Totals.....	$64,623,512 00	$323,117 56

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,642,584 54; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $33,291,777 89.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

☞ Rapid progress is being made in the construction of the railway running up to the northern entrance of the St. Gothard Tunnel, which, as an example of bold and skillful engineering, will stand comparison with the tunnel itself. The Axenburg Tunnel, 1,100 metres long, has been lately completed, and it is hoped that before the end of the present month all the remaining tunnels on the Brunnen-Fluellen section of the line will be successfully pierced. These tunnels are known as the Gutsch, Hochfluh, and Oelberg-Schieferneck, the last named, 1,930 metres long, being next in length to the St. Gothard. Of the whole number of 26 tunnels on the line on the north of the Alps, six only will then remain to be completed—the Rinderfluth at Arth, the Kehr at the well known Pfaffensprung, or Priests Leap, 1,460 metres long, the Wattingen, 1,090 metres long, the tunnel at Leggistein, 1,095 metres long, the shorter Muhl Tunnel as Wasen, and the Robrbach Tunnel.

☞ The Guatemala Central railroad, which is controlled by Americans, was opened on the 18th of June.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, August 12, 1880.

The quotation for call loans at the Stock Exchange is 2@3 per cent, the ruling rate on stock collateral being 2½ per cent, and on United States bonds 2 per cent. Time loans range from 2 to 4½ per cent. Prime mercantile paper is 4@5 per cent.

The market for foreign exchange is dull and heavy. The posted rates of the leading drawers of sterling are 4.82½ and 4.84½. The actual rates are about 4.81½@4.82 and 4.83½@4.84. Cable transfers are about 4.84@½. Prime commercial bills are 4.79¾@4.80¼.

There were fifteen proposals to sell Government bonds to the Treasury on Wednesday, aggregating $6,387,100, of which $2,500,000 were accepted by the Secretary, as follows: $113,000 6s 1880, at 102.35@102.44; $1,307,000 6s 1881, at 104.68@104.74; $1,080,000 5s 1881, at 102.68@102.70. The prices paid are about the same as the market quotations on that day.

The First Comptroller of the Treasury has decided that a draft of the United States Treasurer cannot be attached by order of any State court, reaffirming a former opinion of Mr. Guthrie when Secretary of the Treasury that a government draft cannot be garnisheed. The case came before the Treasury through a certified copy of the order of a State court of Tennessee, upon whose order a draft was attached, a receiver appointed and the receiver ordered to collect the money. The regulations of the Treasury require the draft

to be indorsed by the payee or his recognized agent. In this instance the receiver was substituted, and the Treasury refused to honor the draft, and yet the Court has declared that the draft shall not be paid to the person in whose favor it is drawn. This decision will be printed for circulation among government depositories and sub treasuries, to show that State courts do not control the Treasury in the formulation of its regulations.

The Treasury Department is in receipt of frequent letters calling attention to an apparent discrepancy in the statement of the amount of the public debt on the 30th of June, as shown by the monthly debt statement and by the analysis of the public debt since 1856 recently issued by the department. The principal of the debt is stated in both correctly as $2,120,415,370 63, and agree, but in the monthly statement the debt, less the cash in the Treasury, includes accrued interest amounting to $22,845,549 59. The "analysis" purports to be a statement showing only the principal of the debt.

Government bonds at the board were strong throughout; State bonds, dull and steady; Railroad bonds, irregular; and Railroad shares, compared with the quotations the previous week, have, with few exceptions, declined in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 43@44; Canada Southern, 60½@61¼; Central of New Jersey, 74⅜@74½; Central Pacific, 75½@76; Chicago and Northwestern, 98⅞@99; do. pref., 118@120; Chicago, Burlington and Quincy, 127¼@127¾; Chicago and Alton, 115@115½; do. pref., 125@130; Chicago, Milwaukee and St. Paul, 88@88⅛; do. pref., 108@109; Chicago, Rock Island and Pacific, 111¼@112¼; Chicago, St. Louis and New Orleans, 32@33½; Cleveland, Columbus, Cincinnati and Indianapolis, 70@71¼; Columbus, Chicago and Indiana Central, 16½@17; Delaware and Hudson Canal, 80½@81; Delaware, Lackawanna and Western, 84½@84⅝; Hannibal and St. Joseph, 34⅝@35; do., pref., 76@76⅜; Houston and Texas Central, 63@65; Illinois Central, 111½@112; Lake Erie and Western, 30⅛@30⅜; Lake Shore and Michigan Southern, 107⅜@107⅝; Louisville and Nashville, 115⅛@117; Manhattan Railway, 25½@26; Morris and Essex, 106½@107; Metropolitan Elevated, 90@92; Michigan Central, 93⅛@93¾; New York Elevated, 111@112; New York Central and Hudson River 132@132¼; New York, Lake Erie and Western, 41⅛@41¼; do. pref., 69½@70; New York, Ontario and Western, 25@25⅜; Northern Pacific, 29@29⅛; do. pref., 51¼@51½; Ohio and Miss., 32¼@32⅜; do. pref., 72@73½; Pacific Mail, 40⅛@40¾; Philadelphia and Reading, 20⅝@20⅞; St. Louis and San Francisco —@36; do. pref., 47¼@48; do. 1st pref., 74@75; St. Louis, Iron Mountain and Southern, 53¾@54¼; Union Pacific, 93¼@93½; Western Union Telegraph, 106⅛@106¼; Wabash, St. Louis and Pacific, 36½@40; do. pref., 70⅜@70½.

South Carolina Railroad.

The opinion of Chief Justice Waite and Judge Bond in the case of Calvin Claflin and others against the South Carolina Railroad Company was filed in the United States Circuit Court at Charleston, S. C., on the 5th inst. The opinion holds that all the hypothecated bonds are good; that the non-mortgage bonds are not entitled to the benefit of the lien of the second mortgage, and are an unsecured claim against the company; that the first mortgage coupons held by the syndicate were purchased by them, not redeemed, and are entitled to the benefits of the mortgage; that the injunction previously granted shall continue in force until further testimony as to the amounts of the several liens on the road can be taken. In conclusion, the opinion says the complainants are entitled to a sale of the mortgaged property, subject to the ascertained prior encumbrances, but until such a degree is prepared the injunctions heretofore issued shall remain in force. The opinion, therefore, sustains the defendants in the cause upon the points named, excepting as to the granting a sale and the status of the non-mortgage bonds as unsecured debts, on which two points the views of the plaintiffs prevail.

Chicago, Burlington and Quincy Railroad.

The gross earnings, operating expenses and net earnings of this road for the month of June, 1879 and 1880, were:

	Gross earnings.	Operating expenses.	Net earnings.
1880 ..	$1,434,515 87	$709,336 75	$725,178 62
1879 ..	1,160,967 87	611,927 32	549,040 55
Inc....	$273,547 50	$197,409 43	$176,138 07

For the six months ending June 30, 1879 and 1880, the earnings, expenses, etc., were:

	Gross earnings.	Operating expenses.	Net earnings.
1880 .	$8,148,763 92	$4,107,419 84	$4,041,344 08
1879 .	6,510,238 68	3,629,366 42	2,880,872 26
Inc ..	$1,638,525 24	$478,053 42	$1,160,471 82

It is stated that the above does not include the earnings of the Burlington and Missouri River (in Nebraska) division recently consolidated with the Chicago, Burlington and Quincy, and that the net earnings on this (Nebraska) division for the six months show an increase of about $300,000.

☞ A mortgage for $250,000 on the Pittsburg Southern railroad has been filed in the recorder's offices at Pittsburg and Washington, Pa. The board have authorized the issue of $250,000 in six per cent bonds, running thirty years, and fully states the forms of these securities. The mortgage for the consideration of $1, secures the railroad complete, with all its corporate rights, to the mortgages. It is thought that an effort will be made to push the sale of the bonds in sums to suit purchasers and use the proceeds in the extension of the road to the Virginia ore field.

☞ The quarterly report of the State Board of Agriculture of Kansas, just issued, shows that the railways of the State have a mileage of nearly 3,500 miles, and the assessed value of railway property aggregates $20,547,802. The area in winter wheat this year aggregates 2,210,367 acres, an increase of 689,708 acres over 1879. Area in corn, 3,548,474 acres, an increase of 553,404 acres over 1879. During the year ending March 1 last 18,910 farm houses have been built in the State, at an aggregate cost of $4,223,980. The population of the State is 1,000,000.

☞ The location of the Virginia Midland railroad extension has been completed from Statesville, N. C., to the Virginia line, and it is announced that the right of way has been given along the whole route, the people being exceedingly anxious for the extension of the road. The road located is said to be of easy grades.

☞ Trains are now running on the Shenandoah Valley Railroad between Hagerstown, Md., and Shepherdstown, W. Va. By the first of September it will be opened regularly, and communication made with points one hundred miles south of Hagerstown, including the great Luray Caves.

☞ A dispatch dated Portland, Oregon, Aug. 10, 1880, says that two more ships, the Chandes and Cutwater, have just arrived at the mouth of the Columbia river, with thirty-two miles more of steel rails for the Pend d'Oreille division of the Northern Pacific Railroad.

Eel River Railroad.

The stock of the Eel River Railroad Company has been listed at the Boston Board. The road is leased to the Wabash, St. Louis and Pacific Railroad Company for ninety-nine years from September 1, 1879, renewable forever on the basis of 8 per cent for two years, 4 per cent for three years and 4½ per cent thereafter on $2,972,000 of stock and expenses of keeping up the organization; rental payable quarterly. The debt is $104,000 equipment bonds, dated May 1, 1879, due May, 1885, 7 per cent interest; payment of principal and interest assumed by lessee in addition to the rental. Authorized capital, $3,000,000; capital stock issued, $2,778,800; par value, $100. Dividends have been paid as follows: January, 1879, $2 per share; October, 1879, $1 per share; December, 1879, $1 per share; March, 1880, 75 cents per share; June, 1880, 75 cents per share. Daniel L. Quirk is President and Prosper W. Smith Secretary and Treasurer.

☞ Within a few weeks New Orleans will have direct communication with Houston, Texas—the Louisiana Western and the Morgan companies expecting to join their lines at Vermillionville by September 1. The latter company is also locating an extension of its line from Opelousas to a point two miles beyond Alexandria, on the Red river. Contracts have already been given out, and the work may be completed early next spring.

☞ The track of the Southern Pacific Railroad is laid 17 miles east of Benson, Arizona. The grading is complete beyond Dragoon Summit. An average of 85 cars of railroad material goes to the front daily. Track laying will go on at the rate of two miles per day after reaching Dragoon Summit.

☞ At the annual meeting of the stockholders of the Central Pacific Railroad, held at San Francisco on the 10th inst., the following directors were elected: Leland Stanford, C. P. Huntington, Charles Crocker, C. F. Crocker, E. H. Miller, Jr., M. V. Huntington and E. W. Hopkins.

☞ A charter was granted at the State Department at Harrisburg, Penn., on the 2d inst., to the Meadville Railroad Company, which will construct a road from that place to Linesville, in Crawford county, a distance of 18 miles.

☞ The Ohio and West Virginia Railroad has been completed from Columbus to Gallipolis. Several miles of ballasting remain to be done. The road will be open for traffic August 10.

☞ The Homestake Miding Company has declared its regular monthly dividend of 30 cents per share for July, payable at the office of Wells, Fargo & Co. on the 25th inst.

☞ The next terminus of the Southern Pacific Railroad of Arizona will be Sulphur Valley, forty miles beyond Benson, and will open for business some time this month.

☞ The Texas and New Orleans railroad will be formally opened between Houston and New Orleans on the 15th of August.

[From the Fortnightly Review.]

The Railroads of the United States.

THEIR EFFECTS ON FARMING AND PRODUCTION IN THAT COUNTRY AND IN GREAT BRITAIN.

By Edward Atkinson.

[Continued from page 893.]

It may well be remembered that the constitutions of these Southern States were remodeled after the war on the best methods, and that the great industrial forces now working must soon control their legislation. Violence and anarchy cannot have been the rule in a section that has produced greater crops for sale, and has at the same time been more self-sustaining than ever before in its history. The political ebullition is but froth upon the surface; the whole region is provided with new opportunities born of liberty, and the leaders of the future are those who are now working out the industrial problems of the present. Liberty, protected by the ballot, has in less than a single generation effaced one-half the wrongs of more than two centuries of slavery. Another decade may be needed to prove these assertions to those who only see the froth upon the surface, and cannot observe the deep, strong currents underneath.

In all these great achievements in human progress—in the production or leading forth of the wealth of the mines, the forests, and the soil—it has been the railroad that has made all other inventions worth applying; that has caused abundance to rule where famine might have been, and that is now molding the institutions of centuries to its imperative law.

This article will not be considered by English readers complete without some reference to the tariff system of the United States. The writer's position in respect to the theory of protection is sufficiently well known not to require a restatement. His explanation of the apparent anomalies in our system may therefore be useful.

The present tariff was not passed as a protective measure, but as a war measure, and at a time when both tariff and excise taxes were considered almost wholly with a view to obtaining the utmost revenue. Crude and unscientific as they may appear, they yet served their purpose well; and in the years 1866 and 1867 they yielded a revenue of $1,000,000,000.

After the war ended, an attempt was made to pass a yet higher tariff as a measure of greater protection, which was defeated; but a lesser special bill upon wool and woolens was passed.

An attempt was made to make the question of free trade a political issue; but this culminated in the fiasco at Cincinnati in 1872, when Horace Greeley, the ablest and most honest advocate of protection who ever attained great influence in the country, was nominated for President by a convention that had been promoted by the advocates of free trade.

It has since become evident to many who took part in that discussion and convention, that the issue was prematurely raised. The panic of 1873, and the disturbed condition of the Southern States, made it evident that there were questions at issue, in the presence of which the tariff question sunk into relative insignificance—such as the questions of good and bad money, and of peace, order, and reconstruction—involving the rights of the lately enfranchised race, to whom the faith of the nation stood pledged. It will not be forgotten by English readers that we have no question connected with the tariff in any degree approaching the importance of the corn laws of Great Britain, and the events of the last six years of depression and difficulty must have proved to every one that there are factors in social science more potent than any tariff can be, at least in this country.

In the meantime it may be said that a great intellectual change has occurred. The advocates of national isolation have disappeared with the death of Horace Greeley and Henry C. Carey. The interdependence of nations is recognized as fully by the honest and able advocates of what is called "a tariff for revenue with incidental protection," as it is by the advocates of freer trade, who have in these later years been fighting with them for a sound currency and for the equal rights of all men before the law.

This intellectual change is so great, that to many advocates of freer trade it has seemed best to avoid the discussion of the theory, less the contention should retard, rather than promote, reform. The increase of our exports of manufactures and machinery, although they are yet small in amount as compared to the exports of Great Britain, has yet been sufficient to prove to those who might else have doubted, that the argument for sustaining "infant manufactures" had ceased to apply. It has become apparent to a great many representatives of branches of industry that were formerly urgent for protection, that the extension of their own markets would be greatly promoted by the removal of restrictions upon commerce.

On the other hand, there is a dread of legislative changes; it is said that we are now prospering, and shall not be subjected to the agitation of questions which are not urgent, and that, even if our system is not the best, it is better to realize the benefits that we are now enjoying from the restoration of specie payment, and not cause disturbance by tariff changes that would for the moment create uncertainty, even if ultimately beneficial.

But the restoration of the specie standard itself, and our renewed prosperity, have brought into permanent view some of the provisions of our tariff that are obnoxious to moderate protectionists, as well as to the advocates of freer trade; and, on the whole, the modification of the present tariff may be considered as only a question of time. It is to be hoped that it may be taken up and treated as thoroughly as the tariff of Great Britain was in 1840 by the committee appointed at the instance of Joseph Hume, whose report has become a historic document, and which served as the basis of the great series of measures begun under the leadership of Sir Robert Peel, and concluded by Mr. Gladstone; but it is to be hoped that our changes may not take so many years.

It may therefore be said that there is in this matter no question of political science pending or needing discussion, but the question of tariff reform is one of time and method. It may come in detail or by a general measure carefully prepared to meet the necessity of the country.

It may be hoped that the latter course will be pursued. One of the great evils of such an excessive tariff as that with which we are now burdened is, that it so alters the direction and the conditions of great branches of industry as to make any change difficult; and no man who is not a mere doctrinaire, however devoted he may be to the principles of free trade, would hesitate to admit the claim on the part of those whose capital and labor had been directed into a given channel under the working of a war tariff, that all changes should be fairly considered and gradually made.

Great changes in the legislation of every country must be framed to meet its own condition; and, however sound the principles of free trade may be (and no one could be more convinced on that point than the writer), their adoption must depend in time and method upon the peculiar circumstance of each country and of each period if the opposite policy has long prevailed.

It should be remembered by those who are impatient, that the great reforms in Great Britain were not fairly begun until the disaster to which the protective system had brought all the agricultural, manufacturing, and commercial interests, culminated in the period that preceded the first great reform measures of 1842. Even after that, it needed the Irish famine to force the repeal of the corn laws; and the last of the series of changes begun in 1842 was not completed until 1856, when the registry duty on corn was, I believe, finally removed.

A very erroneous idea prevails to some extent in the United States as to the motive of these reforms; and it is often asserted that they were begun when great prosperity had been achieved by the system of tariff taxation that preceded them. How utterly at variance with the facts this view is, has been overlooked even by many in England. The true state of the case has been recorded in these words:—

"It is impossible to convey, by mere statistics of our exports, any adequate picture of the condition of the nation when Sir Robert Peel took office in 1841. Every interest in the country was alike depressed; in the manufacturing districts, mills and workshops were closed, and property daily depreciated in value; in the seaports, shipping was laid up useless in harbor; agricultural laborers were eking out a miserable existence upon starvation wages and parochial relief; the revenue was insufficient to meet the national expenditure; the country was brought to the verge of national and universal bankruptcy.

"The protective system, which was supported with the view of rendering the country independent of foreign sources of supply, and thus, it was hoped, fostering the growth of a home trade, had most effectually destroyed that trade by reducing the entire population to beggary, destitution and want. The masses of the population were unable to procure food, and had consequently nothing to spend on British manufactures."—Noble's Fiscal Legislation of Great Britain.

In conclusion, it may well be considered that the capital of the richest nation in the world never exceeds one, two, or at the utmost three year's production.

In respect to that portion of the active capital which exists in the form of food, the world is always within less than one year of starvation. Yet, on the other hand, there is always enough. Modern invention and modern appliances assure ample production. In quantity there may never be a failure; but where is it?

The only problem that now greatly affects the material welfare of humanity is the problem of distribution. Had one been asked only ten years since, "Can one hundred and fifty million bushels of grain be moved from the prairies of the West five thousand miles in a single season, to feed the suffering millions of Europe, and prevent almost a famine among the nations?" he who had answered, "Yes: it is only necessary to apply the inventions already made, to accomplish that," would have been deemed a visionary.

It has been accomplished.

Had Sir Henry Bessemer refused the title which he now bears, upon the ground that he himself had done more than any living man to break down the social system of which his title marks one of the orders, whowould have admitted that his reason was well grounded?

Has he not accomplished this?

When Mr. Vanderbilt planned the consolidation of the corporations that now constitute the New York Central Railroad system, and instituted the measures by which the cost of moving a barrel of flour from Chicago to New York has been reduced from one dollar and a half to half a dollar, and by such measures laid the foundation of the largest fortune ever gained by rightful methods in a single lifetime, what would have been the estimation in which he would have been held, had he then said, "I am laying plans to save England from great distress, from riots and bloodshed, perhaps from violent revolution?" Have not he and others accomplished all this, and more?

In presenting this subject I have endeavored to give the various aspects. In this world we can make nothing. All we can do is to move something: we cannot create, but we can direct forces. Prosperity depends upon rapid distribution and ample consumption. Capital is worthless even to its owner unless it is worked to these ends; and in the widest distribution of the products of labor is to be found the highest material welfare, both for laborers and for capitalists.

Only when the legislation of a nation complies with the universal law, can that nation reach its greatest prosperity; and no legislation can have any permanent existence that is not brought into harmony with it. The true test of modern statemanship lies in the removal of all obstructive

statutes, and the adjustment of legislation to this higher law.

Slavery constituted the widest and also the rudest divergence from the true law of production and distribution. Its passive war culminated in active war; with its removal the chief obstruction to material wealth and welfare that legislators could create has been removed from this nation.

More subtle, but not more dangerous, problems are still before both branches of the English speaking people. In Great Britain the land and church questions, and the influence of militaryism," must be met. In the United States, the currency, tariff, and the right government of great cities, will give us little rest during the present century.

When the time shall come for the history of the last half of the nineteenth century to be written, it will be no true record if it omits from among the chief factors, more potent than almost all beside, the American railroad and the English steamship; and, from among the greatest names, the names of those who organized and developed them.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending July 31, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad	117,983	4,228 145	5,031,263
Schuylkill Canal	10,688	230,838	517,751
Lehigh Valley	85,139	2,730 894	2,719,971
Del., Lack. & Western	60,023	1,836,978	2,069,606
Shamokin Valley	19,045	449,724	504,498
Central New Jersey	71,753	1,879,344	2,185,305
United R. R. of New Jersey	26,765	585,684	520,524
Pennsylvania Coal	19,714	554,657	816,654
Delaware and Hudson	49,452	1,631,755	1,862,578
Huntingdon & Broad Top Mt	7,125	262,535	188,763
Penn. and New York	22,158	709,076	774,226
Clearfield, Pa	37,986	854,187	870,908

The total tonnage of anthracite coal from all the regions for the week ending July 31, as reported by the several carrying companies, amounted to 427,276 tons, against 592,373 tons in the corresponding week last year, a decrease of 165,097 tons. The total amount of anthracite mined for the year is 12,054,677 tons, against 14,400,719 tons for the same period last year, a decrease of 2,346,042 tons. The quantity of bituminous coal sent to market for the week amounted to 92,459 tons, against 85,832 tons in corresponding week last year, an increase of 6,627 tons. The total amount of bituminous mined for the year is 2,385,657 tons against 2,007,183 tons for the corresponding period last year, an increase of 376,474 tons. The total tonnage all kinds of coal for the week is 519,735 tons, against 678,205 tons in corresponding week last year, a decrease of 158,470 tons, and the total tonnage for the coal year is 14,440,334 tons against 16,407,802 tons to same date last year, a decrease of 1,967,568 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week of July was 138,788 tons, of which 104,854 tons were coal and 33,934 tons coke. The total tonnage for the year thus far has been 3,902,858 tons of which 2,936,536 tons were coal and 975,822 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended July 31 were 42,517 tons, and for the year to that date 1,187,382 tons —270,700 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 25,294 tons, and for the year 764,566 tons, an increase of 232,252 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 12,073 tons, and for the year 292,179 tons, an increase of 4,709 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 5,151 tons, and for the year 130,637 tons, an increase of 33,738 tons as compared with 1879. —Phil. Ledger, Aug. 9.

Iron Lighthouse.

Messrs. Morris, Tasker & Co., Limited, of Philadelphia, who have the contract for the iron work, weighing 500,000 pounds, for a new lighthouse, to be built at Cape Henry, Va., have the base of the structure finished, and the first and second story nearly completed. The castings and machinery work have been made for the upper stories, and the operations of erecting at the Pascal Works, prior to delivery to the Government, will not be long delayed. The lighthouse is to cost $100,000, and will be of iron, the tower being a frustum of an octagonal pyramid, containing six stories and 155 feet in height to the focal plane. The base is 36 feet diameter, tapering off to about 24 at the top. The tower will rest on a base of corresponding form, of concrete mass, eight feet below the surface, and fastened to it by twenty-four wrought iron anchor bolts. The outside shell will be of cast iron and the inside pyramid of wrought iron, inside of which will be the stairway leading to the lantern. The house will be built on the point some distance from the old one now in use. The present one was built in 1789, is nearly 100 years old, and is considered unsafe. It is of stone, 82 feet above ground, and is rated as a second order light. The new one will be a fixed white light, with a first order lens. The concrete and other work will be done by the Government, under the direction of General O. E. Babcock, Engineer of the Fifth Lighthouse District, who is present superintending the construction of temporary buildings for the workmen, and has just completed a long wharf for landing material.

Great Western Railway of Canada.

The gross earnings, working expenses and net profit of the Great Western Railway of Canada for the month of June, 1879 and 1880, (excluding leased lines) were as follows:

	1880.	1879.
Gross receipts	$360,300	$271,000
Working expenses	260,500	222,400
Net profit	$99,800	$48,600

—showing an increase in gross receipts for the month of $89,300, in working expenses of $38,100, and in net profit of $51,200.

The aggregate for five months, (February 1 to June 30) was as follows:

	1880.	1879.
Gross receipts	$1,772,400	$1,494,700
Working expenses	1,223,500	1,183,200
Net profit	$548,900	$311,500

—showing an increase in gross receipts for the five months of $277,700, in working expenses of $40,300, and in net profit of $237,400.

Leadville as a Railroad Centre.

A dispatch dated Leadville, August 6, says that from present appearances Leadville will soon become a very important railroad centre, and then adds:

The Denver and Rio Grande Company on Thursday let a contract for grading its Eagle River extension to a contractor, who, until last Monday, was engaged in grading along the line of the Leadville Ten Mile and Breckenridge Road. The contract entered into by the latter company with the Rio Grande people agreeing to withdraw its forces, has been approved by the directors, and all work heretofore done formally turned over to the Rio Grande Company, which has largely increased its force, and announces that it will have rails laid to Kokomo within 60 days. President Litchfield of the local Ten Mile Company, who has been endeavoring to negotiate bonds in New York for the extension of his company's road, was notified of the settlement with the Rio Grande Company. It is probable the Eagle River extension will be completed to Red Cliff by Nov. 1. The active movements in the way of railroad construction have given new life to mining camps in Ten Mile, Eagle River, Roaring Forks and other points which will be thus reached, stimulating prospecting for new mines and the development of those already discovered.

☞ The Scioto Valley Railroad Company have made arrangements with the Marietta and Cincinnati Railroad Company for the use of its track from Portsmouth to Sciotoville, until their own track between these points is built.

☞ The Sparta and Lake Superior Railroad Company is the name of an organization effected to build a road from Sparta, Wis., to Ontonagon, Mich. The route is 220 miles long and the capital stock $6,000,000.

MOBILE AND OHIO RAILROAD COMPANY,
NEW YORK AGENCY, No. 11 PINE-ST.,
August 4, 1880.

INTEREST NOTICE.—THE BOARD OF DIRECTORS have this day directed the payment of interest at the rate of 7 per cent upon the First Preferred Income and Sinking Fund Debentures, payable at the agency of the company, in the City of New York, as follows, viz: 3½ per cent on the first day of September prox., to the registered holders thereof at the closing of the transfer books on the 21st day of August inst., and 3½ per cent on the first day of February, 1881, to the registered holders thereof at the closing of the transfer books on Friday the 21st day of January, 1881, on which dates the transfer books of the said first debentures will be closed to reopen on Monday, the 6th of September prox., and on Saturday, the 5th of February, 1881, respectively.

Also, interest at the rate of 1 per cent upon the Second Preferred Income and Sinking Fund Debentures, payable in like manner, on the first day of December prox., to the registered holders of said Second Debentures.

Due notice of the closing of the transfer books thereof will be given hereafter.

(Debentures transferred to "Bearer" must be entered in the name of the owner or holder before the interest will be paid thereon.)

CHARLES WALSH, Secretary.

OFFICE OF THE AMERICAN RAILWAY IMPROVEMENT CO., 80 BROADWAY, NEW YORK.

PROPOSALS WILL BE RECEIVED AT THIS office until August 20 for the clearing, grading, bridging structures, water stations, shops, track laying and ties for the first division of the New Orleans Pacific Railway, extending from Shreveport to Lecompte, La., about 140 miles; also for the bridging of the Atchafalaya River on the second division. For terms of payment, plans, specifications and all information apply at this office. G. M. DODGE, President.

OFFICE OF THE HOMESTAKE MINING COMPANY,
18 WALL-ST., NEW YORK, Aug. 12, 1880.

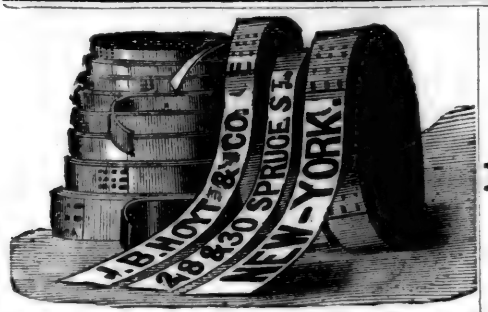
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

New York, Friday, August 20, 1880.

Chesapeake and Ohio Railway.

The Philadelphia North American is authority for the statement that C. P. Huntington, after examining the harbors on the peninsula shore of the Delaware bay, was best pleased with the harbor at the mouth of the Pankatuck river as the most favorable location of the proposed Atlantic coast terminus of the Chesapeake and Ohio railway, and port for the steamship line to Europe in connection therewith. As for the manner of transporting the freight and passengers from the western shore of Virginia, wherever the connection with the Chesapeake and Ohio Railway is made, to the terminus of the proposed new road, it is proposed to build a very large boat, over which freight cars can be taken, and thus save breaking bulk, and the passengers can be given comfortable passage in another part of the steamer. Negotiations are said to be in progress toward the acquirement by the Chesapeake and Ohio Railway Company of the rights in the charter given by the Virginia Legislature, and taken advantage of by Gen. Painter and other Philadelphia and New York capitalists. In regard to Mr. Huntington's scheme for a through line running almost the whole extent of the peninsula, the North American says his plan is to extend the Newtown railroad, which branches off from the Eastern Shore railroad below Salisbury, Md., to Pocomoke City; thence to Modestown, in Accomac county, very near the Atlantic coast, and further south to Cherrystone, on the Chesapeake Shore of Northampton county, Va., and almost northeast to Chincoteague. Mr. Huntington is expected to visit the peninsula again soon, and meanwhile will report his conclusions to the directors of the Chesapeake and Ohio Railway Company.

Illinois Central Railroad.

During the last twenty years the Illinois Central Railroad Company has paid dividends amounting in the aggregate to more than $36,568,344. During that time it has reduced its funded debt to $10,800,000, at five and six per cent per annum on a main line of 705 miles, and a track of 848 miles. When the assets of the company are examined, it is found that its disposable or cash assets are in excess of the entire bonded debt. Among the company's assets are 280,000 acres of land, consisting of farming lands and town lots; $1,600,000 worth of first mortgage bonds of the Chicago, St. Louis and New Orleans Railroad, and $5,023,000 of the second mortgages of the same road, besides 61,000 shares of the capital stock of that company.

Interstate Telephone Co.

The Boston Journal says that a new corporation called the Interstate Telephone Company, composed of New York, Boston, Providence and Hartford capitalists, with a paid-up capital of $100,000, has been formed to connect all the large New England cities with New York, and has secured from the American Bell Telephone Company the exclusive use of its apparatus for seven years from July 1, and will shortly establish a line between Boston and Providence. Then a line will be opened from Providence to New York, by way of New London, New Haven and Bridgeport, and another to the latter place through Hartford and Waterbury. Eventually spur lines will be run out to the main line from Springfield and Worcester. The company also have the right to build lines from New York to Washington, and it is claimed that when they get everything fixed to suit them we shall be able to talk with any of the cities in the system for an additional consideration, with more ease than we can now converse with our neighbors.

Portsmouth and Dover Railroad.

At the annual meeting of the stockholders of the Portsmouth and Dover Railroad held at Portsmouth, N. H, on the 11th inst., the following were elected directors for the ensuing year: Frank Jones, Daniel Maroy, William H. Sise, Albert R. Hatch, of Portsmouth; Oliver Wyatt, Andrew H. Young and Charles H. Sawyer of Dover. It was voted that the directors be authorized to offer for sale to the highest bidder, at not less than par, the 112 shares of stock in the corporation recently issued, in order to bring the capital stock up to the required sum, as authorized by the referees in the recent suit with the Eastern Railroad, and out of the proceeds and cash on hand to pay to the stockholders of July 1, 1879, a further dividend of one and one-half per cent. It was also voted to advertise for the purchase of the whole or part of the 112 shares of stock.

Richmond and Southwestern Railroad.

The engineers engaged in making the surveys for the Richmond and Southwestern Railroad in Kentucky and Virginia have made their reports. The engineer in charge of the first division from Gloucester Point, York River, to the crossing of the James River at Richmond has completed the work on the seventy miles of his division, and will return to Washington with the notes of his survey to prepare profile and estimate cost of construction. The engineer in charge of the second division from Richmond to Lynchburg, Va., is making several prospective lines near Lynchburg and the entrance in the mountain districts. The engineer in charge of the third division from New River, Va., to Hazard, Ky., has several barometer parties in the mountains and is making rapid progress in the Blue Ridge region. The engineer in charge of the Eastern Kentucky division from Hazard to Mount Sterling has run a line near the Three Forks district of the Kentucky River, and proposes to tap the Red River Furnace property, one of the largest and most valuable plants in the West. The Kentucky portion of the route is expected to pay as it is built on account of the demand for timber and coal to Central Kentucky and at the Ohio River. The Richmond and Southwestern Company hope to complete the prelimi-

nary report on the best route and the cost of construction before October.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 7, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad ...	116,051	4,344,196	5,199,022
Schuylkill Canal....	8,708	239,546	541,101
Lehigh Valley.....	89,829	2,820,633	2,808,302
Del.,Lack. & Western.	57 429	1,894,407	2,154 832
Shamokin Valley	15,441	465.165	529,333
Central New Jersey..	66,296	1,945,641	2,275,073
United R. R. of New Jersey	20,495	606,179	529,900
Pennsylvania Coal ..	20,174	574,820	[841,806
Delaware and Hudson	43,410	1,675,565	1,931,965
Huntingdon & Broad Top Mt.....	9,826	272,361	195,298
Penn. and New York.	17,297	726,374	798,379
Clearfield, Pa.....	37,449	891,636	901,868

The total tonnage of anthracite coal from all the regions for the week ending August 7, as reported by the several carrying companies, amounted to 407,886 tons, against 554,784 tons in the corresponding week last year, a decrease of 147,898 tons. The total amount of anthracite mined for the year is 12,462,065 tons, against 14,955,496 tons for the same period last year, a decrease of 2,493,-433 tons. The quantity of bituminous coal sent to market for the week amounted to 84,001 tons, against 81,396 tons in corresponding week last year, an increase of 2 605 tons. The total amount of bituminous mined for the year is 2,469,657 tons against 2,088,579 tons for the corresponding period last year, an increase of 381,078 tons. The total tonnage all kinds of coal for the week is 491,387 tons, against 636 180 tons in corresponding week last year, a decrease of 144,793 tons, and the total tonnage for the coal year is 14,931,720 tons against 17,044,075 tons to same date last year, a decrease of 2,112,355 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last three days of July was 75,424 tons, of which 57,572 tons were coal and 17,852 tons coke. The total tonnage for the year thus far has been 3,977 782 tons of which 2,994,108 tons were coal and 993,674 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 7 were 36,-805 tons, and for the year to that date 1,224,187 tons —266,648 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 19,279 tons, and for the year 783,845 tons, an increase of 230,059 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 10,896 tons, and for the year 303,074 tons, an increase of 230 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 6,631 tons, and for the year 137,268 tons, an increase of 36,539 tons as compared with 1879. —Phil. Ledger, Aug. 16.

☞ Returns received from all the counties of Minnesota show that the total wheat crop for 1880 will be between 44,000,000 and 45,000,000 bushels. The acreage for the year is estimated at about 2,960,000 acres. The yield of last year was about 31,400,000 bushels. The increase of acreage this year over last is 7.27 per cent. The increase of other cereal crops is much larger—that of oats being 21.33 per cent, corn, 19.95, barley, 22.59.

☞ The contract for the construction of the Branch of the St. Louis, Iron Mountain and Southern Railroad from Garden Station to Camden, Ark., in the direction of Monroe, La., has been let to Mandeville, Dowling & Co. The road is expected to be completed by the end of the year.

Commerce of New York.

The foreign imports at New York for the month of July, 1880, are officially stated as follows:

	1879.	1880.
Entered for consump'n.	$14,610,450	$20,427,942
Do. for warehousing....	6,801,618	10,923,589

July	9,329,895 17	13,360,394 37
Total	$57,506,816 63	$84,398,917 53

The exports from New York to foreign ports in the month of July, were:

	1879.	1880.
Domestic produce.	$28,466 272	$38,584,961
Foreign free goods.	153,836	211,950
Do. dutiable.	443,018	383,316
Specie and bullion.....	523,796	459,111
Total exports	$29,586,922	$39,639,338
Do. exclusive of specie .	29,063,126	39,180,227

The exports from New York to foreign ports for seven months from January 1, were:

	1879.	1880.
Domestic produce....	$183,152,540	$229,864,345
Foreign free goods...	1,521,108	1,660,753
Do. dutiable.	2,847,457	2,688,606
Specie and bullion....	12,018,774	5,179,982
Total exports....	$199,539,879	$239,343,686
Do. exclusive of specie	187,521,105	234,163,704

☞ The Baltimore and Ohio Railroad Company have just completed at their Mount Clare shops 30 refrigrator cars, and 20 more are under way. They are 29 feet length of body, 8 feet 4 inches in width, and 7 feet high. They weigh 25,600 pounds each, and have a carrying capacity of 40,000. Each car has two sets of doors, which keep the air out. The flooring is sandwiched with sawdust, as are also the walls. At either end is an icebox reaching from floor to ceiling, and capable of holding about 1,000 pounds of ice. The exterior is painted a bright yellow with black edgings. On each side is a large letter "R." painted black within a red diamond.

☞ Articles of incorporation of the Strawn and Indiana State Line Railroad Company were filed with the Secretary of State of Illinois, on the 11th inst. This company proposes to construct a road from Strawn, Livingstown County, east through Ford and Iroquois county to the State line. Its capital stock is fixed at $100,000, and the incorporators are William Cessna, Ash Grove; Jacob Dazey, Wellington; William Goodwin, Lumley; H. L. Bushnell, Terre Haute, and William Hill, Chicago.

American Railway Improvement Co.

The American Railway Improvement Company is a construction company recently incorporated under the laws of Colorado. Its officers are: Gen. G. M. Dodge, president; James P. Scott, vice president; Francis W. Baldwin, secretary; Charles F. Woerishoffer, treasurer. The company has under its charter extensive powers, which include the right to build and repair railroad and telegraph lines within the limits of the United States and Mexico. It has taken already the contract for the building of the New Orleans Pacific Railroad, and now has under consideration several other important engagements. The New Orleans road extends from Shreveport to near Baton Rouge, and to New Orleans, about 325 miles. This is the line which the directors of the Texas Pacific Railroad Company were authorized, at a recent stockholders meeting, to acquire control of. The original corporators are G. M. Dodge, G. W. Perkins, James P. Scott, G. F. Tyler, G. P. Morosini and Sidney Dillon.

☞ The giant transfer steamer Excelsior, which is to connect the Richmond, Fredericksburg and Potomac railroad at Quantico with the Baltimore and Ohio railroad at Shepherd's, and make the time from Baltimore to Richmond about five hours, is now being fitted up at Wilmington, Del., and is expected in the Potomac river early next month. As soon as the Excelsior arrives the southern connections of Baltimore will be made via Hyattsville, Shepherd and the Potomac river, and the southern passengers for Baltimore will not pass through Washington, but will see the Capitol as they whirl along on the south side of the Anacostia river.

☞ The Baltimore and Ohio Railroad Company has purchased what is known as the Buffalo Branch, a small road running from Garrett station, on the Pittsburg Division of the Baltimore and Ohio Railroad, to Berlin, a distance of nine miles. The road runs through a fertile part of Somerset county, Pa., which is noted for its rich iron ore. The Branch will, it is thought, be extended and made to connect with the Cambria and Somerset railroad. The amount paid for the Branch was $25,000 cash.

☞ The Detroit, Hillsdale and Southwestern Railroad Company has under consideration an extension of its line from Bankers to Lagrange, passing through Algansee, Kinderhook, East Gilead, Orleans and Mungo. From Lagrange, where the road can make a connection with the Grand Rapids and Indiana, it is proposed to extend it by way of Goshen to Walkerton, which will enable it to make connection with Chicago by way of the Baltimore and Ohio Railroad.

☞ Ten passenger cars are now under construction at the Mount Clare shops of the Baltimore and Ohio Railroad Company, which instead of being placed on six-wheel trucks, as formerly, are placed on trucks with but four wheels, which are seven feet from journal to journal. By this arrangement no dead weight is carried, much

unnecessary work is done away with, and a considerable amount of money is saved.

Charlottesville and Rapidan Railroad.

Track laying on the Charlottesville and Rapidan railroad has been completed, and the road will be open for passenger and freight traffic in a few weeks. The line extends from Orange Court House, Va., by a route west of the southwestern range of mountains in the direction of the Upper Rapidan Valley, near Liberty Mills, along the waters of Blue run to the village of Barboursville, and thence across the valley of Preddey's creek, and down to the Rivanna river, reaching Charlottesville, Va., near the present intersection of the Chesapeake and Ohio railway and the Lynchburg and Charlottesville division of the Virginia Midland railroad. The line traverses a fine agricultural section of the country, which cannot be surpassed for the beauty of its natural scenery.

☞ The new iron bridge across the Red river on the St. Louis, Iron Mountain and Southern Railway, is completed. The length is 780 feet between the abutments; draw span, 300; one fixed span, 312 feet, and two fixed spans of 80 feet each. The bridge is first class in every respect. It was planned by chief engineer J. H. Morley, and constructed by the Kellogg Bridge Company of Buffalo, N. Y.

☞ The Camden and Atlantic Railroad Company has, through arrangements with the Central Railroad of New Jersey and the New Jersey Southern Railway Company, constructed a new through short line from Atlantic City, through Long Branch, to New York and Point Pleasant, by which passengers will be carried from Atlantic City to these points without change of cars.

☞ William L. Burt and George L. Ward, of Boston, William Foster, Jr., Enos Wildes, and others, of New York, have filed articles incorporating the Saratoga Lake Railway Company. The road is to run from some central point in Saratoga Springs, to and around Saratoga Lake. The proposed railroad will be about 10 miles in length. The capital stock of the company is $300,000.

☞ A certificate of incorporation has been filed in the office of the Secretary of State of Ohio of the Mineral Valley Railroad Company—termini, Del Roy, in Carroll county, and Zoar Station, in Tuscarawas county, passing into and through the counties of Carroll and Tuscarawas; capital, $150,000, in shares of $50.

☞ Articles have been filed at Albany by E. Kimball, W. H. Gildersleeve and others, incorporating the Metropolitan Passenger Conveyance Company, to convey passengers, baggage, etc., by coach or otherwise, in New York, Philadelphia and Washington.

☞ The bids for the four per cent loan of $150,000 to the State of Maine, were 27 in number, and the aggregate amount was for $1,556,000. The successful bidders were Messrs. Brewster, Bassett & Co. of Boston, at a premium of 1.82 per cent.

☞ The experimental survey for the extension of the Virginia Midland Road through North Carolina has been completed. The engineers report that the route is excellent.

Illinois Central Railroad.

During the month of July, 1880, the traffic on the lines operated by this company was:

In Illinois	$561,339 00
In Iowa (leased lines)	130,348 00
Total	$691,587 00

The traffic for the same month in 1879, on the same mileage, was:

In Illinois	$468,017 03
In Iowa (leased lines)	105,232 84
Total	$573,249 87

During July, 1880, the land sales were 2,379.31 acres for $14,288 12, and the cash collected on land contracts was $10,092 65.

NEW YORK, August 10th, 1880.

L. A. CATLIN, Secretary.

N. B.—A dividend of $3 per share, will be paid September 1st.

☞ In accordance with an act passed by the Legislature of Massachusetts at its last session, which allowed the manager of the Troy and Greenfield Railroad and Hoosac Tunnel, with the consent of the Governor and Council, to make contracts with connecting roads for the operation of the State's road and Tunnel for a period of not exceeding seven years, a contract was signed on the 14th inst. by the State authorities and the Fitchburg Railroad Co. which secures to the latter the right to operate with its train that portion of the Troy and Greenfield Railroad extending from North Adams to Greenfield for the next seven years, upon terms equitable to both the Commonwealth and its connecting railroad.

☞ The capital stock of the Springfield, St. Paris and Sidney Railroad Company has been increased from $800,000 to $1,800,000. The road is to be extended from its previously designated terminus at Sidney, in Shelby county, through and into the counties of Shelby, Auglaize and Mercer to a point on the Indiana State line, the road to be continued thence to Fort Wayne and Chicago.

☞ Twenty-nine first-class passenger cars for the New York, Woodhaven and Rockaway Railroad Company were shipped from Wilmington, Del., on Saturday last. The shipment was a joint one, made by the Jackson & Sharp Company, Bowers, Dure & Company, and the Harlan & Hollingsworth Company.

☞ The Shore Line Railroad Company, of Connecticut, has transferred the road to its directors, as trustees, in accordance with an act of the Legislature, to secure the recent issue of $200,000 of 4½ per cent bonds, due in 1910. If the bonds are met then the transfer will be void.

☞ There are between 1,500 and 2,000 men busily engaged in laying the track of the Somerset and Cambria railroad, which, it is thought, will be completed by the first of November, in time for the fall trade.

☞ The Hagerstown Division of the Shenandoah Valley Railroad, running from Hagerstown to Shepardstown was completed on the 13th inst.

☞ C. A. Whitney & Co., of New Orleans, owners of Morgan's Louisiana and Texas Railroad, have awarded to Rogers & Ballentine a contract for building a branch road from Opelousas to Alexandria.

The Iron Trade.

The Philadelphia Ledger says that the iron trade continues to improve, and the belief is strengthening that the fall will witness a revival in that industry as general as last year, and that it will be lasting, from the fact that experience has taught the necessity of a more conservative policy in regard to prices. Compared with this period of last year the trade is much better. Only 18 furnaces were in blast on the line of the Philadelphia and Reading Railroad at this time last year. Now there are 49 in blast, with 37 awaiting a certainty of a steady continuance of the advance to begin operations. On the line of the Lehigh the number of furnaces is less, but the proportion at work is greater. Out of 40 furnaces 30 are in blast and 10 out. It is good policy to make every concession possible in the price of coal to the furnace men. There is a great deal of extra freight for the railroad companies when the furnaces are in blast, and the other profits that always come from the prosperity of people along the line, which the starting of 37 blast furnaces would very greatly promote.

☞ The Receivers have ordered the expenses of the Philadelphia and Reading Railroad and Coal and Iron Company to be cut down, many trains have been discontinued, the force of hands reduced, and all "dead work" at the collieries stopped. The receivers have increased the debt nearly $3,000,000 since they took control, but have paid $1,620,605 of the July interest. The amount of interest to be met September 15 will be $1,000,000 at least, and with wages to be paid the same month the amount to be raised will not be less than $1,500,000. The whole amount to be raised during the year is $11,556,912, not including money for wages and material.

☞ A dispatch from Ashland, Ky, says that the extension of the Chesapeake and Ohio Railway to that point will be completed within one month. The Ohio Valley Railroad, from Portsmouth, Ohio, to that point will be completed by November. This will give a new and short route to Chicago via the Scioto Valley and Pan Handle Roads from the Atlantic coast. The Big Sandy Road from Ashland toward Louisville will be completed early in the coming year, which will shorten the distance from that point to the Atlantic via the Cincinnati and Ohio Railway about 200 miles.

☞ At the first annual meeting of the stockholders of the Chicago, Hannibal and St. Joseph Railroad Co., at Chicago, Ill., the following directors were elected: John B. Lyon, George C. Walker, N. K. Fairbanks, F. M. Dowd, Jay Gould, Myron P. Bush, Hiram H. Cook, Chas. B. Farwell, S. J. Medill, J. W. Singleton, Russell Sage and Julius Hallgarten. These directors then elected Wm. Dowd President and John W. Hilton Secretary and Treasurer.

☞ The Illinois Central Railroad Company have commenced the construction at Cairo of their million bushel elevator.

RAILROAD AND CANAL DIVIDEND STATEMENT.

☞ All the seats of the new passenger coaches soon to be placed on the New York Central and Hudson River Railroad are finished in cane, none being upholstered, and they are arranged like those in the elevated railroad cars in New York, with the centre seats along the side of the cars. There are no panels between the windows except in the centre, where there are three wide ones, thus affording ample space for mirrors, which are placed inside. The central windows are very wide, which, together with the fact that there are only narrow strips of wood between them, makes the sides of the coaches appear to be nearly all glass.

Statement of the Public Debt of the United States, August 1, 1880.

DEBT BEARING INTEREST.

	Amount Outstanding.	Accrued Interest.

Totals.....	$64,623,512 00	$323,117 56

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,642,884 54; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $33,291,777 89.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

☞ The Milford (Del.) News says that the Philadelphia, Wilmington and Baltimore Railroad Company has decided to construct at an early day its new line of road from Dover via Frederica, Milford and Milton to Rehoboth. The engineer of the company has been ordered to go over the route, make a new survey and estimates, and locate the line, which he will probably do within sixty days. The committee of the board of directors who have the work in charge will probably recommend that the line be located near to the State road, from Dover to Frederica, touching quite near to Magnolia, crossing the Murderkill on the west side of Frederica, and thence over the south fork between the upper bridge and Fork Landing, and coming into Milford, without crossing the State road, down the valley of Millet Run, past Welch's iron works, and across the Mispillion just east of Camp & Blair's factory, with the depot near to that of the Junction and Breakwater Railroad.

☞ The Phœnix Iron Company have been awarded the contract for the iron for the United States Government building at Hartford.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, August 19, 1880.

In the money market call loans are 2@3 per cent, generally 2½ per cent, with 1½ the exceptionally low rate. Time loans range from 3 to 5½ per cent. Prime mercantile paper is 4@5½ per cent.

There is little or no change in the market for foreign exchange. The posted rates for prime bankers' sterling are 4.82½ and 4.84½. The actual rates are 4.81¼@¾ and 4.83¾@4.84. Cable transfers are 4.84¼@½. Prime commercial bills are 4.79½@4.80½.

A statement showing the receipts and expenditures of the Government for the fiscal years ending June 30, from 1856 to 1880 inclusive, was issued on the 18th inst. from the Treasury. From this statement we learn that the receipts from Customs duties for 1880 amounted to $186,522,064 60, and from Internal Revenue sources to $124,009,373 92, which is an increase of $49,272,016 90 in Customs, and $10,487,763 84 in Internal Revenue receipts over 1879. The net revenue of the Government from all sources, for 1880, is shown to be $338,526,610 98, while in 1879 it amounted to $278,827,184 46, an increase of $59,699,426 52. The net ordinary expenditures of the Government for 1880, are shown to be $267,642,957 58, against $266,947,883 53 for 1879.

A comparison of expenditures for interest on the public debt and for pensions for the years 1879 and 1880, shows a large increase in the one and a considerable reduction in the other. For

1879, the interest on the public debt amounted to $105,327,949, and for 1880, to $95,757,575 11, a decrease of $9,570,373 89. In 1879, there was expended on account of pensions, $35,121,482 39, while for 1880, the expenditures for this account amounted to $56,777,174 44, an increase of $21,655,692 05, in one year.

War department expenses, in 1879, were $40,425,660 73, and in 1880, $38,116,916 22. Navy department were $15,125,126 84 in 1879, and $18,536,984 74 in 1880. Indian expenses vary from $2,273,223 45 in 1862—the lowest amount in any year since 1856—to $8,384,656 72—the highest since 1856—in 1875, and $5,206,109 08 in 1879, against $5,945,457 09 in 1880.

The receipts from the sale of public lands, in 1879, were $924,781 06, and in 1880, amounted to $1,016,506 60.

The Treasurer of the United States issued on the 18th inst. $242,000 in registered 3.65 bonds, in exchange for Board of Audit certificates of the District of Columbia. This is the first issue of this class of bonds authorized under the law passed by Congress on the 16th of last June.

An erroneous impression exists in regard to the amount of the 3.65 District bonds authorized to be issued by Congress at the late session. The bonds now being printed are not a new loan, but intended solely to take up the board of audit certificates and pay off the judgments of the Court of Claims hereafter to be given. The total amount of bonds to be issued now cannot exceed $1,250,000, of which amount about $750,000 will be used to take up the board of audit certificates. Congress has limited the total issue of 3.65 bonds to $15,000,000, of which about $13,750,000 were issued from 1874 to 1876, and of this sum upwards of $250,000 have been purchased back for the sinking fund by Mr. Gilfillan, the treasurer of the United States, who is the commissioner of the sinking fund under the law.

In the Bankers' National Convention at Saratoga, on the 18th inst., a paper was read from Hon. John Jay Knox, comptroller of the currency, giving by geographical divisions the capital, the deposits, and the total number of public and private banking establishments in the Union in May and June, 1879. It shows that New England had 1,080 bank, $175,260,000 capital and $510,890,000 deposits; the Middle States 1,920 banks, $245,980,000 capital and $925,680,000 deposits; the Southern States 670 banks, $64,320,000 capital and $84,950,000 deposits; Western States and Territories 2,690 banks, $170,920,000 capital and $372,000,000 deposits. Similar statistics for the present year are in course of preparation. The losses of the national banks in the chief cities for the six months ended March 1, 1880, were as follows: New York, $1,254,820; Boston, $648,327; Philadelphia, $151,638; Pittsburg, $146,404; Baltimore, $142,318; New Orleans, $43,970—the aggregate being one-third less than for the two previous year. Of these losses $1,208,521 was on account of depreciation in the premiums upon United States bonds held by the banks, chiefly bonds which were about to mature.

The Census Bureau commenced on the 16th inst. the ascertainment of the names of the owners of Government bonds, under a clause in the census law. The names of the owners of the $1,140,000 registered bonds are on the books of the Treasury Department, and in their case nothing will be sought beyond their present residences Nothing, however, is known at the Treasury Department about the owners of the $500,000,000 coupon bonds, and to ascertain their names and residences will be a herculean undertaking. It is thought that with the aid of New York bankers they may be approximately obtained. Secretary Sherman will, it is understood, detail Treasury clerks to do all the incidental work in the department, preferring them to census clerks.

The proposals to sell bonds to the Government, yesterday, aggregated $6,823,300, of which the Secretary of the Treasury accepted $2,500,000 at 102.45 for series of 1880, 104.75 to 104.85 for series of 1881, and 102.69 to 102.78 for 5s of 1881.

Government bonds and choice Railroad investments are strong; State bonds at the board were steady; and Railroad shares, compared with the quotations of the previous week, have advanced in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 44@45; Canada Southern, 62@63; Central of New Jersey, 76¼@76⅜; Central Pacific, 75½@77; Chicago and Northwestern, 100¼@100½; do. pref., 120@120½; Chicago, Burlington and Quincy, 130@130¼; Chicago and Alton, 116@117; do. pref., 125@130; Chicago, Milwaukee and St. Paul, 88¾@89¼; do. pref., 110⅛@111⅜; Chicago, Rock Island and Pacific, 113⅛@114; Chicago, St. Louis and New Orleans, 34@34½; Cleveland, Columbus, Cincinnati and Indianapolis, 71@72; Columbus, Chicago and Indiana Central, 17½@17¾; Delaware and Hudson Canal, 83¾@84; Delaware, Lackawanna and Western, 87½@87⅝; Hannibal and St. Joseph, 36½@36¾; do., pref., 79½@79⅝; Houston and Texas Central, 62@63; Illinois Central, 110⅛@110¼; Lake Erie and Western, 31⅞@32⅛; Lake Shore and Michigan Southern, 108⅜@108⅜; Louisville and Nashville, 125¾@129; Manhattan Railway, 31@31¼; Morris and Essex, 108¾@109; Metropolitan Elevated, 93@94; Michigan Central, 94⅛@95; New York Elevated, 113@115; New York Central and Hudson River 133@133½; New York, Lake Erie and Western, 41⅞@42; do. pref., 71@71½; New York, Ontario and Western, 25¾@26; Northern Pacific, 30½@30¾; do. pref., 54¾@55; Ohio and Miss., 34@34½; do. pref., 76@77; Pacific Mail, 41⅛@41¾; Philadelphia and Reading, 24¼@24½; St. Louis and San Francisco, —@36½; do. pref., 46@47½; do. 1st pref., 74@75; St. Louis, Iron Mountain and Southern, 55⅞@56; Union Pacific, 94¼@94½; Western Union Telegraph, 106@106⅛; Wabash, St. Louis and Pacific, 40½@40¾; do. pref., 71⅛@71¼.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Albemarle and Chesapeake Canal 1st, 99; Am. Dock and Imp. bonds, ass., 110; Buffalo, New York and Erie 1st, 1916, 126; Buffalo and Erie 7s, new, 120; Boston, Hartford and Erie 1st, 42⅝; Cincinnati, Indianapolis, St. Louis and Chicago 6s, 100; Chesapeake and Ohio 1st pref., 25; do. 2d pref., 20; do. 1st, Series B, 68; do. cur. int., 39; Chicago, St. Paul, Minn. and Omaha, 44⅜; do. pref., 83; do. consol., 100; Chicago, St. Louis and New Orleans, 34; Chicago, Milwaukee and St. Paul 8s, 1st, Southern Minn. div., 101¾; do. Southwest div. 6s, 104; do. I. & D. div., 114; Chicago and Eastern Illinois 1st, 101; Col., Chi. and Ind. Cent. 1st, Trust Co. certif. ass., with coupon certif., 86¾; do. inc., 40; Central Iowa 1st, 104; Cin. and Spring. 1st, guar. by C., C. ☞ The Flint and Pere Marquette Railway was sold at auction in East Saginaw on the 18th inst. under a decree of the United States Circuit Court for the Eastern District of Michigan and $1,000,000 was bid for it by a purchasing committee representing the consolidated bondholders, at whose instance the sale was made. The sale is for the purpose of converting the consolidated bonds into preferred stock. The new company expect to be reorganized and take possession about October 1. The sale includes 300 miles of road, 200 of which has steel rails, 74 miles of sidings, rolling stock, equipments, &c.

☞ The contract for the extension of twelve miles of the Canton, Ohio, Narrow Gauge Railroad, has been awarded to James H. Connor & Co., of Pittsburgh. The contractors will put a force of 500 men at work immediately.

Missouri Pacific Combination.

The capital stocks of the various companies which are to form the Missouri Pacific Railway Combination are as follows:

Missouri Pacific	$8,000,000
Kansas and Eastern	866,000
Lexington and Southern	1,050,000
St. Louis, Kansas and Arizona	1,158,500
Kansas City, Leavenworth and Atchison	1,800,000
Total	$12,374,500

The total mileage is 589 miles; average stock per mile $21,000 and average bonds per mile $32,000. A consolidated mortgage will be issued—the bonds to bear 6 per cent annual interest to take up present bonds which carry 7 and 8 per cent; the annual saving in interest by the exchange will be $170,000.

☞ A railroad is to be built from Saratoga to Saratoga Lake immediately. The plan embraces a system similar to that used in the equipment and management of the New York elevated railroads. The line will run near to a number of the springs on the northern side of the town, will avoid all carriage roads, and will in no way interfere with the pleasure of those who prefer to ride in carriages. The fare will be five cents to any of the springs and ten cents to the lake. The right of way and materials for construction, both of road and rolling stock, have been bought and paid for.

Texas and Pacific Railway.

OFFICE OF THE TEXAS AND PACIFIC RAILWAY COMPANY, PHILADELPHIA, Aug. 10, 1880.

To the Stockholders of the Texas and Pacific Railway Company:

The following report of the operations of your company for the fiscal year ending May 31, 1880, is submitted by the Board of Directors:

The number of miles of road operated was the same as during the preceding year, viz:

	Miles.
From Shreveport to Fort Worth	219 69-100
From Texarkana to Sherman	155 12-100
From Marshall to Texarkana Junction	69 05-100
Total length of main track	443 86-100

At the commencement of the year your company had 40 70-100 miles of side tracks. During the year 10,484 lineal feet, additional, have been put in, equal to 1 98-100 miles, making 48 68-100 miles of sidings at the close of the year; the total length of main track and sidings being 486 54-100 miles.

The transportation receipts and disbursements were as follows:

Total transportation receipts for the year	$2,589,221 61
Total transportation expenses for the year	1,543,517 75
Net earnings for the year	$1,045,703 86

Against which there is charged:

For interest on First Mort. Bonds "Eastern Division"	$210,180 00	
For interest on Consolidated Mort. Bonds "Eastern Division"	452,940 00	
For Sinking Fund, 1880, account First Mortgage Bonds	69,620 00	
		732,740 00
Surplus on the year's business		$312,963 86

Add balance Income account May 31, 1879..	$105,380 71	
Add taxes on lands, 1874 to 1878, erroneously charged to income.....	28,257 80	
	$133,638 01	
Less interest on Old Land Grant Bonds, January 1877, to January, 1880, both inclusive.....	103 425 00	
		30,213 01
Total surplus, May 31, 1880...		$343,176 87

The receipts from transportation, compared with the previous year, show an increase of $453,-077 96, or 21 21-100 per cent.

In transportation expenses—which include taxes, insurance, legal expenses, and interest on temporary loans and current balances—there was a decrease of $47,709 67, or 3 8-100 per cent.

The net earnings from transportation, compared with the previous year, shows an increase of $500,-787 63, or 91 90-100 per cent.

The receipts per mile of road operated were $5,831 58, against $4,811 13 the previous year, a gain of $1,020 45 per mile, or 21 21-100 per cent.

The expenses per mile of road operated were $3,476 38, against $3,583 84 the previous year, a decrease of $107 46 per mile, or 2 99-100 per cent.

The net earnings per mile of road operated were $2,355 20, against $1,227 29 the previous year, an increase of $1,127 91 per mile, or 91 90-100 per cent.

The percentage of operating expenses was 59 61-100 per cent; last year it was 74 53-100 per cent—a decrease of 14 78-100 per cent.

In this statement operating expenses include insurance, taxes, legal and general expense accounts, interest on temporary loans and current balances, and all replacement and betterment expenditures.

The transportation receipts of the Southern Division, or main line from Shreveport via Marshall to Fort Worth, and from Texarkana to Marshall, 388 74-100 miles, were $1,884,282 29, which is $6,387 40 per mile of road operated, against an aggregate of $1,654,789 85, or $5,609 45 per mile the previous year, a gain of $229,492 91 for the year, or $779 95 per mile of road operated, which is 13 87-100 per cent increase over the previous year.

The transportation receipts on the Trans-continental Division, between Texarkana and Sherman, 155 12-100 miles, were $704,939 82, which is $4,731 13 per mile of road operated. Last year they were $481,354 30, or $3,230 56 per mile, showing an aggregate gain for the year of $223,-585 02, or $1,500 57 per mile of road operated, which is 46 45-100 per cent increase over the previous year.

The revenue from passenger traffic was $456,-054 82, against $456,576 31 last year, showing a slight loss of $521 49, or 11-100 of 1 per cent over the previous year.

The total number of passengers carried one mile during the year was 11,438,607; last year it was 11,651,044, showing an increase of 212,437, or 1 82 100 per cent for the year.

The revenue from freight traffic was $2,053,018 35, against $1,582,925 90 last year, a gain of $470,-092 45, or 29 69-100 per cent over the previous year.

The total number of tons of freight hauled one mile was 66,446,382, against 50,723,818 last year, showing a gain of 15,722,564 tons, or 30 99-100 per cent for the year.

The total tonnage moved during the year was 525,093 tons, against 379,125 tons the previous year, a gain of 145,968 tons, or 38 50-100 per cent. Of this tonnage, 415,875 tons, or 79 29-100 per cent, was from local business, and 109,218 tons, or 20 80-100 per cent was from through or competitive business.

There were 350,951 bales of cotton shipped during the year, against 247,972 bales the previous year, a gain of 102,979 bales, with an increase in revenue of $185,969 25, or 49 92-100 per cent.

The grain shipments show an increase in revenue of $78,068 36; shipments of meal and flour an increase of $46,072 92; live stock shipments an increase of $15,093 62; manufactures an increase of $39,177 56; general merchandise an increase of $71,750 32; miscellaneous shipments an increase of $62,364 22 over the preceding year.

The lumber business shows a slight falling off of 04 40-100 per cent in tonnage, and 07 70-100 per cent in revenue compared with the previous year.

MAINTENANCE.

The following betterment expenditures, made during the year were charged to operating expenses:

For 3,222 tons—36 6-10 miles—of steel rails and fastenings.....	$100,210 74
For steam shovel work, widening embankments and filling in trestles...	21,518 48
For 150 feet span Howe truss bridge over Trinity River at Dallas, to replace old structure.....	5,000 00
For 150 feet span iron bridge over Choctaw Creek, to replace Howe truss	6,000 00
For new track scales.....	1,600 00
For new water stations.....	2,000 00
Total.....	$136,329 22

In making track replacements, there were used 3,222 tons—36 6-10 miles—of 56 pounds steel rails; 24,480 angle bars; 93,950 pound bolts; 166,255 pounds spikes; 133,406 cross ties, and 66 sets switch ties; 25 Reynold's patent safety switches, and 10,484 lineal feet—1 98-100 miles—additional of sidings have been put in. There was also moved by steam shovels 98,374 cubic yards of material, principally in widening embankments and filling in trestles, and 6,554 lineal feet of pile bridging and 5,403 lineal feet trestle bridging has been rebuilt and renewed; 1,093,-073 feet lumber and 35,705 lineal feet cypress piles having been used in the repair of bridges.

The following structures have been added during the year: Two new section houses and tool houses; one small repair shop; two new water tanks and pump houses, and a new wind mill; one lime house; one stable and two coal platforms; and the Division Superintendent's office at Marshall, which was destroyed by fire, has been replaced by a substantial two-story structure, and charged to operating expenses.

In the motive power department, 13 engines have had thorough general repair, 35 light repairs, and 7 changed to coal burners; 10 sets of cylinders have been bored, 11 sets tires have been turned; 5 new cabs, 9 new pilots, 13 new stacks, 1 new tank, 5 new tender frames, and 7 new trucks were built. In these repairs, 22 new axles, 175 new wheels, 7 new injectors, and 22 new tires were used.

In the car department, 1 combination baggage, mail, and express car has been rebuilt; 8 coaches, 1 combination, and 7 baggage and express cars, have had general repairs; 7 coaches have been revarnished, 6 have been repainted and varnished, and 1 sleeping car has had general repairs, repainted and varnished.

Eleven box cars, 19 flat cars, 8 stock cars, and 3 push cars were rebuilt; 7 cabooses, 19 box cars, 15 flat cars, 5 stock cars, and 3 boarding cars have had thorough general repairs, and other freight cars ordinary repairs; and in this work 479,924 pounds of wrought and cast iron, 51,432 pounds of brasses, 451,829 feet lumber, 95 new axles, and 925 new wheels were used.

FINANCIAL CONDITION.

Your attention is invited to the following condensed balance sheet from the general ledger, May 31, 1880, showing the financial condition of your company, in comparison with a similar statement for the preceding year:

COMPARATIVE BALANCE SHEET, May 31,

	1879.	1880.

* This expenditure is for account of 4,851,702

Of the increase of $906,500 in capital stock account, $660,000 was under a compromise settlement with the California and Texas Railway Construction Company for work done and materials furnished on 110 miles of partially completed road; and the balance is mainly from the exchange or conversion of interest scrip on income and land grant bonds into capital stock.

The decrease of $71,000 in first mortgage bonds outstanding is from the cancellation of that number of bonds under a 2 per cent sinking fund, as provided in the mortgage.

The interest scrip Feb. 16, 1880, on income and land grant bonds, represent accretions of interest on outstanding bonds, from their date of issuance by the company to July 1, 1879. Most of these income bonds were issued, under different authorization of your board, in exchange for old coupon land grant bonds with their accretions of interest to different dates. The claim was made by parties holding the older issues that they should not be prejudiced, because they had been among the first to bring their bonds in for exchange under the reorganization scheme, and that interest should be equalized on the several issues, so that all the bonds should have the same value and carry interest from the same date. As the company was not in funds to make the equalization in money, your board, recognizing this apparent equity, directed the issuance of scrip, as authorized by the mortgage, this scrip to be redeemable only by exchanging for land, or by conversion into the capital stock of the company, so that the income and land bonds now all stand on an equality.

The increase of $778,949 38 in construction account is mainly from the final settlement and closing of accounts between your company and the California and Texas Railway Construction Company; and the income and land grant bonds is mainly from the exchange of old coupon land grant bonds, with their accretions of interest, for the new income and land grant bonds, the old coupon bonds outstanding having been reduced from $773,000 in amount with $131,915 of matured coupons at the commencement of the year, to $196,000 in amount, with $84,315 of matured coupons at the close of the year.

A noticeable change is in the special loan and floating indebtedness accounts, which, at the commencement of the year stood as follows:

Special loan	$587,097 11
Bills payable	297,968 43
Accounts payable and current balances	250,027 39
Total	$1,135,092 93
The special loans and bills payable have been paid in full, and accounts payable and current balances have been reduced to	142,148 21
Showing a reduction in floating indebtedness of	$993,944 72

At the close of the fiscal year your company had no loans, notes, or other obligations outstanding, except its current monthly bills and pay-rolls, entered as accounts payable at the close of the month, but not due until the 20th of the month following.

The following is a list of the company's assets outside of its railway property and lands, and its current liabilities:

ASSETS.

Property accounts	$382,322 00
Bills and accounts receivable	77,694 76
Cash in treasury	260,713 62
Material and supplies on hand	170,185 68
Total assets	$890,916 05

LIABILITIES.

Sinking fund payable October 1, 1880	$69,620 00	
Accounts payable	142,148 21	
Coupons, payable June 1	229,320 00	
Replacement of equipment	29,320 00	
		470,408 21
Showing excess of assets over liabilities		$420,507 84

A reference to the fifth annual report of the company, dated Aug. 8, 1876, page 10, shows that on June 1, 1875, the cumulative interest-bearing debt of your company was $22,424,858 57, and that your company had on that date but 324 miles of road constructed and in operation.

At the close of the last fiscal year, May 31, 1880, the debt was but $19,694,846 74, and your company had 444 miles of road, well constructed and fully equipped; $8,177,000 being income and land grant registered bonds without coupons, showing that during the last five years, under the reorganization scheme, there has been a reduction in indebtedness of $2,730,006 83, with an addition to your railway property of 120 miles of well constructed and equipped road.

Under the plan of reorganization adopted in 1875, $10,093,000 first mortgage construction bonds of your company, part of an authorized issue of $40,000 per mile, with about $850,000 of accrued interest, have been called in, canceled, and destroyed, and the mortgage satisfied of record. Also, $9,056,000 of the land grant bonds, with accrued interest coupons exceeding a millions of dollars face value, have been brought in, and are now on deposit with the Trustees of the new income and land grant mortgage, leaving but $196,000 of that issue outstanding.

The debt to the State of Texas has also been reduced $19,208 26, and $935,257 67 of old floating debt and bills payable of the company, antedating June, 1875, has been paid off and satisfied.

It is proper to state in this connection, that every dollar of original indebtedness of the California and Texas Railway Construction Company, aggregating $9,710 523 10, has been paid off by that company in full, or is provided for. The suspension, Nov. 4, 1873, of this construction company, that had undertaken to build your road through to the Pacific Ocean, and to negotiate the securities to be received from your company, was the occasion of embarrassment that made necessary the reorganization scheme of 1875; and it is a matter for congratulation that this reorganization has been perfected under the supervision of your own Board of Directors, without any waste of property from forced sales or litigation, and without any increased expenditures beyond the ordinary charges and expenses of maintaining the general offices of the company.

BONDS CANCELED.

On the second of October last, $71,040, being 2 per cent on the amount of bonds outstanding on the 1st of June, 1879, under a mortgage, dated May 15, 1875, to S. M. Felton and Matthew Baird, Trustees, or their successors in the trust, was, in accordance with the requirements of the mortgage, paid over to the Trustees, and 71 first mortgage bonds, each for $1,000, after having been drawn for, have been presented to the Trustees for redemption, and have been canceled by them and turned over to your company.

There have also been received in exchange for lands, 141 income and land grant bonds of $1,000 each, secured under a land mortgage, dated May 15, 1875, and a supplemental mortgage, dated March 23, 1876, to W. T. Walters and George D. Krumbhaar, Trustees. These $141,000 of bonds have been canceled by the Trustees and returned to the company in accordance with the requirements of the mortgage.

(To be continued.)

☞ The Railroad Board of Arbitration to whom was referred the dispute between the Grand Trunk Railway of Canada and the other railroads centering at Chicago, has rendered a decision awarding the Grand Trunk 10 per cent of the dead freight business from Chicago to the seaboard and 6 per cent of the live stock traffic. The remaining portion of the business is divided between the Lake Shore and Michigan Southern, Michigan Central, Pittsburg, Fort Wayne and Chicago, and Baltimore and Ohio Railroads. The Grand Trunk having recently obtained an independent inlet to Chicago, was in a position to obtain all the business it could get to the seaboard. The other roads had pooled their business and asked the Grand Trunk to join, offering 7 per cent of the business. The Grand Trunk asked for 20 per cent, and so the matter was left to arbitration.

MOBILE AND OHIO RAILROAD COMPANY,
NEW YORK AGENCY, No. 11 PINE-ST.,
August 4, 1880.

INTEREST NOTICE.—THE BOARD OF DIRECTORS have this day directed the payment of interest at the rate of 7 per cent upon the First Preferred Income and Sinking Fund Debentures, payable at the agency of the company, in the City of New York, as follows, viz: 3½ per cent on the first day of September prox., to the registered holders thereof at the closing of the transfer books on the 21st day of August inst., and 3½ per cent on the first day of February, 1881, to the registered holders thereof at the closing of the transfer books on Friday the 21st day of January, 1881, on which dates the transfer books of the said first debentures will be closed to reopen on Monday, the 6th of September prox., and on Saturday, the 5th of February, 1881, respectively.

Also, interest at the rate of 1 per cent upon the Second Preferred Income and Sinking Fund Debentures, payable in like manner, on the first day of December prox., to the registered holders of said Second Debentures.

Due notice of the closing of the transfer books thereof will be given hereafter.

(Debentures transferred to "Bearer" must be entered in the name of the owner or holder before the interest will be paid thereon.)

CHARLES WALSH, Secretary.

OFFICE OF THE AMERICAN RAILWAY IMPROVEMENT CO., 80 BROADWAY, NEW YORK.

PROPOSALS WILL BE RECEIVED AT THIS office until August 20 for the clearing, grading, bridging structures, water stations, shops, track laying and ties for the first division of the New Orleans Pacific Railway, extending from Shreveport to Lecompte, La., about 140 miles; also for the bridging of the Atchafalaya River on the second division. For terms of payment, plans, specifications and all information apply at this office. G. M. DODGE, President.

OFFICE OF THE HOMESTAKE MINING COMPANY,
18 WALL-ST., NEW YORK, Aug. 12, 1880.

DIVIDEND NO. 20.

THE REGULAR MONTHLY DIVIDEND OF Thirty Cents per share has been declared for July, payable at the office of the Transfer Agents, Wells, Fargo & Co., No. 65 Broadway, on the 25th inst. Transfer-books close on the 20th inst.

H. B. PARSONS, Assistant Secretary.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, Aug. 3, 1880.

THIS COMPANY WILL PAY SEPT. 1, 1880, the THIRTY-SIXTH SEMI-ANNUAL CASH DIVIDEND on its entire share capital, being a dividend of THREE (3) PER CENT., to all shareholders registered as such at 2 P. M. on the 13th inst., after which and until the 4th September the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

acres of land in Texas, most of it within the company's reservation. These lands are mortgaged to secure the income and land grant bonds issued by the company, and as they are sold, the net proceeds of sales, after deductions for the expenditures, must be used to redeem the bonds.

† This represents about 4,000 acres of land in San Diego, Cal.

‡ Income and land grant bonds are reserved to provide for these old bonds and coupons.

Calumet and Hecla Mining Company.

At the annual meeting of the Calumet and Hecla Mining Company of Michigan, held in Boston on the 18th inst., the Treasurer submitted the following statement of assets and liabilities April 30, 1880:

Assets:

Cash assets, figuring copper at 16c. net	$3,672,661 94
Supplies at mine	202,737 29
Bills receivable at mine	1,954 36
	$3,877,353 59

Liabilities:

Drafts in transitu	$26,724 02
Bills payable at mine and unfinished machinery contracts	435,957 87
	$462,681 89
Excess of assets	$3,414,671 72

The old Board of Directors was re-elected—namely, Alex. Agassiz, Quincy A. Shaw, George Higginson, H. H. Hunnewell and James N. Wright. There were 69,000 shares represented at the meeting.

At a subsequent meeting of the Directors, Alex. Agassiz was re-elected President, and C. W. Seabury, Treasurer and Secretary.

☞ Work on the Western and Southwestern extension of the Atchison, Topkea and Santa Fe is reported as progressing rapidly.

☞ The contract for building the new Meadville and Linesville Railroad has been awarded to O'Connor & Co. of Oswego, N. Y.

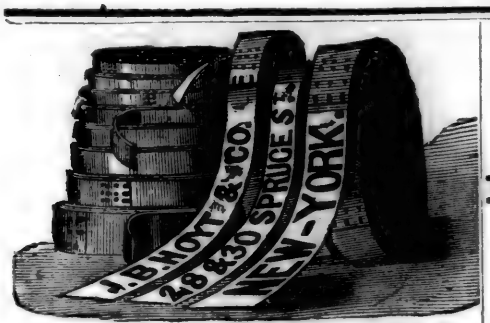
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

The New Hoosac Tunnel Contract.

Ever since the completion of the Hoosac Tunnel and the Troy and Greenfield Railroad by the State of Massachusetts, the widest diversity of opinion has existed in regard to the management of the State's property. Immediately after the passage of the first train through the mountain, the Legislature passed a law under which the entire property was placed in the hands of Mr. G. Clinton Gardner, formerly of the Pennsylvania Railroad, who was to report monthly to the Governor and Council, who were in turn to report annually to the Legislature. The main features of the bill were that all railroads, connecting directly or over intervening railroads, should have the right to enter upon and use with their own motive power the Tunnel and Troy and Greenfield Railroad; that the Governor and Council should prescribe tolls for the passage of cars through the tunnel and over any part of the above mentioned railroad, and that the tunnel and that part of the railroad lying within three miles from its mouth should never be sold, but should always enure to the benefit of the inhabitants of the State of Massachusetts.

The practical difficulties under this law arose in regard to the tolls prescribed for the use of the tunnel. The contracts provided that the State should receive a certain per cent of the receipts after deducting operating expenses. The railroads claimed that many items of expenditure should be charged to operating expenses, which items the State denied were in any sense so chargeable. After a great many hearings before the Governor and Council and many vexatious delays, the matter culminated in the reference of the whole subject matter to a commission who simply decided what sums should properly be charged to the State, by the railroad companies using the tunnel, as operating expenses, and what per cent of the receipts should be paid to the State as tolls, for the months in dispute and until notice given by either party.

This arrangement was understood to be only temporary and liable to be terminated at short notice, and so matters were still in an unsatisfactory condition. The State authorities felt that the question of what should constitute gross receipts would be reargued again and again, and the railroads felt that the next Legislature might pass a law which would completely upset any arrangements they might make, and for this reason they were unable to make permanent contracts with connecting roads. The question to be settled was, how the tolls should be adjusted and what permanent policy could be adopted for the transaction of business over the State's railroad.

Many schemes were submitted, and a law was passed almost at the close of the session of the Legislature last winter, which went further than all previous legislation, and provided that the Manager, by the direction of the Governor and Council, might contract for the operation of the road and tunnel for a term not exceeding seven years and make contracts for constituting through lines, and accept as compensation a pro rata of the through rates upon freight and passengers via such lines. By virtue of this law Manager Gardner, in behalf of the State of Massachusetts, has executed a contract with the Fitchburg Railroad which binds that corporation to become common carriers on the State road, with all the responsibilities thereto belonging for a term of seven years.

Laying aside the question of pecuniary return on the investment, the contract is an advantageous one for the State and a very important one for all railroads connecting with the tunnel. The State could never become a common carrier in a legal sense and many perplexing questions had already arisen. The Fitchburg Railroad by the award of the commission received nearly 53 per cent of the gross earnings; under the new contract it retains 50 per cent for adjustment, which is to be made annually each year in the month of February by the Railroad Commissioners of the State. Under the law as it now stands any connecting railroad can make a similar contract with the State of Massachusetts—at least at any time before the next meeting of the Legislature—and such contract when executed will be beyond the reach of statutes and can only be dissolved by the consent of the agreeing parties.

The troublesome toll question seems to be practically settled at last, and the railroads using the tunnel or connecting with it over intervening roads have for the first time an assurance that for seven years at least there will be no change in the system of management of the Hoosac Tunnel and the Troy and Greenfield Railroad. Capitalists can now safely provide for terminal accommodations, and facilities for tunnel traffic and developments which have long been kept in abeyance can now be made with confidence.

It is probable that contracts, similar to the one mentioned, will soon be made by the Troy and Boston Railroad and the Boston, Hoosac Tunnel and Western Railway, although the last named road is very restive under a recent decision of the Governor and Council, based upon and old an almost forgotten statute, by which they are not allowed to run Sunday

trains over the State's road. During the hot summer months Sunday trains have become a popular necessity in Massachusetts as elsewhere, and a strong effort will undoubtedly be made at the next session of the Legislature of that State to have this antiquated statute repealed.

Railroad Movement in Texas.

From Texas we learn that the Galveston and San Antonio Railroad Company have a corps of engineers locating the extension of their road from the San Antonio terminus to Eagle Pass on the Rio Grande, a distance of about 140 miles, and that contracts are being let for the construction. A portion of the rails for this distance is already landed. At the same time and in concert with the San Antonio Company are two or three parties of engineers between Eagle Pass and El Paso. One of them with headquarters at San Felipe has recently made an examination of the Rio Grande Canon above and below the mouth of the Pecos, and reports a very favorable route. Above the Pecos some distance the Rio Grande rues through a broad, fertile valley. This route would shorten the distance from El Paso to the Gulf down to about 750 miles.

At the same time also all the principal companies in Texas are busy extending their roads generally in a northerly and westerly direction; that is to say, from the Gulf ports and harbors northwestward, and from the north east corner of the State southward and southwestward. Texas is destined to be one of the great railroad States, as well as traffic in cotton, grain and meats.

Remedy for Alleged Abuses in our Transportation System.

At a conference of representatives of the agricultural and commercial interests of this State, held at Saratoga on the 5th inst. for the purpose of adopting measures to secure reforms in our transportation system, and to remedy existing abuses, the following platform or statement of principles was adopted:

We believe that railroads as public highways and common carriers should base their charges upon "cost and risk of service," and that no favoritism, either as between individuals or communities, should be tolerated. Created by the State to exercise the State's function of furnishing public highways, and under the express provision of the law, that when capital actually invested by the builders had been fairly compensated, the rest of the advantages resulting from the invention of railroads should accrue to the public in the shape of reduced charges for transportation, railroad companies cannot, with justice to the public, water their stocks and maintain charges at a point which will yield dividends upon fictitious values.

We believe that the use of money by railroad managers, as expressed by a committee of the New York Legislature, "to purchase the election of the people's representatives," is a practice which brings to the front the venal and least worthy element in politics, discourages honest and independent legislation, destroys the purity of our elections, and tends to undermine our system of Government. We believe it to be the duty of all good citizens to exert their influence in making such practices both unlawful and disreputable, and to this end, we recommend the greatest care in the selection and election of representatives in both our State and National Legislatures, who will have to deal with this subject in the near future.

The Committee on Resolutions also reported a series of questions on candidates for the next Assembly, which were adopted, as follows:

First. Will you, if elected, favor the enactment of laws compelling railroads to base their charges upon the "cost and risk of service," instead of the new theory enunciated by the railroad managers, "what the traffic will bear," of which question transporters are now sole judges?

Second. Will you, if elected, favor the enactment of laws prohibiting favoritism and unjust discrimirations, through secret rates or otherwise?

Third. Will you, if elected, favor the enactment of a law establishing a Board of Railroad Commissioners, to see that the laws relating to common carriers are executed, and to stand between the railroads and those whose interests compel them to use them.

Precautions Taken in Preparing Greenbacks for Circulation.

All paper money, both legal tenders and national securities, are now engraved, printed, and finished in the Bureau of Engraving and Printing at Washington. Under an act of Congress, a building has just been completed for the sole use of the Bureau. The process of making the greenback and other Government securities is this:

The paper is first taken to the wetting division. There it is counted and dampened. It is then delivered to the plate printers, each sheet being charged to them. They again count it in the presence of their assistant, who is a lady, and give a receipt therefor, the assistant certifying that she witnessed the count. The receipts are taken to the wetting division, where they are compared with the books before work is begun, and must agree. The paper is then given the first impression, which is on the back. This is done with a hand-press. Attached to all of these presses are registers, which keep count of each sheet of paper as it passes through, so it is impossible for the printer to secrete any without being detected. The note then passes into the examining division, where it is counted while wet and then placed in a drying box. When perfectly dry it is taken out and again counted, and the work examined by experts, all of whom are ladies. The sheets found defective in any way are canceled, and the perfect ones placed in a hydraulic press, where an immense pressure is given them. When taken out they are smooth. They are then sent back to the wetting division, where they are again dampened.

They are then taken to the printing division, where they receive the second impression, which is the black part of the face, after which they are taken to the examining division, the dry box, the hydraulic press, and back again to the wetting division, the same as at first. They are then taken to the State printing division, where the third impression is received, which is the large red seal on the face. After this they are taken to the examining room, dried, pressed, counted and examined, the same as on both previous occasions. They are then sent to the numbering division, where they receive the numbers that are seen on the upper right corner and left centre. Both legal tender and national bank notes are printed on sheets, and there are always four notes on each. After being numbered the legal tender notes are taken to another room, where the margin is trimmed from the paper and the notes separated. This is all done by machinery. After being separated they are again counted and placed in packages of 1,000 notes each. This is also done by ladies, who are experts. One lady will count 1,000 notes in five minutes. This is the final count. They are then ready for delivery to the parties authorized to receive them. The national bank notes are not separated, but are sent to the banks that issue them in sheets of four each, so that they may be the more readily signed. The rules governing the Bureau of Engraving and Printing are very strict. In fact, during working hours the employes are treated more like prisoners than they are like ladies or gentlemen. From 1,000 to 1,500 persons are employed there, the ladies outnumbering the gentlemen considerably.

"Material Men" — Railway Employes and Mortgages.

The following is an abstract of Mr. George Tucker Bispham's recent paper read before the Bar Association at Saratoga—being much fuller than any which appeared in the report of the proceedings:

The question, how far Material Men and Employes of Railroads are entitled to priority over mortgages has been somewhat discussed during the last few years in legal literature. It has also been the occasion of no little difference of views among members of the bar, and has been the occasion of some diversity of opinion on the bench. Since the case of Fosdick vs. Schall in 9 Otto, some of the points in dispute may be considered to have been settled; but it is desirable to refer to some of the earlier discussions in order to ascertain what was the state of the law at the date of this decision, and what qualifications, if any, are to be attached to the doctrines announced in that case.

One of the earliest cases upon the subject was Clark vs. The Williamsport and Elmira Railroad Company, decided in 1860 by Judge Strong, then of the Supreme Court of Pennsylvania, now of the Supreme Court of the United States. In this case Judge Strong refused to modify an order which he had made when the receiver was appointed, and which provided that payment of arrears due for current supplies should be paid out of income in the hands of the receiver—his refusal being based upon the theory that the mortgagees were, in any event, entitled to nothing more than the net income of the road, and that the road in their hands was, therefore, liable to

pay for the expenses incurred in running it. The next case was Douglass vs. Cline, in the Court of Appeals in Kentucky, reported in 12 Bush, where a similar order in favor of material men and employes was made, the order being based upon two grounds—first, on public policy, which required that a work of public convenience should be maintained; and second, on the rule that he who seeks equity must do equity. Other cases to the same effect exist; and, on the 9th of the present month, the Special Masters in the Philadelphia and Reading Railroad Company's case filed a report (which was approved by the Court), in which they recommend that an order for payment of the wages-and-supply claimants should be made. Judge McKennan accordingly made the order. On the other hand, in several cases such orders have been refused; and, in a case reported in 11 Wallace, the Supreme Court of the United States refused to admit that a material man in a railway case had a lien analogous to the maritime lien for repairs. The material man's lien has, indeed, been ridiculed, and has been termed an "admiralty lien on wheels."

The case of Fosdick vs. Schall has perhaps done much to put the doctrine on a proper basis, viz: that where current income, which would ordinarily be used to pay for current supplies, has been used to pay interest on bonded debt, or to pay for permanent improvements on the road, by which the value of the mortgagee's security has been increased, it is fair that the income which comes into the hands of a receiver, or even the proceeds of the corpus of the road when sold, should be used to make good the deficiency which has thus arisen. Beyond this, however, the doctrine should not be permitted to go. Considerations of public policy ought not to lead the courts to interfere with obligations of contracts or with the vested rights of bondholders; and the general rule that he who seeks equity must do equity should not be loosely applied. Hence, while orders in favor of laborers and material men may fairly be made whenever it is made to appear that the earnings, which would otherwise have gone to them, have been diverted for the benefit of the mortgagees, yet no such orders should be granted by the Court when no such diversion is shown to have existed. The tendency of the best considered decisions now seems to be in favor of restricting the grounds upon which such orders should be granted. This would seem to be apparent from a careful study of the cases of Fosdick vs. Schall (in the Supreme Court of the United States) and of Poland vs. The Lamoille Valley Railroad Company (recently decided by the Supreme Court of Vermont, but not yet reported.)

The subject is one which fairly demands legislation.

Duration of Ocean Cables.

The Electrician says that the life of a submarine telegraph cable is from ten to twelve years. If a cable breaks in deep water after it is ten years old it cannot be lifted for repairs, as it will break of its own weight; and cable companies are compelled to put aside a large reserve fund in order that they may be prepared to replace their cables every ten years. The action of the sea eats the iron away completely, and it crumbles to dust, while the core of the cable may be perfect. The breakages of cables are very costly, and it is a very difficult matter to repair them in comparison with a land line. A ship has to be chartered, at $500 a day, for two or three weeks, in fixing the locality and in avoiding rough weather, as cables can only be repaired in calm weather. One break in the Direct Cable cost $100,000.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of July, 1880 and 1879:

	1880. Month.	1880. Year to date.
Gross receipts:		
Railroad traffic	$1,169,874 19	$10,079,964 14
Canal traffic	64,243 69	381,421 32
Steam colliers	40,158 50	390,376 52
Richmond coalbarges	8,558 59	63,128 04
Total Railroad Co.	$1,282,834 97	$10,914,890 02
Reading Coal & Iron Company	850,579 46	6,861,565 85
Total of all	$2,133,414 43	$17,776,455 87
Tonnage and passengers:		
Tons of coal on railroad	460,411 14	4,228,145 16
Tons of merchandise	463,137 08	3,919,789 18
Passengers carried	908,049	6,225,409
Coal transported by steam colliers	50,406 00	353,940 00
Tons of coal mined:		
By Coal and Iron Co.	211,634 01	2 021,452 09
By tenants	79,214 16	694,352 10
Total mined from lands owned and controlled by Co. & from leasehold estates	290,849 00	2,715,804 19

	1879. Month.	1879. Year to date.
Gross receipts:		
Railroad traffic	$1,147,767 10	$7,886,089 88
Canal traffic	100 544 89	459,294 41
Steam colliers	40,201 59	435,125 45
Richmond coal barges	15,008 79	99,336 95
Total Railroad Co.	$1,303,521 87	$8,879,846 19
Reading Coal and Iron Co.	1,085,376 84	6,317,760 64
Total of all	$2,388,898 71	$15,197,606 83
Tonnage and passengers:		
Tons of coal on railroad	742,441 05	4,977,156 11
Tons of merchandise	487,897 19	2,728,057 08
Passengers carried	830,527	4,735,646
Coal transported by steam colliers	45,593 00	385,885 00
Tons of coal mined:		
By Coal and Iron Co.	412,490 13	2,607,984 11
By tenants	120,357 15	785,014 11
Total mined from lands owned and controlled by Co. and from leasehold estates	532,848 08	3,392,999 02

Comparative statement of business of the Philadelphia and Reading Railroad Company for July, 1880:

	1880. Month.	1880. Year to date.
Gross receipts	$1,282,834 97	$10,914,890 02
Gross expenses	996,577 95	8,486,083 81
Net profit	$286,257 02	$2,428,806 21

	1879. Month.	1879. Year to date.
Gross receipts	$1,303 521 87	$8,879,846 19
Gross expenses	956,813 04	6,721,227 98
Net profit	$346,708 83	$2,158,618 21

Comparative statement of business of the Philadelphia and Reading Coal and Iron Company for July, 1880:

	1880. Month.	1880. Year to date.
Receipts	$850,579 46	$6,861,565 85
Expenses	816,624 61	6,920,642 17
Profit	$33,954 85	Loss. $59,076 32

	1879. Month.	1879. Year to date.
Receipts	$1,085,376 84	$6,317,760 64
Expenses	1,195,264 32	6,900,015 02
Loss	$109,887 48	$582,254 38

Legal Notes.

RIGHTS OF RAILROADS.

An interesting point in the law of common carriers has been raised in England, which will be carried up to the highest courts. The circumstances were these: The manager of the Capital and Counties Bank bought a first class ticket by the Southeastern Railway, and traveled from Woolwich to London bridge, carrying a hand bag containing gold, silver and banknotes to the amount of £2000. Thereupon the railroad company sued the bank to recover £2 12s. 6d., the ordinary charge for transporting £2000, on the ground that bullion did not come within the meaning of personal luggage which the company agrees to carry free with each passenger. The preliminary decision was in favor of the railway company.

ACCEPTANCE.

A telegram authorizing the person addressed simply to draw on the sender for a given amount does not constitute an acceptance of a sight draft:—Franklin Bank of Baltimore vs. Lynde Maryland Court of Appeals.

LIABILITY OF RAILROADS.

A passenger who rides in a baggage car by permission of the conductor, but against the rules of the road, and is injured in consequence of riding there, cannot recover from the railroad company on the ground of its negligence. For the conductor cannot, in violation of a known rule of the company license a man to occupy a place of danger so as to make the company responsible. Pennsylvania Railroad Company vs. Langdon, Sup. Court Pennsylvania.

AGENCY.

An agent who deposits money of his principal in a bank to his own account without the assent of his principal assumes all the risk of the solvency of such bank. If the bank fails and the money so deposited is lost, the loss falls upon the agent. Sargent vs. Downey, Sup. Court, Wisconsin.

CHATTEL MORTGAGE.

The mortgagor must, at the date of the mortgage, have an actual interest in or concerning the subject mortgaged. There must be an interest in presenti of which the future acquisition is the product or in such wise incident to or connected with it as constitutes a tangible and substantial predicate of a contract. Morrill vs. Noyes Sup. Court, Maine.

☞ The Krupp Steel and Iron Works, of Essen, Germany, employ 17,000 men, and pay wages to the amount of $3,600,000 annually. Five thousand men are employed in mining coal and ore.

☞ Work on the extension of the Mobile and Ohio Railroad is progressing.

☞ We give elsewhere a carefully prepared abstract of the paper read by George Tucker Bispham, Esq., before the Bar Association at its recent session at Saratoga, on the present condition of the law applicable to "material men" and railroad employes, in the matter of priority of right to be paid over mortgagees when the affairs of railway corporations are in the hands of receivers. It is an important subject to all bondholders as well as to employes and those who furnish materials to the companies, and the name of the writer is full guarantee of the clearness and ability with which the subject is discussed.

Statement of the Public Debt of the United States, August 1, 1880.

DEBT BEARING INTEREST.

	Amount Outstanding.	Accrued Interest.

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$129,425 60
Kansas Pacific bonds, 1862-64	6,303,000 00	31,515 00
Union Pacific bonds, 1862-64.	27,236,512 00	136,182 56
Central Branch Union Pacific bonds, 1862-64.....	1,600,000 00	8,000 00
Western Pacific bonds, 1862-4	1,970,560 00	9,852 80
Sioux City and Pacific bonds, 1862-64.....	1,623,320 00	8,141 60
Totals.....	$64,623,512 00	$323,117 56

Interest paid by United States, $47,599,861 30; interest repaid by transportation of mails, &c., $13,642,884 54; interest repaid by cash payments: 5 per cent net earnings, $655,198 81; balance of interest paid by United States, $33,291,777 89.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, July 31, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

Northern Central Railway.

The Northern Central Railway Company furnishes the following comparative statement of its gross earnings and operating expenses for the month of July:

	1880.	1879.
Gross earnings.....	$450,297 71	$324,424 95
Operating expenses..	288,774 15	292,613 78
Net earnings...	$161,523 56	$31,811 17

Seven months ended July 31:

	1880.	1879.
Gross earnings.....	$2,666,088 73	$2,158,945 47
Operating expenses.	1,815,849 83	1,636,137 94
Net earnings...	$850,238 90	$522,807 53

☞ The Waynesburg and Washington (Penn.) Railroad is to be sold under foreclosure proceedings on the 4th of September. It is considered probable that the Pennsylvania Railroad Co. may be the purchaser. This is a narrow gauge railroad, about 28 miles long, and if purchased will probably be run as a connection of the Chartiers Railroad, which is part of the Pittsburg, Cincinnati and St. Louis railway system.

Philadelphia Stock Exchange.

Closing Prices for the week ending Aug. 24.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, August 26, 1880.

Money on call is 2@3 per cent. Time loans are 3 to 6 per cent. Prime mercantile paper is 4½@5½ per cent.

The market for foreign exchange is dull and weak, with free offerings of bankers' bills and a small appearance of cotton bills, which latter will not come in much volume until next month. The posted rates for prime bankers sterling are 4.82 and 4.84. The actual rates are 4.80¾@4.81 and 4.83@¼. Cable transfers are 4.83¼@4.84. Prime commercial bills are 4.79@½.

The offerings of Government bonds to the Treasury on Wednesday amounted to $7,122,350. The amount accepted was $2,500,000, as follows: $183,900 5s, 1881, at 102.77@102.78; $34,000 6s, 1880, at 102⅜@102½; $2,100,000 6s, 1881, at 104.77@104.80; of the latter amount $2,100,000 was purchased of the First National Bank at 104.80.

The quarterly interest on the 4½ per cent loan falling due at the Treasury on the 1st of September next, will amount to $2,800,000, and is the only accruing interest to be met by the Government in September.

The Secretary of the Interior has decided that, in payment for the Osage Trust and diminished reserve lands in Kansas, under the act of May 28th, 1880, settlers can only be charged interest upon deferred payments, provided for by the act and that no interest is properly chargeable for any default of payment under previous laws

The first instalment required to be paid consists of one-fourth of the purchase price of the lands and does not include accrued interest.

The Commissioners of the Freedman's Savings and Trust Company of Washington will commence paying a dividend of 10 per cent on the first of September. The amount required is $296,868 29, which, added to the 30 per cent heretofore declared and special deposits paid, aggregates the the sum of $1,258,936 47, which has been divided among more than 61,000 creditors of the 38 branches of the company. The Commissioners expect to be able to pay another dividend of 10 per cent when the company's remaining assets are disposed of.

Railroad Bonds, at the close were irregular; State Bonds, dull; Governments were strong throughout; and Railroad Shares, compared with the quotations of the previous week, have varied considerably in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 44@45; Canada Southern, 61@62½; Central of New Jersey, 76⅛@76⅜; Central Pacific, —@76; Chicago and Northwestern, 99¾@99⅞; do. pref., 118½@119½; Chicago, Burlington and Quincy, 132@132½; Chicago and Alton, 113½@114½; do. pref., 122@126; Chicago, Milwaukee and St. Paul, 87¾@88; do. pref., 109½@110; Chicago, Rock Island and Pacific, 114¼@114½; Chicago, St. Louis and New Orleans, 37½@38; Columbus, Chicago and Indiana Central, 17⅞@18¼; Delaware and Hudson Canal, 84⅝@84¾; Delaware, Lackawanna and Western, 90¾@90⅞; Hannibal and St. Joseph, 39⅛@39⅝; do., pref., 82⅜@82½; Houston and Texas Central, 61¼@63½; Illinois Central, 112@113; Lake Erie and Western, 30¾@31¼; Lake Shore and Michigan Southern, 107⅝@107¾; Louisville and Nashville, 130@132; Manhattan Railway, 27½@27½; Morris and Essex, 110@101¾; Metropolitan Elevated, 90½@91; Michigan Central, 94½@95; New York Elevated, 111@112; New York Central and Hudson River 130¼@130⅜; New York, Lake Erie and Western, 38⅝@38¾; do. pref., 69¼@—; New York, Ontario and Western, 25⅜@25⅝; Northern Pacific, 30@30¾; do. pref., 53½@54; Ohio and Miss., 34@34¼; do. pref., 70@74½; Pacific Mail, 40⅛@40⅜; Philadelphia and Reading, 23@23¼; St. Louis and San Francisco, 34@36; do. pref., 47@47½; do. 1st pref., 78½@79; St. Louis, Iron Mountain and Southern, 55¾@55⅞; Union Pacific, 93⅝@93⅞; Western Union Telegraph, 105¼@105½; Wabash, St. Louis and Pacific, 38⅞@39; do. pref., 69⅜@69¾.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

☞ A dispatch dated Portland, Oregon, August 13th, says that T. F. Oakes, the new Vice President of the Oregon Railway and Navigation Company's Railroad, has been interviewed in relation to the truth of the report that this company had purchased the San Francisco and North Pacific Railroad, with a view of extending the same to meet the Williamette Valley road. He stated to the Associated Press agent that the report has no foundation. With regard to the Oregon Railway and Navigation Company, he says he understands that a syndicate of New York capitalists have purchased what is known as the Donahue road, probably with the intention of extending it northward to a junction with one of the roads from this valley.

☞ One of the provisions in the sundry civil appropriation bill before Congress, was for a survey of the Atlantic and Gulf of Mexico coasts, with the Gulf Stream, from its entrance into the Gulf, its course through the Caribbian Sea, and into and around the Sargasso Sea. This last—a sea of weeds in the Atlantic Ocean, covering several thousand square miles—is not much better known than when, nearly 400 years ago Columbus ran his ships into its tangled masses of floating, but stationary, vegetation islands of the gulf weed, from a few feet to a few yards across, or sometimes like broad acres of drowned meadow.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 14, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	120,942	4,465,139	5,349,837
Schuylkill Canal....	9,777	249,323	560,685
Lehigh Valley.....	80,597	2,901,230	2,884,658
Del.,Lack. & Western.	60,105	1,954,513	2,236,872
Shamokin Valley	19 950	485,115	550,280
Central New Jersey..	68,637	1,014,279	2,858,497
United R. R. of New Jersey	23 723	629,903	542,968
Pennsylvania Coal ..	21,642	596,486	871,185
Delaware and Hudson	46,743	1,722,309	2,006,567
Huntingdon & Broad Top Mt.....	7,985	280,347	202,411
Penn. and New York.	17,787	744,112	822,494
Clearfield, Pa.....	38,292	929,928	937,871

The total tonnage of anthracite coal from all the regions for the week ending August 14, as reported by the several carrying companies, amounted to 416,637 tons, against 520,093 tons in the corresponding week last year, a decrease of 103,456 tons. The total amount of anthracite mined for the year is 12,878 700 tons, against 15,473,543 tons for the same period last year, a decrease of 2,594,-843 tons. The quantity of bituminous coal sent to market for the week amounted to 87,851 tons, against 86,653 tons in corresponding week last year, an increase of 1,198 tons. The total amount of bituminous mined for the year is 2,557,518 tons against 2,132,253 tons for the corresponding period last year, an increase of 425,265 tons. The total tonnage all kinds of coal for the week is 504,488 tons, against 606,746 tons in corresponding week last year, a decrease of 102,258 tons, and the total tonnage for the coal year is 15,436,218 tons against 17,605,796 tons to same date last year, a decrease of 2,169,578 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of August was 136,780 tons, of which 99,599 tons were coal and 37,181 tons coke. The total tonnage for the year thus far has been 4,251,668 tons of which 3,192,613 tons were coal and 1,059,055 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 14 were 39,-882 tons, and for the year to that date 1,264,070 tons —260,557 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 20,569 tons, and for the year 804,414 tons, an increase of 236,654 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 14,350 tons, and for the year 317,424 tons, a decrease of 4,604 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 4,963 tons, and for the year 142,231 tons, an increase of 37,506 tons as compared with 1879. —Phil. Ledger, Aug. 23.

☞ The annual meeting of the stockholders of the Danville and New River Railroad was held at Danville, Va., on the 20th inst. President Sutherlin's report shows that the prospects of the company are highly encouraging. Trains will be running on a portion of the road in thirty days, and the road will be completed to Martinsville in one year from date. President Southerlin and all of the old directors were re-elected.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for July, 1880, as compared with the same month in 1879, shows

An increase in gross earnings of.....	$666,738
An increase in expenses of.....	363,848
An increase in net earnings of...	$302,890

The seven months of 1880, as compared with the same period in 1879, show

An increase in gross earnings of.....	$1,682,752
An increase in expenses of.....	2,135,308
An increase in net earnings of....	$2,551,444

All lines west of Pittsburg and Erie for the seven months of 1880 show a surplus over liabilities of $1,611,963, being a gain over the same period in 1879 of $2,034,721.

☞ The net earnings of the Oregon Railway and Navigation Co. for the year ending June 30, 1880, were $1,657,230 19, leaving (after deducting bond interest and sinking fund charges during the year, as paid, $371,140 09) a balance available for dividends of $1,286,090 09. Of the amount earned the directors have decided to pay only 8 per cent dividend, the remainder to be used in improving and enlarging the company's property.

☞ The Anglo American Cable Company has accomplished the work of laying their new cable, which will be known as the cable of 1880, from Heart's Content to Valentia. To meet this the Western Union Telegraph Company has for some time past been constructing, but has not quite completed, a direct wire of the large No. 4 size, to be worked as quadruplex on cable business alone.

☞ Riehle Bros. have orders on hand for several of their well known make of Testing Machines from Iron and Steel Works. Their Cement Tester has been adopted by the New York City Department of Locks. Orders from blast furnaces are also coming in for Charging Scales and their new Pig Metal Scales.

☞ The statutes of Illinois require sixty days' notice by publication in every county through which the road runs, and a sixty days' previous notice to every stockholder, of the calling of a stockholders' meeting to authorize a mortgage on a railroad.

☞ The Postmaster General has ordered that the second annual count of mail matter originating in the United States shall be made in the first seven days of December next. The count last year was made in the first seven days of November.

☞ The Fifth Street Railroad Company, of Dayton, Ohio, has been incorporated. Capital, $50,000, in shares of $50.

☞ W. H. Harrington, late chief engineer, has been appointed General Manager of the Memphis and Little Rock railroad.

☞ Track laying on the Grand Southern Railway between St. John and St. George has commenced.

Texas and Pacific Railway.

(Continued from page 949.)

LAND DEPARTMENT.

Under grants from the State of Texas and from other sources, your company has acquired title to lands as follows:

	Acres.
To 8,083 25-88 certificates of 640 acres each, acquired by the construction of 404 967-5280 miles of railway and sidings, under an act of the Texas Legislature, passed May 2, 1873.	5,173,302
To 286 certificates of 640 acres each, acquired by purchase, with other property of the Southern Pacific Railroad Company	183,040
To 211½ certificates of 640 acres each, acquired by purchase, under an order of sale by the United States Circuit Court	135,360
Total, 8,580 69-88 certificates, or	5,491,702
Less 1,000 certificates transferred to the Fidelity Insurance, Trust and Safe Deposit Company of Philadelphia, in trust	640,000
Total number of acres owned by the company	4,851,702

About 80,000 acres of the lands now held by the Fidelity Insurance, Trust, and Safe Deposit Company in trust will, it is believed, be reconveyed to this company, on a final adjustment of accounts under the terms of the trust.

The following is a list of unsold lands and the counties in which they are located:

County.	Acres.	County.	Acres.
Bowie	22,038	Rains	2,452
Red River	6 456	Parker	9 892
Lamar	795	Palo Pinto	2,338
Fannin	450	Jack	1,280
Collin	89	Clay	14,030
Denton	5,349	Cooke	1,920
Wise	3,217	Wilbarger	13,320
Tarrant	3,770	Baylor	2,040
Van Zandt	1,710	Brown	6,460
Stephens	18,628	Fisher	23,674
Callahan	73,708	Stonewall	6,260
Eastland	5,160	Mitchell	107,083
Commanche	1,180	Scurry	5,103
Taylor	37,229	Kent	1,965
Jones	12,762	Howard	218 781
Dimmit	53,120	Bordon	170,889
Edwards	10,500	Martin	200,832
Crockett	5,500	Dawson	106 336
Hall	60,982	Andrews	42,693
Briscoe	38,847	Tom Green	1,116,852
Floyd	3,440	Pecos	553,150
Motley	26 011	Presidio	342,848
Childress	26,880	El Paso	1,309,814
Nolan	59,108		
Total			4,736,994

	Acres.
Total number of acres unsold	4,736,994
Lands sold prior to June 1, 1880	95,840
Unlocated certificates and balances in Texas State Land Office	18,868
Make a total of	4,851,702

Of the unsold lands, 33,990 acres, mostly timber lands, are on or near the company's completed lines, in the counties of Bowie, Red River, Rains and Van Zandt.

Between Fort Worth and the one hundredth meridian, a distance of about 185 miles, 180,973 acres are located, and as this portion of the road will be completed by March next there is every reason to believe that these lands will be rapidly taken up by settlers at fair prices.

From the east line of Callahan County to the centre of Howard County, a distance of 150 miles, your company has 532,345 acres of as fine agricultural lands as can be found in the State; and as your road will be constructed through those counties within the next 12 months, a large immigration will naturally be drawn into this section to settle along your line of road, where the soil and climate combined offer greater inducements to settlers than in the more southern portions of the State.

During the year 65,226 15-100 acres of land have been sold at an average price of $1 76 per acre. This low average was because most of the lands sold were situated in western counties, remote from transportation facilities, having been taken up in anticipation of the completion of your road, and of the flood of immigration that will naturally flow into that section of the State when your road shall be completed.

All expenses necessary in perfecting the company's title to its lands have now been made, except the patent fees for a portion of those last surveyed west of the Pecos River, the field notes for which have all been filed in the State Land Office, and the patents are ready for delivery whenever the company shall call for them.

MINERALS.

Under a joint arrangement between the Texas and Pacific Railway Company, the International and Great Northern Railway Company, and the Galveston, Houston and San Antonio Railway Company, an exploring party was sent into Presidio County to examine that section of country with reference to its mineral deposits. The party remained in the field from December until May, confining their explorations to what is known as the Chinati mountain region. A full report of the engineer in charge of the expedition has not yet been received, but enough is known to demonstrate the existence of silver mines in the Chinati mountain district, from which ore can be taken in paying quantities. The assays, made from surface outcroppings taken from various leads in and around the Chinati range, yielded from 16 ounces to 299⅛ ounces of silver per ton of 2,000 pounds, a majority averaging from 35 ounces to 60 ounces per ton. Copper, bismuth and argentiferous galena were also found, and there is every indication that these mountains are capable of very rich mineral development.

COAL.

There is no doubt that a good quality of bituminous coal can be profitably mined in Palo Pinto, Young, Stevens, and Eastland Counties, and adjoining counties west. The completion of your road into Eastland County will, it is believed, develop a large business, as the coal seems to underlie all that section of country—so much so that it gives no special additional value to lands upon which it is discovered. Not only will these deposits furnish a cheap fuel of good quality for the use of the road, but it is believed a large local business will be done in distributing it for manufacturing purposes, and for domestic use in the prairie country, where wood is not easily obtained.

IMMIGRATION.

It is believed that the completion of your road through these northern counties, that are notably healthy and have never been visited by an epidemic, and the opening up of such an extent of rich agricultural and mineral territory, will turn the tide of emigration in this direction, as there is no section of country where such fertile lands in a genial, semi-tropical climate, can be procured at so low cost to actual settlers as in this part of Northern Texas, where cotton and tobacco, corn, wheat, and other cereals, with apples, pears, peaches, plums, figs, grapes, and other fruits, and nearly every kind of vegetable can be grown in the same field in quantity, and of a quality equal to that grown in any part of the world.

Active steps are being taken to direct the tide of immigration into Texas. One of the most important of these is the recent organization of The Southwestern Immigration Company, in Texas, by the united action of your own and other railroad corporations in that State. It is a joint stock company, limited, with its principal office at Austin, and its President is the Hon. W. W. Lang, a prominent and intelligent citizen of Texas, who brings with him to this important work a degree of energy and enthusiasm which promises most satisfactory results in the near future. Its object is to supply as far as possible the great need of a State Bureau of Immigration, which cannot be fostered by the State because of an inhibitory clause in the Constitution of Texas. The general work of this company will not interfere with the individual efforts of your company to secure immigration to its own lines.

There is a marked improvement in the material development of Texas. The growing crops promise the largest yield of corn and cotton ever produced in the State, and there is reasonable expectation of a largely increased tonnage on your lines from this source alone, without mention of the rapidly increasing trade and commerce of this growing and prosperous country.

CONSTRUCTION.

At the last meeting of stockholders, your board was directed to arrange for the construction and equipment of an extension of your line from Fort Worth to El Paso, a distance of about 600 miles, and an issue of stock at the rate of $20,000 per mile of road, and of first mortgage bonds at the rate of $25,000 per mile, was authorized to provide for this work.

In accordance with these instructions, a contract has been entered into on behalf of your company, with the Pacific Railway Improvement Company, a corporation organized under the laws of the State of Connecticut, with a capital of $1,000 000, to complete and fully equip the Rio Grande Division of your road between Fort Worth and El Paso, and a first mortgage upon this portion of the line has been executed and placed on record in the several counties. The railway and telegraph is to be constructed and equipped by the Improvement Company, in conformity with our present standard for replacement, the work to be commenced on or before the 5th of March, 1880, and 100 continuous miles from Fort Worth west to be completed by the 1st day of October, 1880, and at least 50 miles additional on or before the 1st day of April, 1881, the whole line to be completed and equipped, according to the specifications of the contract, on or before the 1st day of January, 1883.

The contract provides that as sections of 20 or more continuous miles of road and telegraph west of Fort Worth shall be completed by the Improvement Company, they shall be examined by an officer of the Texas and Pacific Railway Company, and, if found to be constructed in accordance with the contract, they are to be accepted and paid for at the rate of twenty thousand dollars ($20,000) per mile in bonds, out of an issue of twenty-five thousand dollars ($25,000) per mile authorized, and twenty thousand dollars ($20,000) per mile of the capital stock of the company.

The work was commenced promptly under this contract, and has been vigorously prosecuted; and although no portion of the new road was actually turned over to the company within the limits of the fiscal year just closed, 70 miles in all have since been constructed and accepted by the company, and there is every reason to believe that the first 100 miles will be completed within the time required by the contract.

With the completion of this 600 miles of line to El Paso, your company will own 1,140 miles of road, subject to an indebtedness of but $25,000 per mile of 6 per cent interest bearing bonds, and $7,814 per mile of income and land grant bonds, that have as additional security a first lien upon $4,851,702 acres of land along the line of road under construction. The proceeds of sales of these lands, that under the provisions of the mortgage must be applied to the payment of these income and land bonds, will, it is believed, retire them all within a very few years, leaving the mortgage debt of $25,000 per mile, and $20,000 per mile of capital stock as the capitalized cost of your road.

Under the construction contract for the completion of the Rio Grande Division, $20,000 per mile of bonds out of an authorized issue of $25,000 per mile, is to be paid over to the Improve-

ment Company for the construction and equipment of the road. This will leave subject to the control of your company $5,000 per mile, $3,000,000 in all, of these first mortgage bonds, and there will also be a surplus of about $600,000 of the income and land grant bonds; and as your company has no floating debt, this reserve of securities will not only insure a well constructed and fully equipped road, but will enable your company to maintain the very strong financial condition which it now enjoys.

NEW CONNECTING LINES.

During the past year the property of the Dallas and Wichita Railroad Company has been sold out under foreclosure proceedings. The projected line of this company, commencing at an intersection with your road at Dallas, extends northwestwardly to the town of Denton and beyond. About twenty miles of road from Dallas was completed by the old company, but the equipment necessary to operate it has been furnished by the Texas and Pacific Company. By the sale this property has been relieved from embarrassing liens, and is now in the hands of strong parties, who will at once put the old line in good condition and complete the road to the town of Denton, about 40 miles from Dallas. In view of this extension contracts have been made for completing an extension of your north line from Sherman, via Whitesboro, to Denton, so that before the close of the current calendar year it is believed that this through connection between Dallas and Sherman will be made.

The New Orleans Pacific Railway Company, owners of a projected line from Shreveport to New Orleans, of which about 165 miles are already graded, have recently contracted with responsible parties for the completion of their road, and work will be commenced at once at Shreveport and at the Atchafalaya River bridge. It is expected that this road will be completed, so as to give your company an all-rail connection from Shreveport, via Alexandria, to Baton Rouge, on the Mississippi River, and to New Orleans, within the next 15 or 18 months. The completion of this New Orleans Pacific Railway will not only furnish to your lines a good connection to the Mississippi River and to New Orleans, but will make via your road and the Missouri, Kansas and Texas and Missouri Pacific lines, the shortest all-rail connection between Kansas City and points west from there and New Orleans, and it is believed that a very large through business will pass over this line, in both directions, between the two sections of country.

The completion of your road to El Paso will, it is believed, secure a very important trade from the Republic of Mexico, a nation with a population exceeding 10,000,000 of people or more than ten times that of the Pacific Coast States and Territories. A line of railway extending from El Paso southwardly to the City of Mexico, with a branch westwardly to the Gulf of California, will undoubtedly be constructed within a few years. Such a road will develop a rich mineral and agricultural country and furnish transportation facilities to this vast population; and, via your road, it will open new markets to the trade and commerce of the United States, and enable American merchants to compete for the trade and commerce of more than 10,000,000 of people that are now almost entirely supplied by foreign merchants, via the coast. It is believed that this Mexican traffic will, within a very few years after the completion of your road, be of greater volume and more remunerative than the Pacific coast business.

CONGRESSIONAL LEGISLATION.

The original charter under which your company was organized authorized the construction of a railway and telegraph line between the eastern boundary of Texas and the Bay of San Diego, in the State of California. Section 9 of the act makes an absolute grant of land in the following language: That for the purpose of aiding in the construction of the railroad and telegraph line herein provided for, there is hereby granted to the said Texas and Pacific Railroad Company, its successors and assigns, every alternate section of public land, &c.

There is nothing in the act or in any supplementary legislation making this grant conditional or subject to forfeiture, nor is there any reservation of the right to alter, amend, or repeal the act. There are conditions subsequent—in section 5 of an act amendatory, approved May 2, 1872—requiring the completion of the whole line from "the eastern boundary of the State of Texas to the Bay of San Diego, in the State of California, as aforesaid, within ten years after the passage of this act * * * and upon failure to so complete it, Congress may adopt such measures as it may deem necessary and proper to secure its speedy completion."

The best legal opinion as to the rights of your company is that the grant of land to your company is absolute, and that title to the lands vested by this grant is not liable to forfeiture in any contingency; that the lands cannot revert to the national domain without abandonment by or consent of the company; that any claim to take back lands must be based on unequivocal words of reservation that do not appear in the act; that the penalty for a breach of the conditions as to the time for the completion of the road is not forfeiture, but that "Congress may adopt such measures as it may deem necessary and proper to secure its speedy completion."

NEW ORLEANS PACIFIC RAILWAY.

By an arrangement with the parties who have undertaken the construction of the New Orleans Pacific Road, stockholders of the Texas and Pacific Railway Company, and in the companies forming one of its connecting lines, the Missouri, Kansas and Texas, and the Missouri Pacific Railway Company, or their assigns, have the option to subscribe for $2,000,000 of bonds, and $1,000,000 of capital stock, offered by the Construction Syndicate, to be paid for at the rate of $900 in cash for a $1,000 6 per cent gold bond, and $500 par value of the capital stock of that company.

The New Orleans Pacific Railway Company is organized under special acts of the Louisiana Legislature, and its charter is perpetual. The main line of road of the company extends from Shreveport via Alexandria—which is below the rapids on Red River—to a crossing of the Mississippi River near Baton Rouge, and from thence to New Orleans, about 325 miles, and is the longest line of road, projected or constructed, in the State of Louisiana. It passes through the oldest and most thickly settled and the finest agricultural portion of the State, and has directly tributary to it the rich parishes of Caddo, De Soto, Red River, Natchitoches, Sabine, Rapides, Avoyelles, and St. Landry on Red River and the Atchafalaya; and Point Coupee, Iberville, Baton Rouge, Ascension, St. James, and St. John Baptist, on the Mississippi River.

The line has been well located, and as about 165 miles are already graded, it can be completed at a very reasonable cost. The maximum gradients are but 30 feet, and these in favor of the heavy traffic; it is practically a descending grade for its entire length to tide water, and as there is very little curvature, it may be considered one of the most favorably located lines for economical working. There is but one truss bridge on the line, crossing the Atchafalaya River, which will secure cheap cost in operation and maintenance.

From Shreveport to Cotile, to a point on Red River, north of Alexandria, is a fine agricultural country, and along this part of the line a bale of cotton to the acre, and from 30 to 40 bushels of corn, together with wheat, oats, tobacco, hemp, and live stock, are easily raised. From Cotile south, the line passes through what is known as the Delta of Red River, the richest and most productive portion of the State, extending for upward of 200 miles along the Valleys of the Red and the Mississippi Rivers. It is through this section of country that the enormous crops of sugar, cotton, corn, &c., have been produced for years without any impoverishment of the soil. On many of the sugar plantations 2,300 pounds of sugar and 3 barrels of molasses per acre have been readily made, year after year for many years, and from a bale to a bale and a half of cotton, and good crops of corn and small grains are grown in the same localities. The country is well settled, and it is believed that the local business alone will more than provide for the fixed interest charge on the construction bonds of the company, that are limited to an issue of $20,000 per mile of road.

The distance from Shreveport to Baton Rouge is about 230 miles, and the completion of this road to that point will make tributary to the Texas and Pacific lines the enormous traffic of the Mississippi, the Ohio, and Missouri Rivers, and their tributary streams. At New Orleans the largest vessels can discharge and receive freights alongside the railway company's warehouses; and besides the cotton, hides and wool from Northern and Western Texas that will naturally seek this outlet for foreign ports, it is believed that a very large business will be done in the shipment of provisions, grain, &c., from the country naturally tributary to Kansas City; and that return freights of sugar, coffee, and other imported articles intended for distribution through Northern and Western Texas, the Indian Territory, Kansas and Western Missouri, will be forwarded via this line, as it will be the shortest all-rail route, worked in a common interest, between navigable waters and these different sections of country. There will also be a large and valuable traffic in the interchange of business between this New Orleans line and the St. Louis, Iron Mountain and Southern Railway and its connections; and via this road it will furnish another all-rail highway between St. Louis and New Orleans.

As the interchange of business between your company and this New Orleans Pacific Railway Company will be so large, and the business relations so intimately connected, your board recommend to the stockholders that the officers of your company be authorized to negotiate for a control of the corporation as the road shall be completed and equipped, either by a consolidation and merger of its corporate property and franchises, or by an exchange of Texas and Pacific Railway Company capital stock for the stock of the New Orleans Pacific Railway Company; provided, however, that no issue of capital stock shall be made in excess of $20,000 per mile of road so acquired.

The thanks of the company are due to the officers and employes for the able and efficient manner in which their duties have been performed during the year.

By order of the Board of Directors,

THOMAS A. SCOTT, President.

☞ A new railroad route to Rockaway Beach was opened to the public on the 26th. It is known as the New York, Woodhaven and Rockaway Beach Railroad, and trains are run through from Hunter's Point, Bushwick and the Flatbush avenue stations. By the new route 12 miles are saved between Brooklyn and the Beach. The trip will be made in 30 minutes.

☞ According to the Canada Gazette, the total revenue of the Dominion for the year which ended on June 30th, last, was $24,768,585, and the total expenditures $25,161,712, showing a deficit of $393,127.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, Aug. 3, 1880.

THIS COMPANY WILL PAY SEPT. 1, 1880, the THIRTY-SIXTH SEMI-ANNUAL CASH DIVIDEND on its entire share capital, being a dividend of THREE (3) PER CENT., to all shareholders registered as such at 2 P. M. on the 13th inst., after which and until the 4th September the transfer-books will be closed.

L. V. F. RANDOLPH, Treasurer.

Immigration.

From information furnished by the Chief of the Bureau of Statistics we learn that there arrived in the Customs districts of Baltimore, Boston, Detroit, Huron, Key West, Minnesota, New Orleans, New York, Passamaquoddy, Philadelphia, and San Francisco, during the month ended July 31, 56,123 passengers, of whom 49,922 were immigrants, and 3,922 citizens of the United States returning from abroad. During the year ended June 30, 457,243 immigrants arrived in the United States, an increase of 279,417 over the number arrived during the preceding fiscal year. The year of greatest immigration was the fiscal year 1873, when 459,803 immigrants arrived, exceeding the immigration of the last fiscal year only 2,560.

☞ A mortgage for $250,000 on the Pittsburg Southern R. R. has been filed in the Recorder's offices at Pittsburg and Washington, Pa. The board have authorized the issue of $250,000 in six per cent bonds, running thirty years, and fully state the form of these securities. The mortgage, for the consideration of $1, secures the railroad complete, with all its corporate rights, to the mortgagees. It is thought that an effort will be made to push the sale of the bonds in sums to suit purchasers, and use the proceeds in the extension of the road to the Virginia ore field.

☞ The town of Highgate, Vt., will pay September 1 its $50,000 outstanding bonds, issued in 1869, 1870 and 1871.

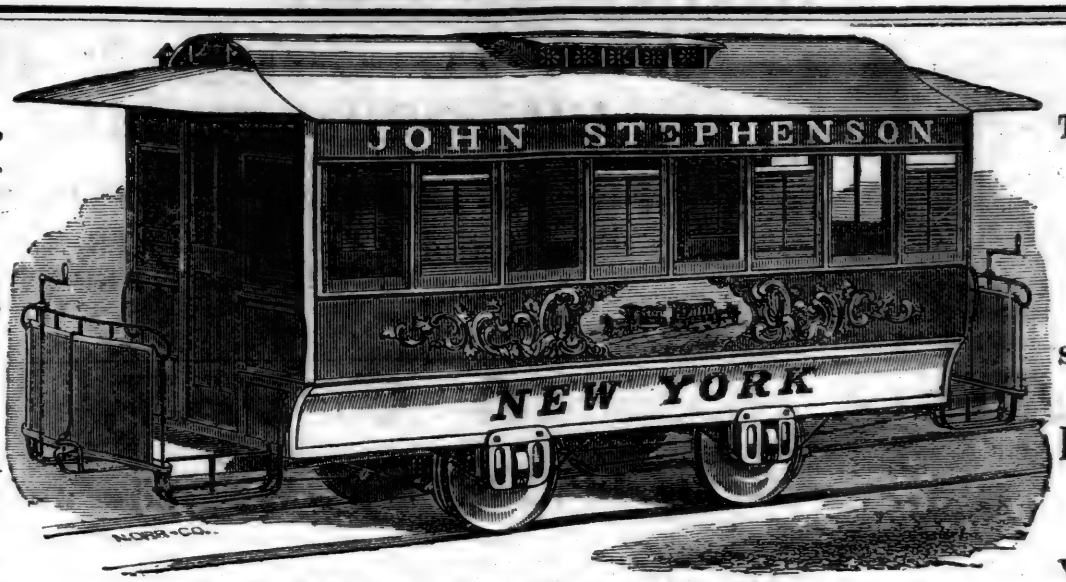
IRON & STEEL RAILS
FOR IMMEDIATE and FUTURE DELIVERY
For Sale by Manufacturers' Agent,
JAMES HENDERSON,
61 Wall St., N. Y.



First-Class English
IRON & STEEL RAILS,
AT LONDON PRICES, F. O. B.
Also purchase all classes of Railroad Securities, and negotiate Loans for Railroad Companies.
WM. A. GUEST & CO.,
17 Nassau Street,
NEW YORK.

RAILROAD IRON.
THE undersigned, agents or the manufacturers, are prepared to contract o deliver best quality American or Welsh, Steel or Iron Rails, and of any required weight and pattern. Also Spiegel and Ferro Manganese
PERKINS & CHOATE.,
23 Nassau Street,
NEW YORK.

Knox & Shain,
MANUFACTURERS of Engineering and Telegraphic Instruments. 716 Chestnut St., Phila. (Two medals awarded by Franklin Institute, and one by Centennial.

CARS FOR **ONE HORSE,** WITH or WITHOUT **Platforms,** OR TO Swing on Trucks.

EVERY **STYLE AND VARIETY** OF CONSTRUCTION.

CARS FOR **TWO HORSES** COMBINING ALL Valuable Inventions, **ELEGANT** STYLE, Light & Durable, **Full Size** AND REDUCED WEIGHT.

47 EAST 27TH STREET.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

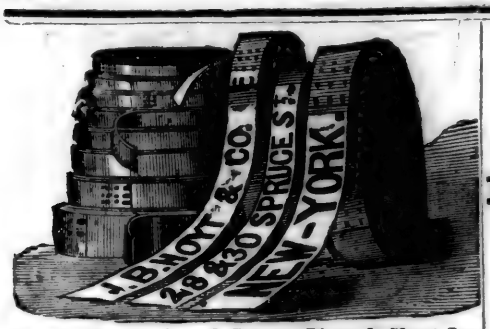
Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinnest parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St.,
NEW YORK.

PATENT
MINERAL WOOL.

ITS FOREMOST QUALITIES:

CHECKING TRANSMISSION OF HEAT, COLD AIR, SOUND AND ELECTRICITY AS AN AIR-HOLDING MATERIAL, ABSOLUTELY FIRE-PROOF AS A MINERAL—RAT AND VERMIN-PROOF, AND NOT ATTRACTING DAMPNESS, BECAUSE VITREOUS.

Its Manufacture, Composition and Uses in the Construction of Dwellings, etc.

A. G. DAY,
MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

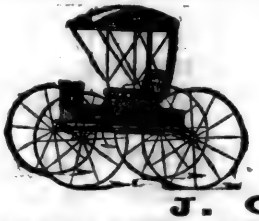
NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almost 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.



E. S. BOWEN, General Superintendent. JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,
MANUFACTURER OF ALL KINDS OF CARRIAGES
Fine Work both Heavy and Light a Specialty!

President.—JOHN H. SCHULTZ.
Vice President.—S. PROCTOR THAYER.
Treasurer.—EDWARD A. WRIGHT.
Secretary.—JOHN H. SCHULTZ, JR.

AN IMPORTANT CONVENTION.

A National Convention of ship owning and other commercial bodies interested in the extension and development of our ocean commerce will be held at Boston on the 6th of October. The call is issued through the New York Board of Trade and Transportation, and all bodies interested in the important object of the Convention are invited to attend, and requested to send their names, number of members, list of officers, and list of delegates appointed, to D. R. JAMES, Secretary N. Y. Board of Trade and Transportation, as soon as possible. The rules regulating the number of delegates are the same as those which govern in the National Board of Trade. The leading railroads will probably afford all traveling privileges possible to delegates.

The American Railroad Journal Rounding its Half a Hundred Years.

Half a century ago, when the advisability of trying to introduce into this country some method of inland communication more desirable than that afforded by canals and stage coaches was being discussed, the AMERICAN RAILROAD JOURNAL was established. Railroading was then an experiment. The new paper, the first railroad paper the world had ever seen, in its first editorial introducing itself said, "A fair experiment should be made of the utility of railroads. Such experiments are now in progress in several States; and all information, therefore, upon the comparative value of railroads and canals, which may be generally diffused amongst the people, must be valuable, as it may prevent a premature and useless expenditure of capital upon works concerning which sufficient data for a correct judgment are not possessed."

Railroading existed then not only as an experiment but as a very doubtful one, with strong opposing interests mustered about the existing canals and stage lines, with their robust and argumentative constituency extending from legislative halls and banking houses to city hostelries and country taverns. It was a bold step, however it may seem now; the starting of a paper that should face the opposing conservatism and prejudice of the time and take an independent stand in behalf of free discussion and the dissemination of ideas and theories pertaining to the embryotic railway system, then so crude and faltering, but which was destined to develop into the most gigantic and stimulating element of American progress before the JOURNAL should reach one-half its present age.

That the founder of the first railroad paper realized the boldness of his step, while having faith in the ultimate benefits to result from it, is seen in the careful way in which he warded off too sudden an outburst from the opposition, through the use of the well chosen closing words of the extract from his inaugural as quoted above. But the first step taken, there was no inclination to retrace it, the paper drawing to itself a liberal support from the best business and financial circles of the period, and after its first issue numbering among its contributors and patrons the ablest and most enterprising constructors and founders of American railroads, the trustworthy negotiators of their securities and the most solid investors in them at home and abroad. Starting with the first one hundred miles of railroad on this continent, the JOURNAL grew up with the present railroad system and walked by its side as the exponent of its most substantially progressive ideas, the encourager of its enterprise, its introducer to capitalists and its careful weekly chronicler; the fostering watcher and historian of its rapid web-like growth. To give faithful reports of the development of American railroads and the interests allied with them, and reliable summaries in tabulated form of the results of their management came to be the chief aim of the paper, and into this work has been put so much of honest endeavor and skilled labor that no more complete history of railroading in this country can be found than is furnished by the files of the AMERICAN RAILROAD JOURNAL, to which as an authority Chambers Encyclopædia recommends its readers for reference. Foreign capitalists soon appreciated the value of a paper that should place before them systematically and without undue coloring the doings and condition of the American enterprises for which their investments were solicited, and the JOURNAL became their guide, early in its history being a recognized necessity for the counting rooms of the leading European banking houses among which, especially in Great Britain and Germany, it now has an unequaled list of world renowned financiers as patrons.

Since the inception of the paper in 1831 by D. K. MINOR, remarkably few changes have been made in its proprietorship and none of importance in its policy and purpose. Mr. MINOR was succeeded in proprietorship in 1848 by Messrs. POOR and SCHULTZ, Mr. POOR being the present compiler of that invaluable, and to railroad men indispensable publication, *Poor's Manual*, which under Mr. POOR's able editor-

ship has become a recognized authority around the world. Previous to Mr. POOR's connection with the JOURNAL it was for several years under the management of Mr. SCHULTZ, who upon the retirement of Mr. POOR, in 1861, after a partnership of thirteen years, assumed the sole proprietorship which he has held until recently for nearly twenty years. Mr. SCHULTZ entered the office of the JOURNAL under Mr. MINOR when a mere boy, and so has been connected with the paper continuously almost from his own and the paper's infancy. As the field for the JOURNAL has widened with the development of the interests for which it has so long labored, the demands upon its efforts and the requirements of its constituency seem to have increased to such an extent as to make it desirable that the paper should no longer rest solely upon shoulders overburdened for years with work of unrelenting exaction.

As announced in another column, the AMERICAN RAILROAD JOURNAL COMPANY was formed, August 17th. It is the purpose of the organization to conduct the JOURNAL on the basis on which it was originally started and which has characterized its many years of strength and reliability. Mr. SCHULTZ, as the president of the company, remains, as will his work, a familiar and well known element of the JOURNAL. The others joining him, one of whom is his son, unite their efforts with his to maintain the prestige and usefulness of the paper, and to broaden its scope in directions consistent with its character. We have few announcements to make as to what the JOURNAL is to do under its new regime; no startling statements as to policies to be adopted. New features, to be sure, are to be added to the paper from time to time, and improvements made we trust that will be readily visible, but we shall plan and strive to make them such as shall enhance the old features, making the old and new in harmony with each other and with the new era in which the JOURNAL finds itself as it rounds its half a hundred years. To be a faithful recorder of events within our province, to place before our readers such information as may be of service to them, to do justice so far as is within our power to the interests intrusted to us, to aid, as of old, whatever tends to the substantial development of the industries brought under our range, to make the JOURNAL not only a valuable paper to the constituency we especially represent, but welcome to others as well, and of interest to those who would be entertained and through being entertained be led into studying the manifold resources for self improvement that lie back of these tables of figures and counting room phrases—are the aims we hold before us. Free from all entanglements or pressure or influence of any circle or sect, we shall strive to keep the AMERICAN RAILROAD JOURNAL worthy of the classification recently given it by *Herapath's Railway Journal*, of London, the leading paper of our kin in England, which ranks the JOURNAL "among the most honest and outspoken of American papers," than which we ask no higher praise.

The New Trunk Line.

The much discussed extension of the Delaware, Lackawanna and Western Railroad is not a new project nor is it, we apprehend, a speculative one. Ever since the company opened its tunnel through Bergen hill, it has been desirous of controlling a trunk line from Buffalo to New York. The company's main and leased lines already give it an outlet on Lake Ontario at Oswego, and an old plan was to build west along the southern shore of the lake. The unexpected depression of business prevented the development of any such scheme for several years, and very little has been said, until the recent increase in business revived the interest in the matter and occasioned the formation, last week, of the New York, Lackawanna and Western Railroad Company. The new road is to consist of a main line running from Binghamton in a general northwesterly direction, through the counties of Broome, Tioga, Tompkins, Schuyler, Steuben, Livingston, Wyoming and Erie, to Buffalo and to or near the International Bridge, and thence to the Niagara River to connect with the Suspension Bridge, with a branch from the main line running, probably from Danville, through the counties of Livingston and Monroe, to Rochester. The length of the road and branches will be about three hundred miles, but the distance from Binghamton to Buffalo will not exceed one hundred and sixty miles. This will make the total distance from New York less than four hundred miles, considerably shorter than Erie or the New York Central. The amount of the capital stock is ten millions of dollars, ten per cent of which has been deposited in cash and one thousand dollars per mile for every mile to be constructed has been subscribed.

The following officers have been elected for the ensuing year: Samuel Sloan, president; Frederick F. Chambers, secretary; F. H. Gibbons, treasurer; A. D. Chambers, assistant treasurer; executive committee, Samuel Sloan, P. R. Pyne, Benjamin G. Clarke, George Bliss, Jay Gould, Russell Sage, Solon Humphreys.

It is announced that the engineers have been on the ground for three weeks past and that their surveys have been accepted, although there is a difference of opinion as to two proposed routes, one of which follows the valley of the Susquehanna and the line of the Erie to Corning, the other skirting the lower end of Cayuga, Seneca Lake, and taking in the towns of Ithaca and Watkins. It is also said that the road will be double tracked throughout and ground be broken at Binghamton some time in September, and work carried westward.

Of the future of the new trunk line it is too early to predict. To build a new through line to the west in direct competition with Erie and the New York Central and in the face of recent disastrous developments in the history of certain coal roads, is a very bold undertaking to say the least.

The new trunk line, however, passes through the Genesee Valley, and the richest and thickest settled portions of Western New York; and the recent business on the through trunk lines would seem to justify the hope that a new road might be successful. Its grades are easy, the road bed for the most part following valleys and water courses, and its connections at Buffalo with the Great Western of Canada and the Wabash system make a strong through line to the lakes and the West.

The new company is closely identified with the Delaware, Lackawanna and Western Railroad, and there can be no question of the great advantage that must result from this combination to the latter road. It affords it an opportunity to develop its valuable terminal facilities at Hoboken, and an excellent chance to extend its coal business. It has been managed of late with great energy and ability; its Syracuse line now pays handsomely, and there seems to be no reason why its Buffalo connection should not be equally profitable.

Sunday Excursions.

The crusades of Rev. Leonard W. Bacon, of Norwich, Conn., against the Sunday excursions of the steamer Ella, have attracted more attention than the recent controversy between the officials of the State of Massachusetts and the various railroads using the Troy and Greenfield road, but the same principle is involved in both cases. In most of the States in the Union the law provides that whoever travels or does any work on Sunday except from necessity or charity shall be punished, and yet in every town is this law utterly disregarded and ignored. The laws of New York and Connecticut are exactly similar in this respect, although not all of the New York Dailies seem to be aware of the fact. Mr. Bacon's object of attack has been, he says, the excursions of the steamboat Ella, "which have been characterized by the filthiest debaucheries." In this movement he was successful, for the trips were discontinued in response to public sentiment which he succeeded in bringing to bear upon the steamboat company, and we have no doubt that a similar result would have been reached had the Ella made her trips from New York or Boston.

The Sunday controversy in Massachusetts arose in this wise: the Fitchburg Railroad and the Boston, Hoosac Tunnel and Western Railway, with the consent of the State authorities, issued a time-table calling for one Sunday train each way between Boston and Saratoga. Certain people at Greenfield, the eastern terminus of the State's road, at once petitioned the Governor and Council to forbid the passenger trains over the Troy and Greenfield Railroad. The object of the petition, some say, was to discourage Sunday travel to Lake

Pleasant, a spiritualistic summer resort, and counter petitions followed from every town along the line of the road, but the State officials took the ground that they were sworn to obey the law as they found it, and that running Sunday railway passenger trains was neither "from necessity nor charity." The proprietors of the Boston Sunday *Herald*, the most enterprising and the best newspaper in New England, however, secured permission to run a baggage train to carry their newspapers from Boston to Saratoga on the ground that newspapers were freight and that freight trains had been allowed to run through the mountain on Sunday since the completion of the tunnel. This distinction made between freight and passenger trains has occasioned much discussion and has not given general satisfaction. People cannot understand why it is called lawful to carry merchandise to Boston on Sunday but unlawful to carry ill or tired mortals from the cities to Lake Pleasant or Saratoga, on the same day.

The recently published statement of Mr. Bacon's views on the Sunday question, from a secular point of view, will surprise and gratify liberal men who have been disposed to criticise his course as too puritanical. It certainly is taking a great step in advance, for an orthodox clergyman, to say that the Sunday law "ought not to interfere with any one's enjoyment or amusement, except so far as such interference is required for the sake of the general rest and the interests of public order and morals." It ought not, he thinks, to try to enforce any religious duty of Sunday observance, nor to try to help the church by any discriminations in favor of church going, expressed or implied, for the reason that every such favor hurts the church more than it helps it. Mr. Bacon is ready to join in a petition to the Legislature "for a careful inquiry as to whether the Sunday laws can be so modified as to permit Sunday steamboat excursions without seriously infringing the right of weekly rest, and without detriment to good order and morals."

Mr. Bacon's ideas should be proclaimed far and wide. Sunday newspapers and Sunday outdoor excursions during the hot summer months have become popular necessities. Both need more than anything else the moral guidance of good and strong men like Mr. Bacon. The laws on this subject are antiquated, and should be and will be changed. It would be vastly better in every respect to have liberal statutes well executed than the present strict ones openly defied and universally disregarded.

☞ **The Chester Evening News says that workmen are now replacing with iron the vast wooden span of the Philadelphia, Wilmington and Baltimore Railroad bridge over the Susquehanna river, at Havre de Grace, and when this is completed the whole bridge will be of iron. The change from wood to iron has been going on for six years. The bridge is one of the greatest structures in the country. With its approaches it is a mile and a quarter long, and the water in the channel is 75 feet deep. The total cost of the bridge has been $2,000,000.**

Flint and Pere Marquette Railroad.

Additional particulars in reference to the purchase of this road—the sale of which took place on the 18th of August—have been obtained, viz:

The Purchasing Committee take the property in trust, pursuant to a plan arranged, for bondholders who have deposited bonds with them for that purpose.

The sale was made subject to prior securities, amounting in the aggregate, including all interest computed to May 1, 1880, with interest on coupons in arrear, to the sum of $4,025,634 45, which amount of prior securities, however, is liable to be reduced by land assets when the same shall have been realized and applied by the trustees of the prior trusts. The land assets referred to consist of about 160,000 acres of land unsold, which it is estimated will produce at least the sum of $1,000,000. For lands already sold there is due to the trustees about another million, and the trustees have in hand to use for retiring bonds something over $200,000. So that the prior debts mentioned above will be reduced by the application of these land assets to about $2,000,000—probably a trifle less. The purchasers also take the property charged with the indebtedness outstanding against the receiver, which amounts at this date approximately to the sum of $500,000.

The sale was made at the instance of the holders of the consolidated bonds, who by this process and by reorganization will convert their bonds into preferred stock. The plan of reorganization contemplates the issue of preferred stock to the amount of $6,500,000, and the plan also recognizes common stock to the amount of $3,500,000, which will not be issued, however, until the preferred stockholders shall have received from the net earnings of the road five consecutive annual dividends of 7 per cent or semi-annual dividends equivalent thereto. When that contingency shall arise then this common stock is to be issued and delivered to the holders of receipts for common stock given by the bondholders' committee. To pay this dividend of 7 per cent to the preferred stockholders will require a net income of $445,000, after providing for the interest on prior securities. The earnings of the road in the hands of the receiver for the first seven months of 1880 amount to $856,604 95. If the earnings continue for the remainder of the year at the same ratio the gross earnings for the year 1880 will be the sum of $1,468,465 60, and allowing 60 per cent for operating expenses the net income will be $587,396 24. It is considered probable, however, that earnings may fall off somewhat towards the close of the year.

The purchasing committee consists of H. A. V. Post, of the firm of Clark, Post & Martin, 34 Pine St., New York, Chairman; L. Snow, Jr., and Francis Hathaway, of New Bedford, Mass.; H. H. Fish and Dr. A. G. Brower, of Utica, N. Y. The total amount of consolidated bonds outstanding, with interest computed to May 1, 1880, together with interest on coupons in arrear to the same date, is the sum of $6,236,368 80, represented by 4,470 bonds, of which there have been placed in the hands of the committee by their owners 4,381 bonds, leaving only 89 outstanding. All those who have surrendered their bonds into the hands of the committee will be entitled to share in the reorganization in accordance with the programme of the committee. The committee who have become the purchasers will proceed at once to procure a confirmation of the sale and will then organize a new company, which it is expected will be called the Flint and Pere Marquette Railroad Company, to take charge of and manage the property. The committee will associate with themselves Jesse Hoyt, Cornelius D. Wood and James C. Parrish, of New York; William W. Crapo, of New Bedford, and Henry C. Potter and W. L. Webber, of East Saginaw, as directors, so that the new board will consist of eleven members.

It is expected that arrangements will be completed so that the new company will take possession of the road on the 1st day of October, 1880.

The first rail of the road was laid at East Saginaw on August 19, 1859, so that the day of sale completed 21 years of the history of the road. The property conveyed now consists of 300 miles of road and 74 miles of sidings. Two hundred miles of the main line have steel rails. The equipments transferred to the new company will consist of 51 locomotives, 42 coaches, 12 baggage, mail and express cars, 332 box freight cars, 561 flat cars, 20 conductors' cars and 5 boarding cars.

The Messler System.

The Pittsburg Chronicle says that where the Messler system of keeping railroad accounts is enforced, settlements are made daily and weekly as well as monthly. At 4 o'clock any afternoon an auditor can drop in upon an agent, and in 20 minutes, if his books are properly kept, learn what shape matters are in. This accounts for the fact that seldom do you hear of an agent or official in the financial department of the Pennsylvania Railroad Company being a defaulter, or ever short in his account, so completely does the Messler system check any irregularities or show up any mistakes. It is spoken of as being an expensive mode of keeping accounts, but, in the long run, it is not so expensive to a railroad company as are the leaks and stealings which are never brought to light where the ordinary method of keeping railroad accounts is in use.

☞ **The contracts for furnishing mail locks and keys as advertised for have been awarded by the Postmaster General as follows: the Smith-Eggi Manufacturing Company, Bridgeport, Conn., for iron mail locks and keys at 52 cents for each lock and 9 cents for each key; for city mail locks and keys at 34 cents for each lock and 9 cents for each key; for through mail locks and keys at 75 cents for each lock and 12 cents for each key; for inside locks and keys for street letter boxes at 85 cents each for locks and 15 cents each for keys. To the Western Lock Company, Geneva, Ohio, for padlocks and keys for street letter boxes at 50 cents each for locks and 9 cents each for keys.**

☞ **Since the construction of the Ohio and Mississippi Railroad there has been scarcely any inflation in the capital stock. The common stock is still the same. Four millions of preferred stock have been issued, and four millions of bonds, but in the meantime the gauge of the line has been changed, and the entire railroad permanently improved.**

☞ **The Dan Valley and Yadkin River Railroad Co. was organized at Danville, Va., on the 31st ult., thus securing the charter from the Legislatures of Virginia and North Carolina. The road will be constructed speedily from Danville to connect with the Cape Fear and Yadkin Valley Railroad west of Greensboro, N. C.**

☞ **Judge Burton, of Iowa, granted an injunction on the 27th ult., against the Missouri, Iowa and Nebraska Railroad Company issuing any more bonds for the extension of that road. This will prevent the extension of the line until January 1, 1881.**

☞ **The track of the Southern Pacific Railroad is now within 196 miles of El Paso, and it is the intention to reach that point on or before January 26, 1881. The boundary line between New Mexico and Arizona will be reached by the 10th inst.**

☞ **The agent of the Texas and Pacific Railway at Dallas, Texas, has been instructed to push the road with all possible speed and have it completed to El Paso by January 1, 1882, instead of January 1, 1883, as originally contemplated.**

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 21, and for the year to the same date, compared with their respective amounts carried to the same time last year :

	Week.	1880.	1879.
Reading Railroad ...	122,841	4,587,980	5,512,056
Schuylkill Canal	9,331	258,654	580,182
Lehigh Valley.....	90,943	2,992 174	2,965,804
Del.,Lack. & Western.	60,804	2,015,317	2,313,205
Shamokin Valley	18,595	503,710	572,617
Central New Jersey..	69,121	2,083,400	2,434,423
United R. R. of New Jersey	27,441	657,344	555,247
Pennsylvania Coal ..	20,784	617,220	897,714
Delaware and Hudson	45,541	1,767,850	2,079,385
Huntingdon & Broad Top Mt.....	5,793	286,141	208,914
Penn. and New York.	19,697	763,810	844,178
Clearfield, Pa.....	35,333	965,261	967,827

The total tonnage of anthracite coal from all the regions for the week ending August 21, as reported by the several carrying companies, amounted to 424,388 tons, against 525,811 tons in the corresponding week last year, a decrease of 101,422 tons. The total amount of anthracite mined for the year is 13,303,088 tons, against 15,999,390 tons for the same period last year, a decrease of 2,696,302 tons. The quantity of bituminous coal sent to market for the week amounted to 85,889 tons against 84,127 tons in corresponding week last year, an increase of 1,762 tons. The total amount of bituminous mined for the year is 2,643,295 tons against 2,246,850 tons for the corresponding period last year, an increase of 396,445 tons. The total tonnage all kinds of coal for the week is 510,277 tons, against 609 938 tons in corresponding week last year, a decrease of 99,661 tons, and the total tonnage for the coal year is 15,946,383 tons against 18,246,240 tons to same date last year, a decrease of 2,299,857 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week of August was 136,780 tons, of which 99,599 tons were coal and 37,181 tons coke. The total tonnage for the year thus far has been 4,251,668 tons of which 3,192,613 tons were coal and 1,059,055 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 21 were 41,217 tons, and for the year to that date 1,305,286 tons—254,693 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 23,697 tons, and for the year 828,111 tons, an increase of 223,451 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 14,099 tons, and for the year 331,533 tons, a decrease of 5,535 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 3,421 tons, and for the year 145,652 tons, an increase of 36,773 tons as compared with 1879. —Phil. Ledger, Aug. 30.

Illinois Central Railroad.

An analysis of the reports of the Illinois Central Railroad Co. and other statistics shows that in the five years from 1875 to 1879 it has spent $2,200,000 on construction account, and by the last balance sheet it had accumulated $1,600,000 first mortgage bonds of the Chicago, St. Louis and New Orleans Railroad, in addition to about $5,000,000 second mortgage bonds previously acquired, and that it had also built branches about one hundred miles in length out of its income. Thus this company has added to its property and and to its assets about $4,500,000 under the foreign policy, besides paying off $500,000 of its sterling 5 per cent bonds at the rate of $100,000 per annum, complying with the sinking fund established upon the block of sterling bonds, thus making the company $5,000,000 better off than it was at the commencement of 1875. Besides, it has been laying steel rails, ballasting its road bed, &c., placing the property in a first class condition in every respect. The New Orleans line is also taking care of itself. It has 300 miles of track laid with steel, and it is understood that its managers contemplate completing it with steel within two years.

Louisville, Cincinnati and Lexington R. W.

The following statement of the financial condition of the Louisville, Cincinnati and Lexington Railway Company is from advance sheets of the report for the year ending June 30, 1880:

Cost of road			$5,752,999 27
Construction and improvement account..			242,353 32
			$5,995,352 59
Sundry assets—			
Cash in hands of treasurer..	$96,609 20		
Cash in hands of paymaster.	2,374 33		
Cash in transit from agents.	20,291 00		
			119,274 53
Due by station agents.....	$17,130 09		
Due by Post Office Department.....	9,858 65		
Due from sundry roads and persons	21,079 39		
			48,068 12
Stock of supplies on hand..	$123,350 00		
Stock of steel rails on hand.	42,574 48		
Louisville, Cincinnati and Lexington Railroad express equipment.....	8,109 74		
			174,034 22
Elizabethtown, Lexington and Big Sandy Railroad renewals.....	$2,581 35		
Louisville Railway transfer construction.....	1,169 40		
Five thousand dollars railway bonds.....	4,900 00		
Due by city Louisville for fill Beargrass.....	13.490 65		
Narrow-gauge Railroad....	30,500 00		
			52,641 40
Total			$6,389,376 87
Bonded debt—			
First Mortgage 7 per cent			$2,900,000 00
Second do., reissued.....	$1,000,000 00		
Less canceled.....	108,000 00		
	$892,000 00		
Less bought of Co.'s funds and held.....	127,300 00		
Issued to the public.....			764,700 00
City of Louisville 6 per cent bonds ...			100,000 00
			$3,764,700 00
Stock liabilities—			
Preferred stock.....	$1,364,591 49		
Common stock.....	496,011 58		
			1,860,603 07
Bills payable—			
For purchase of Narrow-gauge, payable from one to five years.....	$25,000 00		
For purchase of land.....	6,145 80		
For express equipment.....	6,170 18		
Loans (temporary).....	45,000 00		
			82,315 98
Sundry liabilities—			
Vouchers and pay rolls.....	$191,866 88		
Due connecting roads.....	15,101 44		
Due State and city tax account	13,377 14		
Louisville Railroad Transfer Co.'s funds in trust.....	15,750 30		
			236,095 76
Unpaid coupons.....			2,750 00
Coupons due July 1, 1880.....			104,500 00
Cumberland and Ohio Railroad construction fund.....			93,177 12
Receiver's unadjusted accounts.....			3,657 66
Balance from income account.....			241,567 28
Total, as above.....			$6,389,370 87

The income or profit and loss account for twelve months ending June 30, 1880, is as follows:

Operating expenses, State and city tax and rents.....		$742,217 48
Interest paid on bonds.....		263,282 04
Premium paid on $5,000 first mortgage bonds, canceled.....	$5,970 38	
Premiums and discount paid	3,066 92	
		9,037 30
Balance to credit of general account..		241,567 28
Total.....		$1,255,104 10
Gross earnings and profits on leased lines.....		$1,164,428 89
Balance general account, July 1, 1879.		91,680 21
Total, as above.....		$1,256,104 10

Railroads in South Africa.

We are indebted to E. B. Biggar, Esq., of Capetown, for the following interesting article upon Railroads, etc., in South Africa :

As American railroad cars and engines and railway plant are now finding their way abroad not only to Europe but to the Australian colonies it may be of interest to manufacturers in this important line of American commerce to note what has been and what is being done in the now progressive colonies of South Africa in the way of railroad enterprise. Especially will these facts be of interest when it can be shown that the railroads of South Africa are of such a character as to afford an easy introduction for cars of American manufacture, if not for railroad engines and plant. The first railroad undertaking in South Africa was begun in 1859 at Capetown, the metropolis of the British possessions there, and was opened to the town of Wellington, some 60 miles inland four years afterwards. About the same time a short line of some 20 miles was constructed at Port Natal leading to the Natal sugar plantations. At Capetown, in 1862, a small line of eight miles was commenced connecting the city with its suburbs towards Simon's Town. In the meantime the main line from Capetown was pushed on and through many natural obstacles to surmount which the road had at last to be reduced to a narrow gauge, was pushed over the Tulbagh and Hex River mountains by various stages until in February of this year it was opened to the town of Beaufort west 350 miles from Capetown. From this line there is a branch of 40 miles through the grain districts of Malmesbury, and a loop line taking in the town of Stellenbosch with its fruit and wine producing district. For the first hundred miles this main line runs through a level well settled and exceedingly fertile country, and then for a hundred miles through wild, majestic and rugged mountains, with gradients in many places marked one in 40, but probably more, and reaching a height of 1,000 feet above the sea. Then the road winds through low undulations of "Karoo" country, unproductive from its dryness, to Beaufort West. From here it is to be carried in a straight line to the Diamond Fields of Kimberley, over a generally level country of pastoral lands, thinly inhabited as yet. Within the last eight or ten years other railway undertakings have been prosecuted in other parts of the Cape Colony.

From Port Elizabeth, which is called the "Liverpool" of the Cape, a line runs northwest through a portion of the ostrich farming districts to the town of Graaff Reinet 200 miles inland. This

line, as well as the other roads about to be mentioned in the Cape, is, if my memory serves me right, a broad gauge line. It is to be carried forward to form a junction with the Capetown line to the Diamond Fields which are about 700 miles from these seaports. Another line runs from Port Elizabeth northeast and having a branch to Grahamstown, on old settled and wealthy district about 100 miles from the port, runs northward to Cradock, another rich ostrich farming tract about 200 miles or more inland. Another line is now open from East London, the eastern most port of the Cape, to Queenstown, about 150 miles north. These last two lines are to be prosecuted from their present termini through the northern districts of the colony and thence through the Free State to the Diamond Fields also. All these lines are to bring the seaports into direct connection not only with the rich diamond mines of Guiqualand West, but will draw down more quickly the native produce of the interior country, and bring civilized trade to the very borders of the rich tracts of Central Africa. Again in Natal a new line was begun in 1876 and is now about completed from the seaport to Pietermaritsburg, the capital, a distance by rail of 70 miles. This, a narrow gauge line, is to be continued at some future time towards the Transvaal territory, thus opening another route towards Central Africa. A railroad is also projected from Delagoa Bay, but that may be postponed indefinitely.

To sum up these remarks there are now in operation in South Africa about 1,000 miles of railroad, and the extensions to the Diamond Fields will increase this to two thousand. These extensions were brought before the Cape Parliament during its recent session—all the railroads in the colony being government enterprises—but apparently owing to the weakness of the present ministry in listening to the clamorings of local greed and local jealousy the whole scheme was postponed. As they must, however, shortly be continued, and a large amount of rolling stock required, the subject is well worth attention in this country, for the reasons hereafter given. In the first place there are no railroad workshops in the country beyond small repairing shops, and although some few carriages have been made in the colony there is not sufficient wood of the proper kind to produce them there at a reasonable rate. At present all the cars on all the lines are of English style, chiefly from Birmingham, and yet the character of the routes, with their stations far apart and roads in many regions requiring reduced speed and therefore long timed journeys, is such that once the American cars could be introduced they would be certain to be appreciated and generally adopted. They would be certain to be adopted not only on these accounts but on account of the climate as well. The weather being generally very warm and the stations far apart, great distress is often suffered, particularly by lady passengers, for want of drinking water and the other conveniences to be found on American railroads. The ill-suited style of the English cars is a frequent subject of complaint among the more traveled colonists, and some of the newspapers have frequently advocated a change of late. The only thing remaining in the way of the introduction of American cars is the natural prejudice of the engineers and managers in favor of the English system and style. This, as I remarked before, would be removed upon the superiority of the American cars being demonstrated by actual proof. The engines mostly in use in the colonies are the Fairley, but as to these and railroad plant generally it might be doubtful whether American work could successfully compete with the English, iron work being largely used for bridges and all other work as there is little liability to rust in the dry climate of Southern Africa. But whatever the difficulties in American trade in this branch here there can be none of any consequence in the way of a large trade in railway cars, and the subject is well worth the inquiry of men interested in this great branch of manufacture.

Note and Comment.

The National Board of Steam Navigation are now holding their ninth annual meeting at Norfolk, Virginia.

The Buffalo and Southwestern railroad, lately leased by the Erie, is to be attached to the western division of that road. J. S. Beggs will act as superintendent and C. A. Brown as assistant.

The board of public works of Jersey City tried last week to compel the Pennsylvania Railroad to lower their tracks to the street base but Judge Knapp will hear what the railroad has to say about it.

U. S. Receiver Price of the Brattleboro' Vt., bank says that the responsibility for the failure of the bank must rest in a great measure upon those senators and representatives of the State of Vermont at Washington who maintained in office an incompetent bank examiner.

Practically the only thing that the Joint Executive Committee of the trunk lines and their western connections, did at the last meeting was to adopt the following schedule for East-bound cotton, uncompressed, per 100 pounds, all rail, to New York, from the points named: Memphis, Tenn., 74 cents; Nashville, Tenn., 67; St. Louis, Mo., 66; Hannibal, Mo., 66; East St. Louis, Ill., 62; East Hannibal, Ill., 62; Cairo, Ill., 65; Evansville, Ind., 63; Louisville, Ky., 56; Jeffersonville, Ind., 56; New Albany, Ind., 56; Cincinnati, Ohio, 53. The rate per 100 pounds from Memphis, Tenn., to New York, by river and rail, was fixed at 72 cents, and then the report of the committee was adopted, and will go into effect on Sept. 7.

Philadelphia and Reading Railroad.

A movement is now on foot in Pittsburg to make a Western outlet for the Philadelphia and Reading railroad and to secure for that corporation a new source of trade. The general idea is to start at a convenient point on the Cumberland Valley railroad, which connects at Harrisburg with the Reading system of roads, and make by a course due west, Shade Gap in the Broad Top range. Dieter's Gap in the Allegheny mountains proper, towards Bloody run and Bradford, thence via Berlin, in Somerset county, down Indian creek into the Connellsville coal basin, where the line would meet either on the Youghiogheny, or the Monongahela, the extension of the Pittsburg and Lake Erie railroad. A short link from Shippensburg to the Western Maryland road would put the project in complete rapport with the splendid terminal facilities at Canton, below Baltimore, now used by the Northern Central railroad, thus securing tidewater connection with New York, Philadelphia and Baltimore. The amount of money required is estimated at between five and six millions of dollars.—[Pittsburg Post.

Legal Notes.

"Ignorance of the Law Excuses No One."

INSANE PERSONS.—JUDICIAL SALE.

A judicial sale of a lunatic's property will be valid though the statutory term be not complied with, for the notice is there required for the benefit of adversary parties. Mohr vs. Manierre. U. S. Supreme Ct. April, 1880.

MORTGAGES.—PAYMENTS.

The general rule is that payments made in an open running account are presumably to be applied to the extinguishment in the order of their dates; but where the earlier items of an account are secured by mortgage, and the later items unsecured, payments made after the expiration of the time for payment mentioned in the mortgage should be applied to the liquidation of the unsecured amount.

MORTGAGES.—TO SECURE FUTURE ADVANCES.

A mortgage given to secure future advances is valid, there being no present indebtedness subsisting at the time of its execution. Schuelenburg vs. Martin. U. S. Circuit Court, Kansas, June 14, 1880.

LIENS.

Liens given by State law can be enforced in admiralty and the court will follow the ruling of the district court of another State as to the construction of a State statute. White vs. The Cynthia. U. S. Circuit Court, E. D. New York, July 12, 1880.

EVIDENCE.

In an action for penalties and forfeitures the defendant cannot be compelled to *subpoena duces tecum* to produce books and plates to be used as evidence against himself.

COPYRIGHT.

A copyright secures the proprietor against copying by others of the original work, but does not confer upon him a monopoly in the intellectual conception which it expresses. Johnson vs. Donaldson. U. S. Circuit Court, S. D. New York, July 19, 1880.

VALIDITY OF PATENT.

On motion for an injunction in a suit upon a patent: *held*, that as the plaintiff proceeds on the ground that there is no license and that the defendant is at liberty to contest the validity of the patent. Mayo vs. Whitney. U. S. Circuit Court, S. D. New York, June 19, 1880.

INSURANCE.—TOTAL LOSS.

A policy of insurance upon a building is an insurance upon the building as such, and not upon the material of which it is composed. Whether a total loss occurred depends upon the question whether, after a fire, the thing insured still exists as a building, not whether the materials of which it is composed were physically destroyed. Williams vs. Hartford Fire Ins. Co. Supreme Court, California, March 29, 1880.

QUIT CLAIM DEED.—EFFECT IN PASSING TITLE.

A deed of release and quit claim will as effectually pass the title and the covenants running with the land, as a deed of bargain and sale, if the deed itself contains no words restricting its meaning. Brown vs. Banner Coal Co. Supreme Court, Illinois, June 17, 1880.

LIABILITY OF LANDLORD.

When portions of a building are let to different tenants and the landlord retains control of the general passage way and stairs, he may be liable to tenants for injuries received from want of repair therein, known to the landlord and not communicated to the tenant. Looney vs. McLean. Supreme Court, Mass., June, 1880.

CONTRACTS.—CONSIDERATION.

The agreement to undertake the claim is a consideration to support a contract for a percentage of the amount collected. Lawson vs. Bachman. N. Y. Ct. of Appeals, May, 1880.

Iron and Steel.

According to the report of the United States Bureau of Statistics, the following table shows the stocks of foreign iron of all descriptions and steel rails remaining in bonded warehouse in the United States at the end of the fiscal year June 30, 1880.

	At New York.	Other Ports.	Total U. S.
Pig iron tons	79,545	80,189	150,734
Bar iron	1,420	13,111	14,531
Band, hoop & scroll iron	1,370	2,061	3,431
Iron rails	29,314	3,964	33,278
Sheet iron	776	278	1,054
Scrap iron and old rails	96,501	25,064	121,564
Steel rails	9,453	3,147	12,600
Total	218,379	127,813	346,192
Invoiced value	$5,750,429	$3,152,709	$8,912,138
Add $10 per ton for duty, freight &c.	2,183,790	1,328,130	3,511,920
Apparent gross value	$7,943,219	$4,480,839	$12,424,058

Public Debt of the United States.

The following is a recapitulation of the public debt statement issued September 1, 1880:

	Amount Outstanding.	Interest.
Debt bearing interest in coin, viz:		
Bonds at 6 per cent	$229,440,150 00	
Bonds at 5 per cent	480,410,250 00	
Bonds at 4½ per cent	250,000,000 00	
Bonds at 4 per cent	738,241,350 00	
Refunding certificates	1,106,450 00	
Navy pension fund, 3 per cent.	14,000,000 00	
	$1,713,198,400 00	$15,672,400 80
Debt on which interest has ceased since maturity	6,128,035 26	771,412 11
Debt bearing no interest, viz:		
Old Demand and legal-tender notes	$346,741,896 00	
Certificates of deposit	11,300,000 00	
Coin and Silver Certificates	20,835,940 00	
Fractional currency	7,181,995 37	
	$386,059,831 27	
Unclaimed interest		7,327 03
	$2,105,386,266 63	$15,851,139 94
Total debt, principal and interest to date, including interest due and unpaid		$2,121,237,406 57

AMOUNT IN TREASURY.

Interest due and unpaid	$2,964,803 76
Debt on which interest has ceased	6,128,035 26
Interest thereon	771,412 11
Gold and silver certificates	20,835,940 00
U S Notes held for redemption of certificates of deposit	11,300,000 00
Cash balance available Sept. 1, 1880	154,668,141 10
	$196,369,332 23
Debt, less amount in Treasury, Sept. 1, 1880	$1,924,869,074 34
Debt, less amount in Treasury, on the 1st ult.	1,936,896,241 92
Decrease of debt during the month	$12,027,167 59
Decrease of debt since June 30, 1880	$17,603,221 00

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$258,851 20
Kansas Pacific bonds, 1862-64	6,303,000 00	63,030 00
Union Pacific bonds, 1862-64	27,236,512 00	272,365 12
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	16,000 00
Western Pacific bonds, 1862-4	1,970,560 00	19,705 60
Sioux City and Pacific bonds, 1862-64	1,628,320 00	16,282 20
Totals	$64,623,512 00	$646,235 12

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,643,333 04; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $33,291,329 39.

☞ The Ohio and West Virginia Railroad is now open for freight and passenger business between Columbus and Gallipolis.

☞ Farish and Randolph, contractors, have commenced work on the Richmond and Alleghany railroad on the sections between the mouth of North river and Buchanan, Va.

British Agricultural Returns.

James Caird, the eminent agricultural authority, writes to the London Times that agricultural returns from Great Britain and Ireland show, as compared with 1879, a slight increase in the acreage of wheat, a decrease of 7½ per cent in that of barley, an increase of 5 per cent in that of oats, and scarcely any change in that of potatoes. The quality and yield of wheat will be so greatly superior that if the present splendid harvest weather continues a fortnight longer we may reckon on a crop of from three to four million quarters, or nearly two months consumption better than in 1879. Potatoes promise favorably. The dry, clear weather will, it may be reasonably hoped, go far to check further progress of disease. Grass and green crops, except mangold, are abundant. The first hay crop was light and much damaged by rain, but it will be largely supplemented by a heavy second crop. Cattle are deficient to the extent of 90,000 head, and sheep nearly two millions, or 5½ per cent, in consequence of rot resulting from the excessive wet of the last season.

☞ The Costa Rica government has formally protested against "the validity of the contract for the construction of an interoceanic canal concluded in Managua, the capital of Nicaragua, May 25th last." It does not protest because the material interests of the country would suffer by the completion of the work, but believes the signing of such a contract without the previous consent of Costa Rica "is an offense against the honor and dignity of the nation." This protest is dated June 28, and is answered by Nicaragua July 23 by a denial of Costa Rica's claims. Costa Rica claimed equal interest and a common right with Nicaragua to the free use of the San Juan river and harbor, and the treaty between them provided, under certain circumstances, that Nicaragua should grant no concessions for canal construction without previous consultation with Costa Rica.

☞ The Post Office Department has ordered the transportation of United States mails over the recently completed portion of the Southern Pacific Railroad from Yuma to Benson, Arizona, a distance of 300 miles. This completes a continuous route of mail transportation by rail from San Francisco through the entire length of the State of California and nearly across the southern portion of Arizona, a distance of over 1,000 miles. The transportation of the mails over the Arizona end of the route will begin on the 20th of September, and will be the first railroad mail service ever performed in the Territory.

☞ The sale at Philadelphia of the Galveston, Brazos and Texas narrow gauge railroad, which was to have taken place on the 24th ult., has been postponed until Nov. 30.

☞ The annual meeting of passenger agents will be held in Baltimore on the 8th of September.

☞ J. A. Banner has been appointed Superintendent of the Pittsburgh and Western Railroad.

☞ The survey of the Annapolis and Baltimore Short Line Railroad has been completed.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, September 2, 1880.

The quotation for call loans to-day at the Stock Exchange was 2@3 per cent, generally 2½. The highest rate was 3 per cent, and at the close 2 per cent was asked.

The posted rates of the leading drawers of sterling are still 4.82@4.84. The actual rates are 4.80¾@4.82¼, and 4.83@4.83½. Cable transfers are 4.83¾@4.84, and prime commercial bills are 4.79@4.79½.

The payments made from the Treasury by warrants during the month of August, 1880, were as follows: On account of civil and miscellaneous, $5,271,682 75; War, $3,720,949 99; Navy, $1,159,140 54; Interior (Indians), $783,660 67; Interior (Pensions), $5,729,688; total, $16,665,071 96. The above does not include payments made on account of the interest or principal of the public debt of the United States.

The following is a statement of United States currency outstanding Aug. 31: Old demand notes, $60,880; legal tender notes, all issues, $346,681,016; one-year notes of 1863, $16,765; two-year notes of 1863, $12,700; two-year coupon notes of 1863, $23,350; compound interest notes, $248,310; fractional currency, all issues, $15,557,933 70. Total, $362,625,954 70.

The internal revenue receipts for August amounted to $10,497,091, which is $1,069,127 more than the receipts for 1879. The gain in revenue receipts for the first two months July and August, of the present fiscal year, on the re-

ceipts for the corresponding months of 1879 is $2,428,937.

The Treasury Department has directed that $20,000,000 in gold coin in the New York Sub-Treasury be placed to the credit of the Superintendent of the Assay Office in this city. This coin is to pay for foreign bullion as it arrives. It is officially estimated that about $4,000,000 of foreign gold will arrive at New York each week until the first of November next.

The Secretary of the Treasury has issued notices to the various sub-treasuries that standard silver dollars will be sent free of postage in sums of $65, at the risk of the party to whom sent, at his expense for registration, a fee of ten cents to be deducted at the Treasury from the remittance. Fractional silver coin in sums of $70 will be forwarded in the same way.

The offers to sell Government bonds to the Treasury on Wednesday amounted to $9,016,250, of which about $6,000,000 were offered at figures that were close to the then market prices. The Secretary ordered that $2,500,000 be purchased, which were awarded as follows: $976,000 6s 1880 at 102.48@102.51; $33,000 6s 1881 at 104.78; $1,491,000 5s 1881 at 102.78.

State Bonds at the Board were dull and steady; Railroad Bonds and Government Securities were strong throughout; and railroad shares, compared with our quotations for the previous week, have advanced in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 43¾@45; Canada Southern, 60½@62; Central of New Jersey, 76¾@76⅞; Central Pacific, 74@75; Chicago and Northwestern, 101¾@101⅞; do. pref., 120¾@120⅞; Chicago, Burlington and Quincy, 137½@138; Chicago and Alton, 115@116; Chicago, Milwaukee and St. Paul, 89⅜@89½; do. pref., 110½@111; Chicago, Rock Island and Pacific, 114@114⅞; Chicago, St. Louis and New Orleans, 38@39; Columbus, Chicago and Indiana Central, 21¼@21⅜; Delaware and Hudson Canal, 86@86¼; Delaware, Lackawanna and Western, 90⅛@90¼; Hannibal and St. Joseph, 43⅞@44; do., pref., 86⅛@86⅜; Houston and Texas Central, 61@64; Illinois Central, 112½@113; Lake Erie and Western, 33⅝@33⅞; Lake Shore and Michigan Southern, 107¼@107⅜; Louisville and Nashville, 129@131; Manhattan Elevated, 27⅜@27½; Morris and Essex, 109¾@110¼; Metropolitan Elevated, 90@91; Michigan Central, 94¾@94⅞; New York Elevated, 111@112; New York Central and Hudson River, 130⅝@130⅞; New York, Lake Erie and Western, 39¾@39⅞; do. pref., 69@69½; New York, Ontario and Western, 24¼@24½; Northern Pacific, 30¼@30½; do. pref., 53½@54; Ohio and Miss., 35⅜@35⅝; do. pref., 75½@76½; Pacific Mail, 40¾@41; Philadelphia and Reading, 23⅛@23¾; St. Louis and San Francisco, 34@36; do. pref., 46½@48; do. 1st pref., 77½@79¼; St. Louis, Iron Mountain and Southern, 57¼@57½; Union Pacific, 93⅞@94; Western Union Telegraph, 104⅞@105; Wabash, St. Louis and Pacific, 39@39¼; do. pref., 69¾@70.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York and Atlantic Railroad.

Articles of incorporation of the New York and Atlantic Railroad Company, with a capital of $500 000, have been filed in Albany by Charles H. Burtis and others. This company will soon acquire a lease of the New York, Greenwood and Coney Island Railroad, and that road will be extended by the building of a new road from the corner of Thirty-seventh street and Ninth avenue, in Brooklyn, to a point near Tunison's, on the Coney Island road. It is also intended to build a branch to Rockaway. A lease has been signed by the Directors of the New York, Greenwood and Coney Island Railroad to Mr. Edmund Terry, of Brooklyn. In relation to this lease Mr. L. W. Slocum, the President of the company, stated that it was merely a matter of form necessary in reorganizing the company ; that Mr. Terry was not a stockholder of the old company, but was largely interested in the new company, in which most of the stockholders of the old company have also acquired an interest, and that the new company will now lease the New York, Greenwood and Coney Island Railroad from Mr. Terry.

Springfield, St. Louis and Nashville Railroad.

Articles of incorporation of the Springfield, St. Louis and Nashville Railroad Company were filed for record in the Clerk's office of the Circuit Court of Springfield, Ill., on the 25th of August. The corporators are: Bluford Wilson, David T. Littler and L. W. Shepherd, Springfield ; Jonathan Merriam, Tazewell County ; and Edward C. Rice, St. Louis. The articles state that it is proposed to construct a road from Springfield to Centralia, and thence to Murphysboro and East St. Louis. The principal office is to be at Springfield, and the capital stock is fixed at $2,000,000. The first Board of Directors is to include the incorporators and St. John Boyle, Louisville, Ky.; J. H. Wilson, Boston, Mass.; Robert M. Vandoren, Hillsboro, Ills.; A. G. Henry, Greenville, Ills.; H. P. Buxton, Carlyle, Ill., and T. B. Needles, Nashville, Ills. Engineers will commence the survey as soon as possible and the work of construction is expected to commence during the present year.

☞ It is stated that a company is being formed for the purpose of taking from the Sutro Tunnel Company its mining and milling rights, with a view to the development of the mines belonging to that company, of working the ores from them, as well as the low grade ores of the Comstock lode. Works will be erected at the mouth of the Sutro Tunnel by the new company, which will probably be called the Sutro Milling and Mining Company, will be identical in all respects with that of the Sutro Tunnel Company—namely, 2,000,000 shares of $10 each, unassessable. Three-ourths or seven-eighths of these shares will be distributed to the owners of Sutro Tunnel stock, free of cost to the latter, while the remaining balance will furnish the basis for a working capital.

☞ The contract between the Black River Railroad Company and the Chicago and Northwest Railway Company has been signed by both parties. The agreement is that the former is to grade and tie the road as surveyed between Neillsville, Wisconsin, and Merrillian Junction, and the latter is then to iron the road and put on a sufficient amount of rolling stock, and the whole is to be finished within ninety days from the date of contract.

☞ A decree of foreclosure and sale was entered on the 30th ult. in the United States Circuit Court, Springfield, Ills., against the St. Louis and Southeastern Railway Company. John A. Jones, of Springfield, and W. P. Fishback, of Indianapolis, Masters in Chancery, were appointed special Commissioners to conduct the sale.

☞ It is expected that the Toledo, Delphos and Burlington Railroad will have completed its connections from Toledo to Dayton, Ohio, and to Frankfort, Ind., before winter sets in. Col. P. D. Fisher is Chief Engineer of the road.

☞ The first mortgage bonds of the Eastern (Mass.) Railroad Company, now drawing 4½ per cent interest, will commence to draw 6 per cent interest on the 1st of September, 1882.

Pennsylvania Railroad.

During the present summer the Pennsylvania Railroad Company has been, and is still, engaged in making improvements upon its roads which are more extensive than any ever made before. The work of straightening the main line has progressed so that in some localities the new track is used. A Lancaster firm has the contract for this work between Ardmore and Merion, a distance of two miles. Horseshoe curve is being beautified, by planting flowers and shrubbery along the tracks. New stations are soon to be built at Eagle and Frazier. The attractions of the Cresson House will soon be increased by turning the pond formerly used as a feeder to the Johnstown Canal into a lake for pleasure sailing.

The project of reading rooms for train men when off duty is being carried out, and one of these rooms is in course of construction now at Altoona.

The improvements on the New Jersey division include a new stone station at Holmesburg, a new iron bridge over the Hackensack River, and the widening of the cut through Bergen Hill to give room for two additional tracks.

The passenger traffic of the road has been constantly increasing year by year, and at present the earnings for 1880 are $1,000,000 over those of 1879. This can be accounted for by the fact that the company is constantly increasing its facilities for the rapid transmission of passengers.

☞ A special meeting of the stockholders of the Elgin and State Line Railroad Company will be held in Chicago on the 8th of October for the purpose of taking into consideration a consolidation of all the property and franchises of the Elgin State Line Company with all the property and franchises of the State Line and Union Railroad Company so as to form a new consolidated corporation.

☞ The directors of the Peoria, Decatur and Evansville and the Evansville and Peoria railroads have filed articles of consolidation in the office of the Secretary of State of Indiana. The capital stock of the company, which is to be known as the Peoria, Decatur and Springfield road, will be $6,000,000.

☞ Track laying on the Keosauqua branch of the Chicago, Rock Island and Pacific Railway has been commenced, and it is expected that the entire line will be completed and in running order within thirty days.

☞ Work on the new Cleveland, Canton, Coshocton and Straitsville Railroad has commenced near and at Monroe, and a large force of men and teams are employed.

☞ The grading for the Virginia City end of the Carson and Colorado Narrow Gauge Railroad is completed and the laying of the track commenced.

☞ The Cincinnati and Portsmouth Narrow gauge railroad will be sold at the Court House in Batavia, Clermont county, Ohio, on the 4th of September.

Bristol Coal and Iron Railroad.

A contract was closed at Estillville, Scott County, Va., on the 24th ult., that secures the speedy completion of the Bristol Coal and Iron Narrow-Gauge Railroad from Bristol, Va., to Big Stone Gap. The Pittsburg company, represented by J. B. Imboden, undertake all of it which the narrow gauge company are unable to do. The Bristol Coal and Iron Narrow-Gauge Company agree to furnish the right of way and the engineering for the entire line of sixty-one miles, and to complete the grading as far as Speer's Ferry, at Clinch River, distant forty miles from Bristol. The Pittsburg company agree to complete the grading to Big Stone Gap, and to do all the masonry, trestling, bridging, to put down the ties and rails, and to equip the road with four trains at once. These are all to be done and the road in operation against October, 1881. As soon as the grading reaches Estillville they are to put on two daily trains. The 20th of next month they are to commence the bridge across the North Fork of Holston, near Mendota, and to press it to completion. The rails will be of steel, thirty-five pounds per yard. The ties will be of the best quality and the road capable of the highest grade of service. In the mean time the coal and iron mines at the Gap will be opened and connected by tramways, so that a powerful tonnage will be thrown upon the road at once on its completion.

Chicago and Northwestern Railway.

The business and operations of the Chicago and Northwestern Railway Company and its proprietary roads for the year ending May 31, 1880, are as follows:

Total gross earnings		$17,349,349 04
Total operating exp.	$8,049,358 48	
Total taxes	382,241 34	
Total interest on bonds	3,322,015 68	
Total rental of leased roads	1,408,002 80	
For balance in operating Sheboygan and Fond du Lac R. R.	4,876 22	
For balance in operating Sheboygan and Western Railway	2,163 94	
For balance in operating Galena and Western Railroad	1,031 46	
For balance in operating Chicago and Tomaha Railroad	1,371 22	
For sinking funds	98,120 00	
		13,269,181 14
Net		$4,080,167 90

From this amount dividends have been declared as follows:

1¾ per cent on preferred stock, Sept. 8, 1879	$376,642 00	
1¾ per cent on preferred stock, Dec. 4, 1879	376,642 00	
1¾ per cent on preferred stock, Feb. 25, 1880	376,642 00	
1¾ per cent on preferred stock, June 3, 1880	376,642 00	
3 per cent on common stock, June 3, 1880	449,478 00	
		1,956,046 00
Surplus for the year		$2,124,121 90

A dividend of 3 per cent on the common stock, amounting to $449,475, was also declared on the 4th of December last out of the surplus of $481,409 90 belonging to the preceding year.

The gross earnings were from the following sources:

	1879-80.	1878-79.
From passengers	$3,737,342 95	$3,240,695 91
" freight	12,897,777 52	10,687,367 59
" express	285,762 26	270,220 80
" Mail	292,091 74	282,306 76
" Miscellaneous	136,374 57	150,330 33
	$17,349,349 01	$14,580,921 39

The increase in gross earnings was $2,768,427-65, or 18.98 per cent.

Compared with the preceding year, the total charges on the combined roads were as follows:

	1879-80.	1878-79.
Operating expenses	$8,049,358 48	$7,349,652 67
Taxes	382,241 34	357,996 46
Interest on bonds	3,322,015 68	3,261,792 75
Sinking funds	98,120 00	98,120 00
Rental of leased roads	1,408,002 80	1,225,731 61
Sheboygan and Fond du Lac Railroad, the Sheboygan and Western Railway, Galena and Wisconsin R. R., and Chicago and Tomah R. R.	9,442 84	....
	$13,269,181 14	$12,293,293 49

Total increase equal to $975,887 65, or 7.93 per cent.

Net earnings, year 1879-80	$4,080,167 90
" " " 1878-79	2,287,627 90
Increase, equal to 78.35 per cent.	$1,792,540 00

The gross earnings on the different lines were as follows:

Chicago and North Western	$15,912,875 61
Winona and St. Peter, (including branches and extensions)	1,033,208 28
North Western Union Railway	327,987 40
Iowa Midland Railway	69,717 21
Toledo and North Western Railway	5,560 54
Total	$17,349,349 04

The operations of the Chicago and North Western Railway proper, including its leased roads in Iowa, were as follows:

Gross Earnings:

From passengers		$3,274,508 07
" freight		11,995,974 65
" express		269,604 13
" mail		256,967 60
" miscellaneous		115,821 16
		$15,912,875 61
The operating expenses were (41.89 per cent of gross earnings)	$6,666,137 59	
Taxes	333,459 05	
		6,999,599 64
Net receipts		$8,913,278 97
From which deduct:		
Interest on bonds	$2,333,030 68	
Rental Chicago, Iowa and Nebraska R. R.	537,200 98	
Rental Cedar Rapids and Mo. River R. R.	789,991 04	
Rental Maple River Railroad	27,788 75	
Rental Des Moines and Minne. R. R.	26,679 88	
		3,714,691 33
Net earnings		$5,198,587 64
Less sinking fund account		83,120 00
Net balance		$5,115,467 64

PROPRIETARY ROADS.

Gross Earnings:

For acc't Sheboygan and Western Railway	2,163 94	
For acc't Galena and Wisconsin Railroad	1,031 46	
For acc't Chicago and Tomah Railroad	1,371 22	
		2,471,773 17
Combined net profits for the year		$4,080,167 90
To this, add balance to credit of income account May 31, 1879	$1,342,772 17	
Less amount charged off, being old claim against U. S. Post Office Department for deductions for Mail Service, prior to June 1st, 1877	29,359 32	
		4,313,412 85
Total income account		$8,393,580 75

From which must be taken the several dividends declared during the year, amounting to—

7 per cent. on the preferred stock	$1,506,568 00	
6 per cent. on the common stock, including 3 per cent. paid from the income of preceding year	898,953 00	
		2,405,521 00
Leaving a balance to credit of Income Account May 31, 1880, amounting to		$5,988,059 75

The per centage of operating expenses to earnings was 46.40 per cent., and of operating expenses and taxes 48.60 per cent., as against 50.41 per cent. and 52.86 per cent. respectively in the preceding year.

The total increase in operating expenses over those of the previous year was $699,705.81, equal to 9.52 per cent.

The increase in passenger earnings was $496,647.04, or 15.33 per cent.; the whole number of passengers carried was 3,964,798, an increase of 636,371, or 19.12 per cent., and the average rate received was 94.26 cents each, against 97.36 for the previous year; a decrease of 3.18 per cent.

The whole movement of passengers amounted to 140,116,884, carried one mile, showing a gain of 20.72 per cent., while the rate received per passenger per mile decreased from 2.79 the previous year to 2.67 cents, or 4.30 per cent. This reduction in rates is equal to $181,918.11 on the passenger business of the year.

Compared with the previous year, there was an increase of $2,260,409.93 in freight earnings, or 21¼ per cent.

The number of tons of freight carried during the year was.....	5,574,635
The amount carried in the preceding year was.....	4,265,937
Increase, 30.68 per cent., or...	1,308,698
The movement of tons carried one mile.....	865,909,542
Same for previous year.....	681,878,311
Increase.....	184,031,231

The average rate received per ton was $2.31, and the rate per ton per mile was 1.49 cent, as against $2 49 and 1.56 cent respectively in the previous year. The per centage of decrease in the rate per ton was 7.22, and in the rate per ton per mile, 4.49 per cent. This decrease in the average rate per ton per mile, if applied to the entire movement of freight, would be equivalent to a reduction of $610,411.34 on this branch of traffic during the year.

CAPITAL STOCK.

The total amount of capital stock and fractional scrip May 31, 1880, is as follows:

Common stock and scrip.....	$15,109,655 97	
Preferred " "	21,702,844 56	
		$36,812,500 53
Add the $500,000 of preferred stock yet to be issued, as provided in consolidation with La Crosse, Trempealeau and Prescott R. R. Co., and the aggregate of stock issued and to be issued, will amount to $37,312,500 53.		
Stock owned by the company:		
Common stock.....	$121 398 47	
Preferred.....	177,491 84	
		298,890 31
Balance afloat.....		$36,513,610 22

BOND ACCOUNT.

The aggregate bonded indebtedness on the entire property on the 31st of May, 1879, was $47,206,000. This amount has been increased $2,929,000 during the year, making a total of $50,135,000 on the 31st of May last.

The increase consists of $2 900,000 of Chicago and North Western Railway Co's 6 per cent. Sinking Fund Bonds of 1879, issued to represent 140 miles of railroad at $15,000 per mile, and 80 miles of railroad at $10,000 per mile, of the following named railroad companies, whose First Mortgage Bonds in corresponding amount have been received and by this company deposited with the Farmers' Loan and Trust Co., Trustee, as security for the issue, viz.

On account Chicago and Dakota Railway, 46 miles.....	$690,000
On account Dakota Central Railway, 61 miles.....	915,000
On account Toledo and North Western Railway, 14 miles.....	210,000
On account Stanwood and Tipton Railway, 8 miles.....	120,000
On account Chatfield Railroad, 11 miles.....	165,000
On account Sheboygan and Western Railway, 80 miles.....	800,000
	$2,900,000

$160,000 of Menominee River Railroad Extension Bonds, guaranteed by the Chicago and Northwestern Railway Co. have been issued for an extension of that line into the iron districts of Michigan; Consolidated Sinking Fund Currency Bonds of Chicago and North Western Railway Co., to the extent of $13,000, have also been issued for a corresponding amount of other bonds taken up and cancelled. Total bonds issued, $3,073,000.

$58,000 of Winona and St. Peter Extension Gold Bonds on the Western Division; $31,000 of Winona and St. Peter First Mortgage Bonds and $40,000 of Winona and St. Peter Second Mortgage Bonds on the Eastern Division of that road, have been purchased with monies received from sales of Land Grant Lands of that Company, and the bonds, amounting to $129,000, cancelled; $6,000 Galena and Chicago Union First Mortgage Bonds; $5,000 Mississippi River Bridge Bonds; $1,000 Beloit and Madison First Mortgage Bonds; $800 Chicago and North Western Railway Co. Preferred Sinking Fund Bonds; $100 Funded Coupon Bonds, and $100 General First Mortgage Bonds were retired and cancelled; $2,000 of Galena and Chicago Union Second Mortgage Bonds, being the last of the issue, matured and not presented for payment, have been paid to the Farmers' Loan and Trust Company, Trustee. Total bonds retired, $144,000.

MILES OPERATED, (2,215.83.)

The following additional railroad was constructed and put into operation at different periods during the year, viz: 12.76 miles of the Sac City Extension and 11.40 miles of the Toledo and North Western Railway in Iowa; 3.63 miles of Branch line to Appleton Water Power in Wisconsin; 46.39 miles of the Chicago and Dakota Railroad in Minnesota, and 56.66 miles of the Dakota Central line in Dakota. Total railroad constructed, 130.84 miles, whose average time of operation equalled 61.80 miles for the whole year.

This amount, with the 2,154.03 miles in operation at the beginning of the year, makes a total of 2,215.83 miles operated for the entire year.

The aggregate number of miles of railroad owned and controlled by the company at the close of the fiscal year was 2,512.77.

ROAD SERVICE.

The miles run by passenger engines were 3,006,812; by freight engines, 6,539,164; by switching engines, 2,541,808; by gravel train engines, 664,520; and by wood train engines, 17,262 miles. The total number of miles run by all engines was 12,769,566, against 11,125,659 in the preceding year, an increase of 14 78 per cent.

The total number of miles run by cars on passenger trains was 14,359,731, and the average miles that each passenger was carried, 35.34.

The total miles run by freight cars were 151,270,270, and the average distance that each ton of freight was carried, 155.33 miles.

EQUIPMENT.

The number of locomotive engines on all the various lines of the company is 425, an increase of 48 engines; the number of cars of every description is 13,254, being an increase of 2,900 cars during the year.

Referring to connections and extensions of the road, the report says:

An important extension, organized as the Toledo and Northwestern Railway is in progress in Iowa. It joins the main line of this company at Tama Station, Tama County, running through the town of Toledo—whence it takes its name—and pursues a northwesterly and westerly course through one of the most productive districts in that State; its construction will prevent the diversion to other roads of traffic which we now enjoy, and will secure a large accession of new business for the main lines of the company to Chicago, a distance of 270 miles.

A permanent lease of the Des Moines and Minneapolis narrow gauge railroad, extending from the City of Des Moines to Calanan, in Hamilton County, Iowa, and intersecting the main line of this company at Ames, was entered into during the year. The gauge has since been widened on that part of the road between Ames and Des Moines, giving to this company a continuous standard gauge line to the capital of the State. The length of the entire road is 58 miles.

The Sheboygan and Western Railway, formerly called the Sheboygan and Fond du Lac Railroad, consisting of about 80 miles of railroad, extending from Sheboygan to Princeton, Green County, Wisconsin, was also added during the year.

A short line of 6½ miles, called the Rock River Railroad, is being built between Janesville and Afton, that will promote the business of the Rock River Valley, and effect a saving of time and distance in the transfer of cars between the old Wisconsin, Madison and Galena Divisions.

The company has acquired the Galena and Southern Wisconsin and the Chicago and Tomah Railroads, now constructed with a narrow gauge for a distance of 92 miles between Galena, Ill., and Woodman, Wis., with branches to Platteville and Lancaster. An extension of the Chicago and Tomah line will be constructed with a standard gauge direct to Madison, where it will connect with the main line to Chicago, and with the proposed Madison and Milwaukee line to Milwaukee.

The extension which is being constructed towards the Black Hills, to a point near Fort Pierre on the Missouri River, is making rapid progress. The road leaves the main line of the Winona and St. Peter Railroad, at Tracy Station, Lyon County, Minnesota, and is projected in a very direct westerly course across the Territory of Dakota, with lateral branches. That portion of the line in Minnesota, consisting of 46 miles of well built steel track railroad, fully equipped, extending from Tracy to the Dakota boundary, is called the Chicago and Dakota Railroad; and that portion of the line lying in Dakota takes the name of the Dakota Central Railroad.

The length of the extension to the Missouri River will be about 250 miles, and up to the date of this report 170 miles of the road have been completed, and the track laid with steel rails. It is expected that the work will reach the Missouri and a branch be constructed up the valley of the James River during the present year.

This extension will open up an excellent through route for passengers and freight by means of connecting lines of stages and express wagons from the Missouri River to the mining districts of Deadwood and the Black Hills.

The Extensions and Branch Lines that are being added to our system will furnish new elements of strength and protection to the company's property. Their traffic will come from some of the most productive portions of Iowa, Minnesota and Dakota, where the country is being rapidly overspread with settlement and improvements. The cost of these roads is far below that of the older properties, and the additional business they will supply can be done to an advantage over the existing lines of the company at a comparatively small increase of expenditure. During the last year the gross earnings derived from all sources on the old and new roads increased $2,768,427.65 or 18.98 per cent, while the net earnings were increased by the large amount of $1,792 540, or 78.35 per cent, and were unparalled in the history of the company.

☞ The contracting force engaged on the extension of the Northern Pacific Railroad west of the Missouri will complete the grading to the Yellowstone early in October. The President of the Company has directed the chief engineer to transfer the working force directly across to the located line of the Yellowstone division, with the intention of reaching and passing Miles City and Fort Keogh next July.

☞ Two surveys have been made by the engineers of the short line route between Annapolis and Baltimore. One has considerable grading in it and the other much bridging. The first line leaves Annapolis by way of Horse-shoe Point, and the other by Cove Cork, Severn river. One route enters Baltimore by way of Brooklyn, and the other leaves it to the right.

☞ The construction of a branch road from New Haven to the Connellsville Coke and Iron Company's works will be commenced by the Pennsylvania Railroad Company in a few days.

Decatur, Springfield and Roodhouse Railroad.

Articles of incorporation were filed in the Clerk's office of the Circuit Court of Springfield, Ills., on the 25th ult., of the Decatur, Springfield and Roodhouse Railroad Company. The incorporators are: Binford Wilson, David T. Littler and L. W. Shepherd, Springfield; Jonathan Merriam, Tazewell county; and Edward C. Rice, St. Louis. This corporation proposes to construct a railroad from Decatur to Springfield, and thence through Morgan, Macoupin and Greene Counties to Roodhouse. The principal office is to be at Springfield. The capital stock is fixed at $1,000,000, and the first Board of Directors includes Messrs. Wilson, Littler and Shepherd, of Springfield; E. C. Rice, of St. Louis; St. John Boyle, of Louisville, and James H Wilson and Parker C. Chandler, of Boston.

ENVELOPES.

To Railroad Companies and City Street Railways.

The subscribers are largely in the Envelope Manufacturing business, making every kind used by Railroads, including the cheap Manila paper. Also the little street car Envelopes for change or tickets. All well made and sold at low prices. Samples furnished when requested.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

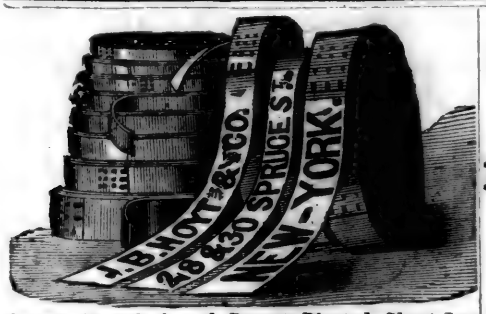
Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. R. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts —shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St.,
NEW YORK.

PATENT
MINERAL WOOL.

ITS FOREMOST QUALITIES:

CHECKING TRANSMISSION OF HEAT, COLD AIR, SOUND AND ELECTRICITY AS AN AIR-HOLDING MATERIAL, ABSOLUTELY FIRE-PROOF AS A MINERAL—RAT AND VERMIN-PROOF, AND NOT ATTRACTING DAMPNESS, BECAUSE VITREOUS.

Its Manufacture, Composition and Uses in the Construction of Dwellings, etc.

This pamphlet and small sample mailed free.

MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

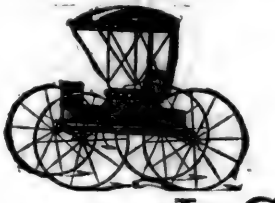
NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.



E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,
MANUFACTURER OF ALL KINDS OF CARRIAGES

Fine Work both Heavy and Light a Specialty!

☞ All the latest Styles or Patterns kept in Stock or Works.

MANUFACTORY AND REPOSITORY, Corner Boreum Place and State St., Brooklyn, N. Y.

EAMES VACUUM BRAKE CO.,
RAILWAY TRAIN BRAKES,

P. O. BOX 2,878. SALES OFFICE, 15 GOLD ST., NEW YORK. Represented by THOS. PROSSER & SON.

THE EAMES VACUUM BRAKE is confidently offered as the most efficient, simple, durable and cheapest power Brake in the market. Can be seen in operation upon over fifty roads.

Elevated Railroads in Boston.

For two years past the Legislature of Massachusetts has been petitioned to grant an Act of Incorporation to an Elevated Railroad Company, for Boston and vicinity; and for two years have they refused to grant the request, the petitioners being met each time with "leave to withdraw." At the last session of the Legislature, although the petition was presented and managed with great ability by a gentleman largely interested in horse railroads, it was understood that only one member of the committee was in favor of the proposed plan.

There is an extreme difference of opinion with regard to the exigency of an elevated railroad at Boston, and the matter has been warmly, not to say bitterly, discussed. The interest taken in the matter was shown by the fact that a large percentage of the members of the Legislature asked to be appointed members of the street railroad committee, leaving the speaker of the House in a quandary as to whom to select.

Those in favor of the elevated road say that Boston has but two thoroughfares—Washington Street and Tremont Street — through which nearly all the travel passes. These streets are narrow and limited in their capacity. This capacity they say has been reached, and point to a resolution passed by the Board of Aldermen for the last two years. The resolution reads as follows: "Whereas, The maximum number of cars which can be accommodated in the more crowded public portion of the streets has been reached, no further legislation tending to increase the number should be favored." They also show that the average increase of passengers on horse railroads for the last twenty years has been two millions and a half of passengers per year and instance the several occasions during the past few years when multitudes have been deprived of the horse cars on account of snow blockades and horse epidemics.

On the other hand the opponents of elevated railroad schemes insist that the business area of Boston is quite limited and that there are nine steam railroads radiating from the outer edge of this business centre, each of them terminating on or within a circle with a half mile radius, the center of which is the City Hall. They point to the fact that in this business center the streets are narrow and crooked and unsuitable for elevated roads and say that outside the business center more surface roads could be built if needed and that, in short, there exist in Boston none of the conditions, which make elevated roads necessary and desirable in New York.

The petitioners for an Incorporating Act last year were men of experience, wealth and ability and there is no doubt they were acting in good faith. Notwithstanding the rebuff which they received, a new organization has just been formed, which proposes to provide Boston and its suburbs with an extensive elevated railroad system, that will leave very little space to be covered with rival roads. The system as projected is to extend through the whole length of Washington Street, one through Tremont Street, one through Atlantic Avenue, and another through Charles and Kneeland Streets, stretching in one direction through Charlestown nearly to Somerville; through Cambridge to Mt. Auburn, and through Boston territory to South Boston, Brookline, Dorchester and Milton.

It is very doubtful, however, whether the present plan will succeed. The General Railroad Law of Massachusetts was not intended by the Legislature to embrace elevated roads; indeed when it was passed elevated roads had hardly been mentioned. The language of the statute, however, is very broad, and the new companies—for there are several companies in the scheme—are fully determined to test the law by a final appeal to the Supreme Court. The law provides that no railroad track shall be laid longitudinally within the streets of a city without the consent of the Mayor and Aldermen, who, in giving such consent, may impose such conditions as to the location, construction and use of the railroad as may be agreed upon by both parties. In case of disagreement an appeal lies to the Railroad Commissioners who seem to have no discretion under the present law but are obliged to fix upon a route subject to certain conditions. For instance, one section of the law provides that no railroad corporation shall be authorized to locate or construct its road until a sworn estimate of the cost is submitted, with bona fide subscriptions of fifty per cent of the estimated cost, and twenty per cent paid into the treasury.

Petitioners for elevated roads before now have always acted upon the theory that elevated roads were not contemplated by the statute and that therefore such roads could not form under it. This we think is the view that the Massachusetts courts will take. Even if the law were broad enough to cover such roads it is doubtful whether the projectors of the present scheme will succeed in their enterprise. The subscribers are not men familiar with railroad matters nor are they men of

special executive ability. They have organized in a singular, not to say suspicious, manner, by fixing the capital stock of the company at five thousand dollars per mile, the lowest sum allowed by law, whereas fifty thousand dollars per mile would be a low estimate for the cost of a properly constructed elevated road. They will meet with a fierce opposition from property holders, steam railroads, horse railroads and rival companies, and their prospects for immediate success are not flattering.

Conservative Boston, however, must prepare for the inevitable; for, notwithstanding the protest of Beacon Hill, the disapproval of State Street and the antagonism of interested parties, she will at length build elevated railroads, but not until she is convinced that they have become an absolute necessity.

Our Shipping Interests.

Encouragement for American ship owners and builders has been long on the way, and so even the forelight of its dawn is stimulating to action an interest in our merchant marine such as has not been evinced for many years. One of the first stimulants has come in the form of the partial opening again to commerce of the ports of the Peruvian coast, from which a large export of guano was formerly made. For this trade American sailing vessels were expressly built, and have in former years been kept encouragingly active by it, though of late owing to the Chilian war the trade has been at a stand still. The American vessels expressly adapted to the traffic will be called into service again, with prospects of a greatly increased business by the starting of a large South Pacific Guano Company recently announced in London.

The grain trade of California with European ports is rapidly increasing, and is giving an encouraging impetus to another branch of important ocean commerce. It is estimated that the surplus of grain for foreign shipment from California will be this year at least fifty per cent larger than last year, the probable surplus being estimated at nearly one million tons. This will necessarily draw to the Pacific coast a fleet of sailing vessels immensely increased in size over that of recent years.

Should the increased number of vessels not be drawn wholly from American ship owners or builders, the encouraging fact still remains that other branches of ocean commerce give equal promise of increase for the coming year, and vessels drawn from one branch to supply the demands of another will only create vacancies in the former that must be speedily filled. The carrying of our products abroad promises this year to be something unparalleled, and as great preparations have not been made to meet it a healthy stimulus is found in the enormous crops, including cotton, to be harvested this fall. It is not unreasonable to anticipate a higher list of freight rates in view of the increased traffic; but a still more healthy feature for our shipping interests will be found in the impetus to be given so surely to American shipbuilding.

The convention of ship owners and others interested in developing and spreading our ocean commerce, to be held at Boston October 6th, has an important work in hand. There are possibilities of accomplishing great good through such a meeting of representative commercial men as are likely to attend. The convention must establish itself on a platform from which it can look over a broad field. It must have under consideration the interests of all branches of commerce, inland and coast as well as ocean, for they are so closely allied as to be inseparable in interests and strongly susceptible each to any injury or benefit done to the other. With a broad unprejudiced survey of the whole field of our commerce and with action turned upon no narrow or selfish bias, the convention is capable of greatly benefitting our important shipping interests in all their branches and earning for itself honors that will be most thankfully bestowed.

The New York Underground Railway.

The much discussed project of an underground railway for New York has at last developed into a fully matured plan; a plan so complete in its construction and so strong in the character and power of its projectors and managers as to guarantee the successful and early completion of this desirable system of rapid transit, which has been so long needed and which far-seeing New Yorkers interested in the welfare of their Island have felt must be provided sooner or later.

Articles of incorporation of the New York Underground Railway Company were filed in the County Clerk's office on the 4th inst. Though the welcome announcement was a surprise to the public generally, the matter is one that has been under long and careful consideration among such men as Gen. McClellan, Mr. George Ticknor Curtis, Mr. Samuel Campbell, Mr. S. L. M. Barlow, Mr. Jewett, and others whose names appear among the directors given below, while in addition there are many more representative men deeply interested in the matter and participators in the plan, who have not yet been publicly identified with it. The estimate of the cost of construction in all its details has been most carefully and critically examined by experts; the cost of rolling stock and running expenses figured most rigidly; the few legal issues that may arise carefully considered; in fact the whole field has been thoroughly studied, and there will be no delay for these usual reasons in pushing the work. The directors for the first year are: Samuel Campbell, Hugh J. Jewett, George R. Blanchard, George Ticknor Curtis, S. L. M. Barlow, R. Sewell, General Geo. B. McClellan, Andrew Gilsey, E. A. Quintard, J. T. Howard, Douglass Campbell, J. F. Ruggles, James F. Pierce.

Perhaps it would be anticipating the official announcement of the action of the first meeting of the directors to make any statement at this writing concerning the financial arrangements of the company, though from interviews with two of the leading directors we could see that plans were well matured in that direction as well as others and that there was no uncertainty or uneasiness felt in regard to the forthcoming of the millions required. Positive announcements, however, will not be made public as to the details of the financial system to be adopted until after the election of officers, but we know from the highest authority that prominent bankers of London and Paris have announced themselves as ready, so soon as the organization should be announced to them, to assume the placing of the bonds, which will probably be done through a form of syndicate. The terms offered by the probable negotiators are said to be very favorable. On this account there is no reason for the surmise which has been expressed that Gen. McClellan would be sent to Europe to place the bonds.

The company will work in part under the franchise of the former "New York Central Underground Railway Company," which has for some time been in the possession of Col. O. Vanderburgh, who conveys the franchise and all the property of the old company to the new organization. Contractors are ready to undertake the work immediately, and the contracts will probably be awarded this month and the work of excavation started in October, with the expectation that the railway will be completed and in actual use before the opening of the World's Fair in 1883.

The road will extend from South Ferry up Broadway and through Union and Madison Squares and Madison Avenue to Forty-second Street. A branch road will run from Madison Square up through Broadway to Central Park. A very important connection is that to be made with the Hudson River Tunnel. The stream of passengers that will be poured into the tunnel under the river from the Erie, the Pennsylvania and the Central Railroad of New Jersey will naturally be caught by the underground railway, and will form for it an immense source of income.

The plan of the construction is the work of Mr. Walter J. Morris, C. E., and includes several novel features of underground tunneling. Two single track tunnels will be built side by side each fifteen feet high and twelve and a half feet wide. They will be partly arched and partly supported by beams, and will be built with tracks on an average twenty-five feet underground, sufficiently deep to avoid water, gas pipes, sewers, etc. The double tunnel is adopted chiefly to assist in ventilation, and to further aid this the engines will carry about the cabs a large flange occupying nearly the entire space of the tunnel, thus creating a strong current through producing a vacuum, which with the introduction of air by artificial means through frequent air shafts should largely obviate the great objection to the London

underground railway—lack of ventilation. If young Mr. Field should have his electric motor fully perfected then a splendid opportunity would be afforded for it here. The cars and the tunnel as well are to be lighted by electricity. Large, sixty-ton, smoke-consuming locomotives, will be used and will burn coke. The walls of the tunnel are to be covered with asphalt on all sides, to avoid dampness. The cars will be both after the style of our Pullman parlor cars and the English railway carriages, with doors at the sides. Trains of eight and ten cars are to be made up, which can seat about one thousand passengers. The rate of speed that can be adopted is estimated at about twenty-five miles an hour. The fare is to be five cents at all hours and to all points. Stations will be located at the leading centres on the route, the chief ones to be built at the Battery, Madison and Union Squares and City Hall. The work of excavation will be started at Madison Square and will not reach Broadway before spring.

The project has been received with great enthusiasm here, and will be looked upon at home and abroad as one of the most promising enterprises that America intends to surprise her visitors with in 1883. People will have the utmost confidence in the project. It does not belong in the realm with visionary speculations. It is in the hands of men who are most thoroughly in earnest and whose financial standing and character are guarantees that it must be made an undoubted success. Running as the road will through the heart of the city, and connecting with such important arteries of travel, it must earn business enough even in its earliest days to pay heavy returns for the investments planned.

The elevated roads are too well established to be superseded, and it is fortunate for both the elevated and the underground roads as it is for the public that their routes cover such different sections of the city. There is room enough for both and each will help, unwillingly perhaps, improve the other until rapid transit in New York has reached a perfection unattainable in any other way.

LATER.

The first meeting of the directors of the New York Underground Railway Co. was held Thursday, the 9th inst., at the office of George Ticknor Curtis, Morse Building. With the exception of Mr. Jewett, Mr. Howard, Mr. Barlow and Mr. Gilsey, the entire board were present. Mr. Jewett and Mr. Howard are in Europe, and a letter from Mr. Howard was read in which he gave the substance of an interview had with Mr. Jewett, August 26th, in which Mr. Jewett expressed his strong conviction of the success of the enterprise. Hon. Samuel Campbell, of Oneida County, occupied the chair as temporary chairman. General Geo. B. McClellan was elected President of the company, and Mr. Herbert N. Curtis Secretary. An executive committee was chosen consisting of Gen. McClellan, Andrew Gilsey, R. Sewell, Hugh J. Jewett and E. A. Quintard, to whom was referred the proposed contract between Col. Vanderburg and the proposed deed conveying the franchise of the late New York Central Underground Railway to the company with instruction to report upon the same at the next meeting. A corporate seal, consisting of an engraved section of the proposed tunnel and the legend New York Underground Railway Co., was adopted. The plans prepared by N. J. Morris, C. E., were referred to General McClellan, who was authorized to approve of same if in his judgment they were such as should be adopted. A committee of three was appointed to prepare by-laws. The subject of salaries of the President, Secretary and Engineer was referred to the executive committee. The directors appointed Mr. George Ticknor Curtis as the counsel for the company and Messrs. Sewell & Pierce as its solicitors and attorneys. Without transacting further business the meeting was adjourned until Tuesday next.

A New Engine of Destruction.

Capt. John Ericsson, the veteran inventor, is reported to have perfected his new torpedo and the means for propelling it with accuracy and force against any target, and the new projectile is said to be the most formidable engine yet invented against iron-clads. It is pretended that several of these weapons were recently shipped to Peru to be used in the warfare of that State with Chili. Capt. Ericsson's experiments have been made, in part at least, under the auspices of the Secretary of the Navy, and they have so far succeeded that he is now able to discharge by means of gunpowder, with reasonable accuracy, a torpedo charged with 250 pounds of dynamite in such a way as to insure its explosion against the sides of an iron-clad. It is claimed that there is no armor-plated vessel in the world that would not be rent to pieces by the concussion of such a tremendous charge of dynamite. If this be so, and this new engine prove to be manageable, it will be the cause of as many revolutions in the navies of the world as were occasioned by the appearance of the monitor in Hampton Roads in 1862.

Photographing Express Trains.

Messrs. Marsh Brothers, photographers, at Henley-on-Thames, England, have just obtained some interesting pictures of the Great Western express —the "Flying Dutchman"— taken while running through Twyford station at a speed of nearly sixty miles per hour. The point of view from which the photograph has been taken is on the "port bow" of the express, and the definition is admirable, the details of the locomotive coming out as sharply as the stationary objects in the view. Messrs. Marsh Brothers are now making a flying shutter which, when applied to their camera, will reduce the time of exposure of the plate to 1-500th of a second. With this new shutter they hope to get a throughly satisfactory photograph of an express train taken broadside on.

☞ A narrow-gauge railroad, thirty miles in length, is about to be built from the famous Cranberry ore mines, in Mitchell county, N. C., near the Tennessee line, to tap the East Tennessee, Virginia and Georgia Railroad at Johnson City a few miles above Jonesboro.

Personal.

—President Wagner of drawing room car fame is an active Republican worker.

—Capt. Thomas Keley, eighty-five years old, the oldest steamboat captain of the port of New York, died in Brooklyn on the 5th.

—Emile Alexis Segris, minister of Public Instruction and subsequently of Finance in the Ollivier Cabinet in France in 1870, is dead.

—Richard L. Franklin, President of the New York City Fire Insurance Company, died at Riverdale on the Hudson Tuesday, after a two months' illness.

—The Cincinnati Chamber of Commerce have adopted resolutions deploring the death of General Meyer and recommending Capt. Howard as his successor.

—Charles F. Crocker, San Francisco, Vice President of the Southern Pacific Railroad, and Miss Jennie M. Easton, neice of Mr. D. O. Mills, were married Tuesday at "Milbrae," Mr. Mills' country seat.

—The venerable Thurlow Weed is suffering from a severe cold, which has aggravated some kidney disturbance, and his condition creates considerable anxiety among his many private and public friends.

—Mr. Hoar gave a reception at his Worcester (Mass.) home Wednesday night to Vice President Wheeler. New England, Governors and numerous other prominent men were among the guests.

—Among those lost on the Vera Cruz were C C. Silvas of Brazil, who had studied at Boston, and Geo. Cole, a Massachusetts builder. Both were en route for Mexico to take positions on a newly projected railroad.

—William H. Greenwood who has recently been engaged in engineering work for Palmer & Sullivan, railway contractors, and who was formerly chief engineer of the Denver railroad was murdered August 29 while at work upon his surveys in Mexico.

—President Wm. B. Stearns of the Fitchburg Railroad, and Mr. A. A. Gaddis of the Boston, Hoosac Tunnel and Western Railway are trying to get more yard room at North Adams, Mass., to accommodate their rapidly increasing freight business.

—Cornelius J. Vanderbilt and George N. Terry sailed from New York, the 4th, on the City of Richmond, intending to make an around-the-world trip, though possibly to make a tour of only the countries of southern Europe and return by January 1st.

—Dudley F. Phelps has been appointed Assistant District Attorney, at New York, to fill the vacancy caused by the resignation of Judge Russell. Mr. Phelps is thirty-five years of age, the brother of District Attorney Phelps, and under Collector Arthur had charge of the law division of the Custom-house.

—Mr. A. K. Owen, of Chester, Pa., a civil engineer of considerable note, was one of the few survivors of the Vera Cruz disaster. He has been well known at Washington for several years as the enthusiastic advocate of a Pacific railroad, which should traverse the middle region of Texas and the Mexican states of Durango and Sinaloa, terminating at the Gulf of California. His graphic description of the disaster was the first reliable account of it received.

—General Alfred T. A. Torbet, gallant and brave, on the field and in the horrors of shipwreck, was among the lost on the illfated Vera Cruz. All reports speak of the remarkable coolness and self-sacrifice shown by him during the disaster, in cheering and directing others while, already badly wounded, there was little hope for his own safety. General Torbet had a brilliant war record and after the war was the commissioner of a number of capitalists to Mexico to secure a land grant and to build a railroad from the Gulf to the Pacific.

Connecticut and Passumpsic Rivers R. R.

The following is an abstract of the report of this company for the fiscal year ending June 30, 1880, prepared for presentation at the annual meeting of the stockholders at Newport, Vt., on the 8th inst.

After so many years of discouragement from the continual falling off in the gross earnings of your road from year to year, we are glad to be able to report that the bottom has been reached and that the gross earnings of the last year show quite an increase over the previous year, as will be seen by the following :

The receipts were $657,647 98, an increase over 1879 of $118,405 95. The expenses were $131,-408 17, leaving the net earnings $226,139 81 ; from which has been paid for dividends, interest, &c., $220,658, leaving $5,481 84 ; interest received by the Treasurer $16,100 02, leaving a balance of $21,581 83 ; surplus of earnings, as per last year's report, $105,398 34 ; balance $126,980 17 ; from which we have paid for 200 freight cars $148,150, leaving the surplus of earnings now on hand $8,-830 17.

The tonnage in 1880 was 219,604 tons ; in 1879, 136,115 tons. Passengers in 1880, 156,934 ; in 1879, 135,494.

The equipment of the road is as follows :

Locomotives, 28 ; passenger cars, 14 ; mail and baggage cars, 9 ; freight cars, box, 440 ; freight cars, platform, 380 ; stock cars, 100 ; saloon cars, 9 ; boarding house cars, 2 ; crane cars, 3 ; beside the necessary number of snow plows, gougers, gravel, wood, push and hand cars.

We have built at our shops at Lyndonville 35 new iron cars and 5 butter cars at a cost of $20,-825, and purchased six second hand iron freight cars at a cost of $2,100 ; also purchased one first class passenger car at a cost of $6,500, all of which has been charged to the current expenses for operating the road.

There has been laid in the track during the year, 1600 tons of steel rails, 412 tons new iron rails, and 40,920 new sleepers ; 6,856 new rails have been repaired and relaid. The track is greatly improved from last year, and is now in better condition than ever before. One thousand four hundred tons of steel rails and eight tons of iron rails more than last year have been laid in the track, and all charged to current expenses.

We think that a liberal amount of steel rails for the year, chargeable to current expenses, would have been 1000 tons. The extra 600 tons of steel rails, the 40 new cars built at shops, and the six iron cars purchased, cost about $51,925, which, taken from the amount charged to expenses would leave the net earnings $277,964 81, instead of $226,139 81 as the account is made up, and is equivalent to two per cent on the stock.

The opening up of business on completion of the Montreal, Portland and Boston Railroad to Longuell, and the completion of the Southeastern Railroad to Sorel, together with the contract made with the Portland and Ogdensburg Railroad (Vermont division) in October last, rendered it imperative on us to make a large increase to our freight cars in order to accommodate the increase of business ; and in addition to the forty cars built at our shops, we purchased two hundred freight box cars of the Wason Manufacturing Company of Springfield.

These cars have all been delivered and are in service. We now find that our supply of cars is not up to the requirements of the road. These two hundred cars cost $118,150, and have been paid for from the former surplus of earnings, $105,398 34, added to the year's surplus of $21,-581 83, leaving the surplus of earnings now on hand, $8,830 17.

You will see from this that we have been able to add two hundred and forty new freight cars to our equipment without increasing our construction account or incurring a debt. Our present floating debt is entirely for amount expended in obtaining and completing the Montreal, Portland and Boston Railway, which is now operated and controlled by the Southeastern Railway, and we are now receiving interest monthly on all the money expended in that road, the present floating debt is $313,008 57. To offset which we have good notes on which we are receiving interest at 6 per cent, $319,006 36.

No accident of fatal or serious consequence has happened on the road during the year. No loss has accrued to the road by fire during the year. Our relations with all connecting roads continue on a friendly basis, and the prospect for the coming year we look upon as encouraging.

The bridges have been carefully looked after and kept in thorough repair ; and some considerable improvement has been made in the wharf and other property at Newport. Some $4,000 has been expended for new furniture and permanent repairs for the Memphremagog House, and it is now in first rate condition, and has been well filled with guests during the summer.

The company own, in addition, not needed for railroad purposes : 1 Memphremagog House, Newport, 1 tenement house at Stansted Junction, 6 tenement houses on Massawippi road, 1 dwelling house at Norwich, 1 dwelling house at Pompanoosuc, 1 dwelling house at Bradford, 1 dwelling house at Newbury, 1 store at St. Johnsbury, 12 cottages at Lyndonville, 3 double-houses, 1 one and one-half story house, 1 farm house at Lyndonville, 1 dwelling house at Barton, 1 dwelling house at White River Junction, 1 dwelling house at Coventry, 1 dwelling house at Sherbrooke, 1 dwelling house at Sherbrooke, 1 dwelling house at Newport, 1 hotel barn at Newport, 1 store at Newport, 23 tenements over depot, 10 shanties, $300, about 200 acres of land at Lyndonville, and about 2,000 acres of wood and timber lands near the line of the railroad.

American Industries and their Rewards.

Among the most interesting of the many valuable features of the meeting of the National Board of Steam Navigation, held at Norfolk last week, was the paper on "American Industries and their Rewards," read by General Negley of Pittsburg. General Negley is well known as an authority on the subjects covered by his paper and his carefully prepared statements are of great value and weight. He has given a most comprehensive and yet concise report of the condition of the important resources of our nation's wealth and power, including our commerce, navigation, railroads, agricultural products, mining, manufacturing and educational interests, in what he has called his "short hand outline." It is a report which for the value of its statistics alone should be printed complete in pamphlet form, as very likely it will be. In this brief allusion to it we are only permitted to quote from those portions relating directly to inter-state commerce, railroads and our domestic marine. He says of—

INTER-STATE COMMERCE :

The volume of trade passing between the Atlantic ports and the interior has increased to immense proportions ; certainly not less than $53,-000,000,000 annually in value. The shipment of freight over rivers and lakes, as well as over the six trunk lines of railway, has vastly increased, both in value and in quantity.

It is a significant fact that the number of tons cleared on the water routes have almost doubled within the present year. The Erie canal delivered 19,300,000 bushels of grain within 53 days, or about 60¼ per cent of the total receipts during the same period ; a most convincing proof of the irresistable influence exerted by water transportation, both as to rate and facilities. Hence it is that grain was carried from Buffalo to New York for five and a half cents per bushel by railroad and one and a half cents by vessel. It also accounts for the distribution of the receipts of traffic on the Atlantic seaboard in the following proportions: New York, 13.3 per cent ; Baltimore, 17.0 per cent ; Philadelphia, 18.0 per cent ; Boston, 8.4 per cent ; New Orleans, 8.5 per cent ; Portland only 1.3 per cent. These receipts show an increase of seven per cent over last year, 15 per cent over 1878 and 121¼ more than in 1877. New Orleans, since it became a deep water port, has largely increased its exports.

Fifteen million bushels of grain, 1,442,684 bales of cotton and 5 412 hogsheads of tobacco were exported from New Orleans to Europe last year. During the week ending August 14th, 406,900 bushels of corn were sent down the river to this port. Norfolk has also gained a largely increased tonnage during the past year.

RAILROADS.

Railroad construction, together with the improvement in old lines, has been carried on with unexampled vigor and economy. The United States, with less than 50,000,000 inhabitants, operates 87,000 miles of railroad, enough to encircle the globe three times ; while, Europe with 306,000,000 of inhabitants, has less than 100,000 miles. The rest of the world, aggregating 1,050,-000,000, of people, are dependent upon 25,000 miles of railroad. Our lines of railroad employ not less than 500,000 freight cars, and 17,000 locomotives in their traffic. Although we pay from 30 to 40 per cent more for labor and material than England does, yet her railroads cost on an average $195,000 per mile as against $58,000 in this country. Since 1873 the trunk lines in the United States have increased 20.88 per cent in mileage, and 45 per cent in tonnage. The increase of freight moved by them in 1879-80 was 47.27 per cent, an excess of 14.4 per cent over the previous year. There has been a corresponding decrease in freight rates, averaging 42.31 per cent. Shipments were made on the lake shore roads for 8-10 of a cent per ton mile ; and on other roads as low as 1 2-100 of a cent. The total gross earnings of the railroads in the Middle States last year, amounted to $170,310,846, while in the Southern States the total earnings were $43,917,-284. The total annual receipts for transportation of freight and passengers over American railroads equals the railroad business of all other nations combined. At least $5,000,000,000 are invested in American railways. The substitution of steel rails for those of iron, which is now taking place, will increase the value of our railroads $350,000,-000.

To furnish the requisite number of cross ties for existing railroads, the timber on 200,000 acres of woodland is annually cut away. American railroad motors excel in design of framing, axles, cranks and finish. They have a powerful tractive force, run easy and wear better than those abroad. Hence a growing market has been created for them in Russia, Japan, Australia and other foreign countries.

OUR DOMESTIC MARINE

Represents about twenty-five thousand two hundred and eleven vessels, aggregating 4,169,600.60 tons. Of this number 17,042 are sailing, 4,569 are steam, 1,206 are canal boats and 2,394 barges. With respect to location, they are distributed as follows: The Atlantic and Gulf coasts have 14,-762 sailing vessels, aggregating 1,967,023.13 tons ; 2,162 steam vessels, 615,039.61 tons ; 658 canal-boats, 58,963.06 tons ; 764 barges, 159,041.11 tons. The Pacific coast has 807 sailing, 148,712 23 tons; 308 steam, 107,040.39 tons ; 87 barges, 14,595.41 tons. The Northern lakes, 1,478 sailing, 807,077.-93 tons ; 896 steam, 203,298.10 tons ; 548 canal-boats, 44,774.43 tons ; 170 barges, 42,226.38 tons. The Western rivers, 1,203 steam, 250,793.46 tons; 1,373 barges, 251,015.86 tons.

As late as 1817 there were no regular steamers plying on these waters.

The tonnage of all vessels touching our ports in 1879 amounted to 13,768,137 tons. During the last seven years we have built 101 modern steamers, aggregating 179,651 tons. We cannot forbear commenting upon the fact that our nation pays annually to foreign ship owners over $70,-000,000 for conducting its carrying trade. Noth-

ing is more certain than that American enterprise and mechanical skill has been deprived of a large share of its well earned reward by defective legislation and the want of a comprehensive national policy.

On the other hand, England by encouraging her merchant marine through a judicious system of drawbacks, amounting to $7,000,000, annually, and the additional annual revenue of $4,200,000 received for carrying the mails has enabled her to encircle the globe with her vessels, and even to divert the current of trade from its natural channels, while Columbia with folded arms makes no determined effort to control this vital source of defence in war, and independence in time of peace. The public duty of promoting our shiping interests, rests upon no sectional grounds. Indeed it is criminal to gauge its advancements by any political calculus, or by measuring its cost by the economical susceptibilities of the day.

A nation that has attained the grandest achievements in the fields of science, art and discovery, and possessing the capacity to feed and clothe all Europe, should build her own vessels, nay more, should man them with her own seamen, and float them under her own starry banner.

Massachusetts State Railroad on Sunday.

It is not desired that any more business than railroad exigences necessitate be done on Sunday. Blockades of cars, trains of live stock and of perishable freight, detained by accident or unavoidable delays, make up much of the business, which on the state road is about one-tenth as large on Sundays as on week days, and this tenth is regarded by railroad men as a work of necessity. The state runs no trains over its road on Sunday except for necessary repairs. The road is now operated as a part of the Fitchburg railroad, and how is that road to be convinced that what is necessary travel over the rest of its line is not necessary over this short link? For the great portion of the line the courts alone can decide whether Sunday travel be necessary or not. Practically, it is said, that this attempted restriction of Sunday travel would, if carried into full effect, destroy the business of the Tunnel line as a through route, and dwarf the opening promise of the tunnel, with its growing benefits to the prosperity of the state. For, it is said, that to stop all travel over the state road on Sunday would be to stop travel as far back as the middle of the previous week. A Chicago shipper of live stock, for instance, would send no business over this line later than Wednesday, for if started Thursday, it could not get here in time to go over the state road before Sunday, and would have to be kept here that day, with suffering to the stock and loss to the owner; so this shipper would seek a different market. So too, a western dealer in grain, who sold for delivery to ocean steamers, would not, after Wednesday, risk the certain delay of Sunday on the tunnel route, and the probable longer delay through blockaded cars, lest he should miss the steamer, and he too would seek a different route or a different market.—[North Adams (Mass.) Transcript.

Philadelphia and Reading Railroad.

The Philadelphia Inquirer says that every branch of business on the Philadelphia and Reading railroad is remarkably active, and there is every prospect of the company's facilities being taxed to the utmost during the remainder of the year, and then adds:

Mr. Gowan estimated that there would be an increase of about $267,000 for this year in the company's passenger business. For the past eight months of the fiscal year—from December 1, 1879—the passenger traffic shows an increase of $316,000, or $50,000 more than Mr. Gowen estimated for the entire year. In round figures the freight business of the company has increased about $900,000 in the eight months over the corresponding period of last year, and leaving out the business of the North Pennsylvania and Bound Brook divisions the increase is about $650,000 on the company's general merchandise traffic, and about $250,000 on the coal business.

Foreign Jottings.

Germany added 1,102 miles of road to its railway system last year, and of these the government built 793 miles.

Kinipple and Morris, London engineers, have been appointed to build a railroad in Newfoundland for the purpose of developing the mineral and agricultural resources of the island. The road is to be 300 miles in length. It will commence at St. John's and terminate at Green's Bay, to the north of the island, and in the vicinity of the principal mining districts, and will pass also on its route through good agricultural land for settlements.

Russia: A policemen at Charkoff recently discovered people making a tunnel from a house to the railroad depot. The diggers escaped. It is thought they intended to lay a mine under the railway over which the emperor passed on his way to Lividia.

A Corean port has been opened to Italian commerce.

The traffic returns of the Suez canal for the seven months ending July 1, 1880, were $4,899,000, as against $3,503,200 during the same period of 1879, and $3,726,000 in 1878. The gross receipts for the present year, as conservatively estimated, will be $8,066,600. Deducting from this the expenditures, $5,735,665, including $5 per share interest, we have $2,330,935, from which five per cent must be deducted for the statutory reserve, namely, $11,546, leaving profits available for distribution to the amount $2,214,389.

The French agricultural authorities estimate that the French harvest will be a good average; that of upper Italy will be 30 per cent, above the average, those of Roumelia, upper and lower Bavaria, 25 per cent; Podolia and Smacia, 20 per cent; South Italy and Wurtemburg, 15 per cent; Bessarabia, 10 per cent and Hungary, Poland and Belgium five per cent above the average. The harvests of Prussia, Palitinate, Baden, Switzerland, Denmark, Sweden, Norway, Central Italy, Holland, South Russia, Servia and Egypt will be up to the average, and those of Austria and Mecklenburg five per cent below; Great Britain, Ireland and Saxony, 10 per cent; Courland 20 per cent; Gothland 25 per cent and Central Russia 40 per cent below the average.

Baltimore and Delta Railroad.

The West Chester (Pa.) Republican states that arrangements are being made for the consolidation of the Baltimore and Delta railroad with the Chester County and Delaware railroads, and then adds:

The nearest road to the route of the Baltimore and Delta road is the Philadelphia, Wilmington and Baltimore railroad, which is some eighteen miles to the south. There is no road on the north running parallel nearer than the Frederick division of the Pennsylvania railroad, and the main line of the road, which is a distance from the Delta terminus of about thirty-five miles, via the middle division of the Peach Bottom road, reached by going to York, or crossing the Susquehanna and taking the Port Deposit and Columbia railroad to Columbia. There are about four miles of the Peach Bottom road to be completed to reach the Susquehanna, and about half a mile to connect with the eastern division of the Peach Bottom road which is built and in operation from Oxford to a point in Lancaster county, some 14 miles distant.

British Railways.

The London Times, summarizing the reports of British railway companies for the first six months of the current year, remarks that it has been a wonderfully prosperous half-year. The status of particular companies, and their condition as compared with last year, the Times indicates as follows:

The London and Northwestern Company—taking the companies in the order of their magnitude—pays 6¾ per cent per annum against 6½ per cent per annum for the corresponding half-year of 1879, the addition to the amount of the dividend being £204,000. The Northeastern Company, again, pays 8 per cent per annum, as compared with 5 cent per annum, the addition to the amount of the dividend being £320,000. The Midland pays 6 per cent per annum, as compared with 5 per cent per annum, the addition to the amount of the dividend being £101,000. The Lancashire and Yorkshire says 5 per cent per annum, as compared with 4 per cent per annum, the addition to the amount of the dividend being £71,000. The London and Brighton pays 4¾ per cent per annum, as compared with 3 per cent per annum, the addition to the amount of the dividend being £60,000. And it is the same with other important companies, which it would be needless to mention. Altogether, on the fourteen principal railways of England and Wales making up their accounts to the 30th of June, having in all an ordinary capital of $155,000,000—regarding the preference capital of the Chatham and Dover Company as ordinary—the result is found to be that the companies pay for the half-year just past the sum of £4,011,0000 in ordinary dividend, or at the rate of £5 8s. per cent per annum, as compared with £3,124,000, or 4 per cent per annum only, for the corresponding half-year of 1879, the increase amounting to £887,000, or £1 8s. per cent per annum. Such an addition to railway shareholders' dividends in one-half year is, we believe, without a precedent. It amounts to very nearly 30 per cent on the amount paid for the corresponding half-year of 1879, which is an immense addition, considering the amounts involved.

☞ A long bridge has recently been completed in Russia, over the Volga, on the Syoran and Orenberg Railway, connecting the cities of Syoran in the government of Simbrisk, with that of Samara. The width of the river is nearly a mile, and as it is liable to the occurrence of very heavy spring floods, the piers (of which there are fourteen altogether) had to be built 100 feet above mean water level, the depth of the river being more than fifty feet. The girders, 364 feet long and 20 feet wide, were all riveted and put together on the right bank of the river, and then floated to their position. The whole cost of the bridge was 7,000,000 silver rubles; and it is worthy of mention that it was completed without any loss of life or any accident of importance.

☞ Articles of incorporation of the Hull and Nantasket Beach Railroad Co., to connect Windmill point with Strawberry hill in the town of Hull, have been filed with the Secretary of State of Massachusetts, who will at once issue its charter. The road is to be three miles in length, and of the standard broad-gauge, and its capital stock is to be $50,000. The directors are George R. Eager, R. M. Pulsifer, F. A. Hobarb, A. J. Tower, H. T. Littlefield, W. R. Clark, E. P. Call, John Lathrop and Wm. Bordman, jr.

☞ The East Line and Red River Railroad Co. owns a line of 3 feet gauge extending from Jefferson, Texas, westward to Sulphur Springs, 93 miles in length. The gross earning of this road for the year ending April 30, 1880, were $122,931 95, the expenses $45,016 09, and the net earnings $77,915 86. The proportion of expenses to earnings (36.62 per cent) was very small. The road does entirely a local business. It runs between the two lines of the Texas and Pacific and has been built chiefly by local capital. An extension from Sulphur Springs westward is now in progress.

Statement of the Public Debt of the United States, September 1, 1880.

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,643,333 04; interest repaid by cash payments: 5 per cent net earnings, $356,198 87; balance of interest paid by United States, $33,291,329 39.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Aug. 31, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

Receivers' Certificates.

The receivers of the Philadelphia and Reading Railroad Company and Philadelphia and Reading Coal and Iron Company are now prepared to issue receiver's certificates, bearing 4 per cent interest from September 1, for all claims for materials and supplies furnished prior to May 25, 1880. Parties having such claims will present them to J. B. White, Comptroller Philadelphia and Reading Railroad Company. The certificates will not bear specific dates, but will be issued in classes, and paid each class in order, principal and interest, as it matures. These, being liabilities issued by the receivers, will take precedence in payment of any of the direct liabilities of the company, all mortgages or other fixed charges, and, of course, will be first paid. Those holding the character of claims specified against the company will consult their interest by early having them put into the required shape to make them negotiable at interest. They will no doubt be readily saleable as soon as offered on the market.

☞ A train has been put on the Richmond and Allegany railroad between Richmond and Maiden's Adventure, a distance of 28 miles.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, September 9, 1880.

Money on call 2@3 per cent. Time loans are 5 to 6 per cent, and prime mercantile paper, 4½ @5½ per cent.

The posted rates of prime drawers of sterling are 4.81½@4.82 and 4.84@½. The actual rates are 4.80½@4.81, and 4.83½@¾. Cable transfers are about 4.84; and prime commercial bills are 4.79@½.

The offerings of Government bonds to the Treasury on Wednesday amounted to $6,796,800, of which $2,500,000 were accepted, as follows: $1,823,500 6s, 1881, at 104.65@104.70, and $676,500 5s, at 102.65@102.72.

The Governing Committee of the Stock Exchange have admitted to dealings at the Board the following securities:

St. Paul and Sioux City (Chicago, St. Paul, Minneapolis and Omaha) Railroad Company—$1,450,000 additional first mortgage 6 per cent bonds, Nos. 5,551 to 7,000 inclusive, issued at the rate of $10,000 per mile on new completed road, thus completing the $7,000,000 allowed by mortgage.

Little Rock and Fort Smith Railway Company—$4,096,135 capital stock and $2,647,500 first mortgage 7 per cent bonds, payable in 1905. Placed on the free list.

Galveston, Harrisburg and San Antonio Railway Company—$4,500,000 first mortgage sinking fund 6 per cent gold bonds, due 1910. Placed on the free list.

Metropolitan Elevated Railway Company—$2,000,000 second mortgage bonds, of the $4,000,000 authorized, guaranteed by the Manhattan Railway Co. Placed on the regular list.

Referring to the Statement of the Public Debt of the United States, given elsewhere, it will be seen that the total amount on the 31st of August was $2,121,237,406 57, less cash in the Treasury $196,668,332 23, leaving net $1,924,569,074 34. The reduction of the debt in August was $12,027,167 59, and in the past two months $17,603,221. Of the bonded debt $229,440,150 bears 6 per cent interest, $480,410,450 bears 5 per cent, $250,000,000 bears 4½ per cent, $739,347,800 bears 4 per cent, (including $1,106,450 in refunding certificates,) and $14,000,000 bears 3 per cent. Interest has ceased on $6,128,035, and $386,059,831 bears no interest, being in the shape of legal tenders, certificates of deposit, etc. In addition to the above there are bonds amounting to $64,623,512 at 6 per cent, issued to Pacific Railroad Companies. The current liabilities of the Government amount to $42,000,191, leaving available cash in the Treasury of $154,668,141.

Government, State and Railroad Bonds were strong at the Board; and Railroad Shares, compared with the quotations of the previous week, have advanced in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 42⅞@44; Canada Southern, 62@63; Central of New Jersey, 78¾@79; Central Pacific, 75@76; Chicago and Northwestern, 104@104⅛; do. pref., 124¼@124½; Chicago, Burlington and Quincy, 138⅜@138⅝; Chicago and Alton, 117⅝@117⅞; Chicago, Milwaukee and St. Paul, 91⅞@92⅛; do. pref., 112½@113¼; Chicago, Rock Island and Pacific, 118⅞@119⅛; Chicago, St. Louis and New Orleans, 41⅞@42⅛; Cleveland, Columbus, Cincinnati and Indianapolis, 72@72½; Columbus, Chicago and Indiana Central, 19¾@20¼; Delaware and Hudson Canal, 87@87¼; Delaware, Lackawanna and Western, 91⅛@91¾; Hannibal and St. Joseph, 41@41½; do., pref., 83¼@83⅝; Houston and Texas Central, 64⅜@67½; Illinois Central, 115@115½; Lake Erie and Western, 34½@35; Lake Shore and Michigan Southern, 109¼@109⅜; Louisville and Nashville, 144@147; Manhattan Elevated, 81½@81⅝; Morris and Essex, 112@112½; Metropolitan Elevated, 94@96; Michigan Central, 96¼@96¾; New York Elevated, 112½@113; New York Central and Hudson River, 132½@132¾; New York, Lake Erie and Western, 40@40⅛; do. pref., 68⅞@69; New York, Ontario and Western, 24@24⅝; Northern Pacific, 30⅛@30¼; do. pref., 53@53⅞; Ohio and Miss., 35@35⅛; do. pref., 76@77; Pacific Mail, 42¾@42⅞; Philadelphia and Reading, 32⅛@32⅜; St. Louis and San Francisco, 34@36; do. pref., 45¾@47; do. 1st pref., 77@77½; St. Louis, Iron Mountain and Southern, 57¼@57½; Union Pacific, 94¼@94½; Western Union Telegraph, 104⅛@104⅜; Wabash, St. Louis and Pacific, 38⅜@38½; do. pref., 69@69¼.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

New York.—Am. Dock and Imp. 7s, 110; Boston and New York Air Line, 46½; Boston, Hartford and Erie 1st, 42½; Chicago, St. Louis and New Orleans, 41; Chesapeake and Ohio 1st pref., 27⅛; do. 2d pref., 22¾; do. cur. int., 41; do. 1st, Series B, 71¼; Chicago, St. Paul, Minn. and Omaha, 44⅛; do. pref., 85; do. 1st, 106½; do. consol., 100; Central Iowa pref., 61½; do. 1st, 103¾; Cincinnati, Indianapolis, St. Louis and Chicago, 81¼; Col., Chi. and Ind. Cent. 1st mort. Trust Co. certif. ass. sup., 95¼; do. inc. 47¾; Chicago, Milwaukee and St. Paul 1st, Southern Minn. div., 102; do. La Crosse and Davenport div., 90; do. I. and D. div., 115; Chicago, Burlington and Quincy 8s, 109; Cincinnati and Springfield 1st, guar. by C., C., C. and Ind., 108¼; Denver and RioGrande, 74; do. 1st, 108½; do. 1st consol., 98⅛; Dubuque and Sioux City, 67; East Tenn., Va. and Ga. 1st, 113¼; Houston and Texas Central 2d M. L., 116; Hudson River 2d S. F., 112; Ind., Bloom. and Western 2d, 64; do. inc., 48; International and Gt. Northern 1st, 103; do. inc., 77; Indianapolis, Decatur and Springfield 1st, 103; Keokuk and Des Moines 1st, 99; Kansas Pacific 1st consol., 97¼; do. 6s, Denver Div., ass., with coupon certif., 110½; do. ex-coupon, 102; Lake Erie and Western, 34⅝; do. 1st, 102; do. inc., 67; Laf., Bloom. and Muncie 1st, 102¾; do. income, 69; Lehigh and Wilkesbarre consol. ass., 96; Louisville and Nashville 2d, 104; do. Cecilian Branch 1st, 106; Memphis and Charleston, 37½; Marietta and Cincinnati 1st pref., 6¼; do. 2d, 4½; Missouri, Kansas and Texas, 36½; do. consol. ass., 106; do. 2d, 67; Mobile and Ohio, 24⅝; do. 1st deben., 84; do. 2d deben., 50½; do. 3d deben., 35; do. 4th deben., 36½; do. 1st mort., 103½; Nashville, Chattanooga and St. Louis, 69⅝; do. 1st, 110¼; New York, Ontario and Western, 25¼; New Jersey R. R. and Transp., 169½; Nashville and Decatur 1st, 111¾; New York, Lake Erie and Western income, 71½; Ohio Central, 23½; do. 1st, 92; do. inc., 52; Oregon Railway and Nav., 138; do. 1st, 105; Ohio and Mississippi 1st, Springfield div., 102¾; Peoria, Decatur and Evansville, 26¼; do. 1st, 104¼; do. inc., 62½; Rome, Watertown and Ogdensburg, 21; do. 1st consol., 67; St. Louis, Kansas City and Northern, St. Charles Bridge 1st, 109; do. R. E. 7s, 1895, 107½; St. Paul and Duluth, 34; do. pref., 65; St. Louis and San Francisco 2d, class A, 96; do. B, 80; do. C, 78; do. Equip., 102; St. Louis, and Iron Mt. 1st pref. inc., 89; do. 2d do., 85; do. D. 103¼; do. W. D., 103⅛; Rutland, 6; do. pref., 29¼; do. 6s, 1902, 97½; Southern Kansas and Western, 71; Summit Branch, 13½; Wisconsin Central, 9; do. 2d Series, 39; Wisconsin Valley, 67; do. pref., 82; Boston 5s, 1882, 102½; do. 1883, 103; Cleveland 6s, 1898, 116; Chicago 7s, 1890, 116; do. 1892, 117¼; Fall River 6s, 1900, 117⅞; Nashua 6s, 1892, 112½; Newport, Ky., 7.30s, 1901, 111¼; Allouez Mining Co., 4; Atlantic, 18; Brunswick Antimony, 25; Blue Hill, 4; Catalpa, 1⅝; Copper Falls, 14½; Contentment, 1¾; Crusader, 1⅝; Duncan, 2¼; Douglass, 8¾; Franklin, 14¼; Huron, 6¾; Harshaw, 87; Mesnard, 1⅜; National, 2⅝; Osceola, 40; Pewabic, 19½; Phœnix, 2⅞; Silver Islet, 51; Sullivan, 9½; Waukeag, 4.

☞ Canton, Ohio, now has three railroads in active operation—the Valley railroad, from Canton, to Cleveland, and the Connotton Valley railroad, from Canton to Del Roy, having been completed. Work is now progressing on two more railroads, both of which will operate as feeders to Canton—the Connotton Northern railroad, Canton to Liverpool Harbor, on Lake Erie, and the Cleveland, Canton, Coshocton and Straitsville railroad, Canton to Straitsville. Contracts have been let for most of the line of the former, and large forces of men and teams are at work.

Chicago, Burlington and Quincy R. R.

The following is a comparative statement of earnings of the Chicago, Burlington and Quincy Railroad Company for the month of July:

	Gross earnings.	Net earnings
1880	$1,566,661 45	$911,084 79
1879	993,823 23	396,778 69
Increase in 1880	$572,838 22	$514,306 10

And from January 1 to July 31:

	Gross earnings.	Net earnings
1880	$9,715,425 37	$4,952,428 87
1879	7,504,031 91	3,277,650 95
Increase in 1880	$2,211,363 46	$1,674,777 92

These earnings are of the Chicago, Burlington and Quincy proper; neither the Nebraska nor any of the branches included.

☞ Three actions were commenced in the U. S. Circuit Court, Des Moines, Iowa, on the 3d inst. by the Des Moines and Minneapolis Railroad Company against the Chicago and North-western Railway Company. The first case which includes Albert Keep and Marvin Hughitt, is to procure the cancellation of $1,600,000 preferred stock now held by the Chicago and North-western Company, alleged to have been voted to itself fraudulently by its own officers, who had insinuated themselves into the directory of the plaintiffs, in order to absorb its property. The second suit is to recover $12,500 rent for which the Treasurer presented a demand, which was refused, and the draft was protested. The third suit is to procure the cancellation of a deed for 2,362 acres of Polk County swamp lands of great value, which, it is alleged John B. Alley took when an officer of the company, and for which he paid nothing.

☞ From Bogota, August 8th, we learn that the Colombian Congress passed a law on the 21st of July which authorized the Executive power to enter into negotiations with the Panama Railroad Company, with a view of exempting it from its obligation to extend the Pacific terminus of the road from the mainland to the islands in the Bay of Panama, on consideration that the railroad company should pay the Government such a sum of money as would, in the opinion of the Executive be a just compensation for the exemption granted. In case the arrangement proposed is not carried out, the Executive is to insist on the immediate prolongation of the road to the islands.

☞ The directors of the Harrisburg, Lancaster, Portsmouth and Mount Joy Railroad Company recently elected, are: Edmund Smith, George B. Roberts, Josiah Bacon, Wistar Morris, John M. Kennedy, N. Parker Shortridge, James Young, Lewis Elkin, A. J. Cassatt.

☞ The Ontario Silver Mining Company has declared its fifty-ninth dividend (for August) of 50 cents per share, payable at Wells, Fargo & Co.'s on the 15th. The above payment make a total of $2,950,000 distributed by the Ontario Company in dividends.

☞ Private cablegrams have been received at Montreal, to the effect that Sir John MacDonald has succeeded in transferring the Canadian Pacific Railway to the London Syndicate.

Loss of the Vera Cruz.

The steamship Vera Cruz, of Alexandre's line, which sailed from this port for Havana August 25th, foundered at sea on the morning of the 4th about thirty miles off the Florida Coast. All but eleven of the seventy persons on board are supposed to have been lost. A cyclone struck the steamer and for hours she was tossed about at the mercy of the waves, her fires having been extinguished by the shipping of a heavy sea. The passengers and crew were provided with life preservers and the best of order prevailed, but many were crushed and killed in the wreck as was shown from the number of mangled bodies which have been washed ashore. Numerous other wrecks entailing sad loss of life and property have occurred along the Atlantic southern coast during the past week, the details of which are but just being learned.

☞ At the Brussels Exhibition there is an electrical railway in full working. On what may be called the locomotive a Gramme machine is placed which derives its power from a stationary dynamo-electric machine as in other modern forms of a similar nature. The electro-motor or locomotive, which weighs 800 kilogrammes, draws three carriages, each seating six passengers, at the rate of 6.7 miles an hour over a distance of 3,000 metres. It may be here mentioned that Messrs. Siemens and Halskei have asked permission from the municipality of Berlin to extend their electric railway system so as to form a connection between the termini of all the railways of that city.

☞ The officers of the Newport and Wickford Railroad and Steamboat Company, recently elected, are; President, George M. Miller, New York; treasurer, John T. Bush, Newport; secretary, A. S. Sherman, Newport; directors, George M. Miller, John N. A. Griswold, and Levi P. Morton, of New York; John G. Weaver and John T. Bush, Newport; and Syria H. Vaugan, Wickford.

☞ The Illinois Supreme Court has decided the case of E. M. Dunbar against the Chicago and Western Indiana Railroad, reversing the decision of the lower court and dismissing the case. The railroad company consider this a final disposition of the litigation hostile to its entrance into the city and will immediately begin the extension of its tracks to Van Buren street.

☞ Under a recent act of he Legislature the city of New York is authorized to issue its stocks and bonds exempt from city taxation, provided the rate of interest on said bonds and stocks shall not exceed 4½ per cent. The taxes are partially paid in the premium.

☞ Work on the Elizabeth City and Norfolk (Va.) railroad is rapidly progressing. The whole road is graded to Berkeley, and a large water-front has been purchased in that place for the terminus of the road, wharves, &c.

☞ The engineers of the tunnel under the River St. Lawrence, between Hochelaga and Longueil are daily at work on the surveys for the location of the line, and are sanguine of success.

Cape Cod Canal.

A correspondent of the Boston Traveller, writing from Sandwich, Cape Cod, under date of September 3d, says:

The Cape Cod Canal, after 250 years' talk, now shows the promise of becoming an accomplished fact. The company that was organized and incorporated about twenty years ago has preserved its vitality, though sometimes in a state of suspended animation. During the present season the surveys have been going on with renewed vigor, and the results have been worked up by competent engineers, until now the whole route is very nearly definitely located.

The last question to be decided is as to the location of the harbor on the Massachusetts Bay side of the Cape. Near the town of Sandwich there are two small rivers which enter the bay; one is the Scusset and the other is the Shawm. They are only two or three miles in length, and though very tortuous in their course they are very nearly parallel in their general direction. For the most part they run through the level salt marshes and are filled and emptied by the ebbing and flowing tide. They each offer a poor shelter at their mouths for small coasters. The Shawm is the Sandwich harbor, the Scusset is a harbor for a limited wood trade with Boston. The mouths of these two rivers or creeks are not more than a mile apart; but the rivers are separated through most of their course by a long ridge of land, which commences at the beach and runs in a westerly direction. The ridge is nearly a mile long and half a mile wide, and possibly seventy-five feet in height at its greatest elevation. It is called Town Neck, and has been owned in common from the time when the town of Sandwich was first settled, say for about two hundred and forty years. It has never been cultivated, and has been used for a cow pasture, and is still devoted to that purpose, supplying feed for seventy head of cattle.

The question now is whether the canal shall have its Massachusetts Bay opening at the north or Scusset side of this ridge, or on the south or Sandwich side. This question will be decided within a very few days, and probably in favor of the Sandwich side, since the facilities for the construction of a safe and commodious harbor favor this location. There must of necessity be a breakwater or jetty, and as the sweep of the tide is southward and eastward from Plymouth, past Sandwich, onward to Barnstable Bay, and since from the point where the Town Neck touches the beach there is a natural deposit of bowlders, which runs from the shores northeasterly, and terminates in a ledge about half a mile from the shore, it is thought at a comparatively small expense the necessary breakwater may be built out from Town Neck to the ledge, at which point the water reaches an average depth of about fifty feet. Most likely, in view of the set of the tide, and the general configuration of the shore, only one breakwater will be needed to supply all the conditions of a perfectly secure harbor.

It is a fact worthy of notice that the tide in Massachusetts Bay, at high water, is eight feet higher than the tide at high water in Buzzard's Bay. The canal will not be far from nine miles long, and as there are to be no locks at all, there will be a constant current of about two and one half miles per hour setting from Massachusetts Bay in Buzzard's Bay. The people of Boston need not fear that this continual drainage will leave Boston high and dry, as the Atlantic Ocean will supply whatever loss may occur. With this straight unobstructed passage through the canal steamers for freight and passengers will be able to leave Boston at five or six P. M. and reach New York at seven A. M. the next day, making the route to New York one of the most beautiful excursions by water possible, and ocean steamers from and to New York and the various European ports will be able to make the passage and save from eight to ten hours each way.

Chief Engineer George Titcomb, with an able corps of assistants, was on the marshes working up the final data on Thursday, September 2. He speaks with the utmost confidence of the speedy and successful termination of the enterprise. The work in part has already been let out to the well known contractor, Mr. Fisher, and sub-contracts have been awarded to Mr. Snow and Mr. Cameron. Mr. Snow assured your correspondent that by the 12th inst., at least one thousand laborers—Italians hired in New York—would be in the town of Sandwich and ready to commence operations.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending August 28, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad ...	120,295	4,708 275	5,707,371
Schuylkill Canal	8,805	267,459	604,951
Lehigh Valley.....	83,231	2,075,405	3,048,459
Del.,Lack. & Western.	62,222	2,077,540	2,394,342
Shamokin Valley	20,613	524,324	597,418
Central New Jersey..		2,083,400	2,434,423

The total tonnage of anthracite coal from all the regions for the week ending August 28, as reported by the several carrying companies, amounted to 418,187 tons, against 561,267 tons in the corresponding week last year, a decrease of 143,080 tons. The total amount of anthracite mined for the year is 13,721,275 tons, against 16,560,657 tons for the same period last year, a decrease of 2,839,382 tons. The quantity of bituminous coal sent to market for the week amounted to 104,317 tons against 88,431 tons in corresponding week last year, an increase of 15,886 tons. The total amount of bituminous mined for the year is 2,747,610 tons against 2,339,123 tons for the corresponding period last year, an increase of 408,487 tons. The total tonnage all kinds of coal for the week is 522,504 tons, against 649 698 tons in corresponding week last year, a decrease of 127,194 tons, and the total tonnage for the coal year is 16,468,885 tons against 18,899,780 tons to same date last year, a decrease of 2,430,895 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week of August was 142,595 tons, of which 106,905 tons were coal and 35,690 tons coke. The total tonnage for the year thus far has been 4,894,263 tons of which 3,299,518 tons were coal and 1,094,745 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended August 28 were 49,010 tons, and for the year to that date 1,354,296 tons—255,971 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 24,721 tons, and for the year 852 832 tons, an increase of 220,558 tons over 1579. The shipments to the Chesapeake and Ohio Canal for the week aggregate 22,186 tons, and for the year 353,709 tons, a decrease of 1,402 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 2,103 tons, and for the year 147,755 tons, an increase of 34,011 tons as compared with 1879. —Phil. Ledger, Sept. 6.

☞ Articles of incorporation were filed at Burlington, Iowa, on the 1st inst. of the Southern Iowa and Nebraska Railway Company with a capital of $3,000,000. The corporators are officers and other interested in the Chicago, Burlington and Quincy Railroad. The road will start from Humeston, Wayne county, and extend westward to the Missouri River. Surveys for the line were made two years ago. An engineering party are now engaged in locating 25 miles of the line, with the intention of putting 20 miles of it under contract by the 10th of September.

☞ The Manchester and Keene Railroad, extending from Keene, N. H., to a connection with the Peterboro' Railroad at Greenfield, is now be-

ing operated under contract by the Connecticut River Railroad Co.

Legal Notes.

"*Ignorance of the Law Excuses No One.*"

NEGOTIABLE INSTRUMENT.—PRESENTMENT AND NOTICE BY A DISQUALIFIED NOTARY.

When in an action against an indorser upon a promissory note it was shown that the notary who presented and protested the note was disqualified from holding the office of notary, *held*, that he was authorized as an individual to present the note for payment and give the proper notice, and the fact that he had done so could be shown by his testimony as a witness. A notarial protest of a promissory note is not necessary. It is only important as *prima facie* evidence of demand on the maker, and notice to the indorsers. Falk vs. Lee. Pennsylvania Supreme Court, March 29, 1880.

NEGOTIABLE INSTRUMENT.—WHAT IS STIPULATION IN PROMISSORY NOTE.

In a note otherwise negotiable, and containing a promise to pay interest at twelve per cent after maturity, has this stipulation: "If this note is not paid at maturity, the same shall bear twelve per cent interest from date." *Held*, that these stipulations were tantamount to a promise to pay interest from date until paid, at twelve per cent, with a proviso that if promptly paid at maturity no interest would be exacted; that they did not destroy the negotiability of the paper, nor impart notice to a *bona fide* purchaser for value before maturity, of usury in the inception of the note. Parker vs. Plymell. Kansas Supreme Court, January term, 1880.

CONSTITUTIONAD LAW.—EMINENT DOMAIN.—RAILWAY TRACK IN HIGHWAY.

In a case where it was claimed by the owner of lots abutting on a street the fee of which street was in the State, that he was entitled to compensation for the use of the street by a railroad company, *held*, that the use of a street for a railroad is not ordinarily inconsistent with its continued use for the common purposes of a street. The regulation or enlargement of the use of the street, the property of the State, by the Legislature, is not a taking of property within the meaning of the constitutional provision in respect thereto, although the lot owner may thereby suffer incidental or consequential inconvenience or injury. Kellinger vs. Forty-Second St. R. Co., 50 N. Y. 208; People vs. Kerr, 27 id. 188; 37 id. 357; Hatch vs. Vermont Cent. R. Co., 28 Vt. 142; N. Y. & Elm. R. Co. vs. Young, 33 Penn. St. 180; Shearman & Redf. on Neg., § 370; 2 Dill. on Munic. Corp., § 564; Cooly on Const. Lim. 542 *et seq.*; 1 Thomp. on Neg. 358; Wood on Nuis., §§ 753, 755. Houston and Texas Central Railroad Co. vs. Odom.

NEGOTIABLE INSTRUMENTS.

According to the very general concurrence of judicial authority in this country as well as elsewhere, it may be regarded as settled in commercial jurisprudence—there being no statutory regulations to the contrary—that where negotiable paper is received in payment of an antecedent debt; or where it is transferred, by endorsement, as collateral security for a debt created, or a purchase made, at the time of transfer; or the transfer is to secure a debt, not due, under an agreement express or to be clearly implied from the circumstances, that the collection of the principal debt is to be postponed or delayed until the collateral matured; or where time is agreed to be given and is actually given upon a debt overdue, in consideration of the transfer of negotiable paper as collateral security therefor; or where the transferred note takes the place of other paper previously pledged as collateral security for a debt, either at the time such debt was contracted or before it became due; in each of these cases, the holder who takes the transferred paper, before its maturity, and without notice, actual or otherwise, of any defence thereto, is held to have received it in due course of business, and, in the sense of the commercial law, becomes a holder for value, entitled to enforce payment, without regard to any equity or defence which exists between prior parties to such paper.

The transfer, before maturity, of negotiable paper, as security for an antecedent debt merely, without other circumstances—if the paper be so endorsed that the holder becomes a party to the instrument—although the transfer is without express agreement by the creditor for indulgence, is not an improper use of such paper, and is as much in the usual course of commercial business as its transfer in payment of such debt. Bigelow's Bills and Notes, 502, et seq.; 1 Daniel on Nego. Instr., 2d ed., chap. 25, sec. 820 to 823; Story on Promissory Notes, secs. 186 and 195, 7th ed., by Thorndyke; 1 Parsons on Notes and Bills, 218, 2d ed., sec. 4, chap. 6; and Redfield & Bigelow's Leading Cases upon Bills of Ex. and Prom. Notes, where the authorities are cited by the authors.

The courts of the United States, in determining questions of general commercial law, are not controlled by the decisions of a State court, even in an action instituted by a national bank, located in the State rendering such decision, against one of its citizens, upon a negotiable note there executed and payable. Such decisions, not based upon local legislative enactments, are not "laws" within the meaning of the federal statute, which provides that the "laws of the several States, except where the Constitution, treaties, or statutes of the United States otherwise require or provide, shall be regarded as rules of decision in trials at common law in the courts of the United States, in cases where they apply." Swift v. Tyson, 16 Pet., 1, reaffirmed, Brooklyn and Newtown City R. R. vs. Natl. Bank of the Republic of New York. U. S. Circuit Court S. Dist. N. Y.

Note and Comment.

—Look out this fall for false reports set afloat to depress stocks.

—The harvest is a fortnight late on the line of the Northern Pacific Railway this year, owing to late seeding in the spring; but wheat has already begun to pour into Duluth.

—Buffalo wants Uncle Sam to run the Erie canal without tolls, because Canada is spending millions on her canals and may become a formidable competitor in water carriage some day.

—One hundred and five Americans were registered at a single hotel in Interlaken, Switzerland, one day in August. The money spent in the little country by our countrymen and women this summer will amount to an enormous sum.

—The official order of Postmaster General Key with regard to fraudulent lottery schemes and gift enterprises has been sustained and declared constitutional by the Supreme Court of the District of Columbia. Lottery companies will do well to look out for squalls.

—The Philadelphia *Record* says that the case of the Troy and Greenfield Railroad against the State of Massachusetts for the redemption of her property has been "taken up by the New York papers," and that "sooner or later the State will have to give way." Dear me, how oracular!

—So much petty jealousy exists with regard to the appointment of Gen. Myers' successor that the work of signal service may be distributed, the quartermaster's department of the army taking the telegraph business, the department of the interior the observations, and the engineer corps the signal work proper.

—It seems as though the famous Cape Cod Canal, which is to save in sailing distance from seventy to ninety miles in doubling the cape, will be built at last. The old company must spend $100,000 and have $400,000 of capital paid in before November 1st. The contractor is on the ground and expects to begin work during the present month. We shall see.

—An awfully deep game is supposed to be hidden in a petition sent to the stockholders of the New York Central Railroad for their signature, addressed to Vanderbilt, asking "that no steps toward the consolidation of the Lake Shore and Michigan Southern Railway with the New York Central and Hudson River Railroad, on any terms whatever, be taken until the beginning of the coming year." They would seem to be pretty well "consolidated" now, both being controlled by one family.—*Springfield Republican.*

Manufacturing Notes.

Riehle Bros., Proprietors of the Philadelphia Scale and Testing Machine Works, have been extending their works and facilities anticipating increased trade the coming fall. They have also introduced new appliances for turning out their superior products in larger quantities. Their store, 4th above Chestnut Street, contains a varied assortment of all kinds of scales, and parties can examine before purchasing. Riehle Bros.' Coal, Hay, and Cattle scales are taking the lead and orders come in for them from all parts of the United States.

OFFICE OF THE ONTARIO SILVER MINING CO.,
No. 18 WALL ST., NEW YORK, Sept. 6, 1880.

DIVIDEND NO. 59.

THE REGULAR MONTHLY DIVIDEND OF FIFTY CENTS per share has been declared for August, payable at the office of Wells, Fargo & Co., No. 65 Broadway, on the 15th inst. Transfer books close on the 10th inst.

H. B. PARSONS, Assistant Secretary.

COMMONWEALTH OF MASSACHUSETTS.

Troy and Greenfield Railroad and Hoosac Tunnel.

OFFICE OF MANAGER,
NORTH ADAMS, August 30, 1880.

Bids will be received by the subscriber until Sept. 15, 1880, for the following wrought iron bridge work on the Troy and Greenfield Railroad.

Two 3 feet Plate Girder Bridges, 36 feet long.

One Through Bridge to have such additions as will fit it for double track. Plans of present structure will be furnished on application.

All Bridge seats are 2 feet wide.

The bridges are required to be of the best American iron and workmanship, and proportioned for a general live load of 3000 pounds per foot of track, and a special panel load of 4400 pounds per foot of track, which loads, together with the dead weight, shall not strain the iron over 9000 pounds per square inch in tension, or in compression not over one-fifth its ultimate strength.

Strains on pins or rivets not to exceed 7500 pounds per square inch of area of pin or rivet. On rivet or pin bearings not to exceed 1000 pounds per square inch of bearing surface measured by taking product of diameter of rivet and thickness of plate.

All pin connections or abutting joints to be plained off or turned.

The bridges to have one coat of acceptable paint before leaving the shop.

Plans must accompany the proposals.

Bids will also be received for the following I Beams to be delivered at North Adams station.

12 ten inch beams 13 feet long.
8 twelve inch beams 18 feet long.
8 nine inch beams 11 feet long.
18 four inch beams 6 feet long.

The right is reserved to reject any or all bids.

G. CLINTON GARDNER,
MANAGER.

A Puzzling Question.

A curious legal question of inheritance has arisen from the lamentable railway accident in Blumenberg, which resulted in the death of several passengers. Among its victims were two Breslau gentlemen, Messrs. Koschel and Callinich, who had been close friends for many years, and were so strongly attached to one another, that they had executed a deed in virtue of which, on the demise of either, the survivor should become entitled to the whole property of the deceased. As both parties to this heritage agreement perished in the accident above alluded to, the questions arise, which, if either of them, died last, thereby becoming his friend's legal heir, and, assuming that their deaths took place simultaneously, what disposition can lawfully be made of their respective properties? The heirs-at-law to these gentlemen have applied to the Breslau Court of Equity for elucidation of this somewhat complicated problem, and the ultimate decision of that authority is awaited with curiosity and interest in Prussian legal circles.—[London Telegraph.

ENVELOPES.

To Railroad Companies and City Street Railways.

The subscribers are largely in the Envelope Manufacturing business, making every kind used by Railroads, including the cheap Manila paper. Also the little street car Envelopes for change or tickets. All well made and sold at low prices. Samples furnished when requested.

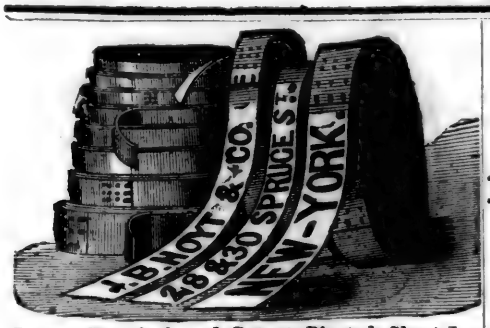
VALENTINES VARNISHES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 2. Paleness. 3. Fluency. 4. Reliability. 5. Drying. 6. Hardening. 7. Fulness. 8. Brilliancy. 9. Durability. 10. Economy.



All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. B. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

New York, Friday, September 17, 1880.

The Canadian Pacific Railway.

When British Columbia was admitted into the Dominion of Canada, nine years ago, the leading condition upon which the union was based was an agreement, on the part of the Dominion Government, to construct a railway connecting the Pacific coast with the Eastern provinces. Since that time disputes between the Provincial Government and that of the Dominion, relative to its immediate construction and to the choice of routes, have been the cause of much local irritation and have greatly delayed the progress of the undertaking. Four years since, the Earl of Dufferin, as Governor-General of the Dominion, made a tour through British Columbia, and by his wise mediation succeeded in harmonizing conflicting interests and in bringing about a much better state of feeling; but it was reserved for the Dominion Premier, Sir John MacDonald, and the present government commissioners to put an end to sectional prejudices and to render inestimable service to their countrymen by insuring the immediate construction of the railway, and thus making the great question of the future of Canada no longer a debatable one.

The preliminary surveys have long been made and the route decided upon is familiar to most railroad men. Starting from Thunder Bay on the northwestern shore of Lake Superior, the first objective point is Rat Portage, or Keewatin, at the crossing of the Lake of the Woods; thence the line runs to Selkirk, on the Red River, twenty-three miles north of Winnipeg, the capital of Manitoba. It then spans Lake Manitoba and extends across the vast prairies of the northwest territory in a northwesterly direction to Northcote, at the northern end of the Duck Mountains; thence it takes a westward course through Brattleford and Edmonton, scales the Rocky Mountains at Yellow Head pass, follows the Thompson River and terminates at Burrard Inlet which is situated just north of the mouth of the Fraser River and possesses three fine harbors in English Bay, Coal Harbor and Port Moody, the latter being first reached from the interior. Near Port Moody is New Westminster, one of the most important towns of British Columbia. The distances from the Pacific to the Atlantic by the new route are as follows: by the Union Pacific road from San Francisco to New York via the Michigan Central, Great Western and New York Central, the distance is 3,363 miles; from New Westminster to Montreal by the Canadian Pacific and the line to Montreal by way of Ottawa, it is 2,730 miles—a difference in favor of the Canadian route of 633 miles. From New Westminster to New York by the Canadian Pacific, Michigan Central, and Grand Trunk, it is 3,251 miles, showing a difference in favor of the Canadian Pacific of 521 miles. From San Francisco to Boston by the most available route it is now 3,422 miles, but from New Westminster to Boston the distance will be reduced to 3,087 miles, a saving in distance of 335 miles, and, comparing distances between Portland and the Pacific coast by different roads, we find that the difference in favor of the Canadian route is 521 miles.

A great deal of work has already been expended upon the line from Thunder Bay to Selkirk—a distance of two hundred and twenty-eight miles—and two branch roads have been completed and in operation for some time. One of them extends from St. Vincent to Winnipeg and connects with the St. Paul, Minneapolis and Manitoba Railroad, which runs from St. Vincent to St. Paul, and is destined to become one of the important factors in the grain transportation of the great northwest.

The preliminary surveys have long been completed and the difficulties encountered and overcome in making them have been enormous. The engineers traversed a vast continent which had hitherto been unknown except by fur traders, roving Indians, and a few devoted missionaries. They knew by report that this great expanse was a country intersected by numerous streams and dotted with many lakes; that it was a rocky territory densely wooded for the most part and without a single white inhabitant. Beyond the scanty information obtained from the early missionaries, who had visited it intent upon benevolent enterprises, the engineers have given us the only accurate information of the country west of the Red river that we possess.

The exploration of a portion of the country was a matter of comparative ease, but when the Rocky Mountains were reached, various obstacles presented themselves. One large party of engineers spent nearly two years in trying to find a suitable pass through these formidable barriers and through the hills that lie within the bend of the Columbia river. An immense amount of extra labor was imposed upon the surveying parties on account of differences of opinion between Government officials as to available routes.

Forty-seven thousand miles were actually passed over under circumstances of the greatest difficulty and danger. Some of the engineers were surrounded by forest fires and burned to death; others lost their lives in trying

to cross dangerous rivers, and others died from the effects of exposure sustained in spending winters in the bleak mountains in the midst of deep snow, with only the shelter of canvass tents. In all, forty lives were lost, and in addition to the actual traveling of forty-seven thousand miles of distinct routes in search of the best way, there are actual instrumental surveys, laboriously measured yard by yard, of more than twelve thousand miles; nearly five times the length of the road when completed to the Pacific coast. These preliminary surveys cost about four millions of dollars, and when we consider that they were practically completed in the space of six years we cannot over-estimate the zeal, the ability and the heroic fidelity of the persons who accomplished such results.

With regard to the future of the railway, we are told that the contract for the construction of the line is taken by a syndicate said to be the most powerful in respect to money and influence that has ever taken hold of any American enterprise. Three sets of capitalists seem to have been working for this contract, which bartered for work to be done a vast empire of undeveloped land in the northwest territory. One was led by Lord Dunmore and Brown & Puleston, bankers; another by George Stephen, President of the Bank of Montreal, R. B. Angus, Hon. Donald Smith, Winnipeg, and American capitalists, and the third by Lord Dunraven, Hon. Thomas Brassey, M. P., and others. The information received states that Sir John MacDonald has united the competing interests by adding a cash bonus to the land grant, although he has retained control over the greater portion of the land so as to prevent it being held other than by bona fide settlers.

The contracting parties will receive from the Canadian government a certain number of millions sterling in cash or its equivalent, to be provided for by an issue of Canadian government bonds and a certain number of millions of acres of land. In consideration of these grants, they undertake to form a company, to be called the Canadian Pacific Railway Company, which shall construct and work the line in perpetuity. The government furthermore gives to the contracting parties in addition to the surveys already made the whole of the line already built. Of the immense advantage of the railway, when constructed, to the Dominion of Canada there can be no doubt. Although, on account of sectional jealousy and perplexity in deciding upon routes, progress has been long delayed, the preliminary matters of the railway have been planned and executed with consummate skill and ability.

The line throughout its whole extent will compare favorably in all important particulars with our own trans-continental lines. It will run through the mountain passes by low lying passages which do not exist in more southern routes. The engineer in chief, lately in charge, has reported a location on which, for fully a thousand miles west of Lake Superior, the easterly ascending gradients can be kept down to half the maximum gradients on the Grand Trunk and other roads in operation in the older provinces, thus insuring to a certain extent cheap transportation. The habitable land of the great undeveloped interior is not confined to a narrow belt along the valley of the Saskatchewan, but recent explorations have shown it to be immense in area and abounding in resources which will now be disclosed and turned to account. The vicinity of the great coal fields of Pennsylvania and Michigan to Lake Erie and Lake Huron will enable Canada to develop her mineral deposits and make them available, and she will now be able to carry her grain and lumber to market. England will send over farmers and artisans, and will confidently expect that what has remained until recently almost a desert, traversed annually by migratory herds of antelope and buffalo and only available for wild Indians and hardy trappers, will become ere long the seat of populous provinces and will constitute, if not the most valuable of her colonies, at least one of the great granaries of the world.

The New York Underground Railway.

A meeting of directors of the New York Underground Railway Company was held at the office of Mr. George Ticknor Curtis, Morse Building, Tuesday. The important business transacted was: the consideration of the report from the executive committee of a contract of purchase of the franchise and property held by Col. Vandenburgh, mentioned in our last issue, which report was adopted and the contract ordered to be executed; the submitting by Gen. McClellan, President, of his report on the plan of construction; the appointment of Mr. Walter J. Morris, C. E., as engineer to the company, and arranging for the consolidation of this company with the Broadway Underground Connecting Railway Company.

By the terms of the contract of purchase the issue of bonds is limited to $2,000,000 on each mile of the railway. The negotiations under way for the placing of the bonds are said to be based on terms very favorable to the company, but of course no positive information concerning the details of the negotiations can be made public until the plans and proposals under consideration are further advanced. The consolidation of the Underground Railway Company with the Broadway Underground Connecting Railway Company is a matter that will be easily and speedily effected, prominent gentlemen of the former company being also prominent in the latter organization, so that there can be no conflict of interests between the two companies. The Broadway Underground Connecting Railway Co. is the one which under a recent act of legislature was organized to construct a railway under Broadway from Park Place to Fourteenth Street. All the arrangements for beginning work are being rapidly perfected, and the directors are exhibiting an activity and confidence in the important enterprise, which give the most assuring guarantees of its early completion and successful establishment. The following is Gen. McClellan's report, which was unanimously adopted:

OFFICE OF THE N. Y. U. RAILWAY COMPANY,
NEW YORK, Sept. 14, 1880.

TO THE HONORABLE BOARD OF DIRECTORS OF THE N. Y. U. RAILWAY COMPANY:—

GENTLEMEN—I have the honor to report that in compliance with your resolution of September 9, I have examined the plans prepared by Mr. Morris. His general design is for a double-track road, of 4 feet 8½ inch gauge, within two parallel archways. At the stations and at a few points where the grade line approaches unusually near the surface, and probably at points where your track for freight purposes will be required, it is proposed to replace the arched roof by one supported by iron girders. As a rule the stations are to be beneath the sidewalks. The principal drawings prepared by Mr. Morris consists of plans and profile of the proposed route and a general cross section of the archways. These are herewith submitted marked blank. The plans and profile have evidently been prepared with great care and accuracy. They indicate all known obstacles, such as sewers, gas and water pipes, the location of the stations and the grades of the streets and railway. The detailed arrangements for the termini are not yet elaborated. The general cross section of the archways represents the normal or usual dimensions of the masonry structure and shows the proposed application of concrete, asphalt, invert arches, &c. This section appears to be of ample strength to resist the greatest average pressure and to bear the heaviest load anticipated. As the nature of the subsoil and the relative positions of the grade line and high water mark will vary in different parts of the line, it will be necessary to modify the several sections somewhat for different localities. Mr. Morris deserves great credit for the manner in which he has performed his work, and has evidently studied the subject thoroughly. Regarding his plans as affording a satisfactory general solution of the problem, subject to such modifications in details as future study and proper application to the different portions of the line may render advisable and necessary, I affirm them and recommend them to the Board for adoption.

I have the honor to be, gentlemen, very respectfully yours. GEORGE B. McCLELLAN, President.

Marshall O. Roberts.

Mr. Marshall O. Roberts, prominent in several of the most important American railroad projects and especially well known in New York as a liberal encourager of the city's most worthy public enterprises and charities, died of apoplexy at Saratoga, on Saturday last. His funeral, at New York, Tuesday, was largely attended by representative railroad and business men.

☞ The National Association of General Passenger and Ticket Agents will hold its next annual meeting in this city Tuesday, September 21, 1880. An invitation has been issued by the Pittsburg, Fort Wayne and Chicago, Canada Southern, and Wabash, St. Louis and Pacific Railroad Companies to the Western members of the Association to pass over their routes. The programme contemplates a concentration of the members of the Association invited at Toledo, Ohio, on the afternoon of the 18th, proceeding thence via

the Canada Southern to Niagara Falls, and stopping over Sunday at the Falls. On the afternoon of the 19th the party will proceed to New York via the New York, Lake Erie and Western Railroad.

Fire Underwriting as a Profession.

Last week the Fire Underwriters' Association of the North-West, held their eleventh annual meeting at Chicago. The meeting extended through two days and was attended by representative insurance men not only from the West but from all parts of the country, the meetings of this association having attained within a few years an importance extending far beyond mere local limitations. Among the principal features of the meeting was the address delivered by Mr. D. A. Heald, Second Vice-President of the Home Insurance Company, on "Fire Underwriting as a Profession." It was an address decidedly out of the ordinary run of efforts customarily expected at conventions of the kind, being more than a bare statement of practical facts, or a cold and rigid collection of theories. It was an earnest and manly appeal for a high standard of business principles, moral character and thorough training for those at work in all branches of insurance. A small part of the address only was devoted to what we are commonly accustomed to hear called practical matters, though nothing can really be of more practical value than that which shall tend to elevate and dignify a calling; but the matter of insurance legislation and certain rules that should prevail in the taking of risks were ably touched upon. An experience of thirty years in insurance has enabled Mr. Heald to test and establish the value of certain ideas and convictions he has worked upon and his address is one that carries with it great weight. We quote from two portions of it:

OVER-INSURANCE.

There is a strong tendency even with honest men to insure beyond actual value. The desire to cover the ultimate possibility of loss may be and doubtless is harmless in honest minds, but in minds of another class the desire becomes a powerful incentive to over-insurance. The passage of valued policy laws is an illustration of this peculiar phase of our business. No sooner does a claimant of this sort find himself unable to collect the full measure of the over-insurance he has succeeded in procuring, than he seeks for special legislation compelling the full payment of such over-insurance; and the law makers in blissful ignorance of the real character of their acts, with singular paradox entitle the new law "An Act to Prevent Over-Insurance." They seek to prevent the evil by protecting it, to discourage it by fostering it, to starve it by over-feeding it. All such laws offer a guaranty to dishonesty, a bribe to arson, and indemnity to perjury; for they lead to dishonesty in procuring over-insurance, hold out a bribe to arson in the nature of fixed and stipulated damages and indemnity to the perjury necessary to the full realization of all the advantages sought by fraudulent claimants. The result of all such laws will be directly opposite to the purpose indicated in their title. Instead of preventing over-insurance such laws will encourage it, and if generally adopted will revolutionize our business, corrupt our property-holders, and swell to terrific proportions the needless waste to the country in the increased destruction of property by fires, kindled by these unwarrantable attempts to subject the freedom of contract to iron rules, as unjust and illegal as they are rigid and oppressive. They stimulate and develop the evils they assume to prevent, and throw upon the honest policy-holder an increase in rates otherwise needless. * * * * The insuring public do not and never have demanded such laws. There is not now and never has been any reasonable cause for their enactment. They can be traced it is believed, in every case to disappointed claimants, who failing to substantiate their claims in the courts, have sought special legislation to enforce recovery at the hands of conscientious and unwilling judges. The undermining of public morals by these laws may be slow, the increase in losses not alarming at first, but the effect will be most pernicious and inevitable. To an intelligent public sentiment we must look for repeal of these as well as all obnoxious laws; meanwhile, we are to protect our interests as best we may by individual or combined action, looking more confidently to the former for that safety which we feel we can and ought to command. * * * *

EXCELLENCE IN BUSINESS LIFE.

Every consideration that can influence man to higher ambition and nobler attainments demands of us all a high standard of excellence in business life. A stern regard for the honor of our profession, and a power of character that shall give life to our purpose and enthusiasm to our hearts, while it commands the respect and confidence of the world. Let us then draw liberally and without stint from the well of that divine enthusiasm, and go forth with higher aims, stronger purpose, and inspiring confidence to the day by day labors, duties and privileges of our profession. Let us remember that failure to realize the highest honors often arises from the want of a proper estimate of the character and purposes of our profession. Viewed simply as a money making machine, and shorn of its higher aspirations and possibilities, it becomes cheap and sinks to the level of mere empiricism. The world is sick of noisy smartness, as some count smartness. It is tired of pretence, and can be influenced permanently only by genuine worth and generous culture, by rectitude of mind, of heart, and of action. Let us then cultivate high thoughts with more than a lover's devotion; enshrine in our hearts a true love of our profession, and, above all, incorporate into our mental and intellectual character, that true sense of fidelity and duty which the world has ever recognized as the key that opens the way to honor and success.

Atlantic, Mississippi and Ohio Railroad.

The receivers of the Atlantic, Mississippi and Ohio Railroad have filed their fourth annual report of operations, embracing the period from July 1, 1879, to June 30, 1880. From this we learn that the total earnings were $1,936,641 68; expenses of operating, taxes, &c., $993,228 27; and for further construction, $20,315 91—leaving net earnings $923,097 50. Compared with the previous year the gross earnings show an increase of $264,509 85, and the operating expenses a decrease of $66,860 48, making an increase in the net earnings of $331,370 33, equal to 54 per cent. The resources in receivers' hands June 30, 1880, amounted to $870,714 38, and the liabilities at same time were $458,767 86, leaving an excess of resources of $411,946 52. Included in the liabilities is the sum of $120,190, which has been ordered to be paid on account of past due interest on the bonds of the Atlantic, Mississippi and Ohio Railroad Company, $186,714 78 the interest due 1st July, 1880, on the divisional bonds of the company, and $84,190 73 to be paid in extinguishment of the Virginia and Tennessee registered interest certificates which fell due January 1, 1871, and January 1, 1880. There has been paid during the year $399,831 85 on account of interest on divisional bonds maturing since July 1, 1876. The old floating debt of the company has been reduced by the payment of $11,592 39 on account of back labor claims and interest on bonds which accrued prior to June 13, 1876. The divisional bonded indebtedness will be reduced to $5,011,900 by the payment of $84,190 78 registered interest certificates, for which provision has been made.

The report states the track is in good condition but the substitution of steel for old iron rails will have to be continued at the rate of not less than 40 miles per annum until the entire road shall have been relaid. Some 3000 tons steel rails were last contracted for, making 17,590 tons, equal to 203⅛ miles, since the road has been in the hands of receivers. These rails are now being put on the track, and by the middle of September it is estimated that there will be 230 miles of steel rails on the main track. A new iron bridge has been erected over Reed creek, and one has been built for the eighth crossing of Peak creek. Twenty-seven smaller bridges, of 15 to 70 feet span, have been renewed during the year. The company's buildings have been kept in good repair. A new coach-shed has been erected at Norfolk and the grounds raised and otherwise improved. The new freight depot is nearly completed. Eleven new water-tanks and five new turntables have been built during the year.

In conclusion, the receivers congratulate the friends of the road that the operations of the year have been closed with such satisfactory results. The net revenue realized was more than sufficient by the sum of $192,133 69 or the payment of full interest on the divisional and Atlantic, Mississippi and Ohio bonds, and the payment of interest on the latter has been partially resumed, as will be seen by the statement above by order of the court.

Personal.

—John Pierrepont Edwards has been recognized by the President as Consul for Great Britain in New York.

—Ex Senator James W. Dwyer of Massachusetts has a large contract on the New York and New England road at Pawling, N. Y.

—Sir John MacDonald, the Dominion Premier, who has been in England upon business connected with the Canadian Pacific Railway, has sailed for Canada.

—Charles Parsons has been elected President of the Midland Railroad Company of New Jersey, to fill the place made vacant by the resignation of the Hon. Garrett A. Hobart.

—William S. Connor has been elected President of the Delaware River Railroad Company, to fill the vacancy occasioned by the death of Thos. L. Ogden, Esq. The office of the company will shortly be removed from Woodbury to Paulsboro'.

—E. H. Waldron, Manager of the Lake Erie and Western Railroad, has been appointed General Manager of the Frankfort and Kokomo Railroad. Mr. Waldron retains the management of the "Lake Erie," although he has additional duties assigned him.

—Sir John Hawkshaw, the engineer who had charge of the construction of the underground railroads of London, and his wife and son were in this city recently, and were taken over the entire elevated railroad system in a special train by Cyrus W. Field and Vice President Guilford. Sir John expressed himself as delighted with all he saw.

—A new office, that of General Manager, has been created by Judge Lathrop, Receiver of the Central Railroad of New Jersey, and Joseph S. Harris has been appointed to the position. General Manager Harris assumes control of the Central Railroad of New Jersey, the New York and Long Branch Railroad and other leased lines, and is only subordinate to Receiver Lathrop and the Board of Directors.

—F. De Funiak, General Manager of the Louisville and Nashville Railroad Company, announces by circular that on the first day of October his company will assume control of the Pensacola Railroad, Pensacola and Selma Railroad, and the Selma Division of the Western Railroad of Alabama. The jurisdiction of the general officers of the Louisville and Nashville Railroad Co. will be extended over the above lines.

St. Paul, Minneapolis and Manitoba Railway.

From the report of the directors of this company for the year ending June 30, 1880, we learn that the receipts during that time were: from passengers, $672,047 91; from freight, $2,084,711 78; express, $30,620 14; mails, $40,178 69; rent of track and stations, $37,304 33; rent of leased lines, $47,777 77; miscellaneous, $20,467 62—total, $2,938,108 24, against $1,900,528 98, an increase of $1,032,579 26, or 54.3 per cent. The operating expenses were $1,300,512 82 (or 44.33 per cent); state tax (3 per cent of gross earnings) $86,559 92; expenses of reorganization, $35,288 09; legal expenses, $12,576 64; and interest due and accrued $947,226 77. The total earnings per mile were $4,471 20; total operating expenses per mile, $1,982 48.

The total length of road owned and operated is 656 miles, of which 98 miles were built during the year and 101 relaid with steel rails. The company is engaged in constructing 200 miles of road, chiefly in the west bank of the Red River, in Dakota, all of which it expects to have completed and in operation before the close of the year.

The equipment of the road consists of 65 locomotives, 5 sleeping cars, 64 passenger, mail and baggage cars, 25 caboose and tool cars, 887 box cars, 72 stock cars, 509 flat cars, and 20 gravel cars.

There have been expended on improvement of the roadbed, purchase of right of way, fencing, water stations, etc., $340,676 49, and on new equipment, $197,021 60, which sums have been provided for from funds reserved for that purpose at organization of the company, while more than ordinary expenditures for maintenance and repairs have been charged to operating expenses. The real estate purchased and permanent improvements represented by the sum of $357,185 45 in the general statement, comprise the lands acquired by the company for union depot at Minneapolis and ground for additional yard room and work shops at St. Paul, new general office building and large freights warehouses at St. Paul, and other property which add materially to the value of the company's assets.

The sales of land by the company during the year for cash and on credit have amounted to 268,741 acres, representing the sum of $1,209,928, from which has to be deducted the amount credited and the liability incurred to settlers for cultivation under the terms of the company's contracts, $300,706. The total cash received over and above the expenses of the department, as principal and interest on land sales, and as consideration for real estate disposed of by the company, has been $597,672 09, which sum is applicable to the sinking fund for retirement of the first mortgage bonds. Of this issue $161,100 in bonds have already been purchased and cancelled, and a further amount of $379,100 has been called in by the trustees for redemption on first of July. The land grant of the company, all of which has been earned by the completion of the line to St. Vincent in accordance with the provisions of the act of congress, amounts to about 3,848,000 acres, of which there have been sold to date 1,087,974 acres.

Although unusual opportunities were repeatedly afforded to every bondholder of the old company to join in majority in the reorganization proceedings, there are still outstanding bonds of the $2,800,000, $3,000,000 and $6,000,000 issues, amounting in all to $256,500, the distributive share on which, $54 207 21, lies in the court depository subject to payment on presentation of the bonds. A few of the holders of these bonds, instigated by an insignificant local element personally hostile to the new company, have taken proceedings to reopen the foreclosure decrees by which the company came into possession of the property. These suits are still before the courts, but are regarded as of no moment to the company. A similar suit on the $15,000,000 mortgage was effectually disposed of by the decision of Mr. Justice Miller at the last term of the United States court in St. Paul.

The financial statement shows the following: real estate and permanent improvements, $357,185 45; expenditure on construction and equipment of new lines, $198,767 87; cost of railway, equipment and lands, $31,135,928 33; cash, $1,365,644 27; other assets $787,448 72—total, $33,839,974 64. The liabilities are: current bills and interest due at date of report $1,522,707 30; funded debt: first mortgage bonds outstanding, $7,838,900; second mortgage bonds, $3,000,000. St. Paul and Pacific bonds due in 1881 and 1892, $486,000 (making total bonded debt of $16,324,900); capital stock, $15,000,000; sinking fund applicable to redemption of first mortgage, $486,572 09—total, $33,284,179 39, leaving to balance, for profit and loss, $555,795 25.

Western Union Telegraph.

In the report presented by the Executive Committee at the last quarterly meeting of the Board, held June, 9, 1880, the net profits for the quarter ending June 30 (May being partially and June wholly estimated), were stated at $1,201,185 78

The official returns for the quarter (ended June 30) showed the profits to be $1,017,466 22, or $183,719 51 less than the estimate.

The following revised statement based upon complete returns, will show the condition of the company at the close of the quarter ended June 30, 1880:

Surplus April 1, 1880, as per quarterly report		$824,298 59
Net profits, quarter ended June 30, 1880		1,017,466 22
		$1,841,764 81
From which deducting—		
Dividend of 1¾ per cent, paid July 15, 1880	$717,571 75	
Interest on bonded debt	106,891 04	
Sinking fund appropriations	20,000 00	
Construction account	477,990 40	
Purchase of patents	56,857 99	
Purchase of telegraph stocks	80,749 78	
Materials and supplies purchased & on hand unissued, in excess of amount issued and charged into current expenses of the year, ended June 30, 1880.	28,448 71	
		1,488,509 67
Leaves a surplus July 1, 1880, of.		$403,255 14

The net profits for the quarter ending September 30, instant, based upon official returns for August, and estimating the business for September (reserving amount sufficient to meet the claims of the Atlantic and Pacific Telegraph Company under existing agreements), will be about | | $1,104,041 63
Add surplus, July 1, as above | | 403,255 14
| | | $1,507,296 77
From which appropriating— | | |
Interest on bonded debt	$107,000 00	
Construction	300,000 00	
Sinking fund appropriations	20,000 00	
Purchase of telegraph stocks and patents	30,000 00	
		457,000 00
Leaves a balance of		$1,050,296 77
A dividend of 1¾ per cent requires		717,570 00
Deducting which, leaves a surplus, after paying dividend, of		$332,726 77
The full returns for the last quarter, ending June 30, give accurate data for summing up the business of the fiscal year ending with that date, and show the net profits for the year to have been		$5,146,639 45
The cash surplus at the beginning of the year was		772,469 91
Making		$5,919,109 36
Of this there has been paid—		
Regular dividends to stockholders	$2,870,241 25	
Extra dividend of one per cent from surplus	410,035 00	
For interest on bonded debt and sinking funds	468,517 13	
For construction on new lines and purchase of Stocks in Telegraph and Telephone Companies.	1,358,632 49	
For patents	320,130 00	
For real estate	98,298 35	
Total payments out of earnings		5,515,854 22
Leaving surplus July 1, as above, of.		$403,255 14

In view of the preceding statements, the committee recommend the adoption by the Board of the following:

Resolved, That a dividend of one and three quarters per cent from the net earnings of the three months ending September 30, be, and is hereby declared payable on the 15th of October next, to stockholders of record, at the close of business on the 20th day of September, instant.

Resolved, That for the purpose of the Annual Meeting of the Stockholders, to be held on Wednesday, the 13th of October next, and of the dividend hereinbefore declared, the stock books of the company be closed at three o'clock on the afternoon of the 20th of September, instant, and be reopened on the morning of the 16th of October next.

Respectfully submitted,
NORVIN GREEN, President.

Cumberland Valley Railroad.

A correspondent of the Baltimore Sun, writing from Hagerstown, Md., under date Sept. 11th, says that the Cumberland Valley Railroad Company have concluded to extend their road from Martinsburg, W. Va., a distance of about twenty miles further south, and then adds:

The extension to Winchester will put the road in connection with an important business center

of the Shenandoah Valley, and where it will form a connection with the Valley Branch of the Baltimore and Ohio railroad, now extending to Staunton. Engineers will next week commence surveys for the proposed extension, and, after the adoption of a line, work will be immediately commenced and vigorously prosecuted, so that the extension may be in operation in the early coming summer.

Southern Pacific Railroad.

The Southern Pacific Railroad Company own two distinct lines or systems, the Northern Division, consisting of a line from San Francisco to Soledad, 143 miles, with a branch from Carnadero to Tres Pinos, 18 miles, and the Monterey Railroad (nominally leased but really owned), from Castroville to Monterey, 15 miles. This system of 176 miles is worked by the company directly, but the Monterey road was not completed until the close of the year. The Southern division consists of a line from Goshen, Cal., to Yuma, Ari., 489 miles, with branches from Goshen to Huron, 40 miles, and from Los Angeles to Wilmington, 22 miles, being 551 miles in all; this division is worked by the Central Pacific Company under lease. The two divisions are to be connected hereafter by a line from Soledad to Lerdo, 160 miles. The company has a land grant of twenty sections per mile, covering about 930 miles of road built or to be built. It also owns the Colorado Steam Navigation Company, whose lines run on the navigable waters of the Colorado River some 300 miles. The equipment consists of 46 engines, 69 passenger and 12 baggage and mail cars, 581 box 348 flat cars, 228 service cars. Of these, 28 engines, 52 passenger and 10 baggage cars, 373 box and 191 flat cars and 94 service cars are in use on the Northern Division, the rest being leased with the Southern Division. The general balance is as follows:

Stock	$36.763,900 00
Funded debt	29,186,000 00
Other liabilities	475,713 08
Balance of accounts	1,819,347 99
Total	$68,244,961 02
Road and property	$66,804,710 54
Materials	122 805 62
Cash	188,980 73
Current accounts	448,097 55
Profit and loss	740,366 58
Total as above	$68,244,961 02

The stock and funded debt remained unchanged during the year. All the bonds are first mortgage 6 per cent bonds, and are further secured by a trust under which all receipts from the land grant are applied for the redemption of bonds. The company is responsible as guarantor for $236,000 bonds of the Market Street Railroad in San Francisco. The traffic of the Northern Division (161 miles) for the year was as follows:

Train mileage, passenger	305.763
Train mileage, freight	137,647
Total	443,410
Total locomotive mileage	570,332
Average miles per engine	20,369
Passengers carried	413 658
Passenger mileage	13,339,712
Tons freight carried	180,331
Tonnage mileage	11,613,297
Average passenger train load, number	43.63
Average freight train load, tons	84.37

This division has a very considerable local and surburban business out of San Francisco. In summer it has also a good deal of travel to pleasure resorts on the line; this was expected to be largely increased this year by the opening of the Monterey road, in connection with which the company has built a large hotel at Monterey, and made other arrangements for promoting summer travel. The earnings, &c., of the Northern Division, with the general income account, were as follows:

Passengers		$411.331 14
Freight		427,992 06
Mail and express		25,709 10
Total ($5,384 86 per mile)		$865,062 80
Expenses (61.20 per cent)		526,565 85
Net earnings ($2,120 48 per mile)		$338,496 95
Rental of Southern Division		1,659,819 76
Total		$1,998,316 71
Payments for interest	$1,751,160 00	
Payments on other accounts	366,246 46	
		217,406 46
Excess of payments		$119,089 75

The net receipts were considerably in excess of interest charges. For the previous year the report was made in a somewhat different form. The net earnings for that year were $2,155,704 03 showing a decline in net receipts last year of $157,387 82, or 7.3 per cent.

Denver, South Park and Pacific Railroad.

As the Stock Committee of the New York Stock Exchange at its next meeting will pass upon the application to have the stock and bonds of the Denver, South Park and Pacific Railroad Company admitted to the list of securities, the following facts from the official statement of the company, filed with its application, will be of interest:

The company was chartered June 14, 1874, under the laws of the then Territory of Colorado, authorized to construct and operate a narrow gauge railroad from the city of Denver by the South Park and the valley of the Arkansas to Southwestern Colorado and the Pacific Ocean, with various branches.

The following is now in operation: Main line, Denver to Buena Vista, 135 1 miles; Gunnison extension to Hortense, 6 miles; 141.1 miles. Branches—Bear Creek Junction to Morrison, 8.8 miles; Como to upper coal mine (towards Breckenridge), 1 mile; Como, south to lower coal mine, 3 miles—total, 12.8 miles. Total owned and operated, 153.9 miles; side track, 13.03 miles; gauge, 3 feet.

The extension of the main line to Gunnison City, a distance of fifty-eight miles beyond the end of track at Hortense, is now mostly under contract for completion in November next, or as soon thereafter as practicable. Trackage has been leased to the Denver and Rio Grande Railway Company over this extension as a rental equal to 8 per cent per annum upon one-half its cost, in addition to one-half of its maintenance.

Under the same contract the Denver and Rio Grande Railway Company has extended its line to Leadville from its intersection with the Denver, South Park and Pacific Railroad at Chalk Creek, and leased to it upon the same terms, equal rights in perpetuity.

The same agreement between these two companies provides for the pooling of all the receipts derived from them by the business of their roads on the joint trackage from Denver and Pueblo.

The road has been constructed by the parties who own it, nearly all citizens of Denver, and is reported to be one of the most substantially built and best equipped in the country. On the construction and equipment of the 150 miles now operated the stockholders have expended in cash $2,550 000. This 150 miles is bonded for only $1,890,000.

The railroad company owns 87½ per cent of the South Park Coal Company, which has 2,000 acres of coal lands at or near Como, in the South Park, about half-way between Denver and Leadville, on which are two well opened mines.

The capital stock authorized is $5,000,000, on which there has been issued on 150 miles of completed road, $3,500,000. All further issues of stock are to be limited to the rate of $20,000 per mile of completed extension and branches.

The first mortgage bonds to be issued are $2,500,000, of which there have been issued, at the limited rate of $12,000 per mile of completed road in actual operation, $1 800,000. Bonds dated August 1, 1876, principal and interest payable in United States gold coin of or equal to the present standard and free from United States taxes; principal payable May 1, 1905; interest payable May 1 and November 1, at the rate of 7 per cent. per annum. Bonds $1,000 each, numbered from 1 to 2 500 inclusive, with provision for their registration, and secured by a first mortgage upon its line of road from Denver to the extent of 208½ miles, its equipment, depots, shops, franchise and other property. A sinking fund of 1½ per cent per annum on the amount of bonds outstanding is applicable after August 1, 1886, to the amount of bonds by annual drawings for their redemption at par and accrued interest. Farmers' loan and Trust Company of New York, trustees. The company has no other bonded debt, and is substantially free from floating debt. Earnings for the year ending June 1, 1880, were $1,659,764; expenses, $560,934; net earnings, $1,098,829.

Shenandoah Valley Railroad.

The completion of the Maryland Division now places the whole line of the Shenandoah Valley Railroad, so far as at present contracted (to Milford, Warren county, Virginia), in direct communication with New York, Philadelphia, and all points in the Middle and New England States, via the Cumberland Valley and Pennsylvania Railroads, as also with Baltimore, via the Western Maryland Railroad. These conditions are additional to that previously established with the Baltimore and Ohio Railroad at Shenandoah Junction, 28 miles from Hagerstown.

Track is now being laid southward from Milford, the present stopping point of trains, and northward from Waynesboro, on the Chesapeake and Ohio Railroad, and the work of construction is progressing so rapidly throughout the whole of the unfinished portion of the road as to insure its entire completion from Hagerstown, Md., to Waynesboro, Va. (143 miles), during the present year, opening to commerce and travel an important highway between the Middle and North Atlantic States and the great South and Southwest.

A first class railroad organization, with corresponding equipment, is now operating the finished portion of the road, and trains are running regularly between Hagerstown and Milford, Va., a distance of 75 miles. As additional lengths of road are finished, the running of trains will be extended to new stations, and increased facilities offered to the business and pleasure-seeking public.

The wonderful Caverns of Luray, which have recently been carefully explored by a large party of scientific gentlemen from the Smithsonian Institute, are immediately upon the line of the Shenandoah Valley Railroad, the entrance to the caverns being but three-quarters of a mile from the town of Luray and from the Luray passenger station of the railroad.

☞ Articles of association of the Cape May and Sewell's Point Railroad Company have been filed in the office of the Secretary of State of New Jersey. The road will begin at the city of Cape May and terminate at Sewell's Point. The length of the road is two miles, and the amount of capital stock is $30,000, divided into 600 shares of $50 each.

☞ At the recent annual election of the Pullman Palace Car Co., Robert T. Lincoln was elected a director in the place of J. N. Du Barry resigned. The other directors were re-elected; and the Board, as at present organized, consists of George M. Pullman, President, Charles G. Hammond, John Crerar, Marshall Field, Amos T. Hall, Robert T. Lincoln and R. P. Flower.

☞ Work was begun at Grindstone Hill on the 2d inst., on the Baltimore and Cumberland Valley railroad. The contract calls for the completion of the work from Waynesboro to Shippensburg, Penn., by the 1st of July.

Statement of the Public Debt of the United States, September 1, 1880.

Interest paid by United States, $47,589,861 30; interest repaid by transportation of mails, &c., $13,643,333 04; interest repaid by cash payments: 5 per cent net earnings, $655,198 87; balance of interest paid by United States, $33,291,329 39.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Aug. 31, 1880.

JOHN SHERMAN,
Secretary of the Treasury.

What's in a Name.

Contrary to general belief, there seems to be something in a name after all. In referring to the reported discoveries of gold mines in New York, The Daily Stock Report, of San Francisco, says: "The names of townships and counties in Northern New York must be changed before an experience-wise public will believe that gold mines have been struck there. Imagine a gold discovery in a place so politely named as 'Benson Township, Hamilton County!' Let this be changed to 'Jackass Gulch, Hamstring District.' Tell us no more of 'Greenfield,' 'Milton,' 'Mountain House,' in 'Saratoga County,' as the places where strikes have been made. Californiaize them into 'Buckshot Belt,' 'Million-a-minute,' 'Tip-top Shanty,' 'Shirt-tail Bend,' 'Bill-be-damn,' and faith may follow."

☞ The product of the Homestake Mine, Black Hills, for the last two weeks of August was 5,209 ounces of gold bullion, valued at about $86,500. This makes over $144,000 for the month of August, or $16,000 more than for July, which showed the largest production of any month up to that date.

Philadelphia Stock Exchange.

Closing Prices for the week ending Sept. 14.

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, September 16, 1880.

Money on call is 2½@3 per cent; time loans are 3 to 6 per cent; and prime mercantile paper 4½@5½ per cent.

The actual rates for first-class bankers' sterling are 4.81@½ and 4.83¼@4.84, the posted rates being 4.82 and 4.84½. Cable transfers are 4.84 @½ and prime commercial 4.79½@4.80.

The offerings of Government bonds to the Treasury on Wednesday amounted to $5,649,700, of which $2,500,000 were purchased as follows: $1,676,500 5 per cents at 102.53@102 59; $331,500 6s of 1881 at 104.48@104.65, and $193,000 6s of 1880 at 102.87@102.60.

Judge Lawrence, First Controlier of the Treasury, has rendered a decision in a case recently brought before the department. The decision is important to the holders of registered United States bonds. Lewis Kline bought and had registered in the name of one Myers, of Aurora, Ill., certain Government bonds without the knowledge of Myers. There were judgments against Kline, and the judgment creditors began proceedings against Kline and Myers to compel the application of the bonds in satisfaction of the judgments. Kline went to Canada, and there, in the name of Myers, assigned the bonds to other persons, who now ask their transfer on the books of the Treasury department. Judge Lawrence decides that if the bonds had been registered in a fictitious name they might, perhaps, on proof of the facts, be now transferred to the present holders. But

as they were registered in the name of a real person he became a Trustee, holding the naked legal title, and before the bonds can be registered in the name of the present holders there must be a release from Myers, or a decree of court divesting him of title. He holds that no decree of a court can require the United States to pay the bonds to the judgment creditors of Kline; that a Government bond is a contract to pay the person in whose name it is inscribed or his indorsee, and this obligation cannot be interfered with by a decree of court.

State bonds at the Board were neglected; Railroad bonds were irregular, but generally higher; and Railroad Shares, compared with the quotations of the previous week, show, in some instances, a considerable decline in price.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 41⅛@42⅛; Canada Southern, 57@58⅛; Central of New Jersey, 76⅛@76¼; Central Pacific, —@74⅛; Chicago and Northwestern, 102⅞@103⅛; do. pref., 122@122⅛; Chicago, Burlington and Quincy, 135⅛@135⅜; Chicago and Alton, 115½@117; Chicago, Milwaukee and St. Paul, 91⅛@91¼; do. pref., 111@111½; Chicago, Rock Island and Pacific, 118@118⅛; Chicago, St. Louis and New Orleans, 39@39½; Cleveland, Columbus, Cincinnati and Indianapolis, 71@71½; Columbus, Chicago and Indiana Central, 19⅛@19⅛; Delaware and Hudson Canal, 85⅛@86; Delaware, Lackawanna and Western, 90@90⅛; Hannibal and St. Joseph, 38¼@38⅛; do., pref., 80⅛@80⅝; Houston and Texas Central, —@66; Illinois Central, 111⅞@112⅛; Lake Erie and Western, 33¼@33½; Lake Shore and Michigan Southern, 107½@107⅝; Louisville and Nashville, 143@145; Manhattan Elevated, 81@81¼; Morris and Essex, 110@110⅜; Metropolitan Elevated, 92½@95; Michigan Central, 94¼@94½; New York Elevated, 110@112; New York Central and Hudson River, 129⅛@130¾; New York, Lake Erie and Western, 38¼@38⅜; do. pref., 67@67½; New York, Ontario and Western, 23⅛@23¾; Northern Pacific, 30⅝@30⅞; do. pref., 54⅛@55; Ohio and Miss., 36@36⅛; do. pref., 75@76⅛; Pacific Mail, 40@40¼; Philadelphia and Reading, 30⅝@30¾; St. Louis and San Francisco, —@36; do. pref., 45¾@46⅛; do. 1st pref., 75@76⅛; St. Louis, Iron Mountain and Southern, 54⅞@55; Union Pacific, 92½@92¾; Western Union Telegraph, 105¼@105⅜; Wabash, St. Louis and Pacific, 35⅛@35¾; do. pref., 65⅝@69¾.

The following quotations of sales of Railway and other securities, for the week, are in addition to those given elsewhere in our columns:

☞ Thomas Messinger, of Great Neck, has been appointed receiver of the Flushing and North Side Railroad, of which the bondholders are foreclosing the mortgages.

Rapid Transit in Brooklyn.

The Rapid-Transit Commission of Brooklyn appointed by the Mayor under the General Railroad Law have reported their plans for a rapid-transit road, and the report has been filed in the Mayor's office. The statement includes the estimate and figures of J. J. R. Croes, the Engineer of the Board, with calculations as to the different styles of elevated roads. The routes were fixed on the 11th of August last, and provide for a line running from Fulton Ferry in a series of curves over streets and through blocks to Adams street up to High street, then to Fulton street and up to the line of the city at New Lots. There is to be a branch down Myrtle avenue to the city line at Newtown and a line from Fulton street at Flatbush avenue to Fourth avenue, then to Prospect avenue and Twenty-first street, while another branch is to leave Fulton avenue at Grand avenue and via Atlantic avenue to the Coney Island Railroad depot. The time allotted for the completion of these several sections of the road runs from two to four years.

The general plan in Adams street and the narrow thoroughfares is to have the tracks over the centre of the street, with columns on the edges of the sidewalks. For Fulton street and Myrtle, Prospect and Ninth avenues it is proposed to have one column in the centre of the street, with the car track separated if necessary to accommodate it, and the other supporting column on the sidewalk, one track to be over the central row of columns and the other as far from the houses as possible. In Flatbush and Fourth avenues the elevated structure is to straddle the horse-car tracks as it does in Third avenue, New York. The highest grade is 79 feet to the mile. A very lofty station will be required at Fulton Ferry, and the engineer remarks that this difficulty can be readily overcome by the use of car elevators at that point capable of raising at once a loaded train of fifty tons.

The estimated cost of the structure is $612,000 per mile, or for the 13 miles $7,958,280. The specifications of the commission are very exact. The iron structure must allow a clear space of 12 feet above the roadway and 9 feet above the sidewalk, and the strength must be sufficient to carry a moving weight of 2000 pounds per foot on each track. Over all cross-walks in the street, aprons or tight floors must be suspended or laid to prevent the falling of cinders and the like to the pavement. The iron work is all to be painted a light color, and it is provided that all steam locomotive engines used shall be fitted with the most efficient and approved devices which may be now or hereafter known for the consumption or purification of the smoke, prevention of the discharge of cinders and repression of noise from the discharge of steam or from the running-gear. The fare may be as much as ten cents, except between the hours of 5.30 to 7.30 A. M. and from 5 to 7 P. M. when 5 cents only may be charged, as directed by law.

The Commissioners will open books for subscription in October, but as yet they have no information that any body of capitalists intend to take up rapid-transit in Brooklyn according to these plans. The capital stock of the company is fixed at $1,000,000, in 10,000 shares.

☞ The Toledo, Delphos and Burlington Railroad Company have closed contracts for the extension of their road 250 miles from Kokomo, Ind., to St. Louis, making a trunk line from Toledo to St. Louis shorter than the Wabash. This road will soon be running through to Dayton, making in all 535 miles of road terminating at Toledo.

The Erie and Boston Line.

Mr. John N. Abbott, General Passenger Agent of the New York, Lake Erie and Western Railroad, has sent the following circular to all ticket agents :

Our line of sleeping coaches on the Atlantic and Pacific Express, trains 3 and 12, formerly run between Hornellsville and Albany, has been extended to Boston on the East and Cincinnati on the West, running over the following named roads : New York, Pennsylvania and Ohio Railroad, between Cincinnati, O., and Salamanca, N. Y. ; New York, Lake Erie and Western Railroad, between Salamanca, N. Y., and Binghamton, N. Y. ; Delaware and Hudson Canal Company's Railroad between Binghamton, N. Y., and Mechanicsville, N. Y., via Albany ; Boston, Hoosac Tunnel and Western Railroad, between Mechanicsville, N. Y., and North Adams, Mass. ; Fitchburg Railroad, between North Adams, Mass., and Boston, Mass. This route will be known as the "Erie and Boston Line," and is represented by ticket forms recently furnished you. The sleeping coaches of this line are new, and of Pullman's latest pattern, and will run between Boston and Cincinnati on trains 3 and 12 daily, except that on Sundays the sleeping coaches will not run east of Albany.

New York, Lake Erie and Western R. R.

The following is a comparative statement of the earnings, expenses, etc., of the New York, Lake Erie and Western Railroad for the month of July :

	1879.	1880.
Gross earnings....	$1,273,532 75	$1,580,975 88
Working expenses..	957,683 03	1,014,658 20
Net earnings..	$315,847 82	$566,317 68

—showing an increase in gross earnings of $307,443 13, in working expenses of $56,975 17, and in net earnings of $250,467 96.

From October 1 to July 31, the earnings, expenses, etc., were :

	1878-'79.	1879-'80.
Gross earnings....	$12 999,804 57	$15,299,817 86
Working expenses.	9,385,818 01	9,657,940 65
Net earnings.	$3,613,986 56	$5,641,877 21

—showing an increase in gross earnings of $2,300,513 29, in working expenses of $272,622 64, and in net earnings of $2.027.890 65.

☞ The Buffalo, Pittsburg and Western Railway Company has been organized with a capital of $1,000,000, to build a road from Prospect Station, on the Crescent Division of the Pittsburg, Titusville and Buffalo Railway, direct to Buffalo.

☞ The Homestake Mining Company has declared its regular monthly dividend for August of 30 cents per share, and an extra dividend of 30 cents per share, both payable September 25 at the office of Wells, Fargo & Co., 65 Broadway.

☞ The earnings of the Indiana, Bloomington and Western Railroad for the month of August, 1880, were $116,731 99, against $107,519 98 for the month of August, 1879, an increase of $9,212 01.

☞ Gen. Kilpatrick has been appointed Government Director of the Union Pacific Railroad vice Nathaniel Niles of New Jersey.

☞ The Utah Northern Railroad is graded in Montana forty miles north of Red Rock.

Value of City of Glasgow Bank Shares.

By a strange irony of fortune, the shares of the failed City of Glasgow Bank have become a valuable property. City of Glasgow Bank shares have become scarce because very few shareholders have survived the blood-letting process of the liquidation. Every holder who has been "sold up," or has made a compromise with the officers appointed by law for the winding up of the bank, loses his right as a shareholder. The remnant of solvent holders being thus enormously reduced, the value of the shares which remain to represent the claim upon the bank's assets become proportionately enhanced. With what feelings must a notification of this sort be read by the hundreds of ruined shareholders and by the thousands of now impoverished persons dependent upon them. To think, too, that the directors of this so-called bank just released from prison or still expiating their offence there, should have the questionable satisfaction of knowing that they have actually raised the market value of each share to £3,000.

Notes from Boston.

The railroad commissioners began their fall examination of the railroads in the state, last Tuesday.

The Brookline selectmen have dismissed a petition for an elevated road from Boston, but the petitioners, as in other petitions for elevated roads from Boston to the suburbs, will apply to the railroad commissioners for a location.

Bryant & King, Boston leather dealers, have received an award of $97,000 damages against the Worcester and Nashua railroad and the Bigelow carpet company of Clinton, the one of whom maintained a culvert and the other a reservoir dam which broke in 1876 and swept away Bryant and King's tannery.

The Connecticut Lake company offers to take $200,000 in Boston, Concord and Montreal railroad stock, and pledges a heavy daily freightage, if the railroad is extended from North Stratford through Colebrook to the Connecticut lake, bringing within reach of the market the now almost inaccessible lumber belt of northern New Hampshire.

The harbor and land commissioners at Boston have contracted with Thomas Potter of Jersey City, N. J., to excavate 300,000 cubic yards of material from the harbor and fill in 15 acres of flats east of the 50-acre lot now owned by the New York and New England railroad company. The price is 40 cents a yard, the same contractor getting 50 cents from the railroad company for grading its neighboring property.

Representatives of the Cambridge and South Boston railroad company urge the Cambridge aldermen to permit an elevated railroad to be built from Mt Auburn to the West Boston bridge. The petitioners declared that they were determined to test the railroad law, and that, should both the city government and the railroad commissioners refuse, an appeal would be made to the supreme court.

There is a proposition to utilize the water which runs out of the west portal of the Hoosac Tunnel, and Manager Gardner and Lieut-Gov. Weston have been looking the matter over. The Troy and Greenfield road is now dependent on the fire district for water supply for the locomotives, and during a drouth the supply is liable to be limited if not entirely cut off, and it is thought practicable to build a reservoir somewhere at the west end and bring water into the village, the 600 gallons a minute of the present water being an ample supply, it is estimated, for all the purposes of the road for the next 50 years, while the interest of the expense to build the works would be less than the rate now paid the fire district for water. It is proposed, also, to allow some party to lay the pipes, and after supplying the railroad to sell the surplus either to manufacturers or other parties, and receive the rentals of the latter for his expenditure.

Steam on the Canals.

In his "Heart of Mid-Lothian," Sir Walter Scott tells of the serious opposition to the proposition to supersede the old easy-going fly-coach by the rapid mail-coach encountered in England and parts of Scotland in the seventeenth century. It was alleged that accidents would be more frequent, and that the movements of the mail-coaches would be so rapid that passengers would not have time to dispute the charges of the inn-keepers. And when Robert Stevenson proposed to construct a railway upon which he believed the trains would be able to attain a speed of six miles an hour he was strenuously opposed on the ground that rapidity of motion would addle the hens' eggs on the neighboring farms, and for other reasons of a similarly weighty character. We are reminded of these historical facts by the opposition that is being made at present to the introduction of the cable-towing system on the Erie Canal. Grocers along the canal banks are opposed to it because they allege that the cable boats don't stop at their places, or don't wait as long as formerly; and some of the owners of horse boats are opposed to it because accidents are of more frequent occurrence with cable than with horse towing. Without expressing an opinion as to the practicability of the cable system as at present operated on our canals, we desire to say that the Canal Board should receive with many grains of allowance the objections advanced against the cable, or any other system of steam towing or propulsion upon the canal. Much of it is due to prejudice against any innovation upon the old methods. If a system could be put in operation to-morrow that would move loaded boats at the rate of five miles an hour and at half the expense of moving horse-boats, its introduction would be opposed, for the reason that it would interfere with existing methods of doing the business. No improvement was ever introduced without exciting serious opposition. But the canal authorities might as well reach the conclusion first as last that it is part of their business to encourage steam on the canal, for unless steam does come into general use the days of canal commerce are numbered. The mule on the tow-path can no more successfully compete with the steamer on the enlarged Welland Canal than the old fashioned stage coach can with the modern fast mail. For this reason we think the Canal Board made a mistake a few weeks ago in rescinding the resolution allowing single steamers the right of way at the locks. So far as the cable system is concerned the company's managers do not claim that it is perfect. Some of the cable is not fit for the work it is made to do There are a great many other defects in the apparatus which are the result of inexperience. These will be corrected as soon as possible. But so long as the company is acting in good faith, is investing large amounts of money in the belief that the system is practicable, is abundantly able and perfectly willing to pay for the little damage done, it should not be inconsiderately interfered with. It is an indisputable fact that this same system is now in practical use upon the canals of Germany and France, and that no difficulty is experienced in navigating serpentine streams with it. If it can be made a success on a European canal, why not on a New York canal.—[Buffalo Commercial Advertizer.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending September 4, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad ...	208,000	4,916,275	5,869,454
Schuylkill Canal	13,360	280,819	629,798
Lehigh Valley.....	158,416	3,233,830	3,125,059
Del.,Lack. & Western.	97,054	2,174,594	2,474,759
Shamokin Valley	21,349	545,673	612,986
Central New Jersey..	109,757	2,198,157	2,584,492
United R. R. of New Jersey	34,414	714,461	582 069
Pennsylvania Coal ..	32,584	670,358	945,126
Delaware and Hudson	77,118	1,889,437	2,229,030
Huntingdon & Broad Top Mt.....	6,384	298,285	221,527
Penn. and New York.	26,166	809,583	890,912
Clearfield, Pa.....	48,773	1,060,013	1,031,600

The report of the Lehigh and Susquehanna Division of the Central Railroad of New Jersey is for nine days ending August 31, and the total for the year is down to that date.

The total tonnage of anthracite coal from all the regions for the week ending Sept. 4, as reported by the several carrying companies, amounted to 651,490 tons, against 493,459 tons in the corresponding week last year, an increase of 158,031 tons. The total amount of anthracite mined for the year is 14,872,765 tons, against 17,054,116 tons for the same period last year, a decrease of 2,681,-351 tons. The quantity of bituminous coal sent to market for the week amounted to 310,322 tons, against 78,281 tons in corresponding week last year, an increase of 32,041 tons. The total amount of bituminous mined for the year is 2,857,932 tons against 2,377,604 tons for the corresponding period last year, an increase of 480,328 tons. The total tonnage all kinds of coal for the week is 761,812 tons, against 571,740 tons in corresponding week last year, an increase of 190,072 tons, and the total tonnage for the coal year is 17,230,697 tons against 19,431,720 tons to same date last year, a decrease of 2,201,023 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the last two days of August was 57,047 tons, of which 46,469 tons were coal and 10,578 tons coke. The total tonnage for the year thus far has been 4,604,481 tons of which 3,464,030 tons were coal and 1,140,451 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Sept. 4 were 52,-225 tons, and for the year to that date 1,406,521 tons—300,726 tons over the corresponding period of 1879. The shipments to the Baltimore and Ohio Railroad for the week were 23,397 tons, and for the year 876,229 tons, an increase of 238,808 tons over 1879. The shipments to the Chesapeake and Ohio Canal for the week aggregate 25,340 tons, and for the year 379,040 tons, an increase of 25,753 tons as compared with last year. Shipments to the Pennsylvania Railroad for the week were 3,487 tons, and for the year 151,243 tons, an increase of 36,665 tons as compared with 1879. —Phil. Ledger, Sept. 13.

Chesapeake Ohio Railway.

The earnings of the Chesapeake and Ohio Railway for the month of August 1880, were.....	$259,109 96
For the month of August 1879.....	216,694 95
Increase in 1880.....	$43,415 01
For the first eight months in 1880..	$1,748,168 94
For the first eight months in 1879..	1,301,887 78
Increase in 1880.....	$546,281 16

The earnings for 1880 are derived from the same sources of revenue with those of 1879, without

any increase of mileage, or development of additional territory, and therefore represent the steady growth of the business of the road independently of the results to be derived from the connections and extensions now in process of construction.

Legal Notes.

"*Ignorance of the Law Excuses No One.*"

RAILROADS.—PRINCIPAL AND AGENT.

Where the conductor on a car acts in the course of his employment as such, and with a view to defendant's interest, and on appearances which he has to exercise his judgment, the railroad is responsible for the manner in which he acted and the consequences of his act, though he may have acted in excess of his authority. [Schultz vs. The Third Avenue R. R. Co. N. Y. Superior Ct. Gen. Term.]

STATUTE OF LIMITATIONS.—NOTE PAYABLE THREE MONTHS AFTER DEMAND.

Payment of a promissory note "payable three months after demand" was sought to be enforced by its holder. The note was indorsed with payment of two installments of interest, but no interest has since been paid during a period of upward of twenty years. Held, that payment of interest was not evidence that a demand for payment of the principal had been made so as to make time run against the holder of the note under the Statute of Limitations, and that the fact that more than twenty years had elapsed without payment was not a fact from which the court could presume satisfaction of the note in the absence of any demand having been made. Chan. Div., March 23, 1880. Brown v. Rutherford. Opinion by Hall, V. C., 42 L. T. Rep. (N. S.) 659.

COMMON CARRIERS.

In the Southern Express Co. v. Van Meter, recently decided by the Supreme Court of Florida, the question was as to misdelivery by an express agent under mistake. A, a stranger in town stopping at a hotel, forged a telegram in the name of B, requesting a bank in another town to remit $500 to B by express, which the bank did on receiving B's agent's obligation to repay it; and it was subsequently repaid. A called at the express office in company with the landlord of his hotel, who treated him there as B, though without any request from the express agent for information or identification. The express agent, knowing that A was a stranger, delivered to him the package. The court held that the express company was liable. The decision seems to have been placed on the principle that an express company is a kind of carrier that is held to make actual delivery (unless it is another than the last in a series of connecting lines), and if it fails to make personal delivery to the one to whom the package is addressd, it must make good the loss.

RAILROAD TAXATION.

The Atlantic and St. Lawrence Railroad Co. is lessor, and the Grand Trunk Railway Company lessee, of a railroad running from Portland to Canada, through Maine, New Hampshire and Vermont. The lease was made in 1853 for 999 years. The personal property used in operating the road belongs to the lessee, and the questions raised relate to the taxation of "the road"—all the real estate of the lessor, including land, buildings and fixtures, used for the ordinary and usual purposes in operating the road, being called "the road." The statute declares that "every railroad corporation * * * * shall pay to the State an annual tax upon the actual value of the road, rolling stock and equipments." Judge Doe says that "the only question is: What was the market value of the road April 1, 1879? A sale or lease of it, made at any time, is admissable evidence on the question of its value at that time, and its value at any time is admissable evidence on the question of its value in 1879. * * * * The lease has no tendency to show anything but the value of the whole road, in three States, in 1853. And it may be possible to ascertain the value of the New Hampshire part in 1879, without finding the value of the whole at that time. When the value of the whole is ascertained there may be difficulty in finding the value of the New Hampshire part. But that difficulty, like all others in the case, is one of fact and not of law. Upon all evidence which the referees regard as of any weight, they will find what was the fair market value of the New Hampshire part of the road on the first day of April, 1879." Atlantic and St. Lawrence R. R. vs. the State. N. H. Supreme Court. C. J. Doe. Sept. 2, 1880.

TRADE MARKS.

Application to register as a trade-mark for ticking the word "Lancaster," accompanied by a symbolical representation of a rose, held, that to admit the word "Lancaster" to be an essential feature of the mark, would convey a false impression to the public—viz., that the goods were manufactured in Lancaster, when, in fact, they were made in Philadelphia, and that any one making like goods in Lancaster might obtain an injunction against the use of such word by parties manufacturing elsewhere. Newman vs. Alvord; Armistead vs. Blackwell; Blackwell vs. Dibbrell & Co., 14 O. G., 633.

Also held—

1. That as a rule geographical names cannot be allowed registration as trade marks.

2. That before any geographical name can be said to be registrable it must clearly appear that the place of that name is such a one that the word will be understood by the general purchasing public as primarily fanciful, and that manufacturers of like goods at such place cannot so mark their wares and claim the protection of our laws.

3. That the essential features of a trade-mark are those only which serve in whole or in part to distinguish the goods of the party by whom such mark is adopted, and it is not proper that anything should be described as essential which the courts would hold otherwise; and,

4. That words calculated to deceive the public as to the place of manufacture should not be allowed registration.

The decision of the examiner of trade marks is accordingly affirmed. Ex Parte Farnum & Co. U. S. Patent Office, Aug. 9, 1880.

Note and Comment.

—Sunday traffic over the Massachusetts State road kicks up quite a rumpus.

—An easy way to make change for a dollar is to cut a $1 greenback into ten pieces. Each piece will then be good for ten cents at the federal Treasury.

—The Connecticut papers describe the speed of trains on the Shepaug road by the story that Jerome Grannis, a New Preston stage driver, being too late for a train last week, licked up and caught it some miles below and put his passengers on board.

—After a few more such accidents, as that reported at the Beea Moor Tunnel in England, where the passengers all safely locked in, like cattle in a pen, waited for an approaching train to slaughter them, our English cousins may conclude to unlock the doors.

—If a railway passenger is injured by an accident arising from a collision or a defect in the machinery or roadway he is simply required to prove the fact of the accident and the extent of the injury. The burden of proof is then upon the railroad to disprove negligence.

—The editor of the Cape Cod Item, who eloquently inveighs against all sorts of deadheading, tells of a religious conference where resolutions were passed pitching into the Old Colony railroad for running Sunday trains, and where immediately following resolutions were passed thanking the same road for favors received in free passes.

—The Bank of England is meeting the drain of gold with ease though the bank of France and the Emperial Bank of Germany find great difficulty in maintaining even the pretense of gold payments. The Boston *Herald* considers this a very strong argument against bi-metalism as the Bank of England is fettered by the single standard of gold in the strictest construction, while the national banks of France and Germany do business under a modified form of the double standard.

—Russia is feeling very seriously the effect of American competition in the exportation of grain. The points which give the American system a great advantage are our vast network of railways, which reach almost the very doors of our farmers, and the facilities which elevators offer in reducing the rate of transport in the shipment of grain. It does not seem likely that the export of cereals from the United States will for a long time receive any serious check from that quarter.

OFFICE OF THE HOMESTAKE MINING COMPANY,
18 WALL-ST., NEW YORK, Sept. 14, 1880.

DIVIDEND NO. 21.

THE REGULAR MONTHLY DIVIDEND OF Thirty Cents per share has been declared for August, payable at the office of the Transfer Agents, Wells, Fargo & Co., No. 65 Broadway, on the 25th inst. Also, an

EXTRA DIVIDEND, (No. 22.)

of same amount has been declared, payable at the same time and place. Transfers close on the 20th inst. H. B. PARSONS, Assistant Secretary.

COMMONWEALTH OF MASSACHUSETTS.

Troy and Greenfield Railroad and Hoosac Tunnel.

OFFICE OF MANAGER,
NORTH ADAMS, August 30, 1880.

Bids will be received by the subscriber until Sept. 15, 1880, for the following wrought iron bridge work on the Troy and Greenfield Railroad.

Two 3 feet Plate Girder Bridges, 36 feet long.

One Through Bridge to have such additions as will fit it for double track. Plans of present structure will be furnished on application.

All Bridge seats are 2 feet wide.

The bridges are required to be of the best American iron and workmanship, and proportioned for a general live load of 3000 pounds per foot of track, and a special panel load of 4400 pounds per foot of track, which loads, together with the dead weight, shall not strain the iron over 9000 pounds per square inch in tension, or in compression not over one-fifth its ultimate strength.

Strains on pins or rivets not to exceed 7500 pounds per square inch of area of pin or rivet. On rivet or pin bearings not to exceed 1000 pounds per square inch of bearing surface measured by taking product of diameter of rivet and thickness of plate.

All pin connections or abutting joints to be plained off or turned.

The bridges to have one coat of acceptable paint before leaving the shop.

Plans must accompany the proposals.

Bids will also be received for the following I Beams to be delivered at North Adams station.

12 ten inch beams 13 feet long.
8 twelve inch beams 18 feet long.
8 nine inch beams 11 feet long.
18 four inch beams 6 feet long.

The right is reserved to reject any or all bids.

G. CLINTON GARDNER,
MANAGER.

☞ The Denver and Rio Grande Railway Company has let the contract for grading the extension from Kokomo to Breckenridge. The track will probably be completed to Kokomo by November 1, and to Breckenridge by January 1.

☞ The Chicago and Indiana Southern and the Indiana and Chicago Railway Companies have consolidated under the name of the Chicago and Indiana Southern Railway Co.

FRANCIS & LOUTREL,

NO. 45 MAIDEN LANE,

Stationers, Printers, and Manufacturers of Patent Spring-Back Account Books,

All kinds of first-class Stationery, Writing Paper, Desk Portfolios, Scrap-Books, Expense-Books, Diaries, Pocket Cutlery, Cards, Chessmen, Wallets, etc., etc.

We keep everything in our line and sell at lowest prices. Orders solicited. CYRUS H. LOUTREL.

ENVELOPES.

To Railroad Companies and City Street Railways.

The subscribers are largely in the Envelope Manufacturing business, making every kind used by Railroads, including the cheap Manila paper. Also the little street car Envelopes for change or tickets. All well made and sold at low prices. Samples furnished when requested.

VALENTINES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinnest parts.

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,
16 & 18 Chambers St.,
NEW YORK.

PATENT
MINERAL WOOL.

ITS FOREMOST QUALITIES:

CHECKING TRANSMISSION OF HEAT, COLD AIR, SOUND AND ELECTRICITY AS AN AIR-HOLDING MATERIAL, ABSOLUTELY FIRE-PROOF AS A MINERAL—RAT AND VERMIN-PROOF, AND NOT ATTRACTING DAMPNESS, BECAUSE VITREOUS.

Its Manufacture, Composition and Uses in the Construction of Dwellings, etc.

This pamphlet and small sample mailed free.

A. G. DAY,

MANUFACTURER OF
Kerite Insulated Telegraph Wire and Cables

Of all kinds made to order, for Ocean, River, Aerial and Subterranean Lines.

The Kerite covering of these Conductors unlike any other, resists effectually the destructive action of Heat and Moisture, and the corrosive agents either in Earth, Air or Water.

☞ Special orders should state whether the Cable is to be exposed to Earth, Air or Water.

FACTORY—SEYMOUR, CONN. **Office, 120 Broadway, New York.**

NEW YORK, LAKE ERIE & WESTERN RAILWAY.

TO THE TRAVELING PUBLIC.

During the Centennial Season—six months, closing November 10, 1876—the Erie Railway carried almos 3,000,000 passengers, without a single accident to life or limb, or the loss of a piece of baggage.

And for a whole year, the official records of the United States Post-Office Department show the arrivals of Erie Railway trains in New York, on time, to be from 15 to 27 per cent. ahead of competing lines.

Facts well worthy the consideration of travelers.

E. S. BOWEN, General Superintendent.
JNO. N. ABBOTT, General Passenger Agent.

PASSENGER CARS

Of the Finest Finish, as well as every description of CAR WORK, furnished at Short Notice and at Reasonable Prices by the

HARLAN & HOLLINGSWORTH COMPANY, Wilmington, Del.

J. CURLEY,
MANUFACTURER OF ALL KINDS OF CARRIAGES

Fine Work both Heavy and Light a Specialty!

☞ All the latest Styles or Patterns kept in Stock or Works.

MANUFACTORY AND REPOSITORY, Corner Boreum Place and State St., Brooklyn, N. Y.

EAMES VACUUM BRAKE CO.,
RAILWAY TRAIN BRAKES,

P. O. BOX 2,878. SALES OFFICE, 15 GOLD ST., NEW YORK. Represented by THOS. PROSSER & SON.

THE EAMES VACUUM BRAKE is confidently offered as the most efficient, simple, durable and cheapest power Brake in the market. Can be seen in operation upon over fifty roads.

Counterfeit Money.

Among the new features adopted by the AMERICAN RAILROAD JOURNAL, as appears on another page of this issue, is a department on counterfeit money. It is intended to make this a permanent and authentic feature of the paper, and we believe it is one that will prove of great service and value to our readers. We are to receive from the U. S. Secret Service Division at Washington immediate notice of the discovery of counterfeits which will be promptly published in the JOURNAL, and information in various forms will be given, through facilities which we have, so that this department may be taken as a trustworthy guide and assistant in checking the circulation of bogus money.

The Cape Cod Ship Canal.

The ship canal which is to connect the waters of Massachusetts Bay with those of Buzzard's Bay follows the general plan of the Suez Canal, which is the only one yet constructed without locks at either end and communicating freely with the sea. The Suez Canal is, correctly speaking, an artificial strait connecting the Mediterranean and the Red Sea; and the fact that the two seas are nearly on the same level, and the rise of tide small, allowed this method of construction to be adopted.

The idea of forming this strait between the two seas is of very ancient origin, and its author unknown. It is understood that a water communication between the Red Sea and the Mediterranean was formed as early as six hundred years before the Christian Era and existed for a period of fourteen hundred years, after which it was allowed to fall into disuse.

The idea of restoring this ancient communication on a scale suited to modern times is attributed to Napolean I., who, about the close of the last century, obtained a report from M. Lepere, a French engineer, which however was followed by no result, and it remained for M. de Lesseps, to realize the dreams of sanguine merchants, by completing the long desired passage.

The postponement of the scheme undoubtedly favored its success, for had the canal been completed a few years sooner, before the introduction of ocean-going screw-steamers, it would have been a financial failure, as captains of sailing vessels would have preferred to round the Cape of Good Hope, to threading their way through such an inland passage, exposed to risks of rocks and shoals and subjected to protracted calms and contrary winds. But the rapid adoption of ocean steamers by all the leading shipping firms in the world, introduced a new feature into ocean navigation and made the Suez Canal not only a convenience but a necessity.

M. de Lesseps spent nearly six years in maturing his plans, and in 1855 formed the "Universal Suez Canal Company," but it was not until the latter part of the year 1860 that work was actually begun, and it was not until February, 1869, that water again flowed, for the first time in many centuries, between the Mediterranean and the Red Sea.

In making this strait across the desert and converting dry sands into navigable lakes, there were about eighty millions of cubic yards of material excavated, and at one time nearly thirty thousand laborers were employed, for whose use a supply of fresh water was conveyed from the Nile at Cairo, and distributed along the whole length of the canal.

Looking at these facts, the Cape Cod Canal seems an inconsiderable affair. The Suez Canal has an average navigable depth of twenty-six feet, is seventy-two feet wide at the bottom and is eighty-eight geographical miles long. The Cape Cod Canal will have an average navigable depth of at least twenty feet, will be sixty-one feet wide at the bottom and will have a total length of about nine miles.

The Suez Canal, however, was built by subscriptions from three great nations and was aided and fostered by enormous land grants and other valuable privileges while the canal at Cape Cod will be constructed by private enterprise. If the amount of money expended on the Suez canal was great, the results obtained were of corresponding importance. Twenty thousand pounds sterling is not too large a sum to spend, in reducing the distance between Western Europe and India from 11,379 to 7,628 miles and in effecting a saving in every voyage of thirty-six days. The gentlemen who are to construct the Cape Cod canal do not expect such magnificent results, but are willing to spend several millions of dollars so that steamers from Boston to New York can pass through an unobstructed passage from the Massachusetts to Buzzard's Bay, and so that European steamers can save from eight to ten hours each way across the Atlantic.

The commissions appointed by the Legislature of Massachusetts to inquire into the feasibility of building the canal have been so numerous during the last twenty years, that one member of the house wittily remarked that

the course of the canal could easily be traced by the train of broken champagne bottles and empty sardine boxes stretching from the shore of Buzzard's Bay to Sandwich Harbor.

Ten years ago the Cape Cod Ship Canal Company was incorporated with the following corporators: Alpheus Hardy, Thomas Russell, Henry H. Sturgis, Charles Allen, James Hay, Arthur G. Bradbury, William H. Jackson, Albert Steinberger, William R. Hynes, Rufus Ingalls and Charles A. Secor. The capital stock was fixed at ten millions of dollars, and by the terms of the charter the canal was to be completed within seven years. Owing to the depression of business nothing of importance was done since the passage of the act, and the Legislature at its last session incorporated another canal company who were to have the franchise and property of the old company unless four hundred thousand dollars of capital stock had been paid in and one hundred thousand dollars expended upon the canal before the first of November of the current year.

That the original company will comply with these conditions and speedily complete the canal, there is now no reasonable doubt. Work was actually begun on the morning of September 15th with 112 men and it is announced that 1500 laborers will soon be at work along the whole line.

As the completion of the Hoosac Tunnel ensured the construction of many railroad tunnels hitherto deemed impracticable, so Massachusetts again leads the van and by undertaking and carrying to a successful conclusion the Cape Cod Canal will render a great service to American commerce and hasten the establishment of other canals and other methods of inter-oceanic communication.

Canadian Pacific Railway Negotiations.

The reports which some of the daily papers have published concerning the arrangements for placing the bonds and stock of the Canadian Pacific Railway we find upon inquiry at authentic sources to be certainly premature. All that can be reliably said concerning the matter at present is that in connection with the plans for placing the bonds and stocks which are being discussed, a syndicate has been talked of that should include prominent financial houses in New York, London and Paris. Among the members of such a syndicate who have been mentioned as likely to be prominent participants is the firm of Morton, Rose & Co., who are the London house of Morton, Bliss & Co. of New York. Mr. Rose has special interests in Canada having formerly been the Canadian Minister of Finance. The Societe Generale is mentioned as the probable Paris member of the Syndicate. The organization has branches throughout France and in fact all over Europe and in both credit and influence is one of the strongest companies abroad. It was established in 1859, reorganized in 1870 and is said to have a capital of 60,000,000 francs. M. H. Duvviene is president and among the other officers are Felix Aubrey, J. De la Bouillerie, formerly French Minister of Agriculture; Victor Jacobs, formerly Belgian Minister of Finances; Baron Portail and Prince Saltykoff. Messrs. Morton, Bliss & Co, are well known as one of the strongest and most substantial American banking houses, having a capital of probably about $6,000,000, and through these parties and the above mentioned foreign organizations, with other houses that have been named in connection with the matter, a very powerful syndicate certainly is under discussion. President Stephen of the Bank of Montreal is among the leading financial men having control of the interests of the Canadian Pacific.

The matters relating to the contemplated syndicate for placing the bonds and stock can only be spoken of as being under consideration. The report that the arrangements were completed is erroneous. Several of the prominent personages connected with the important enterprise are now on the water on their way to Europe, and until after their arrival and the discussion of the matter abroad no arrangements of the kind can be completed, and it may be several weeks before the consummation of the negotiations can be announced.

Meeting of the General Passenger and Ticket Agents' Association.

The semi-annual meeting of the General Passenger and Ticket Agents' Association of the United States was held in this city this week, in the rooms of the National Railway Club, 46 Bond street. The rooms used on this occasion were those fitted up by the National Railway Publication Company, for the purpose of affording accommodations for railroad meetings of different kinds. They are very conveniently arranged and handsomely furnished, and supply a need which has been long felt here. Their fitness for the purpose was fully appreciated by the large number of prominent railway men who have been here this week. The Convention began its session Tuesday morning at eleven o'clock, with the President of the Association, Mr. W. B. Shattuc of the New York, Pennsylvania, and Ohio Railroad, in the chair. The total number of members of the Association is one hundred and forty-five, of whom one hundred and twelve were present Tuesday.

The minutes of the previous meeting were read and approved, after which the Committee on Rates went into session, the following roads being added to those appointed last year: Chicago, Milwaukee, and St. Paul, Cincinnati Southern, and the Virginia Midland. The committee composed of Land Grant Roads appointed at the last meeting to report upon a communication from the United States Quartermaster-General not being ready the time for the committee to make its report was extended to the next meeting, which it was unanimously decided should be held at St. Louis, on the third Tuesday of next March. Upon the opening of the afternoon session the chairman of the Committee on Rates reported differences existing between the Louisville and Nashville Railroad, and the Cincinnati Southern Railroad, each claiming to be the short line from New Orleans to Cincinnati, and having the right to fix the rate. In answer to the Chair, Mr. Atmore of the Louisville and Nashville Railroad stated that tickets were on sale via. Milan, and that trains ran in connection. The matter was referred to the General Committee, who after a short recess reported in favor of the Louisville and Nashville road.

Representatives of the Land Grant Roads in Kansas and Nebraska sent in a request by circular, asking for the purpose of correcting erroneous opinions that have arisen regarding the condition of crops in the States named, and to increase travel along their lines, that the Association favor an excursion at half colonist rates now in force for excursion tickets, to all of the land grant points named in the colonist rate sheet, the excursion to occur on November 9th, 1880. After a little discussion, the privilege was granted by the Association. The General Committee made very favorable mention in their report of the merits of J. A. Kingsbury's coupon baggage check, a ticket and check combined, but did not deem it a matter in which positive action by the Association was necessary, thinking any members desiring to use the ticket and check could do so independently of others, though they suggested a careful study of the merits of the invention.

The Committee on Rates were busy preparing their schedules throughout the day, and with a prospect of two or three good days' work ahead of them. The Convention went into session again on the following day, but we leave the report of the finishing up of its work until our next issue.

The meeting has been a very harmonious one thus far, though there has been much important business—with of course some conflicting interests to be attended to. The leading railroads of the country were represented, and most creditably, by men skilled in the important interests intrusted to them, and who knew exactly what they were here for, and just how to go to work to accomplish it. So with a good presiding officer there was little unnecessary delay in transacting the business, though much time was required in the details of the arduous work of adjusting the long schedule of rates with their manifold complications. The Secretary of the Association, Mr. Smith of the Cleveland, Columbus, Cincinnati, and Indianapolis Railroad, had much and important work devolving upon him, but it was very cleverly and expeditiously performed, much to the satisfaction of the Association and all brought in contact with him, including members of the press, who are indebted to him for facilities affordedthrough his courtesy.

The following is the present list of members of the Association. Those marked with a * were in attendance; those marked with a † have become members since last Convention.

*ABBOTT, JOHN N..New York, Lake Erie and Western.
*ALLEN, D. C.....South Carolina.
*AKGELL, JOSEPH.....Delaware & Hudson Canal Co.
*ATMORE, C. P.....Louisville & Nashville.

APPLEBY, C. T.....Illinois Midland.
*†ADY, GEORGE.....Denver, South Park & Pacific.
*†ARCHER, JOHN J.....Scioto Valley.
*†ANTHONY, W. M.....Boston, Barre & Gardner.
*BARKER, JAMES.....Wisconsin Central.
*BENNETT, E. J.....Little Rock & Fort Smith.
*BOYLSTON, S. C.....Savannah & Charleston.
*BROWN, J. D.....Missouri, Kansas & Texas.
*BUTTERFIELD, THEO.....Utica & Black River.
*BALDWIN, H. P.....Central of N. J.
BODINE, JOHN F.....Williamstown, N. J.
*BROWN, J. W.....Seaboard & Roanoke, and Bay Line Steamers.
*BALDWIN, WM. S.....Pittsburg, Titusville & Buffalo.
BROWN, JOHN W....Indiana, Bloomington & Western.
BOOTHBY, F. E.....Maine Central.
*BLOOD, H. B.....Keokuk & St. Louis Line Steamers.
BRONSON, H. M....Cincinnati, Sandusky & Cleveland.
*†BUELL, F. S.....Buffalo, New York & Philadelphia.
*†BYINGTON, E. B.....Lehigh Valley.
*CARPENTER, T. P.....Lake Superior Transit Co.
*CARPENTER, A. V. H..Chicago, Milwaukee & St. Paul.
CARY, J. W.....Lake Shore & Michigan Southern.
*CHANDLER, F.....Missouri Pacific.
CHARLTON, JAMES.....Chicago & Alton.
COLE, L. M.....Baltimore & Ohio.
CONE, C. S., Jr.....Ohio & Mississippi.
*CONNOR, GEO. L.....Old Colony Steamboat Co.
*CUMMINGS, S. W.....Fitchburg.
CHIPLEY, W. D.....Pensacola.
CLARKE, F. B.....Chicago, St. Paul & Minneapolis.
*CAREY, S. E.....Chicago, St. Louis & New Orleans.
*†CASE, MUNSON T.....Green Bay & Minnesota.
*†CARPENTER, W. A.....Detroit, Lansing & Northern.
*DADMUN, GEO. A...Philadelphia, Wilmington & Baltimore.
*DANIELS, GEO. H.....Wabash, St. Louis, & Pacific.
*DANLEY, W. L....Nashville, Chattanooga & St. Louis.
DAVANT, T. S.....Memphis and Charleston.
DAVANT, J. S.....Port Royal & Augusta.
DORSEY, E. B.....Georgia.
*DUNHAM, A. S.....Chicago & Eastern Illinois.
*DURFEE, W. M.....Providence & Worcester.
*DIXON, W. H.....St. Paul & Sioux City.
DAWES, A. C...Kansas City, St. Joseph & Council Bluffs.
*DERING, H. R..Jeffersonville, Madison & Indianapolis.
*†DAVIDSON, W. M.....Florida Central.
ETTINGER, M. L.....Chicago & Iowa.
*EGAN, JOHN..Cincinnati, Indianapolis, St. Louis & Chicago.
*ERNST, J. C.....Kentucky Central.
*EDGAR, WM.....Great Western.
*FARMER, L. P.....Pennsylvania.
*FILKINS, L. W.....Stonington Steamship Line.
*FLANDERS, D. J.....Boston & Maine.
*FORD, E. A.....Vandalia Line.
*†FIRTH, W. H.....Detroit, Grand Haven & Milwaukee.
*†FOYE, CHAS. H.....Portland & Ogdensburg.
*†FISHER, T. F.....Galveston, Houston & Henderson.
*GALLUP, E.....Boston & Albany.
GAULT, THOMAS D..Chicago, Pekin & South-western.
*†GABBETT, CECIL.....Western of Alabama.
HALL, J. MORTON.....Allegheny Valley.
*HAIR, B. S.....St. Paul & Duluth.
*HARRISON, W. H.....Columbus and Toledo, and Col. & Hocking Valley.
*HANCOCK, C. G.....Philadelphia and Reading.
*HEWITT, JOHN C.....Peoples' Line Steamers.
*HOUSTON, W. J.....Atlanta & Charlotte Air Line.
*HOWARD, CONWAY R.....Chesapeake & Ohio.
*HOLWILL, W. F....Delaware, Lackawanna & Western.
*HANSON, A. H.....Illinois Central.
*†HILLS, F. C.....Sioux City & Pacific.
*HEAKES, F.....Evansville & Terre Haute.
*JAY, M. S.....Memphis & Little Rock.
*JOHNSON, W. P.....Lake Shore & Michigan Southern.
*JOHNSON, A. H.....Arkansas Midland.
KIMBALL, THOMAS L.....Union Pacific.
*KNIGHT, RAY.....Selma, Rome & Dalton.
*KENDRICK, D. M.....Indianapolis & St. Louis.
*†KENDALL, A. C.....New York & New England.
*LYON, JAMES A.....Keokuk & Northern Line Packet Company.
*LEET, A. B.....Grand Rapids & Indiana.
LORD, C. K.....Baltimore & Ohio.
*LOWELL, PERCEVAL....Burlington & Missouri River (in Neb.).
*†LABELLE, J. B.....Quebec, Montreal, Ottawa & Occidental.
*MILLER, F. A.....Cairo & Vincennes.
MILLS, B. F....Burlington, Cedar Rapids & Northern.
*MORRISON, L. B.....Alabama Great Southern.
*MYERS, F. R.....Pennsylvania Company.
*McDONNELL, A. O...Atlantic, Gulf & West India Transit Company.
MASTERS, W. H.....Texas & New Orleans.
MULLEN, GEO. W..Fort Wayne, Muncie & Cincinnati.
*MACABE, C.....Peoria, Pekin & Jacksonville.
MORSE, F. E.....Hannibal & St. Joseph.
*†MORSE, F. W.....Montpelier & Wells River.
*†MORAN, M. R.....New London Northern.
*NOURSE, J. P.....Flint & Pere Marquette.
*O'BRIEN, W. L.....Pittsburg, Cincinnati & St. Louis.
*ORME, A. J.....Atlanta & West Point.
*†OGDEN, JAMES R...East Tennessee, Virginia & Georgia.
*PARKER, S. S.....Louisville, Cincinnati & Lexington.
*PEIRCE, T. W., JR.....Galveston, Harrisburg & San Antonio.
*POPE, A.....Wilmington & Weldon.
*POMEROY, F. L.....Boston, Hoosac Tunnel & Western.
*RUGGLES, O. W.....St. Louis, Iron Mountain & Southern.
*RAY, E. A.....New Haven & Northampton.
*ROCKWELL, CHAS. H...Indianapolis, Peru & Chicago.
RICHARDSON, LORING.....Ogdensburg & Lake Champlain.
*†RICHARDSON, JNO. B...Morgan's Louisiana & Texas R. R. & S. S. Company.
RICE, OWEN.....Cincinnati, Wabash & Michigan.
*ST. JOHN, E.....Chicago, Rock Island and Pacific.
*SANBORN, G. G.....Northern Pacific.
*SHATTUC, W. B.....New York, Pennsylvania & Ohio.
*SMITH, A. J....Cleveland, Columbus, Cincinnati & Indianapolis (Bee Line).
*SMITH, A. D.....Pittsburg & Lake Erie.
*SMITH, GEO. W.....Lake Erie & Western.

Mr. Hickson and the Grand Trunk Railway.

The publication of a new journal, The *Commercial Traveller*, was started this month at London, Ontario. It will be published monthly, and while being especially devoted to the community of Commercial Travellers, will at the same time be identified with general mercantile and railway interests. It starts at an opportune moment, when renewed activity in Canadian industries is so conspicuously apparent, and promises to be a sprightly and valuable feature of provincial journalism. From the first number we quote the following interesting sketch of Mr. HICKSON, the widely known railway manager, and facts concerning what he has done for the Grand Trunk Railway:

Mr. Hickson was born in England in 1830, and began his railroad life when a boy as an apprentice in the York, Newcastle and Berwick Railway. He afterwards became assistant to the General Manager of the Manchester, Sheffield and Lincolnshire Railway at Manchester, and while thus engaged attracted the attention of Sir Edward Watkin, then commissioner and afterwards President of the Grand Trunk Railway.

Mr. Hickson was appointed by him to the position of Chief Accountant of the Grand Trunk in December, 1861, and afterwards to that of Secretary and Treasurer. In the performance of the duties which this latter office entailed, Mr. Hickson found ample scope for that financial and administrative ability which has since met with such general recognition. For nearly twenty years it was his task to battle against what often appeared to be insuperable obstacles, but his skill, knowledge and energy were always in the end victorious, and he had the happiness of preserving the Grand Trunk to its original shareholders when so many lines were thrown into liquidation and the owners deprived of their property. In 1874 Mr. Hickson was promoted to the responsible position which he has since filled. The first service which he had to perform in his new capacity was to effect the change of gauge of the road east of Montreal, so as to complete its uniformity throughout with that of its connections, and to enable cars to go through without change of bulk.

Mr. Hickson's management has been highly successful. When he joined the Grand Trunk Railway in 1861 its traffic earnings were, for the year ending June 30, $3,476,773. In 1879, the revenue had increased to $8,476,566. In the former year the passengers carried were 722,086, and in the latter, 1,973 519. In 1861, the freight amounted to 695,266 tons, and in 1879 to 2,871,225 tons.

It is impossible to write of Mr. Hickson's administration without some mention of the Chicago extension, of which he is President, as well as of the Michigan Air Line. For years it had been agreed by all those who had given any thought to the subject that without this extension the Grand Trunk was so trammelled that it might be completely crippled by its rivals as to the business from Chicago and points beyond, besides having also to contend with the rival enterprises in Canada, some of which have been built by government aid. The financial question, however, loomed threateningly up whenever any attempt was made at a settlement of the difficulty, and it was in this connection that Mr. Hickson's practical experience and skill came to the rescue, and for him was reserved the solution of so important and urgent a problem. It was at this time he negotiated the sale to the Government of the Dominion of Canada of the unremunerative River du Loup Line for $1,500,000. What makes Mr. Hickson's administration so especially satisfactory is the contrast afforded by its results to the issue which had long been predicted by a large portion of the Canadian press and public, with whom it was a foregone conclusion that the Grand Trunk, like so many of its American confreres, must go sooner or later into liquidation. Under less efficient management the line assuredly would have shared the fate so abundantly foretold for it, but energy, economy and vigilance saved it from the ruin that has in recent years overtaken so many other railway properties, and won for Mr. Hickson a high reputation.

To the shareholders it must certainly be some consolation, after their long run of misfortune, to know that their finances are controlled and their road administered by a thoroughly honest master mind, whose victories over circumstances that would have daunted even men not wanting in skill or courage, constitute his claim to continued confidence, and whose past successes are a guarantee of a fair future yet in store for the Grand Trunk. The first effects of the opening of the Chicago connection which took place late in February, and while it was still so defective in equipment, will be an increase of over three-quarters of a million in the traffic for the portion of the half year, after taking into account the loss of the revenue for the 118 miles sold to the government last August. The payment of the dividend on the first, with good prospects for the second preference stock, will be thus assured, which is an event unprecedented in the history of the company.

☞ Notification of an important change in the railway policy of the Queensland Government has been made. Until recently the Government have followed the plan in force in the Australian colonies generally of borrowing money for the construction of lines. Now the Melbourne Argus says, they have determined to adopt the American land-grant system. During his recent visit to London, Mr. M'Ilwraith (the Premier) found that English capitalists were willing, and even eager, to make Queensland railways on these terms.

☞ The importations of this port last week amounted to $12,797,557, one of the heaviest weeks the port has ever known. The importations for the corresponding week of last year were $7,179,688.

Common Law.

RAILROADS.—CONTRACTS AGAINST PUBLIC POLICY.

In the case of the Western Union Telegraph Co. vs. Union Pacific R. R Co., decided on the 30th day of June, 1880, in the U. S. Circuit Court, District of Kansas, it was held that a provision in a contract between a telegraph company and a railroad company, to the effect that the telegraph company will transmit the family, private and social messages of the executive officers of the railroad company free, is against public policy, and immoral, and taints the entire contract, so that a court of equity will not enforce it, or grant any relief to a party claiming under it

The Court said: "The officials of a railway company are quasi public officers. Their duties are of a fiduciary character. They are in an important sense trustees. To pay them individually anything of value for executing a corporate contract, is grossly unlawful, and taints such contract with moral turpritude. Vast interests in which the public, as well as the immediate parties, are deeply concerned, are entrusted to the control and management of such officials; and in my judgment there are important considerations of public policy which demand that courts of justice shall hold them to a strict account, and shall never for a moment recognize as valid a contract obtained by paying, directly or indirectly to such officials any considerations, whether large or small.

THE FIRST NATIONAL BANK OF LOCK HAVEN VS. MASON.

M. kept an account in his own name in a National bank. The bank notified him not to draw any more against his account, as they proposed to hold it for the security of an indebtedness of T. & M., whose money the deposit they alleged really was. Held, that the bank had no right to claim as between themselves and their depositor that the deposit belonged to any one else except the depositor.

Error to Court of Common Pleas of Clinton county, Pa.

Opinion by Paxson, J. June 19, 1880.

It is well settled that money deposited in a bank to the credit of A, may be shown to be the property of B. It may be reached by attachment on the part of the judgment creditors of B., or its payment by the bank to A, may be stopped by a proper notice on the part of B that the money belonged to him.

But the bank, the depository, cannot set up an adverse title to defeat the suit of its own depositor. Having received it as the money of plaintiff, and given him credit therefor, the bank is estopped, in the absence of any notice from or claim by the real owner, from disputing plaintiff's title. Having received the money as the money of the plaintiff, they are bound to pay it to him or upon his order. Such a contract is implied from the fact of the deposit.

It is clearly against public policy to permit a bank that has received money from a depositor, credited him therewith upon its books, and thereby entered into an implied contract to honor his check, to allege that the money deposited belonged to some one else. This may be done by an attaching creditor, or by the true owner of the fund, but the bank is estopped by its own act. A departure from this rule might lead to novel results and embarrass commercial transactions.

Judgment affirmed.

RAISED BANK CHECKS.

A bank, upon whom a check is drawn, is bound, at its peril to know the handwriting of the drawer, and if it pays a check to which the signature of the drawer is forged, it must suffer loss as between itself and the drawer or an innocent holder to whom it has made payment. Nat. Park Bank vs. Ninth Nat. Bank of New York 46 N. Y. 77. But the responsibility of a bank, which pays a forged check, for the genuineness of the drawers signature is absolute only in favor of one who has not, by his own fault or negligence contributed to the success of the fraud or to mislead the bank. Ellis vs. Ohio Ins. Co., 4 Ohio St. Rep. 628; National Bank of North America vs. Bangs 106 Mass. 441.

There is no presumption that the bank is acquainted with the handwriting in the body of the check, inasmuch as checks are often filled up in the handwriting of persons other than the drawer and with which the bank, the drawee, is not presumed to be familiar, and may have no opportunity to become acquainted. Bank of Commerce vs. Union Bank 3 N. Y. If the rule were otherwise, a bank never could safely pay a check filled up in a handwriting that was new to it until it had first satisfied itself by inquiry from the drawer whether the check had been properly drawn. This would result in such delay and inconvenience as to greatly interfere with commercial transactions which are so largely carried on by means of checks. The rule is settled in most states that if a bank, in good faith and without negligence pay to an innocent holder a check, which has been fraudulently altered in amount, after it left the hands of a drawer it will ordinarily be entitled to recover back from the person, to whom it has been paid, the excess over the true amount of the check. Bank of Commerce vs. Banking Association of New York, 55 N. Y. 211.

But were the alteration be made in such a manner that on the face of the check there appears enough to excite a reasonable suspicion of fraud, or if the bank has information which would lead a prudent person to suspect that the bill had been altered, it would be doubtless the duty of the bank to decline payment until the doubt was removed. Redington vs. Woods 45 Cal. 406.

COMMON CARRIERS.

In Pennsylvania Co. v. Miller, 35 Ohio St. 541, it was held that: (1) The implied undertaking of a carrier to insure the safety of baggage does not extend to the contents of a trunk, consisting of samples of merchandise, which the passenger, a travelling salesman, carries to facilitate his business in making sales. (2) But the carrier by taking the property into his charge and putting it in his warehouse for safe-keeping, assumes the relation of it of an ordinary bailee, and he is bound to take such care of the property as a man of ordinary prudence would of his own, under like circumstances. Counsel cited in support of the first holding: "Macrow v. R. R. Co. L. R. 6 Q. B. 612; Railroad Co. v. Shepperd, 8 Exch. 30; Cahill v. Railroad Co., 13 C. B. 818; Wilson v. Railroad Co., 53 Me. 60; Weeks v. Railroad Co., 72 N. Y. 50; Railroad Co. v. Carrow, 73 Ill. 348; Alling v. Boston and Albany Railroad Co., 126 Mass. 121. In support of the second holding, counsel cited: Mich. S. and N. Ind. R. R. Co. v. Oehm, 56 Ill. 293; Camden and Amboy R. R. v. Baldauf, 16 Penn. St. 67; 2 Redf Am. Railway Cas. 267; 2 Smith and Bates' Am. Railway Cas. 357; Minter v. Pacific R. R. Co., 41 Mo. 503; Butler v. Hudson River R. R. Co., 3 E. D. Smith. 571; Hannibal R. R. Co. v. Swift, 12 Wall, 262; Dexter v. Syracuse, Binghamton and New York R. R. Co., 42 N. Y. 326; Phillips v. Earl, 8 Pick. 182.—Albany Law Journal.

Mexican Railroads

A dispatch dated Mexico, Sept. 10th, says that President Diaz has finally settled the propositions for railway connections, and then adds:

He will concede the road to the Pacific Coast to the Palmer party; the road to El Paso to the Symon party, and the road to Laredo, with a branch from San Luis Potosi to Tampico, to the Southern Pacific Railroad Company. This arrangement has caused much dissatisfaction among the various railroad interests. General Palmer wanted the road to El Paso for a connection with the Denver road. The Vera Cruz Railroad Company is greatly excited, because the Tampico branch will cut off half their business. The arrangement may still be changed. President Diaz has not yet signed the papers. The Vera Cruz Railroad Company has published the following report of the receipts of the road: 1876, $2,175,000; 1877, $2,700,000; 1878 $2 895,000; 1879, $3,256,000. The receipts for the first five months of 1880 were $1,512,000. The dollars are silver, worth about 88 cents each.

Notes from Boston.

—Work on Chelsea Bridge is being pushed forward with great energy, both on the Boston and the Chelsea sections. The Lynn and Boston Railroad are now using their tracks on the Boston section, and a few weeks will see the structure completed and open for general public travel.

—The Boston and Maine Railroad is to have a double track the entire distance from Portland to Boston.

—The Nantasket Beach Railroad Company has discontinued trains for the season. Before next season the road will be extended to Tudor's Point in Hull, and will also connect with the Old Colony Railroad at some point near Weir River. The steamboats will run to the beach until the 1st of October.

—The Water Power Company has completed the arrangements for the sale of all its remaining lands north of the Boston and Albany Railroad for $700,000. This will cancel one-quarter of the debt, leaving it about $2,100,000.

Counterfeit Note List.

HOW TO USE THE LIST.

All Paper Money in the United States is printed in sheets of four notes of one denomination on each sheet. Each bill bears a letter called the check letter, usually A, B, C or D, which appears on its upper left hand, and lower right hand corner. The notes are always numbered in their order on the sheets; thus all notes lettered A, will bear the number 1 or a number which divided by 4 will leave 1 remainder; the number accompanying B divided by 4 will leave 2 remainder, C, 3 remainder, D, no remainder. All genuine notes with letters A and C will have odd numbers and all with B and D even numbers.

The counterfeiter makes his plate commonly from one bill and rarely prints more than one of the four letters. As soon as a spurious bill is discovered measures are taken to redeem all good bills of that denomination, bearing the same letter. This leaves the counterfeit alone in the field.

All bills bearing the letters given in the following list should be refused by all non-experts.

We can assure our subscribers that there are no counterfeit bills on paper currency of the United States, which are known to the Secret Service Division at Washington at this date.

The National Bank notes printed in Italics are stolen and are worthless.

Banks starred do not exist, and the whole issue is fraudulent.

Personal.

—An organization to be known as the Brotherhood of Switchmen and Firemen has been organized at Indianapolis.

—Eugene H. Angamar, of New Orleans, has patented an improved apparatus for removing snow and ice from railroads and streets by heat.

—The next meeting of the Railroad Claim Agents' Association is to be held in Chicago on the second Wednesday in January, 1881.

—D. D. Robertson has been elected President, J. H. Wells Vice President, and R. McKeon Secretary of the Master Car Painters' Association.

—James C. Clarke, General Manager of the Chicago and New Orleans Railroad, who has recently been to Baltimore, has returned to New Orleans.

—W. W. Scranton, General Manager of the Lackawanna Iron and Coal Company, has resigned, and C. F. Mattes has been appointed to take charge of the works.

—B. F. Techenor has been appointed Chicago Agent of the Passenger Department of the Wabash, St. Louis and Pacific Railroad, with office at 85 South Clark Street.

—Sol. Haas has been appointed General Freight Agent, and A. Pope, General Passenger Agent, of the Seaboard Air Line, Piedmont Air Line and the Atlantic Coast Line.

—H. C Whiting has been appointed Superintendent of the San Francisco and North Pacific Railroad, vice A. A. Bean, resigned; appointment dating from September 1.

—N. K. Elliott has been appointed General Superintendent of the Vandalia Line, with office at St. Louis. Alonzo Robbins succeeds Mr. Elliott as Master of Transportation.

—The United States Court has authorized Louis Genis, Receiver of the Illinois Midland Railroad, to purchase four engines for the use of the road, not to exceed in price $10,000 each.

—Hugh J. Jewett, President of the New York, Lake Erie and Western Railroad, arrived in this city on the 20th inst. from Europe, in the steamship Baltic of the White Star Line.

—George M. Serpell has been appointed Master of Transportation of the Pittsburg Division of the Baltimore and Ohio Railroad. Mr. S. has been engineer and roadmaster of the Division for many years.

—H. F. Hawley has been appointed Assistant Superintendent of the Chicago Division of the Chicago and Alton Railroad, with headquarters at Bloomington, Ill. He will have charge of train-men and the distribution of cars.

—Mr. Fred Heakes, Genl. Passenger Agent of the Evansville and Terre Haute R. R, and Mr. T. W. Venneman, General Ticket Agent, of Evansville, Indiana, were among the western attendants at the National Railway Club rooms this week.

—Sheldon Fish, of Chicago, has been appointed by Judge Drummond Receiver of the Chicago and South Atlantic Railroad Company under a bond of $25,000. He is given the usual power to take possession, collect debts and generally take charge of the property.

—Manager G. Clinton Gardner and Treas. Austin Bond of the Troy and Greenfield Railroad drove from North Adams to Albany last week with Gen. Jas. H. Wilson of the New York and New England Railroad to examine into the feasibility of building a railroad from Albany to the Mass. State line.

—Several of the employes of the Pittsburg, Cincinnati and St. Louis Railway Company have formed an association, with William Mitchell as President, to assist each other financially. The principal object of the association is to protect the members from garnishee processes of collecting bills.

—Joseph P. Wiswall, of West Troy, and recently of the Metropolitan Elevated railway, New York, is superintendent of construction of the new Saratoga Lake railway, acting directly under the orders of President Burt. They have over 200 men at work on the excavations and forty teams. Two hundred more Italian laborers are daily expected.

—At a meeting of the Executive Committee of the Mexican Central Railroad in Boston, on the 15th inst., Rudolph Finke was unanimously chosen General Manager of the road. A telegram was read from the chief engineer, now in Mexico, stating that the Government had signed the contract and decree giving the right to build the road to El Paso and confirming the subsidy. An assessment of 10 per cent was ordered, payable October 7.

—At a meeting of the Railway Travelling Auditors' Association, held in Chicago on the 15th inst., the following officers were elected: M. S. Salisbury, of the Michigan Central, Detroit president; R. S. Lukenbill, of the Louisville and Nashville, Louisville, Ky., vice president; Robert Shaw, of the Flint and Pere Marquette, East Saginaw, Michigan, secretary, and W. M. Adams, Illinois Central, Chicago, treasurer. The object of the organization is comparison of methods and ideas, social intercourse, etc. The next meeting is to be held the second Wednesday in September, 1881.

The Belgian State Railway System.

At the close of 1878, out of a total length of 5,710 miles of rails (not track) in its roads, only 2,355 miles were of steel. The average number of miles run by a freight car on these roads in 1878 was 5,947; of a passenger car, 23,104 miles; of a locomotive, 19,000 miles. The average number of cars per express passenger train was 10.4; per ordinary passenger train, 9.8; per freight, 25. The average receipt per mile was $1.28; the expense, 77 cents; the profit, 51 cents. The average number of passengers per car was nine; per passenger train, 70.51—the latter much larger than the average in this country, which is not more than fifty. The average passenger journey was only twelve and a half miles, and 22.7 per cent of the seats were occupied on an average. The average actual load of loaded freight cars was 0.17 tons, of freight cars almost exactly 100 tons (99.96) of 2000 pounds, and the average distance freight was hauled was 43.7 miles. The average load was 42 per cent of the capacity of the freight cars. Of the passengers, less than 5 per cent were first-class, but they yielded 19⅓ per cent of the passenger earnings; 13 per cent were second-class, yielding 22¾ per cent of the earnings, and 82 per cent were third class, yielding 58 per cent of the earnings. The average receipt per passenger was only 15 cents; the average receipt per passenger per mile, 1.16 cent—the lowest in the world, probably, except on some of the East India railroads. Nearly 60 per cent of the whole passenger mileage is on round-trip tickets or at other reduced rates. The average receipt per passenger per mile for passengers travelling at full rates was 1.46 per cent, while about 7 per cent of the whole passenger mileage was made by passengers riding on various kinds of commutation tickets at the average rate of only 0.4 cent per mile, and travelling an average distance of eighty seven miles. The average rate per ton per mile was 1.4 cents, while the average in the State of New York the same year was 0.999 cent. The earnings of the State system per mile of road were $13,217, 12¾ per cent of which was from passengers and 8⅛ per cent from express, baggage, &c., carried on passenger trains. The expenses were 59.8 per cent of the receipts, leaving the net earnings $7,904 per mile. The State in 1878 worked 1,372 miles of road and the same year 919 miles in Belgium were worked by fifteen different companies, one of which has 280 miles and one 100 miles of road, but no other so much, and eleven had forty miles or less. The average gross receipts of these companies were $7,718 per mile (not three-fifths of the State railroads' receipts), the percentage of expenses 56¾ and the net earnings $3,350 per mile.

Petersburg Railroad.

In the suit of Atkins, Brothers & Co., William Burkhardt, J. Wilcox Brown, surviving trustee, and Thos. Branch, trustee, vs. the Petersburg Railroad Company et al., Judge Hughes, in the U. S. Circuit Court for the Eastern District of Virginia, on the 9th inst., entered a decree ordering the sale of the road to satisfy certain judgments obtained, the priority of which are specially set forth in the decree. The decree allows until January 17, 1881, for redemption by the company. The terms of the decree not being complied with, it is directed that the sale be advertised for sixty days, and that the purchaser shall deposit $10,000 as a pledge of good faith. After the sale the report thereof will be held thirty days for exceptions, after which time, if the sale is confirmed, the road will be turned over to the purchasers. The road extends from Petersburg, Virginia, to Weldon, N. C. It is currently reported that the company defendant may be ready, either at the October term of the court or the January term, to make such an exhibit of the condition and earnings of the road as to present a case for a suspension of the sale; but up to this time, no sufficient cause having been shown to prevent a sale, the decree has been entered as the merits of the case required.

☞ More than one third of the entire number of miles of railroad in the world last year was operated in the United States. The AMERICAN RAILROAD JOURNAL during its fifty years of railroad chronicling has seen the railroads of this country grow from less than one hundred miles into more than eighty-six thousand. The number of miles of railroad in the whole world in 1879 was 210,000. The number of locomotives in use was said to be 105,000 representing about 30,000,000 horse power.

☞ The forty-ninth annual exhibition of the American Institute is now in full and successful operation in this city. It was opened under the most favorable auspices, with one of the finest displays that has been presented for years. In the machinery department especially there are abundant evidences that it has been a stimulating year for inventive skill.

☞ The Chief of the Bureau of Statistics reports that the total values of the exports of domestic provisions and tallow from the United States during August, 1880, were $10,903,617, and during August, 1879, $8,173,174. For the eight months ended August 31, 1880, $92,875,046, and for the same period in 1879, $75,246,601.

Barrels Made from Pulp.

Barrels made of pulp are among the latest inventions, and, as described by the Detroit Tribune, they are likely to become an important article of commerce. The advantages claimed are lightness, durability and cheapness. The body of the barrel is all made in one piece from coarse wood pulp. The pressure to which it is subjected is 400 tons. The heads are made of one piece in the same way, and when put together the barrels are exceedingly light, strong and satisfactory every way. There are two kinds, one for fruit, flour and other dry substances, the other for oil, lard and liquids of all kinds. A flour barrel made in this way and filled can be dropped from a wagon to the pavement without injury. Fruit packed in these receptacles keeps longer than when put up in the usual way, being dryer and excluded from the air. The barrels for liquid substances are made by subjecting the first form to a simple process, and oil can be kept in them without any leakage. The saving in cost is about 50 per cent. Steps are being taken for the formation of a company to manufacture barrels, tubs, etc., by this new process.

☞ A dispatch from Oil City (Penn) on Saturday last says: "The Titusville and Oil City Railroad will be entirely completed this evening. This road extends from Oil city to Petroleum Centre, on the opposite side of the river from the Pittsburg, Titusville and Buffalo Railroad, and the construction expenses were so economically arranged that it cost but little over $40,000. Passenger business on the Titusville road for August was the heaviest ever known in the history of the company, amounting to $22 500. The gross earnings were about $56 000, or 40 per cent more than any month of 1879, and 50 per cent more than in August of that year."

☞ Articles of incorporation were filed in the office of the Secretary of State at Springfield, Ills., on the 14th inst., of the Charleston, Neoga and St. Louis Railroad Company, the corporators being Tracy Kingman, James A. Connolly, J. R. Cuningham, C. B. Buch, H. R. Keller and twenty-three others. It is proposed to construct a railroad from Charleston, Coles County, to Neoga, Cumberland County, through Shelby, Effingham, Fayette, Montgomery, Bond and Madison counties, to East St. Louis, the principal office to be at Neoga, and the capital stock to be $1,500,000.

☞ The National Association of Railway and Omnibus Transfer Lines was organized at Cleveland, Ohio, on the 15th inst., by the election of the following officers: President, Samuel Bailey, Jr., Cincinnati; Vice-Presidents, E. P. Fountaine, Louisville; C. W. Miller, Buffalo; F. B. Stevens, Cleveland; Treasurer, E. C. Davis, Milwaukee; Executive Committee, Frank Bird, Indianapolis; B. Angell, Ft. Wayne; T. W. Veneman, Evansville. The first annual meeting will be held at Cincinnati the third Tuesday in October.

☞ The stockholders of the Cleveland and Marietta Company have voted to authorize an issue of $1,000,000 bonds for the purpose of making necessary improvements on the road and for building an extension of twenty-four miles, from anal Dover to Canton, to connect with the Valley Railroad. This extension will complete a line nearly due north from Marietta, O., to Cleveland, 181 miles long, a large part of which is through valuable coal lands.

Star Postal Routes.

The Second Assistant Postmaster General is having prepared for distribution the advertizements for proposals for carrying the mails over star routes for four years from July 1, 1881, in New York, New Jersey, Delaware, Pennsylvania, Maryland, Virginia and West Virginia, and the New England States. The advertisements will be printed and ready for distribution Oct. 15. They will embrace proposals for 3,415 routes in the States mentioned below, and are distributed as follows: Maine, 280 routes; New-Hampshire, 130; Vermont, 150; Massachusetts, 164; Rhode Island, 22: Connecticut, 110; New York, 662; New Jersey, 114; Delaware, 28; Pennsylvania, 874; Maryland, 161; Virginia, 451; West Virginia, 266.

☞ The plans for opening the Harlem Ship Canal have been formed and as soon as the necessary purchases of lands have been made, which was authorized by the last legislature, the work will be commenced under the direction of the U. S. Government. The connection thus made between the Hudson and East rivers will be of great value to New York as a port, and will be of especial convenience to boats coming down the Hudson bound for the East river front, as it will save the trip down around the Battery, and will relieve that part of the bay from its frequent over-crowded condition.

☞ The very general adoption of first class chilled wheels for railroads in this country has proved very satisfactory, and the Austrian Northwest Railway publishes figures which go to prove the soundness of the practice. In last December, January and February, on that railroad, while only one chilled wheel failed, forty-eight tires burst, or one chilled wheel for every 4,806 wheels running, and one tire for every 156.4 wheels running.

☞ The production of steel rails in this country has more than trebled itself every three years since 1867. The product for that year amounted to 2,277 tons; in 1879 it reached 606,397 tons. The first ever made in this country were rolled at Chicago in 1865. There are now eleven mills in the United States where steel rails are made; five in Pennsylvania, three in Illinois, one in New York, one in Ohio and one in Missouri.

☞ The locomotive which went down at the Tay bridge disaster dragging so many victims with it, was brought up almost uninjured after it had been at the bottom of the Tay for about three months, was run on her own wheels to Glasgow just as she came from her long bath, had her toilet fixed a little and is now running regularly between Glasgow and Edinburgh.

☞ The plans of the Illinois Central Railroad Company for the Randolph street viaduct, Chicago, have been approved by the city authorities and work will at once be commenced.

☞ The Sioux City and Pacific Railroad Company has let 20 miles of additional grading west of Neligh, Neb,

American Railroad Journal.

Financial and Commercial Review.

THURSDAY EVENING, September 23, 1880.

Money on call is in abundant supply at 2@3 per cent. For thirty days money can be borrowed at 3 per cent, while for four to six months' loans the rates are 4@4½ per cent; these rates are on first class general Stock Exchange collateral; on United States bonds the rates are ½@1 per cent lower. Prime mercantile paper is 4½@5½ per cent. The posted rates for prime bankers' sterling are 4.82 and 4.84½. The actual rates are 4.81@¼ and 4.83½@4.84. Cables are 4.84@¼; and prime commercial bills 4.79½@4.80.

The Government bought on Wednesday $2,500,000 bonds, comprising $48,000 6s of 1880 at 102.54 and 102.60, and $2,452,000 5s at from 102.67 to 102.72. The First National Bank was the largest successful competitor, receiving the award of $1,876,000 5s at 102.72. No 6s of 1881 were accepted; they were offered at 104.72 to 104.81. The total offerings amounted to $6,324,700.

Among the securities admitted to dealings at the Stock exchange on the 23d inst was the American Union Telegraph Company, capital stock of $10,000,000, divided into shares of $100 each. "The lines of the company reach the most important towns and cities of the United States and Canada, and together with the lines covered by working contracts and leases, will form a system of 75,000 miles of wire, of which about 55,000 miles are now in operation, and the balance is being rapidly constructed. The company has an exclusive connection with the new French Atlantic ca-

bles. In addition to its lease of the lines of the Dominion Telegraph Company of Canada, 5,766 shares of the capital stock of that company are owned by the American Union Telegraph Company. The company also controls valuable patents that are essential to the rapid and efficient handling of its business." The lines of the company are or will be bonded for $5,000,000.

Claims have recently been made by certain holders of Board of Audit certificates of the District of Columbia that they are entitled to receive 6 per cent interest on the certificates from the date of issue to the date upon which they were converted into 3.65 bonds of the district. Treasurer Gilfillan, however, has decided to give the holders of the certificates 3.65 bonds bearing interest from the date of issuance of the Board of Audit certificates, but to allow no interest on the certificates. The decision has been sustained by Judge Lawrence, First Comptroller of the Treasury.

The closing quotations on Thursday were: Atlantic and Pacific Telegraph, 40@41; Canada Southern, 58½@59⅛; Central of New Jersey, 74@74⅛; Central Pacific, 71½@72¾; Chicago and Northwestern, 102⅝@102⅞; do. pref., 120@121; Chicago, Burlington and Quincy, 129@129½; Chicago and Alton, 113@115; do. pref, 125@130; Chicago, Milwaukee and St. Paul, 92¼@92⅜; do. pref., 112½@113; Chicago, Rock Island and Pacific, 116⅛@116⅞; Chicago, St. Louis and New Orleans, 87⅛@38; Cleveland, Columbus, Cincinnati and Indianapolis, 70½@71; Columbus, Chicago and Indiana Central, 17¼@17½; Delaware and Hudson Canal, 84¼@84½; Delaware, Lackawanna and Western, 90⅛@90¼; Hannibal and St. Joseph, 88@88½; do., pref., 81⅝@85⅞; Illinois Central, 112¼@112¾; Lake Erie and Western, 33½@33¾; Lake Shore and Michigan Southern, 106¾@106⅞; Louisville and Nashville, 150@151½; Morris and Essex, 110@110¾; Metropolitan Elevated, 91@95; Michigan Central, 94@94¼; New York Elevated, 110@111; New York Central and Hudson River, 129⅛@129½; New York, Lake Erie and Western, 38⅜@38½; do. pref., 69⅜@69½; New York, Ontario and Western, 23⅜@23½; Northern Pacific, 29@29¼; do. pref., 52¾@53; Ohio and Miss., 33⅛@33⅜; do. pref., 74½@76½; Pacific Mail, 38⅜@38¾; Philadelphia and Reading, 28@28¼; St. Louis and San Francisco, —@35; do. pref., 43¼@44; do. 1st pref., 74½@75½; St. Louis, Iron Mountain and Southern, 51⅛@51⅜; Union Pacific, 88¼@88¾; Western Union Telegraph, 98@98½; Wabash, St. Louis and Pacific, 35⅜@35½; do. pref., 65⅛@65¼.

New York Central and Hudson River R. R.

The earnings of this road for the month of August, 1880, compared with the month of August, 1879, were :

	1880.	1879.
From passengers....	$684,917 42	$611,482 81
" freight.....	1,953,160 38	1,610 524 32
" miscellaneous	384,776 74	324 071 69
Total....	$3,022,854 54	$2,546,028 82

—showing an increase in earnings for the month of $476,825 72, or 18.7 per cent.

For the eleven months ending August 31, the earnings were :

	1880.	1879.
From passengers..	$5,839,940 51	$5,313,032 17
" freight.....	20,428,876 02	16,459.466 66
" miscellaneo's	8,906,469 82	3,701,708 58
Total....	$30,175,286 35	$25,474,207 41

—showing an increase for the eleven months of $4,701,078 94, or 18 5 per cent.

☞ The middle division of the Illinois Central Railroad has been completed to a junction with the northern division at Woodford, Ill., about 22 miles due west from the recent terminus at Pontiac, and about 72 miles from the junction of the middle division with the Chicago division at Kankakee.

West Jersey Railroad.

The directors of the West Jersey Railroad Company have decided to lay a double track on the main line from Camden as far as Wenonah. The work will be put under contract at once, so that as much as possible of the grading may be done this year and settle during the winter. This will give the company eleven miles and a half of double track out of Camden beyond the reach of the local accommodation trains. The cost will be very nearly $150,000, probably, as the right of way is valuable ; but the business of the road warrants it. The new line has already earned the year's interest on its cost, although it has been in operation only three months, and the first fortnight's business was done at a loss. The Anglesea Branch extending four miles from Cape May Court-House will also be finished this fall and the track laid in the spring. The Five Mile Beach Improvement Company will give the West Jersey Company the right of way graded, and the company will then furnish the ties, lay the rails and run it as part of their road.

☞ The Greensburg, North Vernon and Rushville Railroad has been completed from Greensburg, Ind., south to Westport, 15 miles. North from Greensburg toward Rushville the line is being surveyed.

☞ The tracks of the Northern and Southern divisions of the Ohio Central Railroad were joined at Three Locusts, Marion County, on the 18th. The iron is now all laid between Fostoria and Bushes' Station in Fairfield county.

☞ Work has been commenced on the Pennsylvania Coal Company's new road from Hawley, on the Erie line, across Moosic mountain to Hawley and Pittston, and will be completed as rapidly as possible.

☞ The St. Louis and Southeastern Railroad is to be sold on the 17th of October by order of the U. S. Court, to satisfy judgments. The total debts are between twelve and thirteen millions of dollars.

☞ The Toledo, Burlington and Delphos Railroad, connecting Dayton and Versailles, a distance of fifty miles, was finished on the 18th inst. The road will be completed by November.

☞ The track of the Texas and Pacific Railway is now laid to a point in Stephens county 17 miles west of Dallas. Iron is being laid at the rate of one mile per day.

☞ The Government of Guatemala has signed a contract to continue the railroad just opened from the port of San Jose to Escuintla and to the capital.

☞ The Tonawanda Valley Railroad to run in connection with the New York, Lake Erie and Western Railroad south from Attica to Arcade was formerly opened for business on the 11th.

☞ Several cargoes of railroad material have arrived at Minatitlan for the Tehauntepec Company.

☞ The Richelieu and Ontario Navigation Company has declared anterm dividend of 2½ per cent, being one half per cent more than was paid last year.

Pennsylvania Railroad.

The statement of the business of all the lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for August, 1880, as compared with the same month in 1879, shows

An increase in gross earnings of.... .... $740,637
An increase in expenses of..... 443,155

An increase in net earnings of.... ..... $297,482

The eight months of 1880, as compared with the same period in 1879, show

An increase in gross earnings of..... .... $5,427,389
An increase in expenses of..... 2,578,463

An increase in net earnings of..... ..... $2,848,926

All lines west of Pittsburg and Erie for the eight months of 1880 show a surplus over liabilities of $1,879,249, being a gain over the same period in 1879 of $2,116,103.

☞ The earnings of the Midland Railroad of New Jersey from May 16th (the date of possession of the new company) to August 31st were $199,881 65 ; and the operating expenses, including terminal charges and leased lines, $184,039 39—leaving as net earnings the sum of $65,842 87. The company is laying 800 tons new steel rails and is putting on all its cars the Westinghouse automatic brakes. Forty new freight cars and two new locomotives have recently been added to its rolling stock. The bridge over the Erie at West End has just been rebuilt. Passenger cars as well as freight are now run to connect with the New York, Ontario and Western Railroad.

☞ The Atlantic and Southern Branch of the Chicago, Rock Island and Pacific Railway has been completed to Griswold, 14 miles south from main line. The Audubon Branch has been opened to Lorah.

☞ The Springfield, Jerseyville and East St. Louis Railroad Co. has been incorporated to build a road from Springfield to Jerseyville, to Grafton and East St. Louis. The principal office is to be at Jerseyville, Ills.

☞ The track is now being laid on the Second twenty mile section of the Detroit, Mackinac and Marquette Railroad. Seventy-five miles will be completed by the close of the year.

☞ Holders of the scrip of the Pennsylvania Railroad Company issued in May last are reminded that the privilege of converting it into stock will cease October 1, 1880.

☞ A contract has been executed for the construction of the Fernandina and Jacksonville railroad, in Florida, the road to be ready for trains by December 15.

☞ The Post Office department has ordered service on the Nevada Central Railroad, instead of star service, to commence on the 1st of October.

☞ The work of grading for a double track on the Michigan Central Railroad between Jackson and Leoni will be completed this fall.

☞ A very important line of railroad is now approaching completion in Russia, connecting the Caspian Sea and the Caucasus with Moscow.

Richmond and Southwestern Railroad.

A correspondent of the Baltimore Sun, writing from Buckingham Court-house, Va., under date September 15, says:

The Richmond and Southwestern railroad, a work projected to run from Gloucester Point, on the York river, through Richmond and various Southside and southwestern counties of the State to Kentucky, is attracting much attention in this section of country. It is understood to be chiefly a project of Boston capitalists, so that that city may have an independent through line with steamers connecting to Boston from deep water on the York river. Among the counties through which the road will pass are Powhatan, Chesterfield, Cumberland, Buckingham and Appomattox, to Lynchburg, and thence southwest. Several of the counties named are noted for their varied mineral resources, including iron, copper, coal, etc., and there is a fine timber region in this country which will be made available by the construction of the road. The counties through which the road is to pass are required to make moderate subscriptions to the stock, not payable, however, in most instances, until the line is constructed within the county making the subscription. The subscription assigned to Buckingham is $60,000, and all such subscriptions have to be authorized by a popular vote. In June last a vote was taken in this county, but as it was necessary that a majority of the actual registered vote should be cast in its favor, it was found then that, though a large preponerance of the voters endorsed the measure, yet the measure failed. To-day the measure was again submitted to the people, and the anxiety to have the road induced a large turnout of the voters. The result was 1,647 votes for the subscription and 77 only against it. This insures the requisite legal majority, as the entire registered vote in the county is about 2 700. There had been at one time some impression among the people that the road would be constructed by its outside projectors without the local subscriptions, but on specific official statements reaching the county to the contrary, the situation was at once realized and the work of carrying the subscription spiritedly entered upon. As indicating the practical thoroughness of those who have the enterprise in hand, they have sent not only surveyors, but geologists and mineralogists from the north to explore the whole region and report minutely upon the peculiar characteristics as to minerals, forests &c., of each county, as well as the agricultural products and resources. This will constitute the sixth through line from West to East, and is said to lessen the distance from points in the West and Southwest which it is to reach some four hundred miles in the travel and transportation to Boston.

Mineral Statistics of the United Kingdom.

Mr. Robert Hunt, F. R. S., Keeper of Mining Records, has issued the Mineral Statistics of Great Britain and Ireland for the past year. A statement of the increase or decrease of coal carried by railway, canal, or sea in 1879, as compared with 1878, shows that there was last year an increase of coal, coke, and patent fuel carried by railways, canal, and shipped to foreign ports of the United Kingdom, of 6,344,049 tons. A return of the mineral produce of the kingdom, made to the Mining Record office, for 1879 shows the following in tons: Iron ore, 14,379,735; tin ore, 14,665; copper ore, 51,032; lead ore, 66.877; zinc ore, 22,199; iron pyrites, 20,275; silver ore, 27; and sundry minerals, including shales, gypsum, calc, spar, coprolites, phosphates, &c., 525,950. The total value of minerals produced last year was £56,733,967. A table showing the production of coal in the United Kingdom, according to the Mining Record office returns, is given for each year from 1854 to 1879, and according to the returns of the Inspectors of Coal mines from 1864 to last year. From this it appears that on the whole the output of coal has been increasing. In 1864, according to the Inspectors of Coal mines the production was 95,122,919 tons, while the Mining Record office returns give it as 92,787,878 tons. In 1879 the former returns gave the productions as 133,720,393 tons, and the latter as 134,008,288 tons, both returns showing that as a rule the output of coal has been on the increase during the past 15 years.

Commerce of New York.

The foreign imports at New York for the month of August, 1880, are officially stated as follows:

	1879.	1880.
Entered for consump'n.	$14,758,455	$20,804,135
Do. for warehousing....	5,518,414	8,688,329
Free goods	8,336,815	9,939,602
Specie and bullion....	6,553,083	9 492,580
Total entered at port..	$35,166 717	$48,924,596
Withdrawn fr.wareh'use	6,590,423	10,044,739

The foreign imports at New York for eight months from January 1, were:

	1879.	1880.
Entered for consump'n	$100,930.452	$164,803,772
Do. for warehousing..	48,884,380	86,149,379
Free goods....	57,723,106	82,755,641
Specie and bullion	12,717,810	14,660,362
Total entered at port..	$220,255,748	$348,369,154
Withdrawn fr. wareh'se	42,588,395	57,779,686

The duties received at New York for the eight months ending with August, were:

	1879.	1880.
January	$7,655,552 67	$11,960,677 78
February	8,229,362 06	12,254,602 24
March...	9,320,695 68	14,469,557 65
April	8,184,797 88	11,901,071 43
May	7,577,233 93	9,752,773 54
June	7,198,779 44	10,699,840 52
July	9,329,895 17	13,360,394 37
August	10,562,138 82	14,492,361 87
Total....	$68,068,955 65	$98,891,279 40

The exports from New York to foreign ports in the month of August, were:

	1879.	1880.
Domestic produce.	$30,898,205	$35,937,898
Foreign free goods.	39 544	113,355
Do. dutiable.	225,207	398,094
Specie and bullion.....	457,544	400,029
Total exports	$31,620,500	$36,849,376
Do. exclusive of specie .	31,162,956	36,449,347

The exports from New York to foreign ports for eight months from January 1, were:

	1879.	1880.
Domestic produce	$214,050,745	$265 802,248
Foreign free goods...	1,560,652	1,774,108
Do. dutiable.	3,072,664	3,C86 700
Specie and bullion	12,476,318	5,580,011
Total exports....	$231,160.379	$276,193,062
Do. exclusive of specie	218,684,061	270,613,051

Schuylkill Nav. Co.

The lease of the Schuylkill Navigation property to the Philadelphia and Reading Railroad Company is dated July 12, 1870, is for 999 years, and provides for the quarterly payment of an annual sum sufficient to pay full interest on all the indebtedness of the lessor company and dividends of 1½ per cent on the preferred and ¾ per cent on the common stock. The original rental was $655,000 per annum, which has, under terms of the lease, been somewhat reduced by the reduction of some of the indebtedness of the Navigation Company. In addition to the obligations of the lease, the Philadelphia and Reading Railroad Company directly guarantees the principal and interest of four of the loans of the Navigation Company, and guarantees the interest of two others, but there is no guarantee by the Railroad Company of any dividend to the shareholders of the Navigation Company beyond the covenant in the lease to pay a fixed rental, which is sufficient, if paid, to enable the Navigation Company to declare the dividends above named. Referring to the above, the Philadelphia Ledger says:

As the canal has for many years entailed a loss to the Reading Railroad Company, we should presume that the present receivers (who have already furnished the means to pay the interest upon the first and second mortgage debts) would ask for some reduction of rental, which would necessarily be borne by the later bondholders and the shareholders.

The Coal Trade.

The leading coal carrying companies make the following reports of their tonnage for the week ending September 11, and for the year to the same date, compared with their respective amounts carried to the same time last year:

	Week.	1880.	1879.
Reading Railroad ...	203,822	5,120,098	6,061,807
Schuylkill Canal....	21,609	802,428	657,935
Lehigh Valley..... ..	110,975	3,344,806	3,205,516
Del.,Lack. & Western.	100 804	2,275,399	2,551,433
Shamokin Valley	21,555	567,229	630,192
Central New Jersey..	115,610	2,367,733	2,679,361
United R. R. of New Jersey	83,459	747,921	596,382
Pennsylvania Coal ..	37,484	707,842	973,557
Delaware and Hudson	83,818	1,972,755	2,804,948
Huntingdon & Broad Top Mt.....	9,334	307,619	224,863
Penn. and New York.	24,007	833,590	913,893
Clearfield, Pa..... ..	44,891	1,104,904	1,062,811

The total tonnage of anthracite coal from all the regions for the week ending Sept. 11, as reported by the several carrying companies, amounted to 596,473 tons, against 516,192 tons in the corresponding week last year, an increase of 80,281 tons. The total amount of anthracite mined for the year is 14,973,509 tons, against 17,593,237 tons for the same period last year, a decrease of 2,619,827 tons. The quantity of bituminous coal sent to market for the week amounted to 101,686 tons, against 48,093 tons in corresponding week last year, an increase of 53,593 tons. The total amount of bituminous mined for the year is 2,959,617 tons against 2,475,752 tons for the corresponding period last year, an increase of 483,865 tons. The total tonnage all kinds of coal for the week is 898,159 tons, against 564,285 tons in corresponding week last year, an increase of 133,874 tons, and the total tonnage for the coal year is 17,933,026 tons against 20,068,989 tons to same date last year, a decrease of 2,135,963 tons. The quantity of coal and coke carried over the Pennsylvania Railroad for the first week of September was 145,791 tons, of which 111,523 tons were coal and 34,268 tons coke. The total tonnage for the year thus far has been 4,750,272 tons of which 3,575,553 tons were coal and 1,174,719 tons coke. These figures embrace all the coal and coke carried over the road east and west. The shipments of bituminous coal from the mines of the Cumberland coal region during the week ended Sept. 11 were 46,064 tons, and for the year to that date 1,462,585 tons—343,104 tons over the corresponding period of last year. The coal was carried as follows: Baltimore and Ohio Railroad—week 18,229 tons, year 894,458 tons,-an increase over 1879, 252,874 tons. Chesapeake and Ohio Canal—week, 20,895 tons; year 399,944 tons; increase over 1879, 46 647 tons. Pennsylvania Railroad—week 6,940 tons; year, 158,183 tons; increase over 1879, 43,582 tons.—Phil. Ledger, Sept. 20.

☞ The Chicago, Milwaukee and St. Paul Railway Co. has taken formal possession of the Chicago, Clinton, Dubuque and Minnesota Railroad, and the Wisconsin Valley Railroad, recent acquisitions. The former runs from Clinton, Ia., to La Crescent, Minn., and is 420 miles long, and

the latter runs from Toma, Wis., to Jenney, Wis., and is 108 miles long.

Philadelphia and Reading Coal and Iron Company's Bonds.

The receivers of the Philadelphia and Reading Railroad Company, guarantors of the divisional coal land mortgage bonds of the Philadelphia and Reading Coal and Iron Company, give notice that they will purchase the overdue July, August and September interest and coupons of the bonds described below, at the rate specified, it being understood and agreed to on the part of the receivers that the principal of all of the bonds and all after-accruing interest thereon shall retain priority of lien over the coupons and interest so purchased.

On the following tracts interest will be paid in full :

	Amount outstanding.	Interest due.	Int. to be paid.
Munson & Williams	$1,840,000	$16,900	$46,900
Big Mountain Improvement Co...	111,000	3,885	3,885

On the following tracts interest will be reduced to 6 per cent.:

Eagle Hill, Ravensdale Dilcamp and West Flowery Field	$254,000	$8,890	$7,620
Lee Land and Oak Hill	524,000	18,340	15,720
Brady, Gray and Wetherill	229,000	8,015	6,870

Interest on the following tracts will be reduced to 5 per cent.:

St. Clair	$285,000	$9,975	$7,125
Glentworth	209,000	7,315	5,225
Locust Mountain Summit Imp. Co.	265,000	9,275	6,625
Mt. Carmel, Locust M. Coal Co	376,000	13,160	9,400
McNeal	179,000	6,265	4,475
Hartman & Myer	13,000	255	325

On the following tracts interest will be reduced to 4 per cent.:

Catharine Groh	$400,000	$14,000	$8,000
Tamaqua	1,640,940	57,400	32,800
Minersville estate	136,000	4,760	2,720
Diamond	26,000	910	520
Coal Hill estate	69,000	2,415	1,380
Gunkle and Branham	165,000	5,775	3,300
Valley Furnace estate	1,295,000	42,325	25,900
Total	$7,516,000	$263,060	$188,790
Difference in Int.	$74,270		

No arrangement appears to have been made for the Putnam county, N. Y., iron ore lands tract of $345,000, interest of which was passed on June 1.

It is further announced that as the receivers are not yet prepared to enter into any permanent agreement with the holders of the bonds above mentioned, they propose the above plan without requiring or proposing at present the surrender of any rights on the part of the bondholders, beyond the overdue coupon or interest.

The Trade of Savannah.

The annual trade review of the Savannah News shows that Savannah received last year 728,455 bales of cotton during the year just closed. The total value of all domestic exports amounted to $24,320,691, and the total imports to $523,051. The total tonnage of the port during the year was 1,228,254. The trade in fertilizers amounted to 119,583 tons, against 85,059 tons of the preceding year. The sales of meat and lard aggregated 25,000,000 pounds, valued at $2,000,000. There has been a remarkable increase in every branch of trade, and "Savannah has held her own as one of the first cotton ports on the South Atlantic coast."

Wealth, Debt and Taxation of Ohio.

The following is an abstract of the statement of the "wealth, debt and taxation" of the State of Ohio, issued by the census officers. The figures are for the fiscal year ended September 1, 1879 :

County debt, bonded and floating, $2,962,648 14 ; city debt, bonded and floating, $38,571,388 66 ; town, village and township debt, bonded and floating, $1,668,934 43 ; bonded school debt, $1,451,197 32 ; total local debt, $44,654,168 55.

Besides this local debt there is a funded State debt consisting of loans amounting to $6 476,805 30, and an irredeemable State debt of trust funds amounting to $4,289,718 52, making a grand total of State indebtedness of all kinds amounting to $65,420,692 37. In the amount of local debts no deduction has been made of the 'cash on hand to pay debt' reported from a number of counties and cities. The amount of 'cash on hand' to September 1, 1879, was $3,186,722 71.

By the census of 1870 the county debt of the State, bonded and floating, was $4,237,543, and the town city and other debts, $8,272,367, or a total of $12,509,910, against $44,654,168 55 local indebtedness in 1880. This increase in local in debtedness has been chiefly in the large cities. The capitation tax for 1880 is $25,735,969, against $23,526,548 in 1879. An increase of $2,209,421, which really represents only the interest on the increased debt. Of course, national taxes are not included in the above amount.

The total assessed valuation of the State is $1,547,746,600, against $1,167,731,697 in 1870, $959,867,101 in 1860, $483,872,682 in 1850 and $126,000,000 in 1841. The assessed valuation of Hamilton County is $207,324,069 ; of Cuyahoga, $88,492,680 ; of Franklin, $50 772,639 ; of Montgomery, $44,392,870 ; of Lucas, $32,593,425, and of Butler, $33,119,243.

Wisconsin Central Railroad.

The branch of the Wisconsin Central Railroad extending from Abbottaford to Chippewa Falls is fast approaching completion, and hopes are entertained that regular trains will be running next month. Arrangements have been made to run through trains from Manitowoc to St. Paul and Minneapolis. A line of boats to ply on Lake Michigan between Ludington and Manitowoc, connecting on the east shore with the Flint and Pere Marquette Railroad, and on the west with the Milwaukee, Lake Shore and Western Railroad will be put on as soon as possible. This will form the great short line from East to West, and will run in connection with the Grand Trunk system. The roads comprising it in Wisconsin will be the Lake Shore road from Manitowoc to Appleton, the Wisconsin Central from Appleton to Chippewa Falls, the Chippewa Falls and Western from Chippewa Falls to Eau Claire, and the West Wisconsin from Eau Claire to St. Paul and Minneapolis. The boats from Ludington to Manitowoc will be operated by the Wisconsin Central. It is intended to make this route the popular freight route from West to East, and as it is much the shortest it will certainly receive its share of patronage. Parlor and sleeping cars will be run from Manitowoc to St. Paul and Minneapolis, and passengers will not be obliged to change for the whole distance.

☞ A quarterly dividend of Two and a half per cent will be paid on the capital stock of the Metropolitan Elevated Railway Company, at the office of the Central Trust Company, on the 1st of October.

☞ A writer in the Davenport (Iowa) Democrat tells how in 1856 he was shown the first sleeping car by its inventor, Mr. Woodruff, at Toledo. Mr. Woodruff had, during several years past, been obliged to accompany his wife, a chronic invalid, from Ohio to Philadelphia for medical treatment, and her sufferings on the journey had constantly suggested the possibility of a more comfortable conveyance, that at last he had conceived the idea—undoubtedly borrowed largely from recollections of the sleeping accommodations on canal packets before the advent of railroads—of portable and adjustable berths, and, buying an old car, he had worked out his idea, and had only an hour previous, brought it in for a trial trip which was to be made that same night.

☞ The proof that petroleum sources are almost world-wide seems to be abundant. In one of the Ionian Islands there is a spring which has yielded petroleum more than two thousand years. The wells of Armenia, on the banks of the Zaro, were formerly used for lighting the city of Genoa. In Persia, too, near the Caspian Sea at Baku, numerous springs of petroleum have been known from the earliest times ; and those of Rangoon, on the Irawaddy, are said to have yielded, before the general introduction of petroleum among civilized nations, some 400,000 hogsheads of oil per annum.

☞ The Port Huron and Southwestern Narrow Gauge Railway has been completed from Minder, Mich., to Sand Beach, a distance of 14¼ miles, making a total of 70 miles of main line. Work on the Marietta branch is progressing rapidly, the 32 miles being nearly half graded. It is expected the entire work will be completed and in running order by January 1, 1881. The company has just received a large addition to its rolling stock from the Ohio Falls Car Co.

☞ Suit has been entered in the United States Circuit Court at Nashville, for John B. Manning, of New York, against the State Treasurer and Controller of Tennessee to recover $5 000 interest on funded bonds of that State. If Manning obtains a decision in his favor suits will be entered by other holders of Tennessee bonds, none of whom have received interest for several years.

☞ The railroad to the mouth of Vesuvius is 800 metres long and terminates 2 00 metres from the mouth of the crater. The inclines are 4 in 10 for the first 135 metres ; 63 in 100 for the next 330 metres ; then 56 52 and 48 in the 100 for the remainder. The carriages are drawn by a steel rope of 49 strands, coated with tar to protect from rust.

☞ The lighting of the harbor of Montreal by electricity has been tested and with most satisfactory results as would seem from the report of the harbormasters. The method was adopted early in July after a trial of seven weeks and since then has been in constant use.

☞ Track laying on the George's Creek and Cumberland railroad has been completed to a point nearly opposite Ocean Station, Cumberland and Pennsylvania railroad.

☞ The Bradford, Bordell and Kinzua Railroad is to be completed to Smethport.

METROPOLITAN ELEVATED RAILWAY COMPANY, No. 71 BROADWAY, NEW YORK, Sept. 16, 1880.

THE QUARTERLY DIVIDEND OF (2½) TWO and a Half per Cent. upon the capital stock of this company will be paid on and after the 1st day of October next, at the office of the Central Trust Company, to the Stockholders of record on the 20th inst.

The transfer books will be closed on the 20th inst., at 3 o'clock P. M., and reopened on the 2d of October next. By order. JOHN E. BODY, Treasurer.

FRANCIS & LOUTREL,

NO. 45 MAIDEN LANE,

Stationers, Printers, and Manufacturers of Patent Spring-Back Account Books,

All kinds of first-class Stationery, Writing Paper, Desk Portfolios, Scrap-Books, Expense-Books, Diaries, Pocket Cutlery, Cards, Chessmen, Wallets, etc., etc.

We keep everything in our line and sell at lowest prices. Orders solicited. CYRUS H. LOUTREL.

ENVELOPES.

To Railroad Companies and City Street Railways.

The subscribers are largely in the Envelope Manufacturing business, making every kind used by Railroads, including the cheap Manila paper. Also the little street car Envelopes for change or tickets. All well made and sold at low prices. Samples furnished when requested.

This Establishment commenced building STREET CARS in 1832, and is famed for superior ELEGANCE of workmanship and SUBSTANTIAL practical results.

Its location, in the PORT of NEW YORK, is most favorable for shipments, and its CARS, CONSTRUCTED in SECTIONS, may be ENTIRELY COMPLETED before being packed for transportation.

VALENTINES

OUR CLAIMS.

We claim that our Finishing Varnishes are unsurpassed in the following qualities:

1. Uniformity. 3. Fluency. 5. Drying. 7. Fulness. 9. Durability.
2. Paleness. 4. Reliability. 6. Hardening. 8. Brilliancy. 10. Economy.

All know it is easy to make a Varnish that has the single quality of DURABILITY, but Varnishes which wear well are generally inferior in color and working quality, uncertain in laying, too slow in drying, or lacking in body or lustre, and frequently they possess ALL these defects.

In our "RAILWAY-COACH FINISHING" the ten qualities will be found combined, and our other Varnishes are as elastic and durable as is practicable for the work on which they are employed.

Those of our Varnishes which have the greatest durability require time for hardening. They have superior elasticity, and ARE DISTINGUISHED FOR THE EXTENT OF SURFACE THEY WILL COVER, WHICH RENDERS THEM ECONOMICAL.

VALENTINE & COMPANY,

Chicago. NEW YORK. Paris.

Patent Stretched and Patent Riveted Short Lap

BELTING.

Our Belts are made from pure Oak Tanned Butts, and of the heart or solid part only. No part of the shoulder being used. Any one not familiar with Belt making can readily detect this by the shortness of the lengths and laps. Long laps are made including the shoulder or thinner and softer part of the Leather, causing the Belt to be, in its enduring qualities, no better than its poorest or thinner parts

Our Belting is warranted to run straight and maintain an even bearing on the pulleys, and sold under the fullest Guarantee.

J. B. HOYT,
D. R. FAYERWEATHER,
HARVEY S. LADEW.

LEATHER BELTING.

Made exclusively from Messrs. J. B. Hoyt & Co.'s Best Oak Butts—shoulders all cut off, only solid leather used—short lengths and short laps—fully warranted.

Rubber Belting and Hose and Packing at lowest prices.

STEPHEN BALLARD & CO.,

The Decline of American Shipping.

A few years ago, American shipping was supreme in American commerce. In 1851, $316,000,000 of our exports and imports were carried by vessels belonging to this country and built upon its shores, against $117,000,000 carried under foreign flags. American ships then secured the most valuable freights and received better pay for their services than foreign vessels. To-day American ships actually carry less than they did in 1851, while ocean commerce has more than doubled. In 1877, American ships carried $315,000,000 of our imports and exports, while foreign ships carried $858,000,000, over seven times as much as in 1851. In 1879, American vessels carried about $400,000,000 of our commerce, while nearly if not quite $1,000,000,000 of the aggregate value was carried under foreign flags, over eight times as much as in 1851.

The decline in our carrying trade is absolute as well as relative. If we look at the aggregate of our foreign trade for the calendar year of 1878, we find that it was $1,224,600,000; in 1879 it was $1,397,780,000. For the fiscal year it was $1,131,917,000 in 1878, and $1,156,217,000 in 1879; the difference between the aggregates for calendar and fiscal years shows that the second half of each of these calendar years had a heavier trade than the first half—that is, it corresponds to the well-known fact that trade has been on an increasing scale for several years. In the calendar year 1879 the volume of trade increased about 14 per cent over that of 1878, yet the returns from the Customs service show that American shipping has not profited directly by this growth of trade. In 1879, 33,394 vessels, of 17,300,000 total tonnage, entered our ports in foreign trade; in 1878, 31,553 entered, of 15,808,196 tonnage. Clearances in 1879 were 32,812 in number, and 17,093,707 in tonnage; in 1878, 31,532 in number, and 15,795,772 in tonnage.

How does this increase effect American shipping? In the entrances for 1879 American vessels were 27.30 per cent of the total number, and 19.37 per cent of the total tonnage; in 1878, 32.40 per cent of the number, and 23.05 of the tonnage. Of the clearances in 1879, 27.16 per cent of the number and 19.62 of tonnage were American; in 1878, 32.58 of number and 23.58 of tonnage. This remarkable diminution, as expressed by ratios, could be partially attributed to the faster growth of the English carrying trade than our own, but the changes in the two cases are in opposite directions. In 1879, 9,093 American vessels, of 3,350,853 tonnage, entered; in 1878, 10,208, of 3,641,883 tons. In 1879, 8,909 vessels cleared, of 3,354,439 tonnage; in 1878, 10,267 in number and 3,702,913 in tonnage. There was thus not merely a relative decline in our share of the carrying trade, but actually an absolute decline in the amount of that trade performed by American vessels, both in number of entrances and clearances, and in their aggregate tonnage.

In other words our increasing export cargoes go out for the most part in foreign ships, and, as our foreign trade grows, we not only let strangers take all the yearly increase, but give them every year a share of the small fraction we have left.

Looking at the matter from another point of view we find on good authority that the situation to-day is as follows:

	American.	Foreign.
Number of sailing ships engaged in the whole foreign trade of the United States, Canadian commerce excepted	1,346	6,286
Number of steamships similarly engaged	61	592
Total	1,407	6,878

The comparison is even less favorable than it appears from the above table, as more than 600 of the American sailing vessels are schooners and brigs plying to the West Indies or other near-by foreign ports, while the foreign ships are mostly of a large class; and of the American steamers only a dozen or fifteen are navigating the great oceans.

If we examine into the nationality of vessels now loading in the four principal American ports for foreign countries, we have the following result:

Nationality.	Number.	Nationality.	Number.
Norwegian	33	French	3
German	30	Italian	6
British	31	Spanish	1
Austrian	6	Danish	1
Swedish	3		
American	8	Total	122

But the disparity is still more startling. If the larger proportion of our commerce consisted in the importation of articles of foreign growth and manufacture, it would not be strange to find foreign ships enjoying the larger share of the business. The ships of other countries would naturally have the preference in their own ports for the exportation of goods to the United States. The significant fact is, that the larger proportion of the goods go from our own shores. No other nation in the world gives to commerce so many tons of merchandise, which have to be carried long distances, as the United States. The record of the Custom Houses shows that of the 17,000 ships which enter and clear at our ocean ports every year, 4,600 enter port empty and only 2,000 sail from port without a cargo. More than eight hundred vessels are constantly lying at the piers in New York Harbor, or at anchor in the bay, taking in or discharging car-

goes. There are one hundred departures a week for foreign ports, but it frequently happens that two weeks elapse without a single ship bearing the American flag clearing for England with which the largest commerce of New York is transacted.

With the decay of our foreign carrying trade there has been a corresponding decay of our shipbuilding. When our marine was most prosperous, in 1857, $25,000,000 was expended annually in the construction of new vessels, and a much larger sum for the repair of old ones. The amount spent annually to-day is but $11,000,000, and the amount expended for repairs is reduced in the same proportion. With twice the tonnage employed in our foreign trade, shipbuilding has fallen off one-half in twenty years. This is the situation that the National Convention of ship-owners which assembles at Boston on the sixth of October, will discuss.

It is to be hoped that there will be a large attendance at the Convention, and that this matter of such national importance shall be so carefully examined and candidly treated that measures of relief may be agreed upon which all will join in advocating.

Desiring to obtain opinion from authoritative sources the JOURNAL wrote to several prominent ship-builders, ship-owners and economists asking them to state very briefly what they deemed to be the best means of restoring the prosperity of American Navigation. Many were obliged to decline the invitation on account of business engagements and other reasons, although the replies received show an universal interest in the subject. The following letters, expressing many shades of opinion, we print without comment:

"PROTECTED TO DEATH."

BOSTON, Sept. 9th, 1880.

MY DEAR SIR:—Referring to your favor of 8th inst., in which you ask me for my views as to "the true means of restoring the prosperity of American navigation," I would reply that to me those means seem very obvious. We have "protected" our shipping to death. I would withdraw the protection and give the poor thing a chance. The temporary and experimental recourse to a few of the rude elementary principles of free trade at this juncture would seem to me not wholly unworthy of serious consideration.

I remain &c., C. F. ADAMS, JR.

PRACTICAL ADVICE FROM EX-MAYOR LINCOLN.

BOSTON, Sept. 21st, 1880.

MY DEAR SIR:—I have received your note of the 17th inst. soliciting my views upon the subject of the restoration of our mercantile marine. It is evident that to maintain our commerce in competition with the fleets of other nations, we must be placed upon an equal footing as regards original cost and expense of maintaining vessels at sea. To do this we require as favorable legislation as other nations enjoy. For instance, it is necessary to abolish the entire system of three months, extra wages to seamen and amend the laws relating to shipment and discharge of seamen. Our present laws are unjust, oppressive and ruinous to shipowners. Our consuls should be selected by reason of their fitness for the position. At present, it is too often the case that the consuls endeavor to plunder and rob the shipowners whenever opportunity offers. From their action there is no appeal. All materials entering into the construction of ships should be admitted free of duty, and all supplies taken on board vessels bound for foreign ports to be consumed at sea should be free of duty.

As vessels sailing under the flag of the United States are protected by the government and require no service from local authorities, such property should be exempt from State, City, or town taxation. A tax of 30 cents per ton on the registered tonnage is paid by the vessel to the government once a year provided she enters a port of the United States during that year. There is no reason why there should be any local tax upon property dependent upon protection wholly upon the Government of the United States.

Finally, a change in our navigation laws, so as to permit a citizen of the United States to purchase a vessel of foreign construction and then place her under the flag of his country. Such vessel to be excluded from the coastwise and inland trade and permitted to engage only in the foreign trade. It may be desirable to include the West Indies with the coastwise trade.

The people of this country are opposed to subsidies, and the only remedies, in my opinion, that can be applied to arrest the destruction of our marine are those above suggested.

Very truly yours,

WM. H. LINCOLN.

"COMPLICATED AND OUTRAGEOUS TAXES"

WILLIAMS COLLEGE, Sept. 24, 1880.

MY DEAR SIR:—Nothing ails American shipping, in my judgment, but the complicated and outrageous taxes to which it is subjected. If the entire tariff of the United States could be abolished to-morrow, Navigation Law and all, a prosperous shipbuilding would begin on the New England coast in two weeks, notwithstanding the very large sums that would go to buying foreign built ships in one week. We never shall have a prosperous domestic shipping until our citizens have the liberty of buying foreign-built ships freely, if they prefer them; and certainly not, until the accursed taxes on every buttock, mast, spar, rail and board,—on canvas for sails, and bunting for flags and signals,—on copper for sheathing, and iron for anchors and spikes, and steel for ship-machinery,—are utterly repealed. Our people have been deluded by interested and selfish and wicked men into believing that taxes are a spur to industry somehow or other, that restrictions of every name and nature conduce to prosperity, and that, if only a long-suffering people can be made to bear burdens enough long enough, somehow or other shipbuilding and other dead industries will come to life.

Why should committees of Congress hear and heed the men who have axes to grind, and substantially no others? Why should John Roach, begging for a subsidy, have ten times the weight in counsel of an equally intelligent citizen, who has no ax to grind?

We have tried everything under Heaven in the way of Prohibition, suppose for once we try the magic of Liberty! Yours very kindly,

A. L. PERRY.

PROFESSOR SUMNER'S TWO CASES.

NEW HAVEN, Sept. 10, 1880.

DEAR SIR:—What I have to say about the revival of American Ocean Commerce can be put into a very brief paragraph.

I know of no reliance for the development of any industrial enterprise save the industry and energy of men. Government can do nothing to develop industry. It can do much to obstruct and hinder it. Organization amongst those who are striving for the end in question will do much, but organization is sure to come whenever a body of able and energetic men are working toward the same end and have common interests. I expect that the industry, energy and perseverance of men are the only forces which develop industry.

There can be no question whatever that there are plenty of men in this country of the requisite energy to develop any industry which promises a profit. American commerce has declined because it does not pay save under special and very limited circumstances. Two possible cases must be kept in mind:

1. It may be that as things now stand, the conditions of building or sailing ships are such here that those industries cannot be carried on in the United States to pay as good a profit as agriculture or other industries which employ all the labor and capital in the country. If that is the case it is not possible or desirable to revive American Commerce.

2. It may be that the carrying trade could be carried on in this country so as to pay the wages and profits obtainable in other industries here, yet that it does not pay now because hampered and destroyed by legislative interference which has been imposed under ignorant and mistaken prejudices.

So long as the legislative interferences exist no one can tell which of these cases is the one which is a fact. Hence the plain and simple thing to do is to remove all the interferences. If the carying trade will then pay, American citizens can be trusted to begin it and carry it on. If it will not then pay, there is no more to be done. In either case the problem is solved. Yours respectfully,

W. G. SUMNER.

AN EXTREME FREE TRADE OPINION.

CHICAGO, Sept. 16, 1880.

DEAR SIR:—Iron ships having now superseded wooden ones, I can think of no ways of restoring American Navigation, except by some kind of strong protective, or subsidy, legislation.

Of these two ways, subsidy to American ships seems to me most effective, and in every way preferable. As a consitent free trader however, both of these resorts seem to me foolish and unjust, and naturally enough I have not thought out the details of systems which did not appear to have anything to recommend them.

In short I can see no reason why we should wish to engage in an industry in which our natural advantages are no greater than they are in the foreign carrying trade and in ship building.

The reason we can't compete appears to me to be simply because our people are unwilling to in-

vest and labor for as small a return as some less favored countries, and, instead of regretting this unwillingness, I hold it to be a matter for special congratulation.

I should be very sorry to see the rate of profit and the rate of wages reduced so low in this country that it will be for the interest of my countrymen to go into a kind of employment when the natural advantages are no greater than they are in these branches.

Believing in the fundamental principle that no man has a right to support in a particular business, I say that the shipping class ought, instead of taxing other classes for their benefit, to turn to those kinds of work in which other nations cannot beat us. Let the people get their goods transported by whoever will do it cheapest. This principle fully carried out insures for us the greatest reward for our labor and sacrifice.

The government does not need to subsidize ships as a war measure, for naval warfare is now carried on by iron-clads, and for them no greater number of experienced sailors are required than our navy could afford. Yours truly,

EDWARD F. SWEET.

A WORD FROM HON. "SUNSET" COX.

NEW YORK, Sept. 12th, 1880.

DEAR SIR:—If you will be pleased to examine the "Globe" of the Congress after 1870, you will find some sedate talks of mine as to the revival of our commerce and shipbuilding. Commerce and shipbuilding are not the same, as of course you know, but if our navigation laws will not let us buy ships abroad nor our tariff allow us to build them at home; or that tariff allow us to buy them abroad for importati n hither under any scale of duties, where are we? When this is answered you have the solution of the consequences of our fatal policies. With respect, &c,. S. S. Cox.

SENATOR BLAINE'S VIEWS.

We make the follwoing extract from a letter written by Senator Blaine, June 17, 1879, to several members of the Chamber of Commerce of New York:

"If I possessed the power to prescribe a policy for the renewal of the American trade, I would make it very simple and very specific. I would continue the navigation laws as part of the very organic law of the land. For wooden sailing ships no further aid is needed than these laws afford, if we will only seek in every way to lighten the burden of taxation on vessels. We can build wooden vessels better than any other country and we can build them as cheaply, but after they are launched and in trade they should not be worried and burdened with every form of taxation, port charge, and quarantine exaction at home; and maltreated and oppressed, as they too often are, by our consuls at foreign ports.

But if we content ourselves with sailing vessels, we surrender the larger half of the world's commerce without a struggle. We must have iron steamships besides, and, with the start that other nations enjoy to-day, we shall never compete with them unless we use the same aids and the same instrumentalities that have built their steam fleets. And that aid I would give. And to give it effectively and wisely I would abandon all idea of granting subsidy to special lines as they apply to Congress for aid. That policy, however just and meritorious, will always be rendered abortive by prejudice, by jealousy, and by scandal, either actual or imputed. I would prefer a general law that should ignore idividuals and enforce a policy. For instance, enact that any man or company of men who will build in an American yard, with American material by American mechanics, a steamship of three thousand tons and sail her from any port of the United States to any foreign port, he or they shall receive for a monthly line a mail allowance of $25 per mile per annum, for the sailing distance between the two ports; for a semi-monthly line, $45 per mile; for a weekly line $75 per mile. Should the steamers exceed three thousand tons, a small advance on these rates might be allowed; if less than three thousand, a corresponding reduction; keeping three thousand tons as the average and the standard. Provide that the steamships shall be thoroughly inspected by a competent commission under the direction of the Secretary of the Treasury, the Secretary of the Navy, and the Postmaster-General, and thus insure the very first class of construction for safety and for speed both for passenger and for cargo. * * * * If the price I have named seems large for mail-pay, I beg to suggest that our Post-Office Department, without cavil or question, is paying a larger sum per mile for weekly, fortnightly, and monthly mails within our own territory—mails that carry fewer letters than these steamers would carry; mails that carry with them none of the incidental advantages which form the chief value of the steam lines under discussion."

Reliability of American Investments.

America has so long held a position in the first rank as a field of investment for foreign and domestic capital, that any strengthening of that position does not make the marked impression that it would were its footing and prestige less firmly established, or less universally accepted. There have been but few and short periods during the last quarter of a century when confidence in the best known American enterprises and plans for investments has been shaken. Such confidence was never more fully warranted than at the present time.

When American railways were being rushed over an undeveloped country with a dizzy rapidity; when railway schemes with bewildering and but partially understood features were being hastily made; when plans for manipulating their securities were prepared with a view extending only to the immediate demands of the constructors, and placed in the hands of the negotiators most easily obtainable, and when our country and its resources were so poorly understood by ourselves; at a time when so little could be foretold as to what sections were destined to grow into centers and channels of traffic and to prove desirable fields for the spreading of the wonderful network of railways, that within fifty years has grown to the magnitude of comprising one-third of all the railroading of the world, the wonder would seem to be only that so few of these enterprises have proved unworthy of the attention and confidence that have been given them by investors. Some of the first started are the strongest in financial worth to-day. The most doubtful projects and those which have faded away with the capital of their encouragers were mainly those which were rushed into notice during the flush times of speculative fever, and were generally such as receiving but slight recognition at home sought their support from foreign markets made over-eager for American investments by scents of oil wells opened and paper glimpses of mine prospecting.

A few years of financial depression have had the good effect of weeding out most unmercifully many unreliable American railway enterprises and placing the others where they can be more easily read, and their weak and strong points more decidedly marked out. Many weak lines whose chief misfortune was being managed by incompetent men have been merged into strong organizations and not only have been braced up, but have been firmly established by skillful managers and renewed activity in the sections which they traverse. The railways being projected now have little of the old time hap and hazard and hasty action in their origin; and will have far less crudeness and wild cat policy in their management. The time has gone by when political reasons or favoritism or the popularity of a name without other consideration places an inexperienced or untrustworthy man as the head of important departments in our railway system. To-day the recognized all important matter to be first considered in the starting of an American railway project is, will men of undoubted character and responsibility examine it and sanction it and give it their approval by identifying themselves with it, and can the right men for managers be obtained. Never before in this or any other country was this fact so strongly apparent and this feature so conspicuously a vital element of projecting and organization as now; as can be seen by looking over the lists of incorporators and officers of any of our prominent railway enterprises recently brought before the public. The railway managers of the United States are the envy of railway corporations throughout the world. Hard working, studious, enterprising men, skilled by trying experience and not weakened in planning capacity or hampered in execution by Government nourishment or supervision, they represent one of the finest types of the trained business man that can be produced. And such men know how to draw around them the assistants most needed to work for the furtherance of the great interests entrusted to them. This noticeable care in the selection of railway officers exhibited now, the class of men who are negotiating the best American securities, and the wonderful increase here of railway traffic, immigration and general business give to American securities a solidity and reliability that establishes them more strongly than ever in the front rank of fields for investment.

Meeting of the General Passenger and Ticket Agents Association.

The meeting of the General Passenger Agents and Ticket Association at the rooms of the National Railway Club closed on Thursday of last week. In addition to that given in our detailed report last week of Thursday's proceedings, the following business was transacted. In regard to a letter from Mr. B. Clark of Washington, Pa. asking if the association could discuss the propriety of having all the railroads of the United States run on the same time which could be some mean-time and be known as the "Railroad Time of the United States," the General Committee reported that they considered it a matter for action of the general managers and not in the province of the association. The idea is one that if carried out would prove of great service to the travelling public and convenience to railroad men, and it will doubtless receive the consideration it deserves by the managers. Mr. James S. Davant, of the Port Royal and Augusta Railroad was appointed a member of the executive committee to fill the vacancy occasioned by Mr. Macrunide retiring in consequence of a change in the administration of one of the Southern roads.

Mr. C. A. Taylor of the Richmond, Fredericksburg and Potomac Railroad offered the following resolution, which was adopted unanimously:

Whereas, Since the last meeting of this Association, Mr. J. M. Broadus, General Ticket Agent of the Washington City, Virginia Midland and Great Southern Railroad, has been removed from our midst by death; Therefore, be it

Resolved, That in the death of Mr. Broadus this association lo es a valued and trusted member, and that, in token of the regard and esteem in which this worthy gentleman was held by his associates, this resolution be spread upon the minutes, and a copy of the same be forwarded to the family of the deceased by the Secretary.

The By-Laws were so amended as to cause the election of officers in the order of business at future meetings to come immediately after the miscellaneous business. It was decided by a vote of sixteen to eleven that on and after November 1st, 1880, the excess baggage rate for one hundred pounds between all competing points shall be ten per cent of the regular first-class unlimited rate. Considerable discussion was had as to whether the rate for corpses should be one first-class "unlimited" or "limited" rate, also as to whether the corpses of those under twelve years should be carried at half of the agreed rate.

Several close votes were taken on resolutions and amendments on these questions, which finally left the rates unchanged. With the two following resolutions adopted unanimously the association adjourned to meet at St. Louis next March.

Resolved, That this Convention authorize its Secretary to examine the rates as made by the Rate Committee, and to publish the same as the rates of this Association to take effect November 1, 1880.

Resolved, That the thanks of this Association be tendered to the gentlemen who have charge of these rooms, for the very pleasant manner in which they have afforded us an opportunity of meeting here.

To the full list of members of the association given in our last issue the name of Jas. L. Taylor of the Savannah, Florida and Western Railroad should be added.

Common Law.

PHILADELPHIA AND READING R. CO. V. ANDERSON.

Where, for a consideration, a railroad company undertakes to transport a passenger from one point of its line to another, there arises an implied contract upon the part of the company that it has, for that purpose, provided a safe and sufficient road, and that its cars are sound and roadworthy; where the passenger is injured by any accident arising from a collision or defect in machinery, he is required, in the first place, to prove no more than the fact of the accident and the extent of his injury; a prima facie case is thus made out and the onus is cast upon the carrier to disprove negligence. In the present case the legal presumption was that the injuries to the plaintiff were caused by the negligence of the defendant, and that this presumption continued until a countervailing presumption of fact was established; this presumption might have been overthrown by proof to the satisfaction of the jury that the injury complained of resulted from inevitable accident, or from something against which no human prudence or foresight could provide.

In Laing v. Colder, 8 Barr, 479, Mr. Justice Bell says, when speaking of the responsibility of passenger carriers: "But though in legal contemplation they do not warrant the absolute safety of passengers, they are yet bound to the exercise of the utmost diligence and care. The slightest neglect against which human prudence and foresight may guard, and by which hurt or loss is occasioned, will render them liable to answer in damages. Nay, the mere happening of an injurious accident arises, prima facie, a presumption of neglect, and throws upon the carrier the onus of showing it did not exist. This punctilious attention to the safety of the passenger embraces the duty of providing strong and sufficient carriages or other conveyances for the journey, in every respect sea, road and river worthy, safe and steady horses, or other means of progressing, and skillful drivers, conductors or other agents, whose duty is to use every precaution against danger." This language is certainly very strong, full and to the point, and Sullivan v. The Railroad Company is but an iteration of it. Both these cases are cited by Mr. Justice Agnew in Meir v. The Railroad Co., 14 P. F. S. 225, and their language reiterated. Furthermore, in the case of the Delaware, Lackawanna and Western Railroad Co., 7 W. N. C. 233, Mr. Justice Sterrett makes use of the following language: "If a passenger seated in a railroad car is injured in a collision, or by the overthrow of a car, the breaking of a wheel, axle or other part of the machinery, he is not required to do more in the first instance than to prove the fact and show the nature and extent of the injury. A prima facie case of negligence is thus made out, and the onus is cast upon the carrier to disprove negligence."

In the case of the Mansfield Coal and Coke Co. v. McEnery, 87 Legal Int., 28, in which it was held to be a sufficient answer to an action brought by an employee for an injury resulting from the falling of a bridge of the company by which he was employed, that such bridge had been built by a competent builder. But this doctrine can have no application to the case in hand, and for the very good reason that a passenger is not an employee. The one by his contract is presumed to run the ordinary risks of the machinery and appliances he is engaged to supervise or use; he is also held to a knowledge of the character and obvious defects of such machinery and appliances, as well as the skill and habits of his co-servants; a passenger, on the other hand, neither can know, nor is presumed to know, anything about these things. He has paid for his passage, and he is wholly passive in the hands, and at the mercy, of the transportation company and its agents. The doctrine advocated by the defendant's counsel, by which the passenger would be put on a par with an employee, will not do; it accords with neither reason nor precedent. The cases of Grote v. The Chester and Hollyhead Railroad Co. 2 Exc'q, 251, and Francis v. Cockrell, L. R. 5 Q. B. 184, and full in point. In the former the action was by a passenger against a railroad company for damages resulting from the breaking down of a bridge whilst the train was passing over it, and it was held, that whilst it was a question for the jury whether the defendant had engaged a competent engineer, who had adopted the best method and used the best materials in the construction of the bridge, yet the mere fact of its having engaged such persons would not relieve it from the consequences of an accident arising from a deficiency in the work. In the latter the action was for damages resulting to the plaintiff from the breaking down of a grand stand, erected for the viewing of certain races, and which had been built by a competent person, and leased to the defendant, he, the defendant, having received a compensation from the plaintiff for admission to the stand. It was held that the plaintiff could sustain an action against the defendant for the damage thus sustained, although the defendant was himself free from all negligence, and had employed a competent person to erect the stand.

Supreme Court of Pa. opinion by Gordon J. —[Legal Intelligencer.

Dispatches from Tucson, Arizona, state that the Southern Pacific road is open for traffic to San Simon, 125 miles east of Tucson and 1,105 miles east of San Francisco. The track is laid 15 miles further east into New Mexico and progressing very fast. All the hard work at the Continental divide is out of the way. Two hundred miles of track have been laid this year, and the Chief of Construction is confident that he will lay 100 miles more by Jan. 1, which will bring them to the Rio Grande at Mesilla. Surveys are being continued on down the Rio Grande on a low grade line to some port in Western Texas.

Direct rail communication with Philadelphia from the Shenandoah Valley has been effected by the recent completion of the northern half of the Shenandoah Valley Railroad, which is now in operation from Hagerstown, Md., to Milford, Va. By means of this connection the agricultural wealth of the famous Shenandoah Valley is made for the first time tributary to Philadelphia, whose markets are also opened to the thriving population along the 76 miles of the Shenandoah Valley Railroad now operated and the total 143 miles which will be completed and in operation by December 1.

Personal.

—Colonel Thomas A. Scott has returned to Philadelphia from the White Sulphur Springs, much improved in health.

—The Boston Mining and Stock Exchange, of which W. A. Simmons is President, was formerly opened on the 27th ult.

—George R. Blanchard, assistant president of the Erie railroad, sailed for Europe on Saturday to take a two months' vacation.

—N. R. Elliott has been appointed General Superintendent of the Vandalia line, with headquarters in St. Louis.

—Sir John A. Macdonald, Sir A. F. Galt and Hon. J. H. Pope arrived at Rimouski, P. Q., on the 25th ult. on the steamer Sardinian.

—Capt. E. H. Ruffner, engineer corps has been ordered to take charge of the improvements of the Kanawha river.

—The contract for building the reservoir at West Chester, Pa., has been awarded to Thomas H. Reagan, Philadelphia. $11,207 98.

—The next meeting of the National Association of General Passenger and Ticket Agents will be held at St. Louis on the third Tuesday in March, 1881.

—A. B. Underhill has been appointed Superintendent of Motive Power of the Boston and Albany Railroad, with headquarters at Springfield, Mass.

—S. J. Darrin, Geo. R. Sheldon, W. H. Bingham and J. O. Baldwin have been admitted to membership in the New York Stock Exchange.

—J. F. Stone, of the New York Stock Exchange, and C. M. Cumming, formerly with Drexel, Morgan & Co., have formed a copartnership for the transaction of a general stock brokerage business.

—Gen. A. L. Jones, of Mount Vernon, Ohio, has been appointed Receiver of the Cleveland, Mount Vernon and Delaware Railroad Company by Judge Tibbals, on motion of the Holland bondholders.

—General Williamson, Commissioner of the General Land Office, has called a convocation of the Surveyor Generals of the Western States and Territories in Salt Lake City, Utah, on the 5th of October, to discuss the present methods of making surveys with a view to instituting certain reforms.

—A. S. Cassidy, of Newburg; C. M. Wolcott, of Fishkill, and Jacob B. Carpenter, of Dutchess county, have been appointed Commissioners to appraise the land damages in the construction of the New York and New England Railroad through Putnam and Dutchess Counties, and they will meet at Brewsters, Oct. 12. The work on the new road is advancing rapidly.

Trial of Steam Fire Engines.

A competitive trial of steam fire engines was had at Hagerstown, Md., on the 22d ult. by the La France Manufacturing Company, of Elmira, N. Y., and the Silsby Manufacturing Company, of Seneca Falls, N. Y. There were five tests: first, time of getting of steam: second, height and distance through 200 feet of hose 1¼ inch nozzle; third, through 1000 feet of hose, 1⅛ inch nozzle; fourth, two streams, 250 feet hose, inch nozzles: fifth, 500 feet hose, 1⅛ inch nozzle; steam pressure during test not to exceed 100 pounds. While the La France generated steam quicker than the Silsby and threw water first to the 100 and 150-foot stakes, the Silsby threw the first water to the 200 feet stake and continued to throw a solid stream to a greater distance than that thrown by its competitor. Upon the trial of throwing perpendicularly and also horizontally through 1000 feet of hose, the Silsby was by long odds the victor.

Articles of incorporation have been filed of the Missouri, Arkansas and Southern Railway Company of Arkansas, the purpose being to construct a railroad from Fayetteville to Fort Smith, Ark. The incorporators are Charles W. Rogers, of St. Louis; John O'Day, of Springfield; Gen. A. Purdy, of Peirce City; A. M. Wilson, B. R. Davidson, and J. H. Vanboose, of Fayetteville, Ark., and J. Holcomb, of Springfield, Ark. The charter is for 99 years. The capital stock will be $1,650,000, to be used in construction and purchasing of right of way, and is divided into 16,500 shares of the par value of $100 each. The road is to connect with the St. Louis, Arkansas and Texas Railroad of Arkansas, the St. Louis, Arkansas and Texas of Missouri and the St. Louis and San Francisco of Missouri. The incorporators have been chosen directors until others shall be elected.

The Governor of Maryland has signed the contract agreeing to the sale of the State's interest in the Annapolis and Elkridge Railroad to the Drum Point Railroad Company. Augustus Albert, president of the Drum Point Railroad, and Wm. H. Biana president of the Annapolis and Elkridge Railroad, were present. Mr. Frank H. Stockett represented the Drum Point Railroad as its attorney, and Mr. John Ireland the State. The contract provides for the sale of the State's interest when the Drum Point road is built from Drum Point to Baltimore, and upon payment of $50,000 to the State, provided the road is built in three years; otherwise the contract is null and void.

The Chicago, Milwaukee and St. Paul Railway is graded 48 miles west from Mitchell, D. T., and about eight miles of the track laid. The graders are expected to reach the Missouri river before the track layers can overtake them. The road will strike the river at the mouth of American Creek, nearly opposite the Lower Brule Agency. This company has filed articles of incorporation in Nebraska for the construction of a road through Knox, Antelope, Holt, and an unorganized county west of Holt.

There is said to be a great drawback to the value of the railway concessions lately made by the Mexican Government in the fact that the Government only agrees to pay $400,000 yearly to the Palmer-Sullivan Company and $600,000 to the Symon-Boston Company, without reference to the amount of work done. This will affect the sale of the bonds of both companies. The people want railroads and do not care who builds them.

In a recent speech at Duncanville, Ontario, Hon. John O'Connor, Postmaster General, referred in a general way to the scheme of constructing the Canadian Pacific Railway by a company of capitalists, and stated that the year 1890 was the time limit for the completion of the undertaking.

According to official report, the indebtedness of the Republic of Guatamala on July 31st of this year amounted to $1,218,408 85.

Philadelphia Stock Exchange.
